# ABR Inc., celebrating 40 years of triple bottom line business philosophy

*Economic viability, environmental stewardship and social responsibility are company's highest priorities*

*Q. What is the official name of your company?*

A. ABR, Inc.—Environmental Research & Services

*Q. Is your firm a subsidiary or affiliate of other companies?*

A. ABR is an independent S Corp.

*Q. What do you most want people to know about your company?*

A. ABR is a homegrown Alaskan company with a proven 40-year track record serving the oil industry in Alaska, including work throughout the North Slope and offshore in the Chukchi and Beaufort seas, Cook Inlet, and Prince William Sound/Gulf of Alaska (EVOS). We have extensive institutional knowledge of the history of oil development in Alaska, the regulations and regulators who oversee oil development, and the stakeholders who participate in or are affected by development decisions. Perhaps most importantly, our scientists have outstanding expertise and experience studying Alaska's fish and wildlife resources and the landscapes and habitats that support them.

*Q. Where is your company located?*

A. ABR's corporate headquarters are in Fairbanks, and we have a branch office in Anchorage.

*Q. What year was the company founded and by whom?*

A. ABR (Alaska Biological Research) was founded in 1976 by Bob Ritchie and Jim Curatolo. Bob Ritchie remains with the company as an active senior scientist and board member.

*Q. What is your company's primary business activity?*

A. ABR is an environmental consulting firm providing expertise in wildlife and fisheries science; marine biology; landscape ecology, wetlands and soil science;

ABR fisheries biologists, John Seigle and Jena Lemke, and North Slope Borough biologist, Josh Bacon (left), capture and tag fish in Elson Lagoon near Barrow.

COURTESY ABR, INC.

ecological restoration; statistics, GIS/satellite mapping and analysis; permitting support; and environmental documentation (e.g., NEPA).

*Q. Are there important projects the company is currently a part of or has done recently?*

A. ABR has been involved in many of the major development initiatives in Alaska in recent years, including new North Slope developments at Pt. Thomson, CD 5, GMT 1 & 2, Nanushuk, and Liberty; offshore and onshore studies in support of Chukchi Sea exploration and development planning; AK LNG; and baselines studies for Susitna Hydro and the Pebble Mine.

*Q. How many employees does your company have?*

A. Sixty.

*Q. Describe the equipment and technology your company uses?*

A. Although ABR essentially is an information/knowledge-based company, we regularly use specialized equipment to make data collection and analysis more efficient and accurate. For example, we pioneered the use of ornithological radar in the 1980s and still maintain those capabilities for monitoring nocturnal movements of birds near development projects (e.g., offshore facilities). ABR also uses Android tablets in combination with proprietary software to collect data electronically in the field. The data are transferred from the devices to our server-based relational databases for additional QA/QC, analysis, and archiving.

*Q. Is the company changing any of its services or products?*

A. Yes, we currently are focused on expanding our permit support services, including endangered species, marine mammals, and wetlands. ABR has always had an experienced team of subject matter experts, and we now are expanding our

*Continued on next page*

continued from page 6

## ABR INC.

permitting capabilities to provide our clients with more turn-key support services.

*Q. What is your company's main strength or its edge over the competition?*

A. ABR has an exemplary reputation not only with our clients, but also with regulatory agencies and other groups (e.g., Alaska Native entities) for objective and rigorous science. Our reputation benefits our clients because our work products are respected by a broad spectrum of stakeholders, which translates into credibility for our client's permit applications. This credibility, in turn, frequently translates into less contentious and timelier negotiations with agencies and other stakeholders.

*Q. What new markets, clients or projects did your company attract in the last year?*

A. In 2015 we started a 4-year contract with NASA's ABoVE (Arctic Boreal Vulnerability Experiment) program. ABR is leading a multidisciplinary research effort that uses remote-sensing, field studies, and sociological investigations to address environmental changes and their impacts on the Yukon-Kuskokwim (Y-K) Delta region of western Alaska.

We also recently started another landscape monitoring project on the Y-K Delta for the Western Alaska Landscape Conservation Cooperative (WALCC). This project is complementary to the ABoVE project and is focused on monitoring and modeling landscape-level impacts from wildfires. The products of this work will inform Y-K resource managers and local stakeholders on the dynamics and trajectories of terrestrial and aquatic habitats following tundra wildfires.

*Q. What are examples of challenging work/contracts the company has undertaken?*

A. ABR's work on Exxon Valdez Oil Spill (EVOS) from 1989 to 2013 was challenging because of the scientific complexity and litigious nature of the work. We conducted a number of post-spill research projects on birds and marine mammals for both Exxon and the EVOS Trustee Council. The fact that both sides of this highly controversial and litigious issue were inter-

ested in ABR's services is a testament to both the quality and objectivity of our work.

*Q. What do you see as your company's biggest challenge in the next five years?*

A. ABR is experiencing the same economic headwinds that are occurring throughout Alaska. Maintaining our capacity and key staff during periods of reduced revenues is our biggest challenge.

*Q. Does your company have an anniversary or other landmark event coming up?*

A. ABR is celebrating 40 years of business in Alaska in this year!

*Q. What is the average length of time employee's work for the company?*

A. Relative to most consulting companies, ABR has remarkable employee retention and loyalty, and we think this provides exceptional value to our clients. The majority of our senior scientists have over 20 years in at ABR, and the average length of time of service for our entire staff in 2015 was 12.5 years.

*Q. What is your company's safety record? What steps does the company take to ensure a safe work environment?*

A. ABR has an excellent safety record and has implemented a culture of safety and a formal HSE program that meets or exceeds the standards of our clients and our self-imposed focus on employee welfare. Our employees regularly attend mandatory (e.g., NSTC) and discretionary

(e.g., IFC Workshops) training sponsored by our clients. Because we regularly deploy field crews to remote sites in Alaska, our employees all are provided First Aid, bear safety, and gun safety training.

*Q. Has your company been involved in any community projects or charity events?*

A. ABR has been a leader in promoting business practices that support a triple bottom line philosophy: economic viability, environmental stewardship, and social responsibility. These practices include donating ~7.5% of our annual profits to charities, sponsoring and compensating our employees for service to non-profits, and company-wide carbon accounting and mitigation. Our interest in maintaining strong connections in the communities where we live and work is a major component of our triple bottom line. For example, we work with young scientists in local and rural communities in a variety of ways, including science fairs, internships (Alaska Native Science and Engineering Program, UAF), and by providing opportunities for Native youth to participate in our field projects near their communities. We are proud to spread the message that good corporate citizenship in the form of socially and environmentally responsible business practices is not at odds with economic success.

*Q. What is the address of your company's website?*

A. [abrinc.com](http://abrinc.com)

GCI Industrial Telecom designs and implements communications for challenging environments, project sites, and requirements of all sizes.

COURTESY GCI INDUSTRIAL TELECOM

# GCI, transforming communication technology in Alaska for more than 35 years

*Serving remote regions under the most extreme conditions, GCI is up for the challenge*

*Q. What is the official name of your program?*

A. GCI Industrial Telecom

*Q. Is your firm a subsidiary or affiliate of other companies? If so, please name those firms and their relationship to your company.*

A. GCI Communication Corp. is a publicly traded company. GCI Industrial Telecom is part of GCI Business, a business unit within GCI Communication Corp.

*Q. What do you most want people to know about your company?*

A. GCI Industrial Telecom was founded to respond to the unique telecommunication needs of energy producers and explorers in Alaska. Over the past 15 years, our capabilities have

been hardened by delivering safe, reliable services in the remotest regions of North America. We listen, we design, and we deliver based on the best available technologies available. We work with our partners to evaluate and recommend how to better use technologies to increase the value of their program.

*Q. Where is your company located?*

A. GCI Industrial Telecom is headquartered in Anchorage, Alaska and has offices in Deadhorse, Alaska and Houston, Texas. We also have resources staged in Lafayette, LA and have set up remote offices based on project needs.

*Q. What year was the company founded and by whom?*

*Continued on next page*

continued from page 8

## GCI INDUSTRIAL TELECOM

A. GCI was founded in 1979 by Ron Duncan and Robert Walp with the goal of introducing long-distance competition to Alaska. Since that time, the company has grown to be one of the nation's premier integrated telecommunication providers. Today, Ron Duncan still heads the company as CEO and the company employs more than 2,300 professionals and has a current run rate of \$800 million. GCI Industrial Telecom was formed in 2001.

*Q. What is your company's primary business activity?*

A. GCI Industrial Telecom provides full life cycle support to the energy sector. This includes professional engineering, consulting, project management, construction and commercial data, wireless and voice services. We also have a VSAT satellite service offering for connecting remote projects throughout North America, and a host of managed technology services..

*Q. Are there important projects the company is currently a part of or has done recently?*

A. Being an integrated part of ALL of the recent production facilities (aka Industrial construction) efforts on the North Slope has helped us to develop a solid reputation with our partners. Prudhoe Bay, Oooguruk, Nikaitchuq, Badami, and Point Thomson are all projects we have explored, engineered, and constructed as a part of the respective owner's project team.

*Q. How many employees does your company have?*

A. GCI Industrial Telecom currently has 80 full-time employees. GCI currently employs over 2,300 full time with another 400 part-time employees and contractors.

*Q. Is the company changing any of its services or products?*

A. GCI has developed a number of managed solutions which can allow our partners to leverage the latest available technology without large capital outlays. Our industrial mobile communication solution provides users with hosted voice and managed data over a secure wireless connection. We have also recently introduced managed WiFi and managed firewall services.

*Q. What is your company's main strength or its edge over the competition?*

COURTESY GCI INDUSTRIAL TELECOM

A. GCI is fortunate to be considered an integrated partner of our clients. We understand the needs of our partners and the cycles in the Oil and Gas patch. Our team is comprised of best-in-class technicians, engineers and project managers who have direct oil patch experience. GCI Industrial Telecom recently celebrated 2.8 million man hours in some of the most extreme conditions without a lost time accident.

*Q. What is the most challenging work/contract the company has undertaken?*

A. During the Macondo Oil spill response effort, GCI Industrial Telecom coordinated and deployed a complex interagency two-way communication system (2-Way radios) for the coast line from Pascagula, FL to Freeport, TX. We completed the majority of the design and implementation in under four months! Once installed we maintained the system and achieved over 40,000 hours of safe work time. We are nimble and know how to hustle while being safe.

