## OIL & GAS DIRECTORY

Vol. 2, No. 1 Released May 2013

A semi-annual supplement

# Want to be a part of this oil and gas directory?

*Qualified Petroleum News Bakken advertisers have full access to all the benefits included in this biannual magazine to reflect its content and extensive distribution. Those benefits include the following:*

- **Exposure.** The Bakken Oil & Gas Directory is distributed twice a year to every Petroleum News Bakken newspaper subscriber, in addition to being displayed at trade shows and conferences.
- **A company profile.** A full page, full color Q&A profile of your company. You'll be involved in the editing and choose the pictures. Once it's printed, you own the piece and you'll receive an electronic copy to use as a company brochure or however you see fit.
- **Access to free news coverage.** Submit announcements, new hires, special projects, new technologies, company photos, and more. Let current and potential new clients keep track of your company's milestones.
- **Unique company listings.** With over 130 categories to choose from, you'll be able to list your company name, contact information and a brief description of the products and services you offer.
- **Additional opportunities** to feature your company and its people – including feature stories, photo spreads, cover shots, and more.

**Get listed and be noticed.**

Allstate Peterbilt of Williston's new full-service facility

# 18 Locations. One goal. To provide the best trucks, parts and service in the industry.

*Serving fleets and owner operators for over 40 years.*

Q. What is the official name of your company?

A. Allstate Peterbilt Group

Q. Is your firm a subsidiary or affiliate of other companies? If so, please name those firms and their relationship to your company.

A. We are a dealer group with 18 locations owned by WD Larson Companies, LTD.

Q. What do you most want people to know about your company?

A. We are suppliers of heavy and medium duty truck parts, as well as sales and service.

Q. Where is your company located?

A. We have locations in Minnesota, North Dakota, South Dakota, Wisconsin and Ohio.

Q. What year was the company

founded and by whom?

A. Allstate Peterbilt Group was founded in 1971 by Don Larson.

Q. What is your company's primary business activity?

A. Peterbilt truck dealerships.

Q. Are there important projects the company is currently a part of or has done recently?

A. We are expanding in North Dakota, and have recently added full-service dealerships in Williston and Dickinson, as well as a parts location in Grand Forks.

Q. How many employees does your company have?

A. We have over 700 employees across all locations.

Q. Is your company expanding any of

its operations or locations?

A. Yes, we are continuously expanding as the demand for Peterbilt trucks increases.

Q. Is the company changing any of its services or products?

A. We are expanding our services to oil field industries in the Dakotas and Ohio. We recently moved and upgraded our Allstate Peterbilt facility in Williston just 4 miles north of town. The new 25,000 sq. ft., 6-bay dealership now offers service and truck sales in addition to an expanded parts inventory. They've got the best driver amenities around, including men's and women's locker rooms, laundry and a comfortable driver's lounge. We also opened a new parts-only location in Grand Forks. Allstate Peterbilt of Grand Forks is our 18th Midwest store and our 5th in North Dakota. The store

**QA**

has a huge inventory of OEM and after-market parts for medium and heavy duty trucks and trailers. They are located just off I-29 in Grand Forks.

Q. What is your company's main strength or its edge over the competition?

A. Allstate Peterbilt is a one stop-shop for all your trucking needs: sales, parts, service and financing. We have over forty years of experience supporting the entire Peterbilt line of products. We also offer other trusted brands such as Utility trailers, Jet trailers, Hino trucks, Ford trucks and Ottawa yard tractors.

Q. What new markets, clients or projects did your company attract in the last year?

A. Strategic partnerships in the oil field, refuse and truck mounted concrete mixers.

Q. Have you received any industry awards or recognition?

A. Yes. We were awarded the Peterbilt North American Dealer of the Year Award for 2012, Parts and Service Dealer of the Year Award for 2011 (Allstate Peterbilt of Fargo) as well as the PACCAR MX Dealer of the Year for 2011. These awards reflect our commitment to customer service.

Map of locations - Allstate Peterbilt Group is the Upper Midwest's largest truck dealer group.

Q. What is the most challenging work/contract the company has undertaken?

A. Expanding to provide true online parts purchasing capability.

Q. What do you see as your company's biggest challenge in the next five years?

A. Recruiting highly skilled personnel to offer best in class service.

Q. Does your company have an anniversary or other landmark event coming up?

A. The launch of the new Peterbilt model 579 & 567 at the Mid-America Trucking Show this year.

Q. What is the average length of time employee's work for the company?

A. Many of our employees have been with us for over 15 years.

Q. Has your company been involved in any community projects or charity events?

A. We are a primary sponsor of the "Toys for Tots" program and donate trailers for use in community food drives. Our Cleveland location has done fundraising for "Trucking for a Cure" in support of breast cancer treatment and awareness.

Q. What is the address of your company's website?

A. [www.allstatepeterbilt.com](http://www.allstatepeterbilt.com)

Groundbreaking for Allstate Peterbilt of Dickinson. Left to Right: Gary Klein, General Manager; Don Larson, Owner; Jeff Vanthournout, President; Matt Vanthournout, Manager of Strategic Development; Steve Mikkelson, Service Manager Fargo.

# Ameritest Inc., supplying the finest personnel and equipment for every BAKKEN application

*Representing the most experienced core of personnel available for Bakken flow-back and well testing.*

Q. What is the official name of your company?

A. Ameritest Inc.

Q. What do you most want people to know about your company?

A. We are a premium flow-back services company based in North Dakota and Montana.

Q. Where is your company located?

A. Minot, ND and Sidney, MT.

Q. What year was the company founded and by whom?

A. Founded in 2010 by Don Klisowsky and Sherman Reeder on behalf of Board of Directors of Testalta Services Ltd.

Q. What is your company's primary

business activity?

A. Shale formation "green" flow-back and production testing and related services.

Q. How many employees does your company have?

A. We currently have 80 employees.

Q. Describe the equipment your company uses and are there any new equipment purchases planned?

A. Ameritest Inc. supplies high volume portable 4 phase separation equipment with sand traps, specialized ball and junk catchers, and all associated equipment for any type of flow back, drill out, and or clean-out activity. Ameritest Inc. is continuing to grow and adding equipment and personnel on-going.

Q. Is your company expanding any of its operations or locations?

A. We would like to expand our current geographic area and will as personnel come available...perhaps to Ohio. Service offices in Minot, ND and Sidney, MT service the entire area of the Bakken formation where we are currently focused.

Q. Is the company changing any of its services or products?

A. Not at this time.

Q. What is your company's main strength or its edge over the competition?

A. Ameritest Inc. has a world class HES system and Safety is a key driver. Additionally the company maintains 85 percent, plus local employees and is focused

# QA AND

COURTESY BRIAN ADAMS, SITE MANAGER, AMERITEST

COURTESY RICK FLADELAND, FIELD SUPERINTENDANT, AMERITEST

COURTESY DAN WITTON, SITE MANAGER, AMERITEST

on training local personnel. Our people are our greatest asset and we maintain the highest standard for training and expectations in North Dakota and Montana. The Management team at Ameritest Inc. has been in the Bakken now for almost 7 years or from the very beginnings of the Bakken formation development.

Q. What new markets, clients or projects did your company attract in the last year?

A. Our primary clients are Hess Corp. and XTO. Ameritest Inc. has maintained a contract with Hess since the companies inception and is currently looking to fur-

ther expand its customer base.

Q. What is the most challenging work/contract the company has undertaken?

A. Ameritest Inc. is up to any challenge and none have been beyond our scope. The equipment is designed for anything the Bakken can dish out and the management team has a combined experience of over 60 years in production testing and flow-back.

Q. What are the biggest obstacles to completing work your company undertakes?

A. The greatest obstacle is always qualified and or suitable staff. Training takes time and there is little in way of local experience traditionally so a great deal of our focus is on training this generation of Flow Back Service people.

Q. What do you see as your company's biggest challenge in the next five years?

A. Again it is personnel...recruiting and retention of local qualified people.

Q. Does your company have an anniversary or other landmark event coming up?

A. March 27th we enter our 4th year of operations.

Q. What is the average length of time employee's work for the company?

A. Two plus years.

Q. What is your company's safety record? What steps does the company take to ensure a safe work environment?

A. Ameritest Inc. is an IS Networkworld data provider and maintains "A" ratings with most of our clients. Safety is the number one point in our guiding principles as a company. The standards we maintain in training are world class and we employ a Safety Professional as our Director of HES. We believe that a service company is all about your people...and peoples' safety comes first.

Q. Has your company been involved in any community projects or charity events?

A. We support a lot of local activities but do not blow our horn about them.

Q. What is the address of your company's Web site?

A. [www.ameritest.us.com](http://www.ameritest.us.com)

# CESI Chemical Inc.'s state-of-the-art Complex nano-Fluid™ suite of chemistries improves drilling economics

*Company offers a full-spectrum of specialty chemicals for stimulation and cementing*

Q. What is the official name of your company?

A. CESI Chemical, Inc.

Q. Is your firm a subsidiary or affiliate of other companies?

A. CESI Chemical Inc. is a Flotek Industries Inc. company. Flotek Industries Inc. is a diversified global supplier of drilling- and production-related products and services to the energy and mining industries. Flotek is headquartered in Houston. FLOTEK was originally incorporated under the laws of the Province of British Columbia on May 17, 1985. On October 23, 2001, we approved a change in our corporate domicile to the state of Delaware and a reverse stock split of 120 to 1. On October 31, 2001, we completed a reverse merger with

Q. What do you most want people to know about your company?

A. Our patented environmental Complex nano-Fluid™ technology provides improved economics for the oil and gas operator by lowering the interfacial surface tension and improving the conductivity of the frac process, thus increasing production.

Q. Where is your company located?

A. We manufacture in Marlow, Oklahoma. Research & Development is located in Houston, Texas.

Q. How do your people make a difference in your company?

A. Among our manufacturing and R&D personnel, we have literally hundreds of years of combined expertise in our industry, many employees having begun their industry experience in the early 1980's.

Dry chemical storage tanks at Marlow facility. Photo by CESI Chemical, Inc.

COURTESY CESI CHEMICAL INC.

COURTESY CESI CHEMICAL INC.

CESI Chemical Manufacturing & Technical Support, Marlow, OK. Photo courtesy Cesi Chemical Inc.

Q. What is your company's primary business activity?

A. Stimulation, Drilling, Cementing, Production and IOR Chemicals and Technology

Q. Are there important projects the company is currently a part of or has done recently?

A. Expanded Research and Manufacturing facilities.

Q. Is your company expanding any of its operations or locations?

A. New Joint Venture in Oman to construct an advanced oilfield chemistry production facility and create a state-of-the-art research and development organization to address the growing need for advanced oilfield chemistry and analysis in the Middle East and North Africa. Under the terms of the Agreement, Flotek will own 60 percent of two new Omani-registered limited liability companies: the first, a chemical production company that plans to construct a production facility - with capabilities similar to the Company's current facility in Marlow, Oklahoma; and the second, a research and development laboratory that will focus on the application of Flotek's leading oilfield chemistries to the challenges of drilling, completion and production in the Middle East and North Africa. Flotek and Gulf Energy will jointly market the products and services of the Company along with Flotek's international marketing partner, Basin Supply Company.

Q. What is your company's main strength or its edge over the competition?

A. Patented Complex nano-Fluid™ Chemical Technology

Q. What new markets, clients or projects did your company attract in the last year?

A. Attracted enhanced oil recovery, near well bore technology.

Q. What do you see as your company's biggest challenge in the next five years?

A. International expansion, acquiring qualified personal and patented product development.

Q. What is your company's safety record? What steps does the company take to ensure a safe work environment?

A. Eighteen months and counting- no recordable OSHA reported incidents.

CESI operates from a comprehensive compliance program that consistently exceeds regulatory requirements.

Q. Has your company been involved in any community projects or charity events?

A. Toys for Tots, through our annual Toy for Tots Breakfast, we gathers toys each December to bring some happiness to needy children in the Houston area; Wreaths Across America, a non-profit organization dedicated to honoring and thanking our veterans for their service and sacrifice; Dallas Casa; Red Cross; St. Jude's Children Hospital; and sponsoring local under privileged athletic teams, as well as, other local charity work.

Q. What is the address of your company's Web site?

A. [www.flotekind.com](http://www.flotekind.com)

W. F. MCCARTHY, E3 ENVIRONMENTAL, LLC 2009

E3 Environmental, LLC offers environmental inspection services to facilitate compliance through construction and final restoration.

E3 Environmental, LLC provided environmental permitting support to site this gas processing plant located near Watford City, ND. This plant required ND Public Service Commission approval.

W. F. MCCARTHY, E3 ENVIRONMENTAL, LLC 2011

# E3's enhancing execution with experience sets it apart from the rest

*Staff has decades of combined experience covering hundreds of facilities throughout US*

Q. What is the official name of your company?

A. E3 Environmental, LLC. E3 stands for Energy, Environment, Experts.

Q. What do you most want people to know about your company?

A. Environmental regulations are here to stay and unfortunately they do not remain static, changing frequently and adding uncertainty to a project. E3 is an environmental consulting firm that is focused exclusively on the energy industry. In this industry, at the pace that projects are developed, the logistics and engineering required, not to mention the financial considerations, all of which is coupled with the performance expectation that has no tolerance for failure; you need E3 on your project team. I think our tag line "Enhancing execution with experience" says it all.

Q. Where is your company located?

A. Our main office is located in St Paul, Minnesota, with project offices strategically located in North Dakota in the

towns of Dickinson and Crosby.

Q. What year was the company founded and by whom?

A. William "Bill" McCarthy founded the company in September, 2009.

Q. What is your company's primary business activity?

A. Environmental consulting to the energy industry; providing environmental compliance support from the well head to the burner tip. Our services include siting of pipelines, gas processing plants and related facilities, construction permitting, environmental inspection services, and compliance documentation and reporting. We provide environmental support services for new projects as well as operating assets.

