3 Lawmakers turn up heat on EPA

Signs of foregone decision to ban Pebble emerge; subpoena seeks evidence

12 Bornite tops 6B pounds copper

NovaCopper expands Ambler deposits; AIDEA at road permitting trailhead

14 New nuclear may jolt uranium price

Nunavut set to reap benefits of reactor restarts, construction and tighter supply

Drilling Carlin-style gold discovered at Atac Resources' Rackla Gold project, situated between the Peel Watershed and contiguous road system in central Yukon Territory. Mining executives ranked Alaska and Canada's North among the richest jurisdictions on Earth in terms of pure mineral potential in the Fraser Institute's Survey of Mining Companies 2013. Land disputes, environmental policy and lack of infrastructure in northern jurisdictions, however, concern the survey respondents. Page 10.