*Q. Does your company have an anniversary or other landmark event coming up?*

A. GCI is celebrating its 15th anniversary in the Pacific Northwest in August and tripled its office space in Seattle.

*Q. What is your company's safety record? What steps does the company take to ensure a safe work environment?*

A. Safety Matters to GCI. GCI Industrial Telecom has recently passed 2.8 Million hours since our last lost time accident (LTA). We take safety very seriously and empower our employees to take the steps necessary to ensure we provide a safe work environment.

*Q. Has your company been involved in any community projects or charity events?*

A. GCI believes in connecting with and making a lasting impact in the communities we serve. From supporting nonprofit organizations and youth education to preserving our rich culture and engaging in community celebrations, we're proud to support programs that help build a stronger Alaska.

*Q. What is the address of your company's website?*

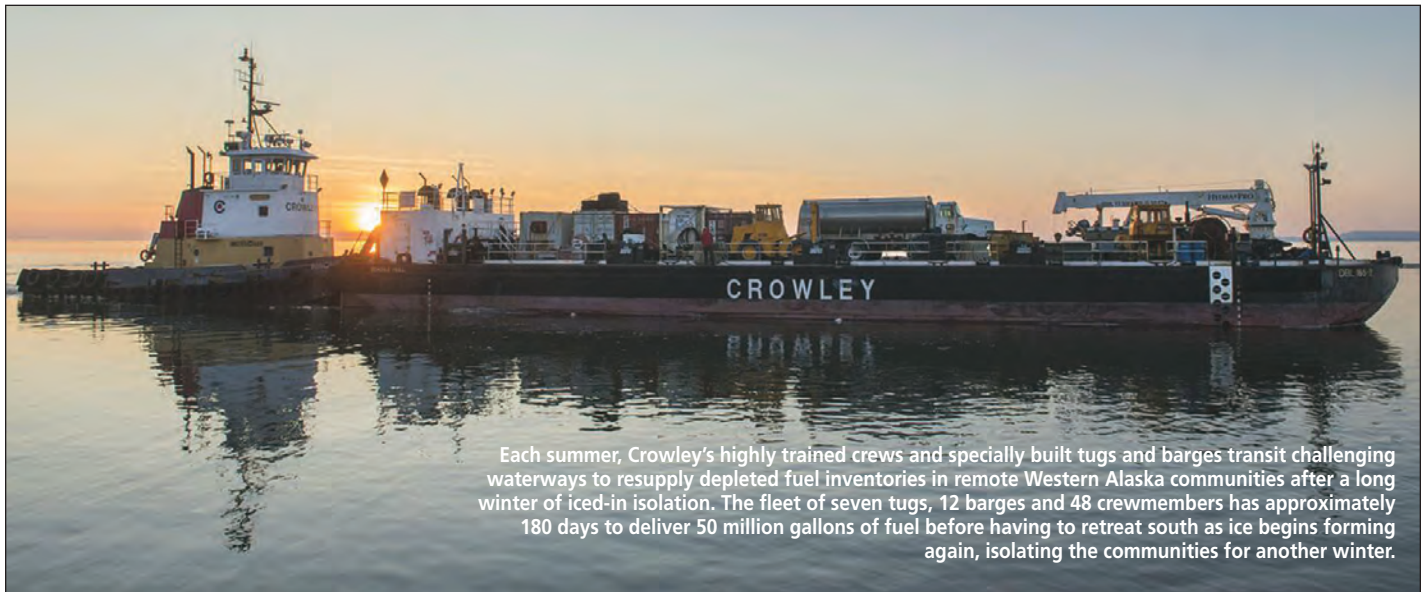

A. [www.gci.com/industrial-telecom](http://www.gci.com/industrial-telecom)

COURTESY GCI INDUSTRIAL TELECOM

## ON THE JOB: Crowley

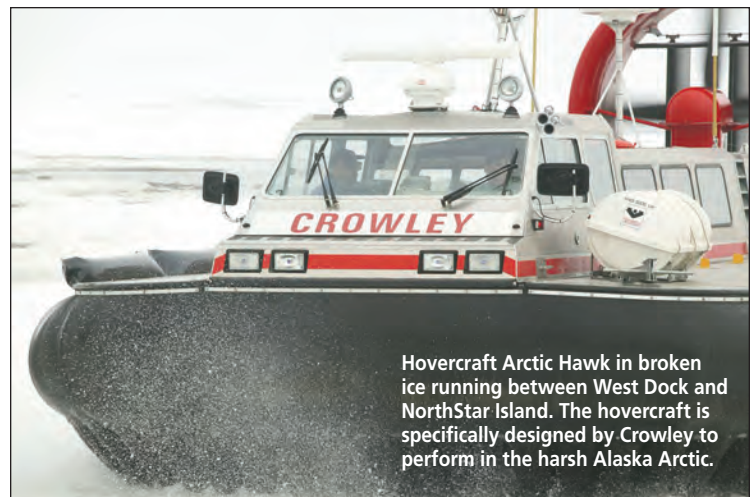

Photos courtesy Crowley

Each summer, Crowley's highly trained crews and specially built tugs and barges transit challenging waterways to resupply depleted fuel inventories in remote Western Alaska communities after a long winter of iced-in isolation. The fleet of seven tugs, 12 barges and 48 crewmembers has approximately 180 days to deliver 50 million gallons of fuel before having to retreat south as ice begins forming again, isolating the communities for another winter.

Topsides placement on the Furie Monopod in Cook Inlet in 2015. Crowley provided offshore engineering and project management for the Furie Kitchen Lights project, which included installation of a natural gas production platform, 16 miles of underwater pipeline and an onshore production facility in Cook Inlet.

Hovercraft Arctic Hawk in broken ice running between West Dock and NorthStar Island. The hovercraft is specifically designed by Crowley to perform in the harsh Alaska Arctic.

Resupplying the pipe rack on the pipelay barge Niniichik during the 2015 Furie project in Cook Inlet. Engineers and subject matter experts from around the world took part in the project-planning phase, and the execution of the project involved many quality subcontractors selected for their expertise in areas such as heavy lift, diving, grouting and offshore welding. Nearly 20 vessels, many of them specially outfitted, were also utilized for the project.

Crowley serves both residential and commercial customers in more than 280 communities across Alaska.

Parker AADU drill rig alongside the Doyon Rig 15 loading out for Eni's Spy Island. The Doyon rig move project involved the construction of a temporary dock in the shallow waters at Spy Island. To accomplish this, Crowley grounded a 200 series barge and built a gravel ramp from the barge to the island. Following delivery, the ramp was removed to return the island to the pre-delivery configuration.

Crowley's commitment to Alaska includes providing Alaskans the opportunity to further their educations and careers through scholarships, mentoring opportunities and employment.

Welding station on the pipelay barge Niniichik during the Furie Kitchen Lights project. Crowley worked with Furie on the installation of a natural gas production platform and underwater pipeline in an undeveloped natural gas field in Cook Inlet in 2015.

Crowley was awarded the 2015 Alaska Trucking Association Safest Line Haul Truck Fleet in recognition of its 125 trucks driven 1.8 million miles while delivering 100 million gallons of fuel with zero reportable incidents.

# 2016 ACADEMY: GeoFORCE Alaska

## COMPANY NEWS *in brief*

### UIC's Pfeifer overseeing government service

Ukpeagvik Inupiat Corp. announced that Dave Pfeifer, who took on the responsibility of UIC's commercial operations as its new senior vice president last August, is now additionally overseeing the UIC government services business.

Pfeifer will help guide UIC as it transitions through an operational restructure to create continuous improvement and efficiencies while eliminating redundancies, while growing the company. UIC strives to keep the best interest in mind of its shareholders, employees and clients. By adopting this imperative, UIC aims to leverage both UIC government services and UIC commercial operations expertise and relationships.

Pfeifer holds a Master of Science degree in construction and real estate from the University of Denver and a Master in health-care administration from the University of Minnesota. In addition, he received his bachelor's degree in Real Estate Business Administration from the University of Alaska Anchorage. His background includes positions with the National Bank of Alaska, Mat-Su Regional Medical Center and Providence Alaska Medical Center. Pfeifer also served as president of real estate development for Cook Inlet Region Inc.

DAVE PFEIFER

### Crowley celebrates more than 6 years since its last LTI

Crowley Maritime Corp.'s tanker escort and docking services group in Valdez is celebrating more than 7 million man hours and more than 6 years since logging its last lost time injury. In addition to this remarkable number, the company announced that it had not had an OSHA recordable case in more than 2 million man hours while performing tanker assist and escort work for Alyeska Pipeline Service Co. In 2015, the company logged more than 1 million man hours while safely escorting 236 tankers through Prince William Sound, transporting 185 million barrels of oil in one of the harshest environments in the world.

"We've partnered with Alyeska Pipeline Service Company for more than 25 years to provide the safest, most comprehensive spill prevention and response services available for tankers traveling through Prince William Sound," said Rocky Smith, Crowley's senior vice president and general manager, petroleum distribution and marine services. "This achievement is a

## BUSINESS SPOTLIGHT

### Alaska Instrument Co.

Alaska Instrument Company is a process instrumentation manufacturer's representative established in 1968, serving all industrial markets within Alaska. AIC represents more than 30 manufacturers of pressure, temperature, level and flow instrumentation, leak sensing and human/machine interface software. The staff of five travels the entire state in support of our clients to see that they are getting the best engineered solutions for their process control needs.

RC CROMWELL

#### RC Cromwell, President

President of AIC, RC Cromwell has a Bachelor of Science in Aviation Business Administration and is a former airline pilot and flight instructor. Looking for a career change, he moved on to industrial plumbing and heating and wholesale for about 12 years, then in 2005 applied for an inside sales job with AIC. Cromwell has worked through various positions eventually becoming president of the company.

testament to the keen focus on safety our professional mariners and Valdez shore side support team displays. They are relentless in their pursuit of zero harm to people, property and the environment."

In Valdez, Alaska, Crowley personnel and tugs help protect the environment through a contract with Alyeska Pipeline Service Co.'s Ship Escort/Response Vessel System. As part of this commercial partnership the company provides tug escorts for tankers traveling through Prince William Sound to and from the Valdez Marine Terminal, assuring safe passage, even under the most extreme winter weather conditions. They also provide secure docking and undocking operations at the oil product loading terminals.

### Motion Industries to acquire Epperson and Co.

Motion Industries Inc. a wholly owned subsidiary of Genuine Parts Co., has entered into a definitive agreement whereby Motion Industries has agreed to acquire Epperson and Co., an industrial distributor specializing in material handling products and services since 1932. Execution of the transaction is expected to take place March 1.