Q. Are there important projects the company is currently a part of or has done recently?

A. 2012 was a busy year for E3 with a good amount of work associated with projects located in North Dakota and

Montana all of course associated with the Bakken. We were involved with several projects that required North Dakota Public Service authorization. In each of these cases we coordinated all of the required field surveys and agency consultations and then prepared the application, provided expert testimony at the public hearings all necessary steps to gain PSC authorization to construct. These projects included the siting of NGL transmission pipelines for ONEOK Rockies Midstream, L.L.C. and Hess; two separate crude line projects for Plains All American, L.P.; and a major relocation of Magellan's existing pipelines. In addition to the pipeline work, in 2012 we compiled the PSC application for ONEOK Rockies Midstream's Garden Creek 2 natural gas processing plant located near Watford City.

We also worked a fair amount on upstream projects, providing permitting services for several hundred miles of gathering pipelines and associated well tie-in projects. On these types of projects we typically provide environmental over-

sight for clients that include securing the necessary permits, approvals and compliance documentation. While it is true that gathering lines are relatively “lightly” regulated from an environmental perspective they are not unregulated. For example, many of these installations occur on federally managed lands by agencies including US Forest Service, US Army Corps of Engineers, and Bureau of Land Management. These activities will trigger some form of National Environmental Policy Act review and E3’s services include NEPA compliance support.

Beyond the Bakken, E3 provides environmental compliance support for a wide range operating energy assets, these services include the typical air, water and waste reporting and documentation for various midstream and local distribution firms. E3 does a good amount of business by providing environmental compliance support to pipeline integrity programs; this is due to E3’s customized approach which is ultra-responsive, accurate and budget sensitive.

**Q.** How many employees does your company have?

**A.** We are a rapidly growing firm; we have 17 full time technical employees and several more contract and part-time personnel. As with anybody working in the Bakken today, E3 is actively recruiting for several positions that remain open, so I encourage your readers to apply.

**Q.** Is your company expanding any of its operations or locations?

**A.** In 2012 we added a job office in Crosby, ND. This was in response to an upstream project awarded mid-year to E3 that has the potential to span a number years. We are currently in the process of evaluating office locations to support clients active in the Marcellus, Eagle Ford and Mississippi Lime plays. Many of the environmental services that we offer can be performed some distance from the actual project area. The majority of the permitting is conducted from our main office allowing our local offices to provide field services.

**Q.** Is the company changing any of its services or products?

**A.** No changes, rather expanding our service offerings in two key areas. First environmental inspection, our clients re-

alize the value that trained environmental professional can bring to a project when under construction and have with increasing frequency asked E3 to provide this service. In response to this demand we anticipate adding up to five new full time employees to our payroll in 2013. We have also witnessed increased interest in our emergency response planning services.

**Q.** What is your company’s main strength or its edge over the competition?

**A.** As the owner of the company, I would say it is my employees. E3 is comprised of a staff of environmental professionals that are all extremely sharp, dedicated and they take their various roles on any given project to heart exhibiting the pride of ownership in the work that they perform on the projects which they support. I am very selective when it comes to hiring new talent and work diligently to seek out the best and the brightest personnel in the business. Beyond the quality of the staff that we have assembled, our size and structure also sets E3 apart. We are still a relatively small organization and clients recognize the benefits that a smaller, streamlined organization can bring to project that larger firms just can’t duplicate particularly in terms of responsiveness and lines of communication.

**Q.** What new markets, clients or projects did your company attract in the last year?

**A.** In 2012 most of our growth was organic, internal referrals within organizations that we were already under contract. I believe this speaks well of the services that we delivered. This resulted in geographic expansion of servicing offerings, notably into Texas, Oklahoma and Kansas.

**Q.** What is the most challenging work/contract the company has undertaken?

**A.** Every project that we have been involved with has had a very aggressive schedule and I do not see that changing anytime soon. Your readers might be interested to learn that one of our more successful endeavors recently involved the USFWS and the conservation easements that they hold on wetlands. E3,

working with the USFWS and our client designed the project in a way that avoided impacting these features which saved the project well over 18 months of potential regulatory delays.

**Q.** What are the biggest obstacles to completing work your company undertakes?

**A.** Agency responsiveness or the lack of it, which I believe is primarily due to the workload that these public servants are attempting to manage with limited staff and shrinking budgets. In today’s political environment and public fiscal policy it is increasingly important to compile clear, concise and complete permit applications to avoid unnecessary delays.

**Q.** What do you see as your company’s biggest challenge in the next five years?

**A.** Maintaining the corporate culture and office environment that we created when we started the company as we continue to grow. We will continue to take a deliberate and pragmatic approach to our growth to nurture the culture that our staff and clients have to come to know.

**Q.** What is your company’s safety record? What steps does the company take to ensure a safe work environment?

**A.** Thus far E3 has maintained a perfect “no loss work” record. We have safety training courses that all staff are required to orient to when first hired and then again on an annual basis. We also reinforce our “safety first” corporate policy via a safety related message that is incorporated into all staff meetings and functions. E3’s personnel also participate in all project specific training when deployed onto a project site or to a client’s operating facility.

**Q.** Has your company been involved in any community projects or charity events?

**A.** In 2012, E3 made charitable cash donations to Big Brothers and Sisters Program and to the Friends of Lostwood National Wildlife Refuge. The later donation was earmarked for habitat improvements for migratory birds and to support education program targeting school aged children.

**Q.** What is the address of your company’s Web site?

**A.** [www.go2e3.com](http://www.go2e3.com)

# Halcón, viewing infrastructure challenges as an opportunity to excel

*Working to minimize the execution risk while following a proven model using advances in technology*

Q. What is the official name of your company?

A. Halcón Resources Corporation

Q. Where is your company located?

A. Houston, Texas

Q. What year was the company founded and by whom?

A. Floyd Wilson founded Halcón Resources LLC in October 2011. Halcón Resources LLC recapitalized a public micro-cap E&P company named RAM Energy Resources in February of 2012 and changed its name to Halcón Resources Corporation.

Q. What is your company's primary business activity?

A. Halcón Resources Corporation is

an independent energy company focused on the acquisition, production, exploration and development of onshore liquids-rich assets in the United States.

Q. How many employees does your company have?

A. Halcón has nearly 500 employees across multiple states.

## Q&A

Q. Is your company expanding any of its operations or locations?

A. Yes, Halcón Resources is expanding its operations in three core plays: the Bakken/Three Forks in North Dakota, the Utica/Point Pleasant in Ohio and Pennsylvania and the Woodbine in East Texas. It also has supplemental, non-core operations located in Texas, Oklahoma and Louisiana.

Q. What is your company's main strength or its edge over the competition?

A. Halcón Resources follows a proven model that exploits advances in technology, focuses on lifting costs and concentrates efforts in emerging liquids-prone plays in the United States.

Q. What new markets, clients or projects did your company attract in the last year?

A. Since the recapitalization of RAM Energy Resources, a conventional micro-cap E&P company, in February 2012, Halcón has entered several new unconventional resource plays such as the Bakken/Three Forks, the Woodbine, the Utica/Point Pleasant and the Tuscaloosa Marine Shale to name a few. Although the Bakken/Three Forks isn't a "new" play to the industry, it is a new

COURTESY HALCÓN RESOURCES CORP.

COURTESY HALCÓN RESOURCES CORP.

play for Halcón. Over time we will divest of all conventional assets and focus on three to five unconventional oil-levered resource plays.

Q. What is the most challenging work/contract the company has undertaken?

A. Lack of infrastructure in emerging plays, the Utica/Point Pleasant and the Woodbine is a concern, but Halcón views infrastructure challenges as an opportunity. As such, Halcón Field Services has been set up as a subsidiary to support the drilling operations, which will allow the Company to control the time it takes to get its products to market by installing, owning and operating midstream assets.

Q. What are the biggest obstacles to completing work your company undertakes?

A. Like many E&P companies, the biggest challenge is executing the drilling program and getting production online. Because of our track record, we have been able to attract a great group of employees that we are adding to every day. They are highly skilled in developing large scale acreage positions and are moving ahead quickly on the Halcón program.

Q. What do you see as your company's biggest challenge in the next five years?

A. Execution is always a challenge; however the excellent track record of the Halcón management team combined with the technical focus of the operational teams for each core area helps minimize the execution risk.

Q. What is your company's safety record? What steps does the company take to ensure a safe work environment?

A. At Halcón, we believe that Environment, Health and Safety excellence is a critical component of our business strategy. Our ability to do business depends on uncompromising compliance with industry rules and regulations. Our reputation depends on being responsible partners with our stakeholders everywhere. We are committed to the prevention of work related injuries and illnesses, and to being good stewards of the environment. Anticipating and preparing adequately for possible events we believe is our key to successful operations. Our EHS program puts a heavy emphasis on proper training of all personnel to ensure they have the skills necessary to execute their job responsibilities in a safe and effective manner. Our employees are em-

powered to make corrective action where any condition may jeopardize the safety or health of any employee, contractor, and member of the public or the environment.

Q. Has your company been involved in any community projects or charity events?

A. Because Halcón is a new company, we are in the beginning stages of putting together our giving program. This management team, in its three previous ventures, has always been committed to making significant investments in the communities in which we work. Halcón's program will be focused around youth education and job training and creation. Halcón Resources has donated to the Student Spaceflight Experiments Program, which provides pre-college students with high media visibility research experience by providing each participating community with the ability to have their own real Space Program. It is an initiative designed to inspire and engage America's next generation scientists and engineers.

Q. What is the address of your company's Web site?

A. [www.halconresources.com](http://www.halconresources.com)

# Quality Mat Co. the world's leading producer of heavy equipment mats

*Company provides outstanding mat products for diversified applications from temporary roads to drill rigs*

Q. What is the official name of your company?

A. Quality Mat Company.

Q. Is your firm a subsidiary or affiliate of other companies? If so, please name those firms and their relationship to your company.

A. No.

Q. What do you most want people to know about your company?

A. We are a family owned mat manufacturer and are the world's largest mat company.

Q. Where is your company located?

A. Beaumont, Texas; Houston, Texas;

Killdeer, North Dakota.

Q. What year was the company founded and by whom?

A. Joe Penland Sr.

Q. What is your company's primary business activity?

Per North Dakota Department of Minerals operate oil production in these counties: Billings, McKenzie

**About:** Established in 1977, Abraxas is a publicly traded independent natural gas and crude oil exploitation and production company, with operations in the Rocky Mountains (Williston Basin), Mid-Continent, Permian Basin and Gulf Coast regions of the United States. Abraxas focuses on quality assets having high working interests with operational and infrastructure control, high producing rates per well, large acreage positions with substantial upside, exploitable using our expertise in horizontal drilling and/or 3-D seismic.

### **Algonquin Oil & Gas Limited**

Renamed PetroShale Energy in March 2012. See PetroShale.

**Attention readers:** The following E&P company listings are meant to include all the major players operating in the Williston Basin's Bakken petroleum system, which includes several formations, such as the Bakken and Three Forks. There are also a few companies listed that are evaluating the Southern Alberta Basin Bakken or Exshaw in northwestern Montana and southern Alberta.

The Bakken Oil & Gas Directory is essentially a marketing tool for Petroleum News Bakken advertisers — a value-added product, per se. But it is also meant to be of use to readers, so oil and gas companies are listed in the directory under Exploration & Production Companies, whether or not they advertise in the newspaper. And the list is meant to be complete. So, if we have missed a company, or if a correction should be made to an oil company listing, please contact me via email at [publisher@petroleumnews.com](mailto:publisher@petroleumnews.com).

**About:** American Eagle says its "proven resources and expert team derive from the 2011 combination of Eternal Energy Corp (formerly OTCBB quoted as EERGD) and American Eagle Energy Inc." forming an "exploration and development company with a diverse blend of high potential exploration projects and solid

development opportunities.”

#### **Anschutz Exploration Corp.**

Subsidiary of The Anschutz Corp., a privately held company

Philip Anschutz, top exec at parent  
Bill Miller, president of Anschutz Exploration  
55 17th St, Ste 2400, Denver, CO 80202  
Website: [www.anschutz-exploration.com](http://www.anschutz-exploration.com)  
Phone (303) 298-1000  
General email: [info@aec-denver.com](mailto:info@aec-denver.com)

**Assets and about company:** Privately owned company that is a pioneer explorer in Southern Alberta Bakken Basin; specifically in the portion that is in northwestern Montana's Glacier County. In July 2011 closed sale of its remaining operated and non-operated properties and undeveloped acreage in the Williston Basin of Montana and North Dakota after a “successful Bakken and Mission Canyon program that began in 2004. Our continuing focus is on emerging shale oil plays in the U.S.” If Anschutz can prove up acreage in Southern Alberta Bakken, it will look for a producer to buy or farm-in and take over operatorship. Per its website, Anschutz has “active oil and gas projects in Montana, Wyoming, Colorado, New York and Texas.”

Website: [www.arkanovaenergy.com](http://www.arkanovaenergy.com)  
Email: [info@arkanovaenergy.com](mailto:info@arkanovaenergy.com)  
Stock Exchange: OTCBB / Ticker symbol: AKVA

**Assets:** [www.arkanovaenergy.com/Montana.html](http://www.arkanovaenergy.com/Montana.html)

**About:** Arkanova Energy is an exploration and junior production company engaged in the acquisition, exploration and development of oil and gas properties. Arkanova has secured working interests in three key North American areas; Montana, Arkansas and Colorado. In Montana, the company is focused on the Alberta Basin Bakken. Also referred to as the Exshaw formation, it is Mississippian in age and consists of black shale, siltstone and limestone and is time equivalent to the lower and middle members of the Williston Basin's Bakken Shale. The Exshaw formation, when present, overlies the Upper Devonian Three Forks Formation and is at the base of the Mississippian-age Madison group. The company said it relies on experience, science and proven growth strategies in order to continuously balance a risk/reward portfolio.