A leading supplier of bulk material conveying products and services in the Southeast, Epperson and Co. is headquartered in Tampa, Florida, with full service locations in Jacksonville and Miami. Offerings include conveyor-related products such as belting, idlers and pulleys, as well as services such as system installation and removal, belting splicing and installation, idler replacement and other maintenance projects.

Jimmy Abbitt, Epperson's president, said, "We are pleased and excited about joining forces with Motion Industries and look forward to the opportunities that this brings for our people. The nice fit for both companies in the Florida market was key to our decision, and we are optimistic about the future."

## Calista Corp. declares record \$5.6M spring dividend

Calista Corp.'s board of directors recently approved the spring dividend for 2016, a record \$5.6 million. Calista has declared 13 dividends since inception, with five declared since 2014. The total distribution of all Calista shareholder dividends is \$38.9 million, with 49 percent of that total declared since 2014.

Calista has one of the largest populations of shareholders among the Alaska Native corporations, with approximately 13,000 individuals. The spring dividend will be approximately \$4.23 per share, an 11 percent increase from the previous year. The average shareholder owns 100 shares. Checks are expected to be mailed out by the close of business April 15.

"Calista's dividends are more than discretionary spending money for our shareholders," said Calista Corp. Board Chair Margaret Pohjola. "The Yukon-Kuskokwim Delta is one of the most economically challenged regions in the country. Shareholders have shared with us that these dividends are used to purchase gas for use in subsistence activities, food for their families, and supplies for their homes."

In 2014, Calista made corporate history by declaring two dividends in one calendar year. The spring dividend is determined from shareholder equity. The fall dividend is from the Akilista investment portfolio, which made distributions in 2014 and 2015. This is an investment fund created to provide a perpetual source of dividends not dependent upon business operations.

## Polyguard introduces PolyPhen insulation

Patrick Dunn, vice president of the mechanical products division of Polyguard Products, is pleased to announce the introduction of PolyPhen insulation into the mechanical insulation market.

PolyPhen has an excellent K value (.15k) and a 0,0 rating on ASTM E84; the base 2.5# closed cell foam density insulation will be orange in color.

The product will be available for shipping in March.

"Polyguard is continually looking to strengthen our commitment to the mechanical insulation industry with viable, innovative insulation products for our industry," Dunn said.

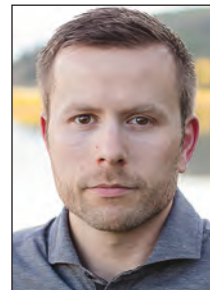

The insulation will be available in four densities

## BUSINESS SPOTLIGHT

### Fountainhead Development, Inc.

Recognized as a premier real estate developer in the Pacific Northwest, Fountainhead Development's 1.7 million square foot portfolio consists of commercial and residential property, hotels, restaurants, a wildlife sanctuary and an auto museum.

Our diverse mix of commercial real estate holdings include a variety of retail, medical, flex, warehouse, and class "A" office space located in Alaska and Washington. We are the home to numerous investment grade tenants including Alaska Airlines, Blue Origin, Lockheed Martin, Wells Fargo Bank, Xerox, REI and the Greater Fairbanks Community Hospital Foundation just to name a few.

BOBBY HANSON

### Bobby Hanson, Commercial Leasing Manager

Bobby Hanson started with Fountainhead Development in 2014 with a desire to pursue real estate development opportunities after an 8 year career as a commercial insurance broker. Hanson manages lease negotiations, tenant improvement projects and day to day operations of Fountainhead's commercial real estate operations.

Hanson was born, raised, and educated in Fairbanks and holds a BBA and an MBA in Finance from the University of Alaska — School of Management. He has served on the Fairbanks Chamber of Commerce board of directors since 2014, and is a past president of the Alaska Independent Insurance Agents & Brokers. While not on the clock, he enjoys DIY improvement projects, and traveling to new destinations for half marathons with his wife, Amy.

### Equipment Source, Inc.

ESI designs, develops, and builds quality, innovative worksite products for the oil, mining, construction, and agriculture industries. All of our products are built Arctic tough, built to last, and tested in challenging environments. We also specialize in Kubota Tractors.

NICK FERREE

### Nick Ferree, PE, Branch Manager — Fairbanks, Alaska

Nick Ferree, PE is a born and raised Alaskan with 7 years of arctic engineering experience. He is a Professional Engineer with a bachelor's degree in civil engineering from the University of Alaska Fairbanks. As the branch manager in Fairbanks, he oversees daily operations for ESI sales, rental and manufacturing as well as the Kubota dealership. ESI designs, develops, and builds quality, innovative worksite products for the oil, mining, construction, and agriculture industries. Built Arctic tough, built to last, and tested in challenging environments, ESI's products include the famous ES700, Hydronic and Flameless Heaters and mobile water pumps and power generation. Nick's attention to detail and arctic engineering background will be an asset for ESI and our customers across North America. In his free time, Nick likes to explore the Alaska outdoors with his family via foot, bike, snowmachine and boat.

to fulfill all insulation and hanger location requirements. For more information on PolyPhen, contact Patrick Dunn at [pjd@polyguard.com](mailto:pjd@polyguard.com).

## Foss Maritime honored for safety performance

Foss Maritime has been recognized by the ILWU Marine Clerks Local 52 for zero injuries at Terminal 5 between March 2015 and February 2016. The first-ever Safety Award given by ILWU was presented to Foss and partners Shell and Jones Stevedoring at the ILWU's annual safety banquet held in Sea-Tac, Washington.

"We are extremely honored by this award," said Paul Stevens, CEO and president of Foss. "It's a real credit to the hard work of our dedicated Foss employees and also to our stevedore partner Jones Stevedoring, and to the trust of our customer, Shell."

Terminal 5 is the second largest terminal in Seattle, Washington, and offers a variety of equipment and services to support intermodal, break bulk and project cargoes. It is a unique location as it can be accessed by deep sea vessels, by barge, by rail and by truck. By the close of 2015 Foss had accumulated about 168,000 people hours at Terminal 5, without an injury.

## CAI deploys eMAPSS to meet industry needs

Following the 2015 success of mobile forms design and real-time data reporting for a top oil and gas company, Computing Alternative Inc. recently deployed eMAPSS for use across multiple industries. eMAPSS operates as a complete information management system, but it can also be used as a mobile front-end for an existing system.

"CAI has been working on the core principles of eMAPSS since I founded the company in 1998. In 2014, we linked our data management knowledge with the latest mobile hardware and software to produce eMAPSS," says Sunil Sethi, president and CEO of CAI.

"We tailor eMAPSS to align with the specific goals of a company. The oil and gas company's central priority was offshore safety and environmental protection. It was a pleasure during the 2015 season to see that company adapt to this new technology so quickly and intuitively."

Sethi, who has also developed revenue taxation, lease sales and administration, and royalty accounting systems for the state of Alaska, says eMAPSS is a product that can help even in the toughest of times. "CAI has been operating for nearly 20 years, so we've been through the thick and thin of technological breakthroughs and economic shifts. But most industries are barely touching the surface of what is possible with mobile technology. The benefits of eMAPSS are that the system increases efficiency, cuts costs, and offers dynamic reporting in ways that are lacking with other mobile forms providers. These are always key goals for any business, whether an industry climate is facing rough times or thriving."

CAI continues to work closely with the oil and gas industry, while tailoring eMAPSS to other industries, including construction, utilities, health and safety, and renewable energy. For more information about eMAPSS, visit <https://emapss.com/> or call 1-855-368-9669.

SUNIL SETHI

## AECOM most admired company for second consecutive year

AECOM, a premier, fully integrated global infrastructure firm, announced recently that it has been named to Fortune magazine's list of the world's most admired companies for the second consecutive year.

From an annual survey conducted by Fortune and global management consulting firm Korn Ferry Hay Group, top executives, directors and financial analysts identify the companies with the strongest reputations within their industries and across industries.

"Being included on Fortune's world's most admired companies list for a second year in a row is an outstanding achievement that highlights the growth and fundamental strengths of our business and the transformative work we do globally," said AECOM Chairman and CEO Michael S. Burke. "This recognition is another reflection of the dedication and expertise of our employees who make it possible for all of us to deliver a better world."

According to Fortune, the world's most admired companies list is considered to be the definitive report card on corporate reputation. The companies featured on the list represent "the pinnacle of excellence" in nine key performance areas: Ability to attract and retain talented people, quality of management, social responsibility to the community and the environment, innovativeness, quality of products or services, wise use of corporate assets, financial soundness, long-term investment value, effectiveness in doing business globally.

The world's most admired companies list and details on the methodology can be found on the Fortune website. The list also appears in the magazine's Feb. 22 print edition.

## Guess & Rudd names Bryant shareholder

Guess & Rudd P.C. is pleased to announce that Kristin Eagen Bryant has become a shareholder of the firm. Since joining Guess & Rudd in 2011, Bryant has represented insurance companies, corporations, municipal governments, small businesses, aircraft overhaulers and individuals in a broad range of litigation matters. These include aviation accident liability, product liability, insurance bad faith and coverage issues, underinsured/uninsured motorist claims, premise liability, automobile liability, professional liability claims and employment law claims. Bryant has tried cases in both federal and state court. In addition, she works on a variety of estate planning and disposition matters. Bryant attended Seattle Pacific University where she received a 4-year gymnastics scholarship. She is a graduate of Gonzaga University School of Law in Spokane, Washington.

## COMPANY NEWS

Sound when its contract expires June 30, 2018. Crowley has provided marine services in Prince William Sound since 1990.

Despite bidding aggressively for the SERVS contract extension, Crowley was not chosen by Alyeska to retain the entire scope of the current contract.

Crowley is fully committed to continued professional service and full compliance as the marine service provider until the end of June 2018, and will be engaged in any transition process. Participants in the bidding process are restricted from disclosing details.

"We bid this contract very aggressively and are extremely disappointed that we were not selected to retain this business," said Tom Crowley, company chairman and CEO. "We have been assured that this outcome is the result of a very competitive landscape and is not a reflection of Crowley's qualifications or record. We will continue to work constructively with Alyeska through the duration of our contract. Crowley and Alyeska agree that there is nothing more important than the continued protection of Prince William Sound."

There are currently 17 vessels, 230 highly trained mariners and 17 shore side administrative personnel working together to provide world-class service to Alyeska in Valdez.

### ACA awards 2016 Scholarship to Brandon Smothers

The Alaska Air Carriers Association scholarship, underwritten for the last four years by Crowley Fuels in Alaska, was recently awarded to Brandon Smothers, a high school senior at Interior Distance Education Alaska in Fairbanks. Smothers, a Talkeetna native, will enter University of Alaska Fairbanks this fall to pursue a degree in aeronautical engineering.