/ Rhame (701) 279-6688 / Tioga (701) 664-3001

Stock exchange: NYSE / Ticker symbol: CLR

**Assets:** Continental is the largest acreage holder and oil producer in the Bakken. Per its website, its lease position has grown to more than 1,140,000 net acres at end of 2012, and has identified 3,439 drilling locations. The company reported an average output of 67,522 barrels of oil equivalent per day during the 2012 fourth quarter, a 64 percent increase versus the fourth quarter of 2011. Continental completed 173 net wells in 2012, and expects to increase that number to 226.2 in 2013. Its capital budget for 2013 is \$2.622 billion (\$2.1B in ND, \$427M in Mont., plus \$63M Red River units).

Map of major U.S. assets:

[www.contres.com/operations](http://www.contres.com/operations)

Per North Dakota Department of Minerals operates oil production in these counties:

Billings, Divide, Dunn, Golden Valley, McKenzie, Mercer, Mountrail, Stark, Williams.

**About:** In 2004, the company completed the first commercially successful well in the North Dakota Bakken to be both horizontally drilled and fracture stimulated, a technology that has allowed the Bakken to evolve into a world-class producer. Continental also was the first explorer to demonstrate incremental reserves from the Three Forks first bench in 2008 and from the second bench in 2011. In 2012, Continental also became the first to establish production from the third bench, as part of its current program designed to determine the region's production and reserve po-

tential.

Per Continental's website, "Continental Resources is a Top 10 petroleum liquids producer in the United States and the largest leaseholder in the nation's premier oil play, the Bakken play of North Dakota and Montana. Based in Oklahoma City, the company also has a leading presence in the Anadarko Woodford Play of Oklahoma and the Red River Units Play of North Dakota, South Dakota and Montana. Founded in 1967, Continental's growth strategy has focused on crude oil since the 1980s. The company reported total revenues of \$2 billion for 2012 and is on track to triple production and proved reserves by year-end 2017, with the Bakken taking the lead role in the effort.

**Cornerstone Natural Resources, LLC**

David Kornder, president and chief executive officer

**Assets:** In 2012, ExxonMobil expanded its Williston Basin Bakken position to approximately 585,000 net acres with the \$2 billion acquisition of Denbury Resources' North Dakota and Montana Bakken assets. The newly acquired acreage is close to the company's current development areas, "generating further efficiencies," Exxon said in its 2012 annual report. The deal also increased the company's net oil-equivalent barrels per day of production by 16,000, bringing its daily average production in the second half of 2012 to about 49,000 barrels of oil equivalent.

ExxonMobil Canada is involved in the Exshaw play in southern Alberta, which is referred to as the Southern Alberta Basin Bakken across the U.S. border in northwestern Montana. Per North Dakota Department of Minerals operates oil production in these counties: XTO in Burke, Divide, Dunn, McKenzie, Mountrail, Williams; Billings, Golden Valley, Ward.

**About:** XTO Energy, an ExxonMobil subsidiary, operates the companies' Williston Basin Bakken acreage in the United States. Its western division office in Englewood, Colo., a suburb of Denver, oversees operations in six states, including North Dakota, Montana, northern New Mexico, Colorado, Wyoming and Utah. Under the western division are 13 district offices and nearly 700 employees. District offices include Sidney in Montana and Williston, Ray and Tioga in North Dakota. ExxonMobil entered the Williston Bakken play when it acquired XTO in 2010 for a whopping \$41 billion (\$10 billion in assumed debt) to take out XTO Energy and create the world's largest unconventional gas producer. It was Exxon's biggest transaction since the \$81 billion merger of Exxon and Mobil 10 years earlier. In the midst of falling oil production and a first quarter 2012 net income decline of 11 percent, ExxonMobil began shifting drilling rigs from shale gas areas to liquids-rich areas such as the Williston Basin's Bakken petroleum system.

#### **Fairways Offshore Exploration (Fairways Exploration & Production, LLC)**

Dwayne T. Stewart, president and chief executive officer

[dstewart@fairwaysresources.com](mailto:dstewart@fairwaysresources.com)

13430 Northwest Fwy, Ste 800, Houston, TX 77040

Website: [www.fairwaysresources.com](http://www.fairwaysresources.com)

Phone: (713) 622-3492 Fax: (713) 622-3474

Email: [information@fairwaysresources.com](mailto:information@fairwaysresources.com)

**Assets:** The company is evaluating about 15,000 net mineral acres within "the Bakken/Three Forks trend" in northwestern Montana, more commonly known as the Southern Alberta Basin Bakken and the Al-

berta Bakken fairway (Exshaw in Alberta). Fairways spud its first exploration well in the region in October 2011. The well, the States #1-21 wildcat in Teton County, reached its targeted "total depth" of 7,200 feet. The company said in a December 2011 press release that the "deeper, secondary Duperow target was absent," and that it "obtained whole core through the shallower, primary Bakken/Three Forks intervals. Presently the core is being studied and will take two to three months before the results are available. The drilling rig has been released and the decision as to whether or not Fairways will drill a horizontal lateral into the Bakken/Three Forks will be made after analysis of the core is concluded."

No further announcement was made. However, in July 2012 Fairways said in a press release that it was starting a "proprietary 3D seismic survey covering approximately 70 square miles," intending "to image the Bakken and Three Forks formations in Teton and Pondera Counties, Montana."

On Nov. 4, 2012, Fairways said it had completed the Pendroy 3D seismic survey and expected to complete processing by April 2013 and preliminary interpretation by July 2013, with drilling to commence shortly thereafter.

**About:** In 2009, Fairways Offshore Exploration Inc., which began in 1993 and only operated Gulf of Mexico assets, was restructured under an enhanced business plan as a private portfolio investment company targeting opportunities in the upstream oil and natural gas sector. Its affiliate — Fairways Exploration & Production, LLC — was formed to participate in onshore exploration and development of oil and natural gas reserves in the Lower 48 states.

#### **Fidelity Exploration & Production Co. E&P arm of MDU Resources Group**

Kent Wells, president and CEO of Fidelity

Phone: (406) 359-7360 / Fax: (406) 359-7273

Stock exchange: NYSE / Ticker symbol: MDU

**Assets:** Fidelity's business is focused in the Rocky Mountain and Mid-Continent/Gulf States regions. Fidelity's properties in the Rocky Mountain region are primarily located in Colorado, Montana, North Dakota, Utah and Wyoming. Fidelity produces natural gas and oil in the Baker field in southeastern Montana and southwestern North Dakota, the Bowdoin area in north-central Montana, the Big Horn Basin in north-central Wyoming, the Bakken area in western North Dakota, the Paradox Basin in Utah, the Powder River Basin of Montana and Wyoming and the Green River Basin in southwest Wyoming. Fidelity also owns non-operated natural gas and oil interests and undeveloped acreage positions in the Rocky Mountain region. Parent MDU said it plans to invest about \$400 million on its exploration and production business in 2013, with a significant portion of the capital

allocated to development areas. Fidelity currently has five rigs drilling in the Bakken, one in Paradox and one in Texas. The Bakken is to get about \$200 million of the company's \$400 million E&P budget.

Per North Dakota Department of Minerals operates oil production in these counties: Mountrail, Stark.

**About:** The E&P arm of MDU Resources Group, Fidelity is involved in the acquisition, exploration, development and production of natural gas and oil resources. Fidelity's activities include the operation and development of natural gas and oil production properties, acquisition of producing properties and leaseholds with potential development opportunities and exploratory drilling. Fidelity shares revenues and expenses from the development of specified properties in proportion to its ownership interests.

Stock exchange: New York / Ticker symbol:

GMXR

**Assets:** The Oklahoma-based E&P independent entered the Bakken in 2011 with a plan to boost the oil portion of its natural gas-heavy portfolio. It has approximately 36,000 net acres on which GMXR wells produced a daily average of 594.8 barrels of oil in January. Per North Dakota Department of Minerals operates oil production in these counties: Billings, Stark, McKenzie

**About:** From company website in September 2012, "GMXR's 2012-2013 business strategy. Liquidity & Execution: We have become a Bakken producer and will continue to focus on improving drilling, completion and production operations; as well as lower costs for

all activities across our Bakken acreage. GMXR's objective for the second half of 2012 is to increase our liquidity to fund our 2013 oil drilling program and to retire near term debt maturity. At year-end 2012, with continued successful drilling our Bakken acreage, 70 percent of our revenues are projected to be oil and natural gas liquids."

On April 1, 2013, the company announced it had filed a "voluntary petition for reorganization under Chapter 11 in the U.S. Bankruptcy Court for the Western District of Oklahoma. In connection with this petition, GMXR is pursuing an asset purchase agreement with holders of its senior secured notes due 2017 who own a majority of these secured notes ... to acquire substantially all of the company's operating assets and undeveloped acreage. The company's joint venture, Endeavor Gathering LLC, in which the company owns a 60 percent membership interest, is not included in the filing. Upon finalizing the contemplated asset purchase agreement with the principal senior secured noteholders, the sale will then be subject to a public auction and receipt of competing, and potentially higher and better offers, pursuant to procedures to be approved by the Bankruptcy Court."

Stock exchange: New York / Ticker symbol: HES

**Assets:** Global operations and assets can be found at

www.hess.com/operations/default.aspx. Hess' North Dakota operations are in Tioga, Williston, Keene, Fryburg and Newburg counties. It has approximately 800,000 net acres in the Williston Basin. Company is the largest gas producer and the third largest oil producer in North Dakota, with approximately 64,000 barrels of oil equivalent per day produced in December 2012. Its goal is to produce 120,000

barrels of oil equivalent per day by mid-decade. It ran up to 15 rigs in 2012 in the basin, with an average of 12; as of April 1, 2013, it was running 12, expecting to run an average of 13 in 2013.

Hess' 2013 capex of \$2.2 billion is 29 percent less than its 2012 capital spending, but it drove drilling and completion costs down by more than 30 percent in 2012 and expects to complete about the same number of wells in 2013 as it did in 2012.

Hess also operates the Tioga Gas Plant.

Per North Dakota Department of Minerals operates oil production in these counties: Burke, Dunn, McKenzie, Mountrail, Ward, Williams.

**About:** Hess is a huge integrated energy company that has enough operations to literally span the globe. Currently, it has operations in more than 20 countries. First production in North Dakota, where its assets are 100 percent self-operated, was 1957. Per its website, "Hess discovered oil in North Dakota in 1951, and its presence has since continued to grow."

**Assets:** The strongest well economics throughout the Bakken petroleum system have been tied to operators who entered the

Classic Bakken scenery, pipe yards and haybales. E3 Environmental, LLC has offices in Dickinson and Crosby, North Dakota and has been active in the Bakken since 2009.

field early and assembled strong positions in Mountrail County — notably EOG Resources, Whiting Petroleum, Slawson Exploration and Hunt Oil. Hunt has a significant land position and active programs in the Williston Basin Bakken system of North Dakota, as well as the Eagle Ford play of South Texas and the Marcellus play in Pennsylvania and West Virginia. In the Bakken the company appears to operate most if not all of its wells with Hunt-operated wells producing 9,235.7 barrels of oil per day in January 2013. As of April 4, 2013, Hunt was running three drilling rigs in North Dakota.

Per North Dakota Department of Minerals operates oil production in these counties: Dunn, McKenzie, Mountrail, Divide.

**About:** Hunt Oil celebrated its 75th anniversary in 2009. A privately held exploration and production company, Hunt is one of the world's leading independent energy companies, with operations in North America, South America, Europe, Australia and the Middle East. It has drilled wells on every continent except Antarctica

#### Husky Energy

Asim Ghosh, president and chief executive officer

707 – 8th Ave SW, Box 6525, Station D, Calgary, Alberta T2P 3G7

Website: [www.huskyenergy.com](http://www.huskyenergy.com)

Phone: (403) 298-6111 / Fax: (403) 298-7464

Stock exchange: Toronto / Ticker symbol: HSE and HSE.PR.A

**Assets:** [www.huskyenergy.com/operations/](http://www.huskyenergy.com/operations/)

Husky is continuing to sharpen its focus on oil and liquids-rich plays, as the conventional sector of the Western Canada Sedimentary basin went into decline. Of the 400 wells Husky planned to drill in the basin in 2012, more than a third are focused on oil and liquids-rich gas resource plays, a trend continuing into 2013 plans. One of those liquids plays is in southeast Saskatchewan, at Oungre Bakken, where the company holds 18,000 acres and drilled 23 wells in 2012. Combined Bakken, Viking, Cardium and Lower Shaunavon resource plays produced an average of 7,000 barrels of oil equivalent per day in 2012.

**About:** Per its website, Husky Energy is one of Canada's largest integrated energy companies. The company operates worldwide with upstream, midstream and downstream business segments. A combination of technological innovation, prudent investment, sound project management and responsible resource development allows Husky to deliver strong returns to shareholders. The company has a well-defined and growth-oriented business plan, a stable foundation and has set course to realize value from three mid- to long-term growth pillars.

#### Intervention Energy LLC

John Zimmerman, founder and managing member

[john@interventionenergy.com](mailto:john@interventionenergy.com)

PO Box 1028, Minot, ND 58702

Website: [www.interventionenergy.com](http://www.interventionenergy.com)

Phone: (701) 852-0213

**About:** Intervention Energy, or IE, is a pri-

vately held non-operating oil and gas exploration and production companies focused on North Dakota and Montana. The company has participated in more than 100 wells targeting the Bakken or Three Forks formations and now controls more than 50,000 net mineral acres. Since its founding, IE says it has built its mineral lease portfolio through "selective acquisitions and has partnered with leading operators" active in the Williston Basin.

#### Jettison Inc.

Ron Evitt, owner

1224 4th Ave E, Williston, ND 58801

Phone: (701) 774-2004

**Assets:** According to State of North Dakota records, Jettison-operated wells produced an average of 15.3 barrels of Bakken oil per day in January 2013.

Per North Dakota Department of Minerals operates oil production in these counties: Burke, Billings

#### KKR & Co.

##### Samson Resources Co.

Robert Schaffitzel, senior vice president Rockies and business development

Samson Plaza, Two W Second St, Tulsa, OK 74103-3103

Phone (918) 591-1791 / Fax: (918) 591-1796

Rockies Regional Office

370 17th St, Ste 3000, Denver, CO 80202

Phone: (720) 904-1391

Websites: [www.samson.com](http://www.samson.com) and

[www.kkr.com](http://www.kkr.com)

**Assets:** [www.samson.com/operations.html](http://www.samson.com/operations.html)  
Per North Dakota Department of Minerals operates oil production in these counties as of January 2013: Burke, Divide, Mountrail

**About:** Samson was founded by the late Charles Schusterman in 1970 and grew to hold hundreds of drilling leases nationwide and offshore. Then CEO Stacy Schusterman, his daughter, and the family put all of the company up for sale except for their interests in the offshore and deepwater Gulf of Mexico. In late 2011, KKR & Co., the private equity firm that began investing in the energy industry in 1985, agreed to acquire most of Samson Investment Co. for \$7.2 billion to capitalize on increased production of shale-based oil and gas. KKR changed the name from the recent Samson Investment Co. back to the original Samson Resources Co. A \$1 billion 2012 capital budget for Samson was to be primarily spent on drilling for oil. KKR said at the time that it eventually plans to take Samson Resources public. But in the second half of 2012 KKR began selling off Samson assets in the Williston Basin, including a 20,000 net acre sale in November for \$30 million to Magnum Hunter Resources subsidiary Bakken Hunter in Divide County and in December the sale of approximately 116,000 net acres primarily in Divide and Williams counties, North Dakota, and production of approximately 5,600 barrels of oil equivalent per day, for approximately \$650 million. The deal with Continental represented roughly two-thirds of Samson's Bakken oil production in North Dakota, and the wells involved had not been

transferred to Continental as of Feb. 1, 2013. Per state records, as of April 4, 2013, Samson had just two rigs operating in North Dakota, both in Divide County.

#### Kodiak Oil & Gas Corp.

Lynn A. Peterson, chairman, chief executive officer and president

James E. Catlin, executive vice president of business development

1625 Broadway, Ste 250, Denver, CO 80202

Website: [www.kodiakog.com/index.html](http://www.kodiakog.com/index.html)

Phone: (303) 592-8075 / Fax: (303) 592-8071

Fortuna, ND: (701) 985-2422

Stock exchange: New York / Ticker symbol: KOG

**Assets:** Per its website, Kodiak "owns and controls approximately 154,000 net acres" in Western North Dakota and Eastern Montana in the Williston Basin, where its primary target is the Bakken petroleum system's middle Bakken and Three Forks formations. The company has more than 800 net locations prospective for Bakken production. During 2012, the company invested approximately \$810 million for drilling 71 net wells and completion of 62.6 net wells. A total of \$618 million of the capex was allocated to operated wells and \$146 million to non-operated activities. Kodiak's sales volumes for 2012 totaled 5.3 million barrels of oil equivalent, or about 14,521 barrels of oil equivalent per day. Kodiak's estimated capex budget for 2013 is \$775 million which is expected to fund the drilling of 75 net wells, investing \$600 million to drill and complete 61 net operated wells and \$140 million to non-operated capex through participating in an estimated 14 net non-operated wells. For 2013, "substantially all of the estimated \$775 million capex is allocated to Williston Basin oil and gas operations," the company says on its website.

Per North Dakota Department of Minerals operates oil production in these counties: Divide, Dunn, McKenzie, Williams.

**About:** Kodiak is an independent exploration and production company focused on exploring, developing and producing oil and natural gas in the U.S. Rocky Mountain region. Its core areas include the Williston Basin in Montana and North Dakota, and the Vermillion Basin of the Greater Green River Basin.

#### Legacy Reserves

##### Legacy Reserves Operating LP

Cary D. Legacy Reserves Operating LP

Dan Westcott, executive vice president and chief financial officer

303 W Wall St, Ste 1400, Midland, TX 79701

Website: [www.legacylp.com](http://www.legacylp.com)

Phone: (432) 689-5200

Cody, Wyoming office:

Tom Fitzsimmons, Cody business unit leader

Phone: (307) 587-7232, ext 203 for Fitzsimmons

**Assets:** Page 6 of this pdf has an assets map at [bit.ly/RsHfC7](http://bit.ly/RsHfC7) In mid-July 2012 Summit Resources and Panther Creek Resources transferred operatorship of 61 North Dakota wells, and the leases held by them, to Legacy Reserves LP, signed a \$70.8 million cash deal in April; a deal that included another 60 wells

and adjacent acreage in Montana. At that time total net production from the North Dakota and Montana wells was 776 barrels of oil equivalent a day. The transaction, which closed May 23, 2012, represented Legacy's entry into the Williston Basin in North Dakota. The new assets will be managed by the company's wholly owned subsidiary, Cody, Wyo.-based Legacy Reserves Operating LP, which absorbed Iron Creek Energy and its team in 2010 and oversees its parent's properties in the Rocky Mountain region.

As of the end of January 2013, Legacy-operated wells in North Dakota were producing a daily average of 110.8 barrels of oil per day. Per North Dakota Department of Minerals operates oil production in these counties:

Billings, McKenzie

**About:** Legacy's company-wide strategy is to acquire long-lived oil properties in basins with multiple producing horizons, aligning it with carefully selected, "efficient" and "reputable" nearby leasehold operators that then operate the combined acreage, Tom Fitzsimmons, Cody business unit leader, told Petroleum News Bakken in mid-September 2012. Currently, Legacy is an "aggressive purchaser of production," he said. "We are going to be a competitive big bidder on packages ... sold that are highly developed." But in the next few years Fitzsimmons can envision Legacy picking up a rig in the Williston Basin, but before the company drills its own wells it will "look for a little more risk to be taken off the table," he said.

#### Liberty Resources LLC

Chris Wright, chief executive officer  
C. Mark Pearson, president  
1200 17th St, Ste 2050, Denver, CO 80202  
Website: [www.libertyresourcesllc.com](http://www.libertyresourcesllc.com)  
Phone: (303) 749-5757

**Assets:** Since its formation in 2010, Liberty says it has acquired approximately 43,000 net acres in Williams and McKenzie counties of North Dakota, believed to be prospective with respect to the production of oil from the Middle Bakken member of the Bakken petroleum system in the Williston Basin. The company says it operates 12 producing wells and participates in approximately 70 non-operated wells in the Bakken formation. Liberty plans to drill approximately 20 operated wells in the basin by the end of 2013.

As of April 4, 2013, Liberty was running one rig in North Dakota, in McKenzie County. Per state records in January 2013 Liberty-operated wells in the Bakken produced an average of 110.8 barrels of oil per day. Per North Dakota Department of Minerals operates oil production in these counties: Williams, McKenzie.

**About:** On its website Liberty Resources says it is "focused on acquiring acreage in emerging oil and gas resource plays and generating superior production results based on its completions expertise. The principals in the business are recognized as global experts in hydraulic fracturing and related technologies."

#### Magnum Hunter, parent Operates as Bakken Hunter in Williston Basin

**Williston Hunter ND, formerly MHR Acquisition Co II; now Magnum Hunter Resources' Williston Basin Division**

**Williston Hunter Canada, formerly NuLoch Resources**

Gary C. Evans, chairman and CEO, Magnum Hunter Resources

Glenn Dawson, president, Magnum Hunter Resources' Williston Basin Division (formerly president and CEO of NuLoch Resources, which is now Williston Hunter Canada.

777 Post Oak Blvd., Ste 650, Houston, TX 77056

Website: [www.magnumhunterresources.com](http://www.magnumhunterresources.com)

Headquarters phone: (832) 369-6986 / Fax:

(832) 369-6992

Williston Hunter Canada

2200, 444 - 5 Ave SW, Calgary, Alberta T2P 2T8

Telephone: (403) 920-0455 / Fax: (403) 920-0457

Stock Exchange: New York / Ticker symbol:

MHR

**Assets:** 180,000 net acres in Williston Basin, primary targets Middle Bakken, Three Forks Sanish and Madison (130,000 net acres in North Dakota and 46,000 net acres in Tableland). No basin-wide production numbers released but company said it has decided to "really" focus on "higher-return" production wells in the Williston Basin in 2013 and beyond. It will let leases expire that it doesn't consider meet its economic standards. North Dakota Williston Basin acreage the company is "least excited about" is located "further east," and the acreage it's "most excited about" is further west, preferring Divide County over Burke. (See map and Williston basics: <http://bit.ly/10Dbok3>) The company hopes to raise \$400-\$500 million in asset sales in 2013, including non-core Williston Basin legacy properties in Burke County.

**About:** Magnum Hunter Resources Corp. is an independent exploration and production company engaged in the acquisition, development and production of crude oil, natural gas and natural gas liquids, primarily in West Virginia, Kentucky, Ohio, Texas, North Dakota and Saskatchewan. The company is active in five of the most prolific unconventional resource plays in North America, namely the Marcellus, Utica, Eagle Ford, Pearsall and Williston Basin/Bakken.

#### Marathon Oil

Clarence P. Cazalot Jr., chairman, president and CEO  
David E. Roberts, Jr., executive vice president and COO

5555 San Felipe St, Houston, TX 77056

Website: [www.marathonoil.com](http://www.marathonoil.com)

Phone: (713) 629-6600

Stock exchange: New York / Ticker symbol:

MRO

**Assets:** The North Dakota Bakken oil play is a significant part of Marathon's unconventional resource portfolio "and a top investment priority" for the company, per Marathon's web-

site. In 2012, the Bakken accounted for 26 percent, or 27,000 barrels a day, of Marathon Oil's total U.S. liquid hydrocarbon sales came from the Williston Basin (29,000 barrels of oil equivalent per day). Marathon holds about 410,000 net acres in North Dakota and eastern Montana — in Dunn, Hettinger, McKenzie, McLean, Mountrail, Slope and Williams counties in North Dakota, and Richland, Roosevelt and Sheridan counties in Montana. In its operated assets the company has a working interest of around 89 percent. Marathon said in early 2013 that it anticipates drilling approximately 300 gross company-operated wells over the next four years, and expects production to exceed 47,000 net barrels of oil equivalent per day in 2016. The company is focused on maximizing production from the Middle Bakken and Three Forks reservoirs in the Hector/Ajax and Myrmidon areas and plans to continue initial development of its other areas. Data acquisition continues to test margins of the Bakken play and high-grade an exploration portfolio as Marathon explores additional formations in the Williston Basin, such as the Lodgepole (part of the Bakken petroleum system), and Tyler and Red River, separate petroleum systems.

Per North Dakota Department of Minerals operates oil production in these counties: Dunn, McKenzie, McLean, Mountrail, Williams

**About:** "By using state-of-the-art automated rigs in the Bakken to achieve best-in-class drilling performance, we have reduced well costs and cycle times and improved safety and energy efficiency. In addition, Marathon has implemented proactive environmental practices in sensitive areas located on federal and tribal lands," Marathon said about its Bakken operations in the Williston Basin. The company is celebrating its 125 year anniversary this year (2012).

#### MBI Oil & Gas LLC

**Missouri River Royalty Corp.  
UEC, United Energy Corp.**

Numerous contacts on website  
919 S 7th St #405, Bismarck, ND 58504  
Website: uecorporation.com/pages/missouri-river-royalty-corp  
Phone: (701) 255-7970

**Assets:** Missouri River Royalty, Jurassic Resources Development NA LLC, Montana Heartland LLC and Pine Gas Gathering LLC own over 126 oil and natural gas wells in western North Dakota and eastern Montana along with dozens of non-operated, overriding royalty and royalty interests in many other wells. The focus of the company is almost entirely on natural gas production and gas gathering in addition to producing associated volumes of crude oil. Missouri River began operating wells in 1984 and continues today. All of its production is in the Williston Basin in North Dakota and Montana. Plus it has 38,000 net acres of non-producing mineral rights in the Williston Basin. According to state records, company produced 10.0 barrels of oil per day on average in January 2013. Per North Dakota Department of Minerals operates oil production in these counties: McKenzie, Mountrail.

**About:** Competitive advantage, per the website, "Unlike many 'Rockies' producers, much of Missouri River Royalty's gas production assets have the advantage and choice of accessing the Chicago/Midwest market via Northern Border Pipeline or staying in the Rockies off WBI. Recently, this has added significantly to the price Missouri River Royalty and its working interest partners have received for their natural gas."

**Murex Petroleum Corp.**

Phone: (303) 360-8223 / Fax: (303) 617-8836  
**Assets:** Map www.murexpetroleum.com/assets/ Murex currently operates 170 wells in North Dakota, South Dakota, Montana and Wyoming. Current project: "Continuing a successful horizontal Bakken drilling program on the Nesson Anticline in Williams County, North Dakota."

Murex also controls more than 34,000 net mineral acres through affiliated companies. These companies include Linda Petroleum Co., Missiana LLC, Missilinda of Canada, Williston Projects Inc., and Mono Corp. with holdings in North Dakota, South Dakota, Montana, Nebraska, Kansas, Oklahoma, Texas, Louisiana and Mississippi.

Per State of North Dakota records in January 2013 Murex-operated wells produced an average of 8,064.2 barrels of oil per day from the Bakken petroleum system.