Don King, senior account executive, highway sales for Crowley, presented Smothers with the \$3,000 scholarship at ACA's 50th annual convention in Anchorage.

Smothers' love of aviation began at the age of 12 when he joined the nationally-recognized Talkeetna Build-a-Plane program where he learned valuable skills like sheet metal fabrication and repair, riveting, electrical repair and welding, as well as project management and leadership. Soon after joining the program, he began flight training and has since logged over 50 hours. Because of his excellent work and dedication to the TBAP program, Smothers has been selected to attend multiple simulator sessions with both UPS and FedEx, and has worked as an intern for air-taxi company, K2 Aviation. He expects to complete his private pilot training this spring.

"My journey in the aviation community will not end here. In the fall, I will attend the University of Alaska Fairbanks where I will major in aeronautical engineering," said Smothers. "My ultimate goal is to work as a pilot for an Alaska-based air service and help establish TBAP programs in small communities throughout the region."

### PND names new president, senior VP, shareholder

The board of directors of PND Engineers Inc. has elected Jim Campbell, P.E., to the position of president, and Dempsey Thiemman, P.E., S.E., to senior vice president. Campbell and Thiemman succeed John Pickering, P.E., and Mike Hartley, P.E., respectively.

JIM CAMPBELL

DEMPSEY THIEMAN

Campbell, who joined PND in 1995, brings pride and enthusiasm to his new role. "PND is a premier civil and structural engineering company with a focus on serving our clients and engineering innovation" he said. "Our company's gradual but steady growth over the past 37-plus years is a result of clients' trust and return business. Our staff is top-notch, and our customers deserve no less. I see great things in PND's future."

Thiemman looks forward to helping perpetuate the culture of leadership that has shaped PND into the successful company it is today. "We have grown since I came aboard more than 20 years ago, and with growth has come opportunity and challenge," Thiemman said. "Nonetheless, our values have remained constant. Our staff is committed to client service and satisfaction, and working with integrity as a team to provide innovative and cost effective design solutions. Our motivation, and inspiration, come from our customers."

PND's board has also selected Torsten Mayrberger, P.E., PhD, to be a principal in the firm. Mayrberger has 15 years of professional engineering experience, and joined PND's Anchorage office in 2009. He specializes in geotechnical investigations and deep foundation design in permafrost soils, as well as geotechnical investigations in marine and non-permafrost soils. He was also instrumental in establishing PND's AASHTO-accredited state-of-the-practice geotechnical lab testing facility in Anchorage.

TORSTEN MAYRBERGER

### Granite named a 2016 world's most ethical company

Granite Construction Inc., a diversified heavy civil contractor and construction materials producer, has been recognized by the Ethisphere Institute, a global leader in defining and advancing the standards of ethical business practices, as a 2016 Worlds Most Ethical Company.

This year marks the 10th anniversary of the Ethisphere and the World's Most Ethical Companies designation, which recognizes those companies who align principle with action, work tirelessly to make trust a part of their corporate DNA, and in doing so, shape future industry standards by introducing tomorrow's best practices today.

“Being named as one of the World’s Most Ethical Companies for the seventh year in a row is an honor and testament to our employees who personify our core values,” said James H. Roberts, president and CEO, Granite Construction Inc. “Our employees are committed to honoring and maintaining our founder’s high standard of conduct, ensuring that all Granite customers and stakeholders are well-served.”

Granite is a seven-time award winner, and is one of only two in the construction and building materials category underscoring their commitment to leading ethical business standards and practices.

## Fluor finalizes acquisition of Stork

Fluor Corp. has closed its acquisition of Stork Holding B.V. Fluor announced in early December that the company had agreed to purchase 100 percent of Stork’s shares from UK-based private equity firm Arle Capital Partners.

“I welcome our 15,000 new colleagues from Stork and we are excited to have them join the Fluor family,” said David Seaton, chairman and CEO of Fluor. “Fluor’s most important asset is its people, and we are fortunate to have found in Stork a company that shares the same values, pride and global heritage as we do.”

Stork is a global provider of maintenance, modification and asset integrity services associated with large existing industrial facilities in the oil and gas, chemicals, petrochemicals, and power markets. Founded in 1827, Stork has long-term relationships with a diverse range of customers. It has operations in continental Europe, the United Kingdom, the Middle East, Asia-Pacific and the Americas.

Stork’s business model is primarily based on ongoing operating budgets that are less impacted by capital spending plans and volatile commodity prices. The addition of Stork’s capabilities to the Fluor portfolio will help meet customers’ needs throughout the full lifecycle of an operating plant.

Stork, along with Fluor’s current Operations & Maintenance organization, will be led by Stork CEO Arnold Steenbakker and reported financially under the Global Services business segment.

## Gruhn joins aeSolutions as safety consultant

aeSolutions is proud to announce that Paul Gruhn, PE, CFSE, ISA 84 SIS expert has joined their Houston, Texas, office as their global functional safety consultant.

Gruhn is recognized across industry as an ISA Fellow, original member of the ISA S84 committee, author of the ISA book on functional safety, and as the developer and instructor of “safety instrumented systems - design, analysis, and justification” (EC50) and “advanced design and SIL verification” (EC54) ISA training courses. In his new role, Gruhn is developing aeSolutions’ global marketing initiatives, instructing functional safety training nationwide, serving as a technical authority on select projects, and managing a content development program; all in effort to continuously improve the process safety performance of industry.

## Wedgewood Resort, Bear Lodge turn gravel pit into lake

From gravel pit to wetland habitat was the objective of Fountainhead Development owner Tim Cerny in the acreage surrounding Wedgewood Resort and Bear Lodge in Fairbanks. His goal was to reclaim the land for a wildlife sanctuary, so guests could enjoy a peaceful walk around a pristine lake while vacationing at the 105-acre property.

“Guests can enjoy nature walk, view wildlife, and birding without having to go beyond the boundaries of the company’s hotel property, Wedgewood Resort and Bear Lodge,” Cerny said.

Wander Lake was once a deep, steep-sided gravel pit offering limited habitat to birds, company official Deanna Brandon said. Reclamation began by enhancing the surrounding area to provide habitat for a wider diversity of wildlife. Excavation included new shallows, creating islands and peninsulas, introducing aquatic plants, planting willows and native grass on the banks. Additionally, Cerny had non-game fish transplanted into the lake to provide a food source for the loons, grebes, and other waterfowl nesting at the sanctuary.

“The sanctuary’s nature trails connect to Creamer’s Field Migratory Waterfowl Refuge creating miles of easy walking trails for all to experience,” he said.

Wedgewood Resort is a “destination in itself,” Cerny said. The resort includes 157 guest rooms at Bear Lodge, 305, one and two bedroom residential-style suites and an antique auto and fashion museum. All conveniently situated minutes from downtown Fairbanks.

## Northern Air Cargo announces new general manager

Northern Air Cargo Inc. recently named Gideon Garcia as general manager for the Anchorage based, all-cargo airline. Gideon joins NAC bringing more than 22 years of Alaska travel trade and business operations experience. He has previously

served as regional manager for Holland America Tours; and, most recently and more notably as COO of CIRI Alaska Tourism Corp. where he managed a portfolio of five business units in Southcentral Alaska. Garcia's strong qualifications in the areas of safety, operations management, fiscal strategies and sales are welcomed, optimal competencies essential to the ongoing and future success of the 60-year old business.

"While Gideon will be embarking on his first venture in the air cargo industry, he has vast experience with managing large companies with hundreds of employees in a safety sensitive, regulated environment. We are confident that he will be a great leader for NAC's cargo operations and look forward to the additional stability he will bring," said Dave Karp, president and CEO of Northern Aviation Services, NAC's parent company. In the position as general manager, Garcia's primary responsibilities will focus on cargo operations and sales.

Garcia holds a general management M.B.A. from the University of Alaska Fairbanks and a B.A. in liberal arts from The Evergreen State College. From 1988 to 1989, he served with HHC, 119th military intelligence brigade in Fort Lewis, Washington. Garcia leads numerous community organizations and currently serves as president of Anchorage East Rotary Club and Anchorage Downtown Partnership, and as a board member of the Resource Development Council.

## UIC announces opening of Tukcumavik Suites in Barrow

UIC said recently that the new UIC Tukcumavik Suites in Barrow, Alaska, is officially open for business. A grand opening reception will be announced at a later date.

UIC President and CEO Anthony E. Edwardsen said, "This new facility will be good for Barrow by providing an up-to-date and much needed lodging resource. It's great for workers and business groups coming to Barrow for projects, tour groups, and affordable enough for family and friends coming to visit."

COURTESY UIC

Edwardsen also said, "With more and more global focus on the Arctic; by providing Barrow with this new lodging facility this is just one way UIC is continually adapting and helping Barrow stay at the leading edge as our world changes." The only facility of its kind in Barrow, Tukcumavik Suites offers traveling professionals all the comforts of home with competitive pricing. The 11,834 square foot facility was conceptualized, planned and built by UIC Design Plan Build and its partner Builders Choice. Construction of the \$6.3 million project began in March 2015 and was completed a year later.

UIC Tukcumavik Suites is centrally located near shopping, restaurants and other town amenities. The Iñupiat word "Tukcumavik" means a place to rest. Due to Barrow's limited lodging resources, this brand-new hotel is a welcomed relief to

regular and new visitors alike. Built with traveling professionals in mind, Tukcumavik Suites is able to provide lodging for long-term and short-term guests.

## Crowley announces acquisition of Ace Fuels in Anchorage

Anchorage-based Crowley Fuels said May 2 that it has completed an asset acquisition of the aviation fuels business of Ace Fuels LLC, a fixed base operator headquartered at Merrill Field in downtown Anchorage offering Jet A and AV 100LL fuels. The acquisition includes the company's six, 24-hour self-service aviation fuels pump stations and associated buildings located at the Merrill field strip, Merrill Field main airport, Willow airport, Wasilla airport, Lake Hood strip and Fairbanks International Airport.

"Congratulations to the entire team on completing this acquisition of two like-minded, privately owned and operated businesses," said Rocky Smith, senior vice president and general manager. "While it will immediately expand Crowley's footprint by adding additional aviation fuels service stations throughout Alaska, it also gives Ace Fuels customers better access to Crowley's high quality fuels in southcentral and western parts of the state."

While ownership has changed, Crowley will continue to provide great products and services under the Ace Fuels name and eventually rebrand the stations as Crowley. Ace Fuels Manager Michelle LaRose will join the Crowley team, and company owner Richard Armstrong will leave to pursue other interests.