Per North Dakota Department of Minerals operates oil production in these counties: McKenzie, Mountrail, Williams.

**About:** Per its website, Murex Petroleum was

incorporated in 1996 and is engaged in the acquisition, development and operation of oil and gas properties in North America.

**Murphy Exploration & Production Co.  
Murphy Oil Corp., parent**

David Wood, president and CEO  
16290 Katy Fwy, Ste 600, Houston, TX 77094  
Website:  
www.murphyoilcorp.com/default.aspx  
Phone: (281) 675-9000  
Stock exchange: New York / Ticker symbol: MUR

**Assets:** Murphy is a player in the Southern Alberta Basin Bakken/Exshaw. Starting in 2010, the company has added approximately 151,000 net acres in Southern Alberta "in the heart of the emerging Alberta Bakken shale light oil resource play," also referred to as the Exshaw and which straddles the Alberta/Montana border. One of the larger operators in the play, Murphy said in spring 2011 that it had drilled the first two Exshaw/Bakken appraisal wells of its six-well program, and has since disclosed that it hit oil in the Three Forks zone. In April 2012, Murphy CEO David Wood said the findings were encouraging, but that it wasn't the Eagle Ford, where a U.S. subsidiary of Murphy is active. When asked to shed some light on the precise nature of the Exshaw play, and whether it was similar to the Bakken, he said it was a "geological equivalent," but about 10 percent thinner overall than the sweet spots of the Bakken. "It does have the same carrier bed in the middle. So, given the results of the Bakken where that is a key contributor to how wells perform ... it has very similar geologic characteristics," Wood said. "The oil that was recovered from the two wells on acreage we have is good quality oil, low-30 gravity. The section is over-pressured. So it is quite analogous," but Wood noted there wasn't yet enough data on the play and that "geologically things change over these long distances, but it does have a lot of very similar characteristics." Murphy said it is trying to grow its position, and it drilled two more wells in 2012. One well was on production test in 2012 and early 2013. Additional wells are planned in 2013 to test various formations in Murphy's southern Alberta acreage.

**About:** Murphy Oil is an international upstream, midstream and downstream oil and gas company that conducts business worldwide through various operating subsidiaries.

**Newfield Exploration Co.  
Newfield Production Co.  
Newfield Rocky Mountains Inc.**

Lee K. Boothby, chairman, president and CEO  
Daryll T. Howard, vice president, Rocky Mountains  
4 Waterway Square Pl, Ste 100, The Woodlands, TX 77380  
Phone: (281) 210-5100 / Fax: (281) 210-5101  
Website: www.newfld.com  
Rocky Mountains office: 1001 17th St, Ste 2000, Denver, CO 80202  
Phone: (303) 893-0102 / Fax: (303) 893-0103  
Stock exchange: NYSE / Ticker symbol: NFX

**Assets:** Newfield's principal domestic areas of operation include the Mid-Continent, the Rocky Mountains and onshore Texas. Internationally, the company focuses on offshore oil developments in Malaysia and China. Newfield holds roughly 96,000 net acres in the Williston Basin and an inventory of about 255 drilling locations in the Bakken and Three Forks formations of the Bakken petroleum system.

Map <http://bit.ly/11yumL4>.

Forty-one thousand acres are in development on and west of the Nesson Anticline and 55,000 acres outside of development, including Elm Coulee. In addition, Newfield has joined the Southern Alberta Basin Bakken/Exshaw hunt in northwestern Montana. In 2013-15 company plans to operate four rigs in the Williston Basin, continue to develop the Middle Bakken and Upper Three Forks members, as well as test the potential of the lower benches of the Three Forks. In 2012 company operated 24 wells that targeted the Middle Bakken and, assuming a \$90 per barrel oil price, plans to operate 25-30 in 2013. In 2012 Newfield operated 4-6 Three Forks wells and plans to operate 15-18 in 2013. In 2013 company's capex is \$213 million for the Williston Basin, which the company's year-end 2012 report said will allow activity levels to increase. Net production is expected to grow 15 percent from net production at year-end 2012, which was approximately 10,500 barrels of oil equivalent per day (comprised of 7,800 barrels of oil and 1,000 barrels of natural gas liquids) and 10 million cubic feet per day of natural gas.

Newfield-operated wells in North Dakota produced an average of Daily 10,503.6 barrels of oil a day in January 2013, per State of North Dakota records.

Per North Dakota Department of Minerals operates oil production in these counties: Divide, Dunn, McKenzie, Williams

**About:** According to the company website, Newfield Exploration is an independent energy company engaged in the exploration, development and production of crude oil, natural gas and natural gas liquids. The company relies on a "proven strategy of growing reserves through an active drilling program and select acquisitions."

**Northern Oil & Gas Inc.**

Michael L. Reger, co-founder and CEO  
315 Manitoba Ave, Ste 200, Wayzata, MN 55391  
Website: www.northernoil.com  
Phone (952) 476-9800 / Fax: (952) 476-9801  
Stock exchange: NYSE, AMEX / Ticker symbol: NOG

**Assets and about:** One of the largest non-operating participants in the core of the Bakken and Three Forks play in western North Dakota and eastern Montana, the company has participated in more than 1,400 Bakken or Three Forks wells since 2007 and now controls ~180,000 net mineral acres. An asset map can be found on its Home Page, along with a link to a detailed map.

**Oasis Petroleum Inc (OAS) or  
Oasis Petroleum North America, LLC**

Thomas B. Nusz, chairman of the board of directors

1001 Fannin St, Ste 1500, Houston, TX 77002  
Website: [www.oasispetroleum.com](http://www.oasispetroleum.com)  
Phone: (281) 404-9500

Stock exchange: NYSE / Ticker symbol: OAS

**Assets and about:** Focused exclusively on the Bakken petroleum system of the Williston Basin, Oasis was established in 2007 when it Oasis acquired 175,000 net acres and 1,000 barrels of oil equivalent per day in West Williston for \$83 million. By the end of 2012 it held 335,383 net acres in the Williston Basin that are highly concentrated and prospective for the Bakken, Three Forks and other potential horizons (see map [www.oasispetroleum.com/operations/](http://www.oasispetroleum.com/operations/)). Held by production from the leasehold by year-end 2012 were 264,595 net acres. Average 2012 production from West Williston was 15,263 barrels of oil equivalent per day; East Nesson produced an average of 4,936 boe per day; and the Sanish, 2,270 boe per day; for a total average of 22,469 boe per day in 2012 (89 percent oil).

Oasis' 2012 annual report said during that year Oasis completed and brought on production 117 gross (95.8 net) operated Bakken and Three Forks wells in the Williston Basin. As of Dec. 31, 2012, it had 21 gross operated wells waiting on completion and 11 gross operated wells drilling in the Bakken and Three Forks formations. Oasis' 2013 drilling plan "contemplates" completing approximately 128 gross (92.5 net) operated wells in its project areas, depending on "market conditions and program results."

Oasis increased its operated drill blocks by 37 through acreage additions and trades during 2012.

In addition to continuing to enhance its drilling and completion techniques to maximize overall well economics, Oasis said in 2013 it will also continue to pursue strategic acquisitions with significant resource potential to supplement its existing operations in the Williston Basin.

But, "going forward, we may selectively target additional basins that would allow us to employ our resource conversion strategy on large undeveloped acreage positions similar to what we have accumulated in the Williston Basin."

In January 2013 Oasis-operated wells in North Dakota produced an average of 19,565.7 barrels of oil per day, making it the 12th largest oil producer in the state by wells operated. Per North Dakota Department of Minerals operates oil production in these counties: Burke, McKenzie, Mountrail, Williams.

**Occidental Petroleum  
Oxy USA Inc.**

Stephen I. Chazen, president and chief executive officer

10889 Wilshire Blvd, Los Angeles, CA 90024  
Website: [www.oxy.com](http://www.oxy.com)  
Phone: (310) 208-8800

Stock exchange: New York / Ticker symbol: OXY

**Assets:** Occidental's oil and gas operations are consolidated in three core areas — the United States, the Middle East/North Africa and Latin America. The United States is the heart of the company's oil and gas business. Oxy's U.S. operations include interests in North Dakota's Williston Basin, where it says on its website that it has about 277,000 net acres of "oil producing and prospective unconventional properties" in the Bakken and Three Forks formations. A substantial portion of the acreage was purchased in 2010 and 2011.

Although he and the report did not offer any specifics in terms of spending or production numbers for the Williston, on Jan. 31, 2013, during a fourth-quarter earnings call company CEO and President Stephen Chazen said Oxy had reduced its "activity in higher cost unconventional oil plays, specifically in the Williston and in lower return gas properties, mainly in the Midcontinent and Rockies. However, as a result of planned efficiencies we expect to drill a similar number of wells as we did in 2012."

When asked when things might be expected to pick back up — "if you guys get to your cost reduction targets, will you expect that to pick back up later in 2013," Chazen said, in short, "Yes, we've already seen some sizable, actually reductions in the costs, but we're not where we need to be. ... Next year, as the capital needs of some of the longer-term projects start to roll over, then we can look at what's the best use of the capital. For this year, I think we're trying to be conservative and only spend the money on the best things we can."

When asked if Oxy might consider disposing of its Bakken assets, Chazen basically said, yes, if the price was right.

According to State of North Dakota records, Oxy-operated wells in North Dakota produced an average of 15,416.1 barrels of oil per day in January 2013, making it the 14th largest oil producer in the state. As of April 4, 2013, it had seven drilling rigs running in North Dakota.

Per North Dakota Department of Minerals operates oil production in these counties: Billings, Burke, Dunn, Mountrail, Williams.

**About:** Occidental is an international oil and gas exploration and production company — the third-largest in the U.S., based on equity market capitalization as of June 30, 2012 — and its OxyChem subsidiary is a major North American chemical manufacturer. Oxy prides itself on being an industry leader in applying advanced technology to boost production and access hard-to-reach reserves. It has more than 40,000 employees and contractors worldwide.

**Passport Energy**

Bruce Murray, chairman, president and CEO  
600 - 6th Ave SW, Ste 420, Calgary, Alberta, T2P 0S5

Website: [www.passportenergy.com](http://www.passportenergy.com)

Phone: (403) 930-4060 / Fax: (403) 930-4065

Stock exchange: TSX.V / Ticker symbol: PPO

**Assets:** Passport is involved in both the Williston Basin Bakken in southeastern

Saskatchewan and the Southern Alberta Basin Bakken in northwestern Montana, which is referred to as the Exshaw play in Alberta (see map at

[www.passportenergy.com/saskatchewan.php](http://www.passportenergy.com/saskatchewan.php)).

It has drilled or participated in drilling three wells to date at its Hardy project in Saskatchewan, reporting the following in early 2013: At Hardy North the company's first development well in the Hardy Bakken pool, HARDY S HZ 1A4-16-4B4-09-004-21W2 ("4-16"), has produced more than 33,000 gross barrels of oil from September 2011 to the end of December 2012. The well continues to produce, averaging approximately 50 gross barrels of oil per day and 12.5 bopd net (38.5 degree API oil) with an average oil cut of approximately 28 percent in December 2012. At Hardy South, Passport completed and placed on production its first operated horizontal Bakken oil well (50 percent interest), the PASSPORT MINTON HZ 1C11-32-3A-16-33-3-21W2M ("11-32"), in August 2012. After an initial cleanup and optimization period, the 11-32 well produced an average gross daily rate of approximately 97 bopd of 38 degree API oil over an eight day period with a peak rate of 130 bopd with an average oil cut of about 20 percent. In December 2012 the well averaged more than 36 bopd, with an average oil cut of about 20 percent. Passport plans to drill up to three horizontal Bakken wells in the Hardy South area in 2013. In the Southern Alberta Bakken, Passport has a 60 percent interest in about 17,400 gross hectares of oil and gas leases in the Sweetgrass Arch of Northwest Montana. To date this area has primarily been explored for shallow gas targets in the Bow Island, Dakota and Burwash intervals. Passport has identified several potential oil-bearing intervals over the land base with two holding major resource-style potential. Shallow horizon depths and minimal expiries in the area make this an attractive area for future drilling activity, the company says on its website. See Montana Sweetgrass project map at [www.passportenergy.com/sweet-grass.php](http://www.passportenergy.com/sweet-grass.php)

**About:** Passport Energy is a junior oil and gas company focused on acquiring, exploring and developing light oil resource opportunities in Western Canadian Basin and NW United States.

**PetroBakken Energy Ltd.**

John D. Wright, president, chief executive officer and director

2800, 525 - 8th Ave SW, Calgary, Alberta T2P 1G1

Website: [www.petrobakken.com](http://www.petrobakken.com)

Phone: (403) 268-7800 / Fax: (403) 218-6075

Stock exchange: Toronto / Ticker symbol: PBN

**Assets and about:** PetroBakken is a light oil-focused exploration and production company with an extensive portfolio of resource plays. Its principal operating areas are southeastern Saskatchewan where it targets the Bakken formation of the Williston Basin and conventional Mississippian reservoirs, central Alberta, where it is focused on the Cardium formation and north-central Alberta, where it is engaged in exploring for light oil resource plays.

HALCON RESOURCES CORP.

In addition, PetroBakken has significant land holdings in the Horn River and Montney plays in northeast British Columbia that provide it with "natural gas optionality." In January, its Bakken business unit produced approximately 19,800 barrels of oil equivalent per day and its Cardium business unit produced approximately 20,800 boe per day, with the remainder of the production generated by our southeast Saskatchewan conventional and AB/BC business units. As of the end of December 2012, the company had 13 rigs operating in the field, with six in the Cardium, four in the Bakken, one in Southeast Saskatchewan, one in Swan Hills and one in a new play area. PetroBakken's 2013 capital expenditure plan of \$675 million includes \$85 million for 32 net Bakken wells. PetroBakken largely attributes its operational success in the Bakken, where it has identified more than 900 drilling locations, to its depth of expertise in applying technologies: "We are continuously innovating and evolving the efficiency of our horizontal drilling and fracture stimulation methods. We developed a drilling and extraction strategy that drills bilateral wells (two horizontal legs drilled out from one vertical well bore). This dual-leg tac-

tic provides increased exposure to this generally low permeability reservoir. In fact, four bilateral wells will fully develop a section in the Bakken, while eight single laterals are required to achieve the same well density. We have also been able to push the boundaries of the Bakken fairway with the introduction of delayed fracs, and Cleantech™ fracing solution."