## Motion Industries agrees to acquire Colmar Belting Co.

Motion Industries Inc., a wholly owned subsidiary of Genuine Parts Co., has entered into a definitive agreement to acquire Colmar Belting Co. The closing of the transaction was expected to occur May 1.

Colmar Belting Co. is a regional distributor focused primarily on power transmission and belting sales and service based in South Boston, Massachusetts. Their offerings include material handling related products such as conveyor belting, idlers and pulleys, as well as a wide spectrum of custom belt services such as slitting, fastening, and vulcanizing.

In business since 1933, Colmar serves the needs of numerous industries including aggregate, manufacturing, food processing, HVAC and recycling.

Michelle and Rob Labossiere, owners of Colmar Belting, said, "Throughout the growth of the company, Colmar has continually diversified to meet the challenges of this rapidly changing industry. Joining the Motion Industries team allows Colmar to continue to provide outstanding service to our customers, while providing excellent opportunities for our employees. We are excited to be part of Motion Industries." Colmar Belting will continue operations under its existing management team in all locations.

"Growth is the key driver behind this transaction, and the complement of Colmar's belting and power transmission expertise places us in an even stronger competitive position in the Northeast," said Tony Cefalu, Motion's senior vice president of shops and services.

## NOSI becomes newest member of Saltchuk family

Saltchuk said recently that NANA Oilfield Services will operate as a sister company to Delta Western, the leading distributor of petroleum products and lubricants in Alaska, under North Star Petroleum, the petroleum distribution unit of Saltchuk.

NOSI's facilities in Deadhorse distribute jet A and B aviation fuel, diesel, heating fuels and gasoline as well as drilling fluids and potable water to camps all over the North Slope. The acquisition further diversifies and expands North Star Petroleum's footprint in the state.

"We are very happy to have NOSI as well as Brad Osborne and his team join the Saltchuk family of companies," said Brian Bogen, president and CEO of North Star Petroleum, "We currently serve the North Slope from Delta Western's location in Fairbanks. Expanding services in Deadhorse is reflective of our long term commitment to the state of Alaska and our oil and gas customers."

The purchase was completed on April 30. Leadership from North Star Petroleum and Saltchuk will travel to meet with NOSI's 36 employees in Anchorage, Fairbanks and Deadhorse over the coming week.

"It's a great fit. Saltchuk's values and commitment to Alaska make me very confident that we have found a great home," said Brad Osborne, president of NOSI. Osborne will stay on as president of the company. "We've got a long and exciting future ahead. I'm looking forward to being a part of the Saltchuk family."

## PND announces new hires and professional achievements

PND Engineers Inc. recently said that it is proud to announce the new hires of Nathan Harris, E.I.T., and Brandi Opsahl, E.I.T., who recently joined the firm as staff engineers. Both are lifelong Alaskans, and both graduated from the University of Alaska Anchorage with bachelor's degrees in civil engineering. Harris brings to his position field inspection, highway design and construction administration experience. Opsahl was an intern at PND prior to becoming a full-time employee. She specializes in building structural design.

In addition PND announced the professional achievements of Brenna Hughes, Timothy Peters and Ingrid Martin. Hughes

NATHAN HARRIS

BRANDI OPSAHL

BRENNA HUGHES

TIMOTHY PETERS

was hired as an environmental scientist. She holds a Bachelor of Science degree in geology from the University of Alaska Fairbanks and a master's degree in science management from the University of Alaska Anchorage. Hughes has seven years of experience planning, permitting, and executing geophysical and hydrographic surveys in support of marine construction, resource development and nautical charting. She has broad experience with the Alaska regulatory environment and with the logistics and permits required to implement field projects in remote environments.

Peters, PND's systems administrator, recently obtained the CompTIA Security+ certification. The Security+ credential is an internationally recognized validation of foundation-level information technology security skills and knowledge. Peters has seven years of professional IT experience and has been with PND since 2012.

Martin, marketing manager for PND, has earned the designation of Certified Professional Services Marketer through the Society for Marketing Professional Services, which advocates for, educates, and connects leaders in the design and building industry. Candidates must meet educational and experience requirements, pass a written examination, and pledge to abide by the CPSM Code of Ethics. Martin rejoined PND in August 2014. She was the firm's marketing manager from 2000-08. She has an extensive background in journalism and has also worked as a federal-contracting proposal manager.

INGRID MARTIN

## AECOM in Alaska announces three new appointments

AECOM, a premier, fully integrated global infrastructure firm, recently announced that it has made several leadership changes within its Alaska operations to enhance the impact of the organization in the region.

Laura Young assumed the role of technical services manager. In this new role, Young will oversee engineering, geographic information system and computer-aided drafting disciplines. Young will also continue to serve as the federal business development lead for Alaska. Young joined AECOM, through legacy Dames & Moore, in 1995.

Elizabeth Bella, PhD, was named planning group manager. In this new position, Bella will continue to manage projects and will also serve as strategic and business development lead for the planning group. Bella has 15 years of applied ecology and regulatory experience, and she joined AECOM in 2015.

Joy Wakefield-Gonzalez was named business manager. In this

LAURA YOUNG

ELIZABETH BELLA

JOY WAKEFIELD-GONZALEZ

new role, Wakefield-Gonzalez will be responsible for project management improvement, business management and financial planning. Wakefield-Gonzalez joined AECOM, through legacy firm Tryck Nyman Hayes, in 2008.

"We are excited to welcome Laura, Elizabeth and Joy into their new roles. They are very capable and experienced in their fields and will continue to be an asset to our team," stated Joe Hegna, AECOM Alaska operations manager and vice president. "I am looking forward to seeing all they accomplish in their new positions."

COURTESY CONAM

## CONAM Construction receives award from ConocoPhillips

CONAM Construction said it was recently recognized by ConocoPhillips as part of its 2015 Supplier Recognition Award program. Awards were given in the areas of safety, focus on execution and doing business better, with CONAM receiving the "Focus on Execution" award.

As the general contractor responsible for installation of the drill site production facilities, CONAM Construction played a critical role in enabling DS-2S to start up two-and-a-half months ahead of schedule. The company demonstrated adaptability by adjusting their work plans and ensuring the project stayed on the critical path despite facing weather-related delays of critical materials and modules, completing 145,000 hours of work with a total recordable incident rate of 0.0.

Recipient companies were nominated by ConocoPhillips' business unit leadership, with winners chosen by a global cross-functional committee, including senior management. CONAM was nominated by the Alaska business unit.

Dale Kisse, president of CONAM Construction Co. says, "CONAM is honored to be recognized by ConocoPhillips and being presented the Focus on Execution award. The project success can also be attributed to the ConocoPhillips' capital project team members who supported us throughout the project. It was the entire team, working together that delivered the project ahead of schedule without incident."

CONAM Construction Co. is a leading provider of specialized contracting and EPC services delivering heavy industrial infrastructure solutions to the oil and gas, mining and power industries throughout the state of Alaska. The company is an operating unit of Quanta Services (NYSE: PWR).

## Bradner joins Petroleum News writers

Veteran Alaska journalist Tim Bradner has joined Anchorage-based Petroleum News as a contributor and will specialize in reporting on environmental regulation and state tax and revenue issues, as well as some breaking oil and gas news.

Bradner is also co-publisher of Alaska Legislative Digest with Mike Bradner, and co-editor of Alaska Inc., a business quarterly. He writes for the Alaska Journal of Commerce on health care and workforce/training and is a columnist for Alaska Dispatch News.

Bradner has lived in Alaska since 1962 and worked with BP Alaska and Sohio Petroleum Co. from 1970 to 1985.

"Tim and I worked together many years ago on the Alaska Public Affairs Journal for the University of Alaska-Southeast. It is great to be working with him again as a freelancer for our weekly newspaper," said Kay Cashman, publisher and executive editor of Petroleum News.

TIM BRADNER

## Opti Staffing acquires new location to meet demand

Opti Staffing said recently that it has moved locations to meet the need of its clientele. The new building, located at 3601 C St., Ste. 1220, in Anchorage is one and half times the size of Opti's previous office space.

In addition to the move and expansion, Opti will be bringing on three new recruiters, which will bring its staff up to 12 full time recruiters, all sharing candidates and working together to provide the best service possible.

Opti is a locally owned and operated full-service agency that boasts continual growth and innovation, with five offices located throughout the Pacific Northwest in Alaska, Washington and Oregon. Opti's focus is on long-term career placement, offering a variety of business models to best suit its clients' needs.

For more information about Opti Staffing visit [www.optistaffing.com](http://www.optistaffing.com)

## Second Foss arctic class ocean tug christened

Foss recently said that the second of three state-of-the-art arctic class tugs, the Denise Foss, was christened June 1 at the Foss Waterway Seaport in Tacoma, Washington. Built at the Foss Rainier, Oregon, shipyard, the Denise is designed to operate in the extreme conditions of the far north, and will enter service this summer.

In opening remarks Foss COO John Parrott applauded the hard work and dedication of the people, designers and customers that made this project possible. He also introduced Denise Tabbutt, the vessel's namesake and one of the three sisters who are primary shareholders of Saltchuk, the parent company of Foss Maritime.

Tabbutt spoke at the event and had the honor of breaking the ceremonial bottle of champagne across the hull of the Denise Foss.

The Denise Foss is ice class D0, meaning the hulls are de-

signed specifically for polar waters and are reinforced to maneuver in ice. The first of the three arctic tugs, the Michele Foss, debuted in 2015 and has performed above and beyond expectations. The Michele lead the way in safely pioneering a new route across the North Slope, while operating in extreme conditions of first year ice a meter thick.

Like the Michele, the Denise complies with the requirements in the ABS Guide for building and classing vessels intended to operate in polar waters, including ABS A1 standards, SOLAS and green passport. She includes a Caterpillar C280-8 main engine, which complies with the highest federal environmental standards; a Nautican propulsion system; and Reintjes reduction gears. Markey Machinery supplied the tow winch. The tug has a bollard pull of 221,000 pounds.

## Parrott to assume role of president of Foss Maritime

Foss Maritime Co. COO John Parrott will take over the role of president of Foss Maritime, assuming responsibility for the day-to-day operations of the company as of Aug. 1. Current President and CEO Paul Stevens will remain CEO of Foss until the end of 2016. He will then move to Foss' parent company, Saltchuk, where he will serve as senior vice president and managing director.

JOHN PARROTT

Parrott, who came to Foss as COO in January of this year from sister company TOTE Maritime, takes the helm with more than 28 years of maritime experience, both at sea and ashore. "Foss is an incredibly dynamic company," said Parrott. "We are building on more than 125 years of safe, innovative service, and we have an exciting road ahead. I'm honored to be part of this iconic company."

Paul Stevens has had a distinguished maritime career for more than 40 years. "I'm happy to turn over the company to someone with an extensive maritime background and who has earned the respect of our owner group at Saltchuk through his contributions at TOTE Maritime," said Stevens.

"Paul has led Foss through an incredible period of growth and has served as an adept leader within our company for more than 13 years," said Tim Engle, president of Saltchuk. "We are grateful that we will continue to have Paul's leadership and expertise serving the entire Saltchuk family of companies."

In his new role at Saltchuk, Stevens will support various strategic initiatives currently underway and will help support Saltchuk's growth activities.

## GCI expands high-speed network to more communities

GCI announced recently that it will expand high-speed terrestrial broadband service to the Northwest Arctic Borough and Norton Sound, delivering services to 10 new communities this year. GCI's terrestrial for every rural region in Alaska network delivers low latency network connections and high-speed internet access. These speed increases, supported by Ericsson technology, will dramatically improve the performance of online health, education and government services.

Terrestrial broadband provides high-speed data streaming which is a transformational service for many rural Alaska communities. By the end of 2016, Buckland, Kiana, Noorvik, Selawik, Koyuk, Elim, Golovin, White Mountain, Stebbins and St. Michael will join the growing list of rural Alaska communities with access to TERRA. With TERRA, these communities will have access to high-quality video conferencing, a critical tool for health care and education that can result in long-term cost savings for Alaskans and the agencies that serve them.

"GCI has brought high-speed internet to some of the most remote locations on earth," said Greg Chapados, executive vice president and COO of GCI. "We've seen how much a community can benefit from the improved medical care, improved education and improved economic opportunities that accompany access to broadband. We're truly connecting Alaskans to the rest of the world. The projects are hard and the environment unforgiving, but we're an Alaska company and we don't expect things to be easy."

Through video conferencing, students can take field trips without leaving their village, interact with highly qualified teachers regardless of location and collaborate with students across the globe. Rural patients have access to specialty doctors who can diagnose and treat ailments and are able to consult with physicians at larger hospitals.

## Foss Maritime vessels receive safety award

Chamber of Shipping of America has recognized 73 vessels of Foss Maritime and their subsidiary companies with the 2015 Jones F. Devlin award for outstanding safety records.

The Jones F. Devlin Award is one of two award programs CSA has sponsored since 1968. The award is given to self-propelled merchant vessels that have operated for two full years or more without a crew member involved in a lost-time incident. It publicly recognizes the skill and dedication of the men and women who are responsible for safe vessel operations.

The 73 Foss vessels were recognized at the CSA Annual Safety Awards Luncheon held this year on June 8 in New Orleans. Altogether, the Foss and subsidiary company vessels achieved the equivalent of 562 years of incident-free operation. Sixty-one vessels had five or more years, and 18 vessels boasted 10 to 22 years without a lost-time injury.

"This year, awards were conferred on 1,522 vessels that operated 10,084 years without a lost-time incident," said Kathy Metcalf, CSA president. "This extraordinary record is directly attributable to the professionalism of our seafarers and the dedication of shore-based company personnel to safe operation. These mariners are the frontline in ensuring the safe and environmentally responsible operation of the vessels on which they serve."

"Foss does not take safety lightly," said Paul Stevens, Foss president and CEO. "We carry a deep obligation to the safety of our people and the environment, and this is evident in everything we do. We're constantly improving and adding to our safety programs, training, resources and operations. We want every one of our valuable people to return home safely, and we do all that we can to make sure that happens."

A list of the vessels receiving the award is posted on CSA's website [www.knowships.org](http://www.knowships.org). Click on "Press Releases".

## The Nature Conservancy honors Palmer's Kim Sollien

If you live in Alaska's Mat-Su valleys, chances are you've met Kim Sollien on the trail with her three dogs, at the farmer's market, or at your local community council meeting. Your kids may have heard her teach hands-on lessons about streams and salmon at their school. From having coffee with community leaders in downtown Palmer to swinging hammers while building a new boardwalk, wherever Sollien goes, she carries a simple message with her: "Tell me about the special places you love in the Mat-Su and I'll tell you how we can work together to protect them."

KIM SOLLIE

Because Sollien's efforts are making a difference, The Nature Conservancy in Alaska is pleased to present her with the 2016 Susan Ruddy Community Conservation Award.

Sollien has been instrumental in Great Land Trust's campaign to secure permanent public access to Bodenbug Butte, a popular hiking destination with a commanding view of the Matanuska Valley. She has led Great Land Trust in creating new hiking and nature-watching opportunities in an area newly added to the Palmer Hay Flats State Game Refuge and worked with a number of Valley families to help them conserve their historic homesteads. Her sights are now set on creating a new coastal park near Settler's Bay.

The Susan Ruddy Community Conservation Award is dedicated annually to an individual who has worked to promote conservation in Alaska through forging successful partnerships and building consensus in local communities. The award honors the remarkable contributions of Susan Ruddy, the founding state director of The Nature Conservancy in Alaska and current president of the Alaska chapter's Board of Trustees. As an award recipient, Sollien serves a one-year term as an honorary trustee for The Nature Conservancy in Alaska.

## Crowley, AVTEC win grant to help Alaska students

Crowley Maritime Corp. assisted the Alaska Vocational Technical Center to win a three-year grant that will help students develop skills to successfully establish careers in the maritime industry.

AVTEC, with the help of Crowley's marine services group in Valdez, Alaska, serving as lead industry partner, won a Carl Perkins Post-Secondary Grant from the Alaska Department of Education & Early Development's Career & Technical Education Office. AVTEC, known as Alaska's institution of technology, will receive a grant of \$250,000 annually, renewable up to three years.

"Crowley is proud to again partner with AVTEC to provide opportunities for Alaskans in maritime careers. Our long history in Alaska's communities makes us uniquely qualified to support the development of job opportunities for students seeking sustainable careers," said Crowley's Rod Jones, general manager of Crowley's marine services group in Valdez.

AVTEC will use the grant to enhance its AVTEC Secondary

Training Academy, helping students earn the credentials necessary for licenses to work on maritime vessels. Crowley will continue to support AVTEC's young mariner program, which provides scholarships, work experience and career development information.

The company has funded scholarships to Alaskans attending AVTEC maritime training, as well as supported job training and employment of Alaska Natives.

## Fluor granted full notice to build power station

Fluor Corp. announced it has been granted full notice to proceed by Dominion Virginia Power to build its Greenville County, Virginia, power station. Fluor was awarded the contract by Dominion in April 2015 on a limited notice-to-proceed basis. Once completed, the combined-cycle, natural gas-fired power station will be the largest and most efficient natural gas-fueled power station in Virginia. Fluor booked an undisclosed value for the project in the second quarter of 2016.

"Fluor is proud to continue our valued relationship with Dominion and to move forward and begin this important next step on the Greenville County power station," said Chris Tye, president of Fluor's power business. "As with each of our projects, our team is committed to executing this project safely and with excellence. We also look forward to continuing our efforts to make a positive impact in the local community."

The 1,600-megawatt Greenville County power station will produce enough electricity to power 400,000 homes at peak demand. It is located on a 1,143-acre site on the Greenville and Brunswick County line in southern Virginia.

Fluor is currently designing and building the two largest gas-fueled combined cycle power plants under construction in the United States. As a leader in the gas-fired engineering, procurement, construction and commissioning business, Fluor has led the design and build of nearly 50,000 megawatts of gas-fueled power facilities over the past 20 years.

## Arctic Slope Regional Corp. announces acquisition

Arctic Slope Regional Corp. said recently that it is pleased to announce the acquisition of Builders Choice Inc. by its wholly owned subsidiary ASRC Construction Holding Co. LLC. Headquartered in Anchorage, Alaska, BCI was founded 20 years ago and is now Alaska's leading provider of customized modular solutions. The company serves a diverse group of customers, including state, local and federal government agencies, oil and gas producers and service providers, mining companies and residential real estate developers. In addition to its facility in Anchorage, BCI operates a manufacturing plant in Vermillion, South Dakota. In 2013, the company began selling building materials and engineered roof trusses from stores in Anchorage, Wasilla and Soldotna.

"On behalf of ASRC's board of directors, I am pleased to welcome BCI's employees to the ASRC family of companies," said Rex A. Rock Sr., president and CEO of ASRC. "This acquisition demonstrates ASRC's continued commitment to the state of Alaska. Despite the challenges posed by the current economic environment, ASRC believes Alaska's long-term future is bright."

"Today is an exciting day for BCI and its employees," said Mark Larson, BCI president and CEO. "I believe the combina-

tion of ASRC's financial support and relationships across multiple industries will provide opportunities for growth and expansion of BCI's products and services." Members of the BCI management team, including Mark and Sandi Larson, will maintain their respective roles post-acquisition. In his role as president and CEO of BCI, Mark will report to Doug Smith, president and CEO of ACHC.

## Arctic Catering shows support at United Way picnic

Arctic Catering & Support Services said June 7 that it recently provided more than \$3,000 worth of food and the cooking expertise of CEO Dave Gonzales and other senior personnel, to help make the 2016 United Way Appreciation Picnic a resounding success.

The event is held annually to honor the hundreds of local United Way volunteers, who help the organization make a difference in Anchorage. Four senior staff members at AC&SS assisted in serving and grilling food at the event, including Ean Aucoin, Matt Graham, Erich Muth and Eileen Simmons. In addition, Miranda Issacson from Sysco worked with the team.

"We've participated with United Way for several years in this event, as United Way truly makes a difference in our communities," said AC&SS CEO Dave Gonzalez. "It's important to us to give back to Alaskans, and volunteering is a key part of that."

Remaining food from the event was donated to Bean's Café, while vegetables and other food items were also donated to the Alaska Zoo.

## DRI and Bowhead to provide risk management course

Disaster Recovery Institute International and UIC's Bowhead Systems Management LLC have teamed up to provide a risk management course for business continuity professionals and other professionals looking for certification in risk management.

"It was a natural fit to combine Bowhead's risk management expertise with our business continuity experience and acumen," says DRI International President Al Berman. "As these disciplines converge within organizations, it is important for practitioners to expand their skill sets accordingly. So, this course and the certifications are exciting and necessary."