**Petro-Hunt LLC**

Bruce W. Hunt, president  
 Douglas H. Hunt, director of acquisitions  
 1601 Elm St, Ste 3400, Dallas, TX 75201  
 Phone (214) 880-8400 / Fax: (214) 880-7101  
 Website: www.petro-hunt.com  
 North Dakota regional office: 258 119th Ave SW, Killdeer, ND 58640  
 Phone: (701) 863-6500 / Fax: (701) 863-6620

**Assets:** Beginning with its first East Texas oil field, Petro-Hunt entities have participated in the discovery of reserves in almost every major producing region in the United States. Its main domestic areas of operation include Mississippi, Louisiana, East and South Texas, the Texas Gulf Coast, Wyoming and the Rocky Mountains Williston Basin areas. A map of domestic operations can be found here

[bit.ly/RvkIRD](http://bit.ly/RvkIRD).

After selling some 81,000 acres and 10,500 barrels of oil equivalent a day of production to Halcon Resources in fourth quarter 2012, Petro-Hunt received a significant ownership position in Halcon and will continue to operate production of approximately 24,000 boe per day and develop its "600,000 plus acres of oil and gas leasehold in the Williston Basin with the full attention of our existing staff," the privately owned company said in an Oct. 22 press release.

According to State of North Dakota records, Petro-Hunt-operated wells that produced an average of 23,897.4 barrels of oil per day in January 2013.

Per North Dakota Department of Minerals the company operates oil production in these counties: Burke, Dunn, McKenzie, Mountrail, Williams.

**About:** Petro-Hunt LLC and its related entities are owned and operated by the William Herbert Hunt Family and are commonly referred to as Petro-Hunt, a privately held independent oil and gas company headquartered in Dallas, Texas. Through Petro-Hunt, its subsidiaries and affiliates are actively engaged in various industries with the primary focus

being the onshore and offshore exploration and production of oil and gas, gas processing, pipeline transportation and refining. Today Petro-Hunt is one of the largest privately held companies in the world. In addition to the energy industry, it is also active in coal mining, marine transportation, real estate, banking and ranching.

**PetroShale Inc. (formerly Algonquin Oil & Gas Limited)**

**PetroShale (US) Inc.**

James D. Fair, president and CEO, PetroShale Inc.

John Fair, president, PetroShale (US) Inc.

John@petroshaleinc.com

1801 Broadway, Ste 1410, Denver, CO 80202

Website: [www.petroshaleinc.com](http://www.petroshaleinc.com)

Phone: (303) 297-1407

Stock exchange: TSX VENTURE / Ticker symbol: PSH

**Assets:** PetroShale's primary asset is a 160-plus horizontal well program in the Mondak play operated by partner Slawson Exploration. It is just south of the Elm Cooley field in Richland County, Mont., and Mackenzie County, N.D. (see map and details at [www.petroshaleinc.com/operations](http://www.petroshaleinc.com/operations)). See September 2012 article [www.petroleumnews.com/pnads/964413997.shtml](http://www.petroleumnews.com/pnads/964413997.shtml) about PetroShale and Slawson tapping the upper Bakken shale member at Mondak, and a follow up April 7, 2013, at [www.petroleumnews-bakken.com/pnads/300996495.shtml](http://www.petroleumnews-bakken.com/pnads/300996495.shtml).

**About:** Per PetroShale's website, the company was formed in March 2012 "under a plan of arrangement combining Mondak Petroleum Inc. and Algonquin Oil and Gas Ltd." It has offices in both Calgary and Denver. PetroShale partners with Slawson in the Williston Bakken, where Slawson is one of the largest oil producers and has been operating for more than 36 years. PetroShale says its non-operating model and low overhead "allows for extremely efficient conversion of Slawson Exploration operations into both reserve and EBITA growth."

**Pride Energy, an Oklahoma general partnership**

Co-owners Matthew L. Pride and John W. Pride

4641 East 91st St, Tulsa, OK

PO Box 701950, Tulsa, OK 74170-1950

**About:** Per Manta, Prima Exploration is a "private company categorized under oil and gas producers. Our records show it was established in 1980 and incorporated in Colorado." Shows three employees.

**Primary Petroleum**

Michele (Mike) N. Marrandino, president, director, founder

700 - 4th Ave S.W., Ste 480, Calgary AB T2P 3J4, Canada

Website: [www.primarypetroleum.com](http://www.primarypetroleum.com)

Phone: (403) 262-3132 Fax: (403) 262-3175

Stock exchange: Toronto / Ticker symbol: PIE

**Assets:** Per its website, Primary "has focused a majority of its resources in the acquisition of prospective oil and gas acreage in NW Montana. The company has a significant land position in the Alberta Basin Bakken Fairway in Northwestern Montana. Currently, Primary is nearing completion of the \$41 million Phase I exploration program, which is 100 percent funded by its U.S. major JV partner. The Phase I program mandate was to evaluate and test both the conventional and unconventional formations for commercial hydrocarbons in the area. The target formations explored in the Phase I program were the Sunburst, Madison, Lodgepole, Bakken, Three Forks and Nisku Formations. Primary holds over 384,000 gross/324,000 net acres (600 gross/506 net sections) in Southern Alberta Basin Bakken prospective area in NW Montana."

**About:** Primary is a junior oil and gas company engaged in exploration and development activities in NW Montana and currently holds land positions in both an unconventional and conventional oil plays.

**QEP Resources Inc.**

Charles B. "Chuck" Stanley, president and CEO

1050 17th St, Ste 500, Denver, CO 80265

Website: [www.qepres.com](http://www.qepres.com)

Phone: (303) 672-6900 / Fax: (303) 294-9632

Stock exchange: NYSE / Ticker symbol: QEP

**Assets:** Company-wide E&P areas map at [www.qepres.com/ops\\_overview.html](http://www.qepres.com/ops_overview.html). In 2012, QEP went on a buying spree in the Williston Basin's Bakken petroleum system, where it has been operating since 2008. At the end of 2012 the company had 117,000 net acres in the basin with 450 Bakken and 301 Three Forks drilling locations. QEP said it intends to pick up the drilling pace considerably in 2013, dedicating 53 percent of its forecasted \$1.625-to \$1.725 billion capital expenditure budget to Bakken and Three Forks development, spread between operations on the Fort Berthold Reservation and its recently acquired South Antelope properties. The 53 percent of capex allocated to the Bakken for 2013 compares to 28 percent in 2012 and 17 percent in 2011.

Per state records, QEP had eight rigs working in North Dakota as of April 4, 2013, and in January 2013 company-operated wells produced an average of 17,615.3 barrels of oil per day, making it the 13th largest oil producer in the state that month.

Per North Dakota Department of Minerals QEP operates oil production in these counties: Dunn, McKenzie, McLean, Mountrail, Williams.

**About:** QEP is an independent natural gas and oil exploration and production company focused on the Rocky Mountain and Midcontinent regions of the United States. The company also gathers, compresses, treats, and processes natural gas.

**Quicksilver Resources**

Glen Darden, president and chief executive officer

801 Cherry St, Ste 3700, Unit 19, Fort Worth, TX 76102

#### Rosetta Resources

Randy L. Limbacher, president, director and CEO  
717 Texas, Ste 2800, Houston, TX 77002  
Website: [www.rosettaresources.com](http://www.rosettaresources.com)  
Phone: (713) 335-4000 / Fax: (713) 335-4197  
Stock exchange: NASDAQ / Ticker symbol: ROSE

**Assets:** Eagle Ford producer Rosetta holds a 300,000-acre exploratory position in the Southern Alberta Basin Bakken (called Exshav in Alberta) in northwestern Montana. (Its average daily production for 2012 in the Eagle Ford was 37,200 barrels of oil equivalent per day, up 35 percent from the prior year.) In 2011, Rosetta drilled four wells in a seven-well horizontal drilling program in its Montana Southern Alberta Bakken acreage in order to test the economic potential of the Banff, Bakken and Three Forks reservoirs. It drilled the remaining three wells in the first half of 2012. Rosetta reported initial production rates ranging from 50 to 403 barrels of oil equivalent per day, electing to suspend all investment in the play because the returns did not meet its economic standards. Rosetta's leases in the area start to expire in early 2014.

**About:** Rosetta Resources is an independent oil and gas company engaged in the exploration, development and exploitation of on-shore energy resources in the United States of America. It says it is, "focused on maintaining an inventory of high-return, low-risk unconventional drilling opportunities offering long-term production and reserve growth and a balanced commodity mix."

Email: [seciinfo@slawsoncompanies.com](mailto:seciinfo@slawsoncompanies.com)

**Assets:** According to State of North Dakota records, in January 2013, Slawson-operated wells produced an average of 20,759.3 barrels of oil per day, making the independent the 10th largest oil producer in North Dakota. As of April 4, 2013, Slawson had two rigs in Richland County, Montana, and three in Mountrail County, North Dakota. Privately owned, the company seldom discusses its assets and operations in a public forum, but Slawson has been exploring the Bakken petroleum system since 1989 and has gained a reputation of being a technically savvy aggressive explorer and producer which focuses on risk reduction. It was the third company to drill a horizontal well in the Williston Basin and the first company to aggressively pursue the development of the Upper Bakken, which is the first shale member to be developed in the Bakken petroleum system. According to Northern Oil and Gas's fourth quarter earnings call on March 1, 2013, the company's joint venture with operator Slawson in Upper Bakken shale development in Richland County, Mont., produced the highest internal rate of return for the highly successful Minnesota firm. Per North Dakota Department of Minerals Slawson operates oil production in these counties: Dunn, McKenzie, Mountrail, Williams.

**About:** Slawson Exploration is a privately held oil and gas exploration company founded by Donald C. Slawson in 1957. Since its inception, Slawson has drilled more than 3,500 wells in 10 states employing advanced techniques like 2-D seis/strat in the early 1980s, horizontal drilling in the late 1980s, large scale 3-D AVO in California gas basins in the 1990s and record-holding staged fracs for hydrocarbon harvesting in the oil resource plays throughout the Rockies.

**About:** Manta shows Triple T Inc. in Stanley, N.D., is a private company categorized under wholesale oils-petroleum. It was established in 1982 and incorporated in North Dakota.

**Triangle USA Petroleum Corp.**  
Jonathan Samuels, president and chief executive officer  
1200 17th St, Ste 2600, Denver, CO 80202  
Website: [www.trianglepetroleum.com](http://www.trianglepetroleum.com)  
Phone: (303) 260-7125 / Fax: (303) 260-5080  
Stock exchange: New York / Ticker symbol: TPLM

**Assets:** Per its website, Triangle's development operations are focused on the Bakken oil play in the Williston Basin of North Dakota and Montana. Through operated and non-operated growth channels, the company is actively converting its acreage position to resource and production. Map can be found here [www.trianglepetroleum.com/index.php?page=us](http://www.trianglepetroleum.com/index.php?page=us).

In December 2012, Triangle said that its average daily Bakken production throughout its fiscal third quarter ending Oct. 31 was 1,389 barrels of oil equivalent per day, representing a quarter-over-quarter sequential growth rate of approximately 20 percent.

In North Dakota, Triangle has approximately 36,000 net acres and is currently directing capital towards its operated program in the Rough Rider area of McKenzie and Williams counties. The development program encom-

passes a de-risked area of the play with industry activity taking place within adjacent drilling units. For its next fiscal year, Triangle has set a total budget of \$190 million, of which \$128 million is earmarked for the company's two-rig operated drilling program with another \$27 million for its non-operated drilling program. The company has also budgeted \$15 million for infrastructure construction, \$6 million for expanding and maintaining acreage, \$5 million for its fracking subsidiary Rock Pile Energy Services, and \$9 million for other capital expenditures. In Montana, Triangle has acquired approximately 50,000 net acres in Roosevelt and Sheridan counties. The position is largely contiguous and lies on the northwestern flank of the Williston Basin, adjacent to the Elm Coulee field. Driven by geologic modeling and control from vintage producing wells, the company was an early mover in the region which allowed it to secure attractive leasehold terms, but does not plan on deploying capital to this area over the near term, preferring other operators de-risk the area before committing resources.

Per North Dakota Department of Minerals Triangle operates oil production in these counties: McKenzie, Williams.

**About:** Triangle is a growth-oriented oil and gas exploration and development company focused solely on the Bakken oil play in the Williston Basin of North Dakota and Montana. Since entering the basin in early 2010, the company has acquired approximately 86,000 net acres prospective for the Bakken and Three Forks formations. While converting its assets to production through operated and non-operated drilling programs, the company said it continues to grow its acreage position throughout the basin.