A recent student from a federal agency stated, "Overall, enjoyed the class and instructors. Would definitely recommend to peers and I would take additional, higher level courses." DRI Senior Director of Operations Traci O'Neal said, "Response to the course has been overwhelmingly positive. It's great to see the level of excitement around the topic, and the feedback we're getting just proves how much a course like this was needed." The next course is scheduled for early August in Anchorage. For more information and to register for the course visit: <http://www.bowheadsupport.com/drii/>.

## aeShield selected by BP for all upstream facilities

aeSolutions, the leader in process safety engineering and automation, said July 18 that after a three-year software evaluation

period, BP has selected aeShield to assist asset personnel in monitoring control, alarm and safety instrumented systems performance for all upstream oil and gas assets around the globe. To date, it has been a challenge to automate the monitoring of these devices due to the lack of common systems in place across BP's facilities.

By using aeShield, BP will achieve centralized reporting, standard enforcement consistent with internal procedures, reduced man-hours, monitored IPLs and efficient management of change tracking. During initial rollout, BP will focus on HAZOP/LOPA studies, safety requirements specification, SIL verification, and IPL performance monitoring.

aeShield provides key performance indicators. The software seamlessly transfers data from the HAZOP/LOPA, to SIS design and verification, and into operations and maintenance activities. This contiguous data model simplifies monitoring protection layer, both SIF and IPL performance against assumptions made during the initial risk assessment and design versus current real world performance.

aeSolutions started designing aeShield after realizing the one thing that would ultimately improve the process safety of the process industry was a database-driven safety lifecycle platform created for engineers by engineers. aeShield enables users to cost effectively maintain their entire process safety lifecycle documentation in an evergreen fashion. For more information visit [www.aeshield.com](http://www.aeshield.com).

## Polyguard welcomes 22 to employee ownership

Polyguard Products Inc. said it recently held its 29th annual employee stock ownership plan dinner at Winding Brooks event venue where 22 new employees received their first account statement.

Polyguard's ESOP is a broad-based ownership plan where employees become owners with no out-of-pocket contribution of their own. Polyguard is a 100 percent employee-owned ESOP and currently has two ESOP millionaires working with the company, with that number expected to grow in the coming years. An ESOP is a retirement plan which is in addition to the 401(k) and matching contribution already offered by the company. Its value is based on the stock price of the company, which is up 340 percent since 2010. This year's ESOP contribution is roughly 20 percent of eligible employees' salaries.

"Polyguard's ESOP allows us to create a culture based on teamwork and pride," Polyguard President Shawn Eastham said. "All the employees get a chance to share in the success of the company. Our employees act like owners because they are owners."

Polyguard, with 23 consecutive years of sales growth, currently employees 12 owners who own 1 percent or more of the company and has more than 100 total employee owners.

Polyguard's ESOP began in the mid-1980s after John and Kathy Muncaster bought the company and wanted to build the type of culture where employees have a direct impact in not only their own personal success but also that of the company.

## PND announces Anchorage staff professional achievements

PND Engineers Inc. recently said it is pleased to announce Anchorage staff professional achievements for Alexandra West,

Corey Roche and Feifei Bai.

West and Roche have obtained professional engineer registrations from the state of Alaska. Both are lifelong Alaskans and graduates of the University of Alaska Anchorage with bachelor's degrees in civil engineering.

West specializes in hydrology and hydraulic projects consisting of field work, desktop analyses and hydraulic design of bridges, culverts, erosion control, site drainage, miscellaneous drainage structures, and fish passages.

Roche's engineering duties have been primarily in the areas of structural/civil design, inspection, construction administration and material testing. Prior to his engineering career he worked as a certified welder and heavy equipment operator for 6 years in remote Alaska.

Bai recently passed the NCEES structural exam and now is a registered structural engineer for the state of Alaska. The 16-hour national SE exam tests the engineer's ability to practice structural engineering competently and covers broad topics relevant to structural engineers exclusively. The exam includes separate vertical and lateral components to test the engineer's ability to safely design buildings and/or bridges, especially in areas of high seismicity and high wind. Bai passed the vertical component in April 2015 and lateral component in April 2016 as a first-time exam taker. Bai joined PND in 2007 after earning a master's degree in civil engineering from the University of Alaska, Anchorage. She recently transferred from the firm's Anchorage office to the new Houston location and continues to support Alaska projects. Bai currently holds professional engineer licenses in Alaska, California and Texas.

ALEXANDRA WEST

COREY ROCHE

FEIFEI BAI

"Having our employees and senior staff take the lead in community support fundraisers like the AWAIC tournament is an excellent way for us to give back."

## AECOM's Rich Kleinleder receives 2015 NMFS award

AECOM, a premier, fully integrated global infrastructure firm, said Aug. 3 that it is proud to announce Rich Kleinleder was selected as a recipient of the 2015 National Marine Fisheries Service Team Member of the Year Award. Team Member of the Year award recipients are honored for their outstanding contributions in advancing the NMFS mission. Kleinleder was recognized by his peers in the program management, scientific and technical category.

Kleinleder is a senior biologist who has more than 35 years of experience with all aspects of wildlife research throughout Alaska. Since 2009, he has served as project manager for the NMFS regional fisheries science center environmental compliance project. In this role, Kleinleder is responsible for coordinating with each of the six regional fisheries science centers and numerous other NMFS offices and contractors to develop programmatic environmental assessments and applications for letters of authorization under the marine mammal protection act for each center.

"Rich's award is further recognition of his tireless efforts of being an extraordinary team player and showing outstanding leadership," said AECOM's Joe Hegna, Alaska operations manager and vice president. "His hard work has paid off tremendously and we are proud of his many accomplishments."

## Reliance Steel acquires Alaska Steel

Reliance Steel & Aluminum Co. said Aug. 2 that it has acquired all of the capital stock of Alaska Steel Co., a full-line metal distributor headquartered in Anchorage, Alaska. Alaska Steel will operate as a fully owned subsidiary of Reliance's American Metals Corp., with current management in place. Terms of this transaction were not disclosed.

Alaska Steel houses the largest on-hand inventory in Alaska and offers both same-day and next-day delivery from its three facilities in Anchorage, Fairbanks and Kenai. The company provides steel, aluminum, stainless and specialty metals and related processing services, and caters to a wide range of customers in diverse industries including infrastructure, energy and mining throughout Alaska.

## aeSolutions develops training and certificate program

aeSolutions said it worked throughout 2015 with the International Society of Automation to develop their new ISA/IEC 62443-based cybersecurity training and certificate program [www.isa.org/CYBERCertificate](http://www.isa.org/CYBERCertificate). The program is designed to help professionals involved in industrial IT and industrial control systems improve their understanding of, and acquire a command of the principles covered in, the ISA/IEC 62443 series of standards. These standards apply to all key industry sectors and critical infrastructure, providing students with the knowledge to identify and mitigate vulnerabilities in industrial automation and control systems.

## Arctic Catering lends resources to AWAIC tournament

For the fifth year in a row, Arctic Catering & Support Services sponsored a team in AWAIC's Drive Out Domestic Violence Golf Tournament, and the event photography for the tourney.

AC&SS' team was an all-female group, led by long-time Executive Director Client Solutions Eileen Simmons. The tournament is funded 100 percent by sponsorships, and raises money for victims of domestic violence and their children.

The tournament raised \$30,000 in support of the shelter, from 68 golfers and sponsors. Funds are used to provide a safe place for those in imminent danger of domestic abuse. The shelter generally runs at or over capacity, with an average daily population of 50, providing services to more than 700 individuals annually.

The winning team in the tournament was Bristol Bay Native Corp.

"We are pleased to support events like this that address a serious need in our community," said AC&SS CEO Dave Gonzalez.

The entire program consists of four training courses. The fundamentals course is two days in length. Additional three-day courses take deeper dives into risk assessment, design and maintenance. All the courses include extensive high-quality hands-on labs. After attending each course, students may take an exam to demonstrate their command of the material. Students taking all four courses, and passing all four exams, are allowed to use the title ISA/IEC 62443 cybersecurity expert.

"It was an honor for me and my team to work with ISA, to fulfill our mutual vision to develop a practical, standards based curriculum, that will quickly enable industrial IT and automation professionals with the knowledge and skills needed to protect their companies ICS systems. I am particularly thankful to the ICS vendors who provided ISA with hardware, software and support to make the hands-on labs extremely realistic," said John Cusimano, aeSolutions' director of industrial cybersecurity.

Patrick Gouhin, executive director and CEO of ISA, expressed his appreciation to aeSolutions and stated, "You truly employ world-class subject matter experts that are shaping the future when it comes to ICS cybersecurity knowledge."

## ASRC announces subsidiary management changes

After five years as president and CEO of ASRC Energy Services Jeff Kinneveauk has tendered his resignation. Jeff's last day with AES was Aug. 19. "On behalf of Arctic Slope Regional Corp.'s board of directors, I thank Jeff for his service to the corporation and wish him all the best in the future," said Rex A. Rock Sr., president and CEO of ASRC.

Concurrent with Jeff's resignation, ASRC is pleased to announce a series of subsidiary management changes. Doug Smith, president and CEO of Little Red Services and ASRC Construction Holding Co., will assume the role of president and CEO of AES effective Aug. 19. Prior to being the CEO of LRS and ACHC, Smith was a vice president and business unit manager of AES. Smith is active within the oil and gas industry, serving on the boards of the Alaska Support Industry Alliance and the Resource Development Council.

Joe Curgus, the long-time vice president of operations for LRS, will take over as president and CEO of LRS concurrent with Smith's transition to AES. Curgus has been an essential member of the LRS team for more than 30 years and has played a critical role in the successful transition of the company into the ASRC family of companies. He is respected throughout the Alaska oil and gas industry as an engaged customer-focused executive.

Brady Strahl, the current president of ASRC SKW, will take over as president and CEO of ACHC. Strahl has been with the ACHC family of companies since 2009. He has been a key member of ACHC leadership and has been instrumental in improving ACHC's financial and project performance over the past two years. Strahl graduated from Gonzaga University in 2003 and was an Alaska Journal of Commerce Top 40 under 40 award recipient in 2008.

DOUG SMITH

## The Nature Conservancy elects new trustees

The board of trustees of The Nature Conservancy in Alaska is pleased to announce the election of two new trustees. The board elected J. Michael Johnson and Greta Schuerch at recent meetings.

J. Michael Johnson of Alamo, California, is former executive vice president and group head of Wells Fargo's Corporate Banking Group. He has more than 35 years of experience in finance, commercial real estate, investment management and capital markets. He also serves on The Nature Conservancy's California leadership council.

Greta Schuerch of Kiana, Alaska, is external and government affairs liaison for NANA Development Corp. Her professional experience includes roles with the Alaska Legislature, Inuit Circumpolar Conference, the Alaska Humanities Forum and the North Slope Borough. She has comprehensive knowledge of rural issues and extensive experience in Northwest Arctic Borough communities.

The newly elected trustees join the Alaska civic, business and academic leaders who currently serve on The Nature Conservancy's Alaska Board of Trustees, which guides the nonprofit organization's conservation and fundraising.

Since 1988, The Nature Conservancy has worked in diverse partnerships to create innovative solutions to natural resource challenges all across Alaska. The state's salmon streams, forests and coasts - as well as the people who rely - have all benefitted from conservancy projects.

## Crowley's Evans promoted to VP of strategy

Setting its sights on future growth opportunities, Crowley Maritime Corp. announced Aug. 15 that veteran company executive Eric Evans has been promoted to vice president of strategy, a newly created position that will focus on facilitating long-term growth through external business partnerships, including mergers and acquisitions.

Evans, who most recently served as vice president of finance and planning for several of the company's business units, will continue to be based in Crowley's Jacksonville, Florida, headquarters. He will report to Carl Fox, senior vice president of corporate services, and will have strong functional ties to John Calvin, senior vice president and controller, as well as the finance teams within each of the company's business units. The project management organization, which is focused on analysis and strategy execution, will report to Evans.

Evans joined Crowley in 1987 in Seattle as an accountant and manager of management reporting for 11 years, supporting the West Coast businesses and taking various short-term assignments in Saudi Arabia and Puerto Rico. In 1997, he took an assignment as administrative manager in Caracas, Venezuela, for

J. MICHAEL JOHNSON

GRETA SCHUERCH

ERIC EVANS

Crowley's oilfield logistics company and was there for two years. Evans moved to Jacksonville to serve as the projects manager and finance director from 1999 to 2001 for Crowley's contract services and international operations, then moved to Seattle in a similar role. He was presented the Thomas Crowley Award, the company's highest honor, in 2004 and moved back to Jacksonville in 2009 to support Crowley's petroleum services, technical services, and petroleum distribution and marine services business units. He was promoted to his most recent position as vice president of finance and planning in 2010.

Evans graduated from the University of Pennsylvania's Wharton School in 1987 and is a Washington state CPA.

## Doyon Foundation receives language revitalization grant

As reported on newsminer.com Sept. 5, the Doyon Foundation received a \$900,000 grant to revitalize five Athabaskan languages through online education, according to a Doyon Foundation news release.

The Native American language preservation and maintenance grant was awarded by the Administration for Native Americans, which is a nonprofit group with a mission to promote self-sufficiency in cultural preservation.

"We are humbled and grateful to have been awarded in a highly competitive selection process. This news is very exciting, and this project will be a huge assist to those wanting to teach and learn their ancestral language," said Allan Hayton, director of the foundation's language revitalization program, in the news release.

The Doyon Foundation will use the grant money to create 280 online lessons in the next three years. The courses will be to readily available to educators and students throughout Alaska.

The online courses will be created through a partnership with the nonprofit group 7,000 Languages, which has a mission of preserving languages throughout the world.

The Athabaskan languages Holikachuk, Denaakk'e, Benhti Kenaga', Hän and Dinjii Zhuh K'yaa will be the focus of these online courses. The foundation's end goal is to create online lessons for all languages used in the Doyon region of Alaska and Canada.

"As Native people, our languages are part of our identity and are very precious to us. Our children, grandchildren and great-grandchildren deserve to have the opportunity to learn their language," the foundation's executive director, Doris Miller, said in the release.

Established in 1989, the Doyon Foundation is a nonprofit arm of Doyon Ltd.

## Bell seeks to hire civil engineer, land surveyor

F. Robert Bell and Associates, a full-service engineering and surveying firm in Anchorage, Alaska, is searching for qualified candidates to fill two positions in the Anchorage office.

Bell said it is currently seeking a licensed and experienced land surveyor to fill a supervisory role. That person would manage all aspects of the company's surveying department including field personnel and technical staff. The successful candidate will be highly proficient with Trimble Business Center, AutoCad Civil 3D, Leica total stations and Trimble GPS. Bell is looking for

someone with plus or minus 10 years of progressive experience in surveying field work, office work and project management, preferably in the Anchorage area, who can put together successful proposals and bids. The candidate should have strong written skills, with relevant experience in proposal writing and cost estimation.

For more details: <http://bellalaska.com/professional-land-surveyor/>

Bell said it is expanding operations in Anchorage and is recruiting for a professional civil engineer to manage and be responsible for leading project planning and scheduling, construction document preparation, permitting, client communication and supervision of civil engineering project technical staff. The company said candidates should have strong electronic design skills, preferably Civil 3D, and civil engineering design skills related to site planning, grading, utility systems, stormwater management, sanitary sewer and water main design and roadway improvements. Bell said the ideal candidate will hold registration as a professional civil engineer in the state of Alaska, or be able to obtain registration within 12 months.

For more details: <http://bellalaska.com/professional-engineer-civil/>

## Foss receives 2016 American Maritime Safety Award

American Maritime Safety recognized Foss Maritime's efforts in building and maintaining a strong culture of safety by awarding the company the American Maritime Safety Award for the implementation and management of zero-tolerance drug and alcohol policy.

Foss will be presented with the award at the 2016 Annual Membership Meeting and Safety Awards Luncheon on Oct. 13.

"Foss has a long history of leading the industry in safety and innovation, and we are honored by this recognition of our drug and alcohol policy," said Foss President John Parrott. "Our primary concern in all that we do is to keep our employees, equipment and the environments in which we operate safe. We do this with robust safety programs and systems, a constant commitment to improving our reporting and methods, and our relentless push to zero lives lost."

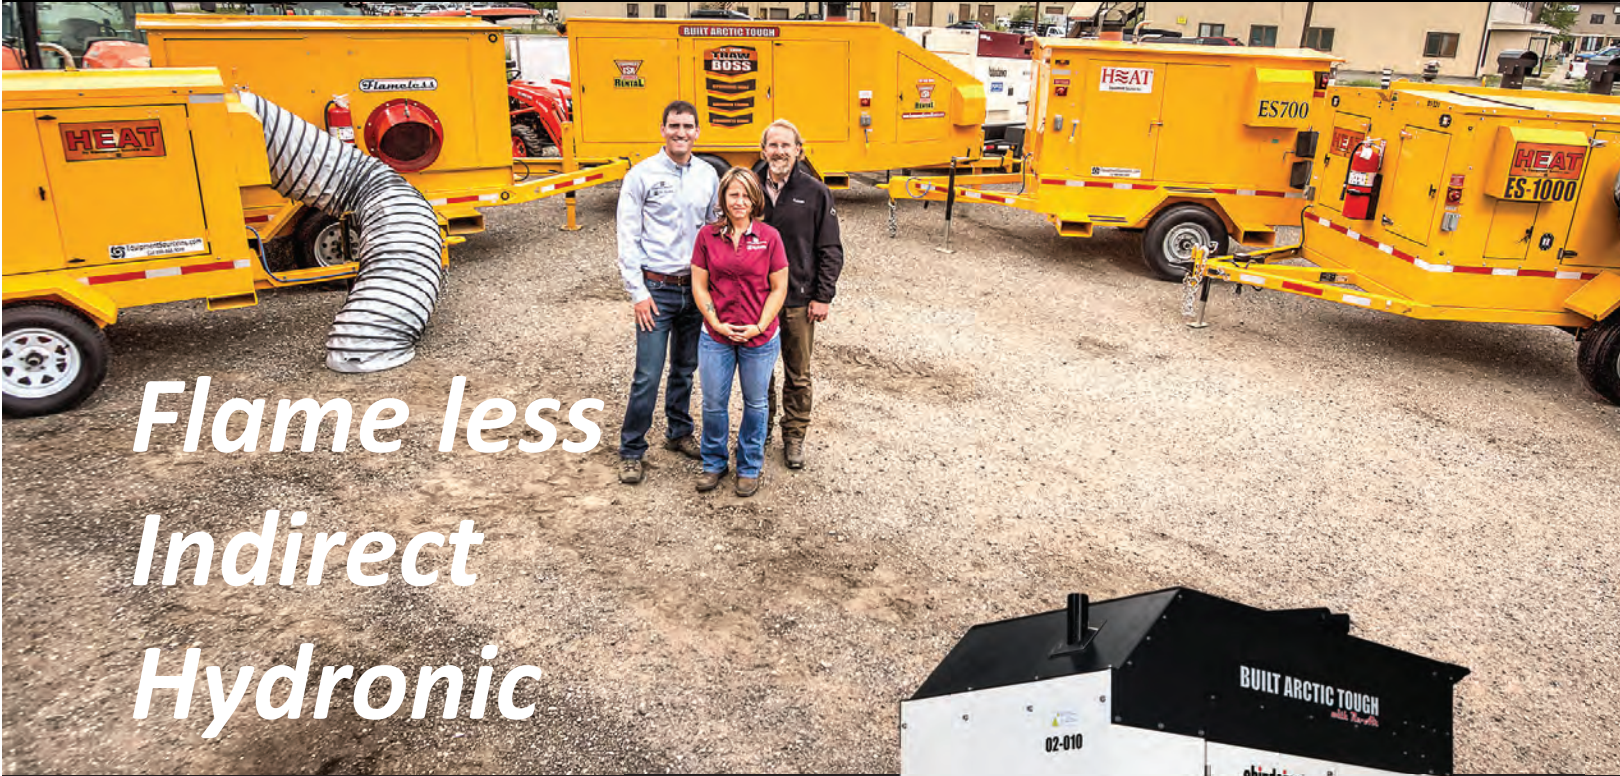

Foss' policy, which was updated in 2015, addresses the concerns of opioid abuse and other addiction issues, the legalization of marijuana in many states, and the reasons a zero-tolerance stance is essential to the company's safety initiatives, and in meeting increasing customer demands and regulations.

"For decades Foss has built a strong reputation of being always ready," said Foss CEO Paul Stevens in a recent video to employees about the policy. "In more recent years we've added always safe. One way that we deliver on this commitment is by upholding a drug and alcohol policy that keeps employees and equipment safe and ready for whenever we report to work."

American Maritime Safety is a non-profit maritime trade association that facilitates the maritime industry's compliance with international shipping protocols and U.S. Coast Guard regulations. AMS annually recognizes companies that uphold a commitment to manage and operate vessels that are environmentally efficient, safe and dependable, as well as promoting responsible maritime work practices.