**Whiting Petroleum Corp.****Whiting Oil and Gas Corp.**

James J. Volker, chief executive office  
1700 Broadway, Ste 2300, Denver, CO 80290

Website: [www.whiting.com](http://www.whiting.com)

Phone: (303) 837-1661

Stock exchange: New York / Ticker symbol: WLL

**Assets:** One of the first successful modern operators in the Williston Basin's Bakken petroleum system with the discovery of its Sanish field in early 2007, Whiting holds more than 700,000 net acres in the play and continues to add to that position. On page 5 of this pdf there is a map of all the company's assets: [www.whiting.com/media/general\\_corporate\\_information1.pdf](http://www.whiting.com/media/general_corporate_information1.pdf). On page 11 of the pdf is a Williston Basin assets map. Whiting reported company-wide production of 82,540 barrels of oil equivalent per day in 2012, an increase of 22 percent over output of 67,890 boe per day in 2011. (However, when adding back the 4,500 boe per day of production that was conveyed to the Whiting USA Trust II in March 2012, the company's overall production in 2012 was up 28 percent over 2011.) Seventy-three percent of the company's production comes from the Rocky Mountain region, with more than 60 percent of that coming from the Bakken, Pronghorn Sand and Three Forks formations in the Williston Basin. Based on independent engineering and internal estimates, Whiting estimates it has a total of 9,661 gross (4,503.2 net) potential future drilling locations. Of these gross locations, 50 percent are in Whiting's Bakken petroleum system and 25 percent are in its Redtail Niobrara play.

The company's 2013 capital budget is \$2.2 billion, of which \$1,914 million is for exploration and development activity, \$108 million for land and \$178 million for facilities. In 2013, it plans to invest \$1,142 million for the drilling and completion of 219 gross (148 net) wells in the Williston Basin, which represents 60 percent of its total planned exploration and development expenditures of \$1,914 million. Outside of its Sanish field, Whiting has assembled lease positions on seven separate prospects in the Williston Basin targeting the Bakken/ Three Forks and Pronghorn Sand formations.

Per North Dakota Department of Minerals operates oil production in these counties: Mountrail, Billings, Golden Valley, Stark, McKenzie, Williams.

**About:** Whiting Petroleum is an independent exploration and production company with an

oil focused asset base. It controls one of the largest acreage positions in the Bakken resource play in North Dakota. It also operates one of the largest enhanced oil recovery projects in the United States at its North Ward Estes Field in the Permian Basin of Texas. Whiting aims to deliver sustainable growth through a combination of its high return Bakken assets and long lived enhanced oil recovery projects.

**Windsor Energy Group LLC**

Diamondback Energy  
14313 N May Ave #100, Oklahoma City, OK 73134

Phone: (855) 979-2012

Minot, ND phone: (701) 837-2900

Stock exchange: New York / Ticker symbol: WPX

**Assets:** WPX Energy has operations and interests in Colorado, New Mexico, North Dakota, Pennsylvania, Wyoming, Argentina and Colombia. In addition to its exploration and development activities, it engages in natural gas sales and marketing. Interactive asset map can be found here [www.wpxenergy.com/operations.aspx](http://www.wpxenergy.com/operations.aspx). In December 2010, WPX acquired Dakota-3 E&P Company LLC, a company that held approximately 84,000 net acres on the Fort Berthold Indian Reservation, where WPX says it has proved reserves of about 80 million barrels of oil equivalent. According to State of North Dakota records, WPX-operated wells produced an average of 14,713.1 barrels of oil a day in January 2013, making it the 15th largest producer in the state that month.

WPX has introduced "many of the efficiencies we've honed in the Piceance into the Bakken," the company says on its website. It produced some 9,500 barrels of oil equivalent per day from its Bakken-area properties in 2012, up 98 percent from 4,800 boe per day produced in 2011. In the fourth quarter, the company produced about 11,400 boe per day from the Bakken, up 78 percent from the fourth quarter of 2011. And the company closed out the year producing some 11,600 boe a day from the play. All told, the Bakken accounted for more than half of WPX's total oil production in 2012, and WPX expects Bakken production to grow between 25 and 30 percent in 2013. Its 2013 capital expenditures budget for the Bakken is \$370-plus million.

Per North Dakota Department of Minerals WPX operates oil production in these counties: Dunn, McKenzie, Mountrail

**About:** According to WPX's website, it is "an independent natural gas and oil exploration and production company engaged in the development of long-life unconventional properties. We have built a geographically diverse portfolio of natural gas, oil and NGL reserves through organic development and strategic acquisitions."

Per State of North Dakota records Zenergy-operated wells produced an average of 8,799.1 barrels of oil per day in January 2013, making it the 20th largest oil producer in the state that month. Per North Dakota Department of Minerals operates oil production in these counties: McKenzie, Williams.

## COMPANY NEWS *in brief*

### Magnalight.com adds pedestal mounted halide light

Larson Electronics' Magnalight.com said Oct. 30 that it has announced the addition of a portable 400 watt metal halide hazardous area rated pedestal mount work light. Designed for high output, portability, and compliance with Class 1 Division 2 hazardous location regulations, the EPL-PM-1X400MH-100 Metal Halide Hazardous Location Light illuminates 25,000 square feet of work area and is suitable for wet locations. The compact size and 100 foot long cord of this unit combined with the pedestal base with built in carry handle provides operators in hazardous locations with an easily deployed and highly versatile source of portable illumination.

The EPL-PM-1X400MH-100 metal halide hazardous location light is a portable Class 1 Division 2 source of illumination that doesn't sacrifice power for portability. This industrial grade hazardous location light produces a 36,000 lumen flood beam of light using a 400 watt metal halide lamp and effectively illuminates 25,000 square feet of work area. The metal halide lamp assembly contained in this unit is approved for Class 1 Division 2 locations and has a weatherproof cast aluminum housing fitted with a hinged tempered glass door that is heat and impact resistant. The high performance ballast is sealed within the lamp housing and operates on voltages of 120 to 277 VAC for convenient connection to standard wall outlets. For more information visit [www.magnalight.com](http://www.magnalight.com).

### Larson Electronics introduces portable work light

Larson Electronics LLC said Nov. 13 that it has announced the addition of the 6000 watt CM-4X15M-25-480V-3P for operators looking for portable 480 volt work site lighting. Equipped with four 1500 watt adjustable metal halide light heads, this Magnalight work site lighting system can be used from the ground or elevated via crane for work site area illumination.

Larson has begun shipping the CM-4X15M-25-480V-3P 6000 watt portable work site lighting system. Equipped with four

1500 watt metal halide lights that can independently be positioned in any direction, this industrial lighting system can be powered with 480 volts, Larson said. Constructed of heavy duty aluminum tubing, this work area floodlight system is built for durability and demanding conditions. The design of the light enables the operator to pick the light system with a crane as easily as using it from the ground, since the light heads can be pointed directly up or down.

"Our new CM-4X15M-25-480V-3P work site illumination system is designed to be positioned within, above or below the work area for optimal coverage," said Larson's Rob Bresnahan. "The 480 volt ballasts don't require any kind of transformer or power distribution. Instead operators can tie off directly to their 480V panel and get the lighting they require."

For more information visit [www.magnalight.com](http://www.magnalight.com).

### Tractor & Equipment Co. plans expansion with purchase

Tractor & Equipment Co. said Nov. 8 that it has purchased 50 acres of property in the Bakken Industrial Park north of Williston on Highway 2. The property will be the future home to a full service T&E The Cat Rental Store rental center providing machinery, electrical power generation, air compression and mobile air-conditioning rentals.

"T&E The Cat Rental Store already has the largest equipment rental fleet in the Bakken, and this investment will allow us to provide truly unrivaled local support to our rental customers," said Troy Hickey, vice president of sales and marketing. "When our new facility opens mid-2013, we will greatly increase our overall rental capacity in western North Dakota and eastern Montana, adding approximately 40,000 square feet with 12 full-service bays and other supporting areas for the rental business." T&E will continue to operate its sales, parts, and service operations at its current Williston facility at 14078 West Front Street.

Since becoming an authorized Caterpillar Dealer in 1929, Tractor & Equipment Co. has grown from its roots in Sidney, Mont., to a multi-store operation servicing 44 counties in western North Dakota, central and eastern Montana, and northern Wyoming. T&E operates seven facilities in six cities under the names Tractor & Equipment Co., T&E The Cat Rental Store and T&E Power Systems. Tractor & Equipment Co. offers Caterpillar and other preferred brand equipment and power systems sales, parts, service and rentals for the construction, petroleum, mining, agricultural, governmental, electric power, on-highway and industrial markets. For more information, please visit [www.tractorandequipment.com](http://www.tractorandequipment.com).

### Ebeltoft Sickler Lawyers announces due-diligence group

Jennifer Grosz, partner in the Bakken-area law firm of Ebeltoft, Sickler, Kolling, Grosz, Bouray PLLC said Nov. 22 that the firm is announcing the formation of its business due-diligence team. "We have organized our Dickinson, North Dakota-based law firm to provide efficient and cost-effective corporate

performance audits and fixed-price due-diligence and closing services anywhere in the Bakken play,” said Grosz.

Notching her first mega-sale closing in 2010, Grosz was shocked that many oilfield businesses lose track of the basics. “The press of day-to-day business and the need to keep costs under control is so extreme that even critical organizational issues get put on the back burner,” Grosz explained. “Untended-to business details can cause big problems, shipwrecking a sale of the entire business when surprises are discovered after a letter of intent to purchase is signed,” Grosz told Petroleum News. “The billion-dollar companies can take care of themselves, but businesses with EBITDA-based values of \$10-\$150 million are where the most balls are dropped. These businesses are right in our services wheelhouse,” said Grosz.

JENNIFER GROSZ

Building strong partnerships with accounting firms, merger and acquisition advisors and business brokers, Grosz and her personal planning, transactional and real estate lawyers within Ebeltoft Sickler Lawyers have become the “go-to-lawyers” for small to mid-value business sales transactions. “By forming a practice team in the firm, we are building on that strength,” Grosz stated. For more information please contact Jennifer Grosz, senior level lawyer 701-225-LAWS (5297).

## Flermoen completes executive fire officer training

The City of Grand Forks, N.D., said Dec. 17 that the Grand Forks Fire Department Battalion Chief Kelli Flermoen has successfully completed the prestigious Executive Fire Officer program, offered by the U.S. Fire Administration’s National Fire Academy.

Flermoen is the first to complete the program in the Grand Forks Fire Department and one of a select few firefighters in North Dakota to do so. The program is designed to provide senior fire officers an understanding of the need to transform fire organizations from being reactive to proactive — with an emphasis on leadership development, prevention and risk reduction.

“This is a tremendous plus for the Grand Forks Fire Department,” said Grand Forks Fire Chief Peter O’Neill. “I admire Battalion Chief Flermoen’s dedication to the educational process and applaud her efforts.”

The program consists of a unique series of four courses — each two weeks in length — that span a four-year period. Following each course, the participant has to complete an applied research project that relates to their organization.

Flermoen, who has been with the Grand Forks Fire Department since January, 1996 has been a battalion chief since May 2011.

## Firm announces Kolling’s certificate, Cripe addition

The law office of Ebeltoft . Sickler . Lawyers said Nov. 27 that Matthew Kolling has earned the highest certificate available for HR professionals after passing examination demonstrating a

## Magnalight.com announces 40 watt magnetic light

Larson Electronics’ Magnalight.com said Dec. 5 that it has released a powerful magnetic LED work light designed to provide output comparable to 250 watt metal halide fixtures while improving reliability and reducing energy use. Lighter and producing less heat than comparable metal halide lamps, the AML-LED-WP40-M is ideal for a wide variety of applications including automotive mechanics, racing, inspections, and general shop work lighting.

The AML-LED-WP40-M mechanics LED work light from Magnalight.com produces high output illumination comparable to metal halide fixtures, yet is smaller, cooler running, and more versatile. Designed for illuminating in and around the shop during vehicles repairs, these LED fixtures are constructed of high strength aluminum and powder coated for protection from the elements as well as grease and oil. A shatterproof polycarbonate lens provides excellent lamp protection, and a waterproof and vapor proof sealed assembly ensures full protection against rain and damaging conditions. These LED work lights produce 1,462 lumens in a long flood pattern, allowing them to effectively illuminate large work areas, such as the underside of a vehicle while removing a transmission.

“This mechanics work light provides an even spread of bright white light for illumination for hands free operation during routine maintenance, repairs, and automotive performance modifications,” said Robert Bresnahan of Larson Electronics’ Larsonelectronicsllc.com.

For more information visit [www.maganlight.com](http://www.maganlight.com).

mastery of concepts such as strategic management, workforce planning and employment, human resource development, total rewards, employee and labor relations and risk management. Kolling and a team of HR layers are available to provide business HR practices audits and presentations to your human resources staff. Please contact him at 701.225.LAWS (5297).

In addition, the firm announces the addition of Attorney Haylee Cripe to its practice group. Cripe graduated from UND School of Law in Grand Forks, ND in spring of 2012 and completed her undergraduate education at UND graduating with a bachelor's of accountancy.

Ebeltoft . Sickler . Lawyers, serves the Bakken-based businesses in North Dakota and Montana. Practice groups provide corporate due-diligence; merger; acquisition and business sale negotiation and completion; leasing; purchase or sale of real estate and developer contracts; appearances for planning and zoning and litigation relating to governmental decisions; environmental claims litigation.

MATTHEW KOLLING

HAYLEE CRIPE

## Larson Electronics introduces swing arm light

Larson Electronics' Magnalight.com said Dec. 17 that it has unveiled the HBLP-1MLED-SWAM stainless steel swing arm mounted explosion proof light for waste water treatment plant applications. Built with 316 stainless steel and equipped with a Class 1 and Class 2 Division 1 10,000 lumen LED light, this adjustable hazardous area light is designed for corrosive environments.

The HBLP-1MLED-SWAM is used to position the explosion proof LED light to address maintenance tasks, and then pushed aside for storage. Similar in functionality to a dock light, this high powered LED light is rated for use in Class 1 and Class 2 Division 1 areas. The 316 stainless steel hinge and mounting arm are corrosion resistant and applicable for food grade applications. Priced around \$3,500, the HBLP-1MLED-SWAM is available with one week or less lead time.

"We have expanded our welding fabrication to include stainless steel configurations, because more of our customers in highly corrosive or food processing require it," said Rob Bresnahan with Larson Electronics' Magnalight.com. "This explosion proof LED light with stainless steel swing arm is the first of several products designed to meet the needs of operators in those industries."

Larson Electronics' Magnalight.com produces a wide range of innovative and durable implementations of portable hazardous location lighting. You can learn more about Larson Electronics at [www.Magnalight.com](http://www.Magnalight.com).

## Totem Equipment & Supply has new generator system

Totem Equipment & Supply said Jan. 15 that it is announcing

the development of a 90KW prime power Natural Gas powered Generator System.

The RCI-100NG-90 is specifically targeted towards the oil field. The Totem90 has available a sophisticated pipeline dehydrator system that pulls the moisture and solid particles out of the gas. The clean and dry gas is then regulated down to the proper pressure and volume to power the generator.

The Generator supplies a full 90 kilowatts of continuous duty electricity fueled by the natural gas already available on site. The benefits include fuel savings, transportation savings, elimination or reduction of flaring issues, and a continuous and reliable power supply.

This unit comes standard in a weather proof enclosure, skid mounted for ease of placement. Available options are distribution systems and the dehydrator.

For more information contact Four Seasons at 701-577-7014 or [www.FSEI-ND.com](http://www.FSEI-ND.com)

## Lynden International expands network in Edmonton

Lynden International, a full-service freight forwarding and logistics company, said Jan. 2 that it opened a new service center in Edmonton, Alberta, Canada, on Jan. 1. The new location adds a strategic link to Lynden's North American and Canadian network and will meet the increasing demand for transportation and logistics services for Canada's oil and gas industry.

"Lynden has served Canada for many years through Lynden Transport in Edmonton, Calgary and Whitehorse and we are pleased to now introduce Lynden's international services to our customers in the Alberta market," said Rob Clarke, Lynden International's Canadian business development director.

The new service center is located at the Edmonton International Airport in Nisku, Alberta. Lynden has locations all across Canada, including Calgary, Edmonton, Fort Erie, Toronto and Vancouver. As an international air and ocean freight forwarder with more than 50 locations in North America, Lynden International offers customs clearance and works with U.S. and Canadian customs, carriers, suppliers, vendors and buyers to arrange air, ocean or truck transportation anywhere in the world.

## Larson Electronics introduces safe blasting light

Larsonelectronics.com said Jan. 15 that it now offers a compact and powerful LED blasting light designed to provide extreme durability and cordless hands free operation.

The Larson Electronics BLG-LED-4 intrinsically safe blasting light provides long run times on a single set of alkaline batteries while providing enough power to cut through dusty media

blasting conditions. UL and IECEx/ATEX intrinsically safe approved and able to withstand abusive industrial working conditions, this light is ideal for media blasting operators who need a compact yet powerful blasting light that can illuminate the work area even through dirty working conditions.

The light also provides cordless and hands free operation in a compact and powerful LED blasting light package that mounts directly to blasting guns. This light is designed to be mounted to any standard blasting gun and features battery powered operation for convenient cord free operation and a replaceable heavy duty protective lens to protect the lamp assembly against the damaging effects of media blasting. Features include a heavy duty mounting system which includes all the necessary mounting hardware, a replaceable protective lens, 4 watt LED lamp producing 90 lumens, Class 1, Division 1 Groups A, B, C, D, Class 2, Division 1 Groups E, F, G approval, and international IECEx Exia IIC T4 iaD T135C Ga, Da and ATEX IIIGD Exia IIC T4 iaD T135C approvals. For more information visit [www.larsonelectronics.com](http://www.larsonelectronics.com).

## Larson Electronics offers high output LED light bar

Larson Electronics said Jan. 29 that its new LEDP3W-6 Low Profile High Intensity LED Light Bar provides high power illumination in a compact yet durable design. This LED light bar measures only 9 inches long by 2 inches high yet produces 1,368 lumens of bright white light in a waterproof package that can stand up to the most demanding operating conditions.

“The LEDP3W-6 LED light bar was designed to withstand rugged applications, such as marine boating, heavy machinery, hunting, and military use,” said Robert Bresnahan of Larson Electronics [www.larsonelectronics.com](http://www.larsonelectronics.com). “The compact design and low amp draw make this LED light bar an exception choice for any application that require lighting that will hold up to abuse without failure.”

The LEDP3W-6 low profile LED light bar uses only 18 watts at 1.5 amps of current draw on a 12 volt electrical system and is designed to provide a versatile light fixture that can be mounted in space limited locations without sacrificing durability or output. The heavy duty fixture assembly is constructed of extruded aluminum with an unbreakable polycarbonate lens to provide excellent durability. The assembly is IP68 rated waterproof to 3 meters of submersion, making this fixture ideal for offshore or boating applications where wetness and humidity is an issue. Internal LED drivers actively monitor voltage and heat

levels to assure the highest output and longevity possible while also allowing these light bars to operate with any voltage from 9 to 32 volts DC.

For more information visit [www.larsonelectronics.com](http://www.larsonelectronics.com).

## VP of law firm attends USLAW Network conference

Ebeltoft . Sickler . Lawyers said Jan. 28 that its vice president and managing partner, Randall Sickler, attended a recent semi-annual gathering of the membership of the USLAW Network where lawyers and their clients discussed emerging trends in products liability, construction and business litigation. There was also an open exchange of ideas between the lawyers and clients as to ways in which lawyers can provide additional value-added benefits. USLAW Network selects its members for delivering results and unparalleled client service, choosing Ebeltoft . Sickler . Lawyers as its sole North Dakota affiliate. Members represent many of the country’s leading businesses.

RANDALL SICKLER

With a priority on offering the highest level of education available in the legal profession, USLAW and its practice groups develop seminar content that is timely and which is delivered by experts including both its member attorneys and their clients.

Ebeltoft . Sickler . Lawyers consist of nine lawyers serving the Bakken-based businesses in North Dakota and Montana. Practice groups provide corporate due-diligence; merger; acquisition and business sale negotiation and completion; leasing; purchase or sale of real estate and developer contracts; appearances for planning and zoning and litigation relating to governmental decisions; and environmental claims litigation. With a wide range of lawyer expertise within four walls, the company’s mission is to harness the extensive experience and youthful energy to more effectively represent its clients, pledging to provide them with the highest level of service in a timely and efficient manner.

## Larson Electronics offers rechargeable LED tower

Larson Electronics said Feb. 11 that it has released an infrared LED light tower designed to provide fully portable operation in a compact and powerful design. The WAL-LED3W-4S-IR Infrared LED Light Tower produces invisible infrared light intended for use with night vision equipment and devices and features a collapsible tower and case with rechargeable battery for fully portable operation.

The WAL-LED3W-4S-IR Infrared LED Light Tower from Larson Electronics is as easy to carry and transport as suitcase sized luggage, yet provides high infrared illumination without the need for external power sources. This portable infrared LED light tower is designed for easy transport and deployment and can be set up in less than 30 seconds to provide an immediate source of high power infrared illumination. When fully collapsed and closed this unit is approximately the size of a carry on suitcase and weighs only 48 pounds. An included collapsible handle and case mounted wheels provide easy transport around the deploy-

ment area simpler deployment. The case is a heavy duty pelican style unit that holds all of the operational equipment inside when closed and provides full protection against damage from impacts and contaminants. In fully deployed configuration this unit will withstand 65 mph winds even with the tower extended to its full eight feet in height. For more information visit [www.larsonelectronics.com](http://www.larsonelectronics.com).

## MT Rigmat announces 2X stronger Walking Rigmat

MT Rigmat said Feb. 4 that it now offers the 2X stronger Walking Rigmat for the new walking rigs. These new rigs weigh between 1.5 million and 2 million pounds when loaded with 20,000-plus feet of drill pipe and more than 60 percent of that weight is transferred to the two walking pads on one side of the rig. Operators found that when they walked the rig past the well cellar on soft ground conventional rigmats were not strong enough and were bending, causing displaced dirt to crush the cellar side wall and damage the mats, creating unsafe work conditions.

MT Rigmat's 2X stronger Walking Rigmat is twice as strong as conventional rigmats due to the 6x25# beam built in a four-rail design rather than the standard 6x15# beam three-rail rigmat, translating into half the PSF loading to the ground beneath the rigmat and allowing it to bridge twice the distance and weight of a standard three-rail rigmat. The rigmat's dimensions remain the same as standard dimension at 8 feet by 40 feet, allowing for the rigmat to interchange with standard rigmats on location. Each 2X Walking Rigmat weighs 9,500 pounds.

MT Rigmat specializes in the manufacturing of oilfield rigmats and oilfield camp mats, also providing custom fabricated rigmats for any application and is the local rigmat solution for the Bakken field in Montana and North Dakota, and oil industry in Wyoming. For more information visit [www.mtrigmat.com](http://www.mtrigmat.com).

## Larson Electronics offers new dual colored light bar

Larson Electronics said Feb. 20 that it has released a high intensity LED light configured to allow operators to produce red

or blue light output from the same fixture. The LEDLB-24-VISRED LED light bar features rugged waterproof construction designed for extreme conditions and a dual color LED design that allows this unit to serve in multiple applications.

The LEDLB-24-VISRED LED light bar features four rows of LED emitters, two rows producing white light and two rows producing red, these light bars are ideal for law enforcement, security, and hunting applications where colored light is often desired. These high output LED lights are fitted with dual pigtailed Deutsch connectors to provide secure wiring connections and have an IP68 rated waterproof housing and unbreakable polycarbonate lens to withstand abusive weather conditions and handling.

The Cree LEDs used in these units provide more than 50,000 hours of operational life and high power output that surpasses that of comparable halogen lights while using less power. Since these lights are LED, they draw far less current than incandescent lamps and produce more than 4,000 lumens while drawing only 72 watts at 6 amps from a 12 volt electrical system. For more information visit [www.larsonelectronics.com](http://www.larsonelectronics.com).

## Four Seasons rallies to support Special Olympics

Four Seasons Equipment said Feb. 28 that in partnering with the Williston Special Olympics to help raise money for a trip to the state tournament in March, it held a cookout for the team and their families at its shop in Williston, N.D., on March 9.

Four Seasons would like your continuing support for these athletes and their journey to the state tournament and is requesting community support for the athletes to compete and help in developing important skills for their future.

Four Seasons is especially excited for this year's event, as one of its employee's sons, Christian Garzon, will be competing with the team from Williston.

To support the Special Olympics athletes with various expenses on their journey to the state basketball tournament, donations will be put toward the purchase of team uniforms, transportation to and from the tournament, and hotel accommodations, among various other expenses. Your support is greatly appreciated. Please mail donations prior to the March 15 tournament to Special Olympics North Dakota, 2616 South 26th St., Grand Forks, ND 58201, or visit [www.specialolympicsnorthdakota.org/home/](http://www.specialolympicsnorthdakota.org/home/).

## Lister adds new team member to its front office

Lister Industries said Feb. 28 that it is pleased to announce the addition of Marjorie Parker to its team in 2012 as office manager of its Edmonton Alberta office. Parker has a solid background in oil and gas office management coming from Carlyle Saskatchewan where she worked for an oilfield service company. She will keep a steady hand on Lister's billing and receivables and employee payrolls. Parker arrives into the office well before sun up to ensure those early bird truckers are able to load Lister rig mats quickly and get on the road to the many destinations Lister ships to throughout North America and works closely with Nicki Fox to ensure customer's needs are fully met.

In her spare time, Parker enjoys reading, taking long walks, camping and spending time with her two grandchildren whenever she is able to get back to Saskatchewan.

Lister Industries Ltd., a family owned company, is a global leader in the design and manufacturing of rig mats since 1968. Lister's product has been designed and built with quality craftsmanship using top grade materials. They are built to last through years of rough field service.

MARJORIE PARKER

LED18W-PAR38-RGB 18 watt RGB LED PAR 38 remote control light is an innovative addition to their extensive line of LED offerings that gives operators a wide range of operating choices as well as the ability to control the operation of the unit via a handheld remote control. This LED lamp features a PAR38 design which allows it to work with most standard light sockets, allowing users to simply unscrew and replace common outdoor floodlights and interior bulbs. Operating features include a handheld remote control which allows the user to control all the functions and modes from up to 25 feet away, making this LED light ideal for installation in hard to reach areas. Functions include on/off control, the choice of 16 different light colors, and the ability to produce a constant on state, a fast or slow flash, strobing effects, color fade, and dimming. For more information visit [www.larsonelectronics.com](http://www.larsonelectronics.com).

## Ebeltoft Sickler attorneys give presentation at SAHRA

BEKKI GRANT

COURTNEY OLSON

The law offices of Ebeltoft Sickler Lawyers said Feb. 27 that attorneys Bekki Grant and Courtney Olson recently gave a presentation to the Southwest Area Human Resources Association on the issue of age discrimination in the workplace. The Southwest Area Human Resources Association is an affiliate of the Society for Human Resource Management. The Society for Human Resource Management is the world's largest association devoted to human resource management.

Attorneys Grant and Olson's presentation covered federal and state regulations on age discrimination, including the Age Discrimination in Employment Act of 1967 and the North Dakota Human Rights Act. They also touched on safeguarding employment practices from age discrimination by adopting protective policies, impact monitoring, and education. The presentation concluded with an interactive session in which audience members were asked to work through a potential age discrimination scenario.

The presentation covered federal and state regulations on age discrimination, including the Age Discrimination in Employment Act of 1967 and the North Dakota Human Rights Act. They also touched on safeguarding employment practices from age discrimination by adopting protective policies, impact monitoring, and education. The presentation concluded with an interactive session in which audience members were asked to work through a potential age discrimination scenario.

## Larson Electronics releases PAR38 style LED light

Larson Electronics said March 4 that it has announced the release of a multi-mode capable LED light with remote control that is compatible with standard PAR38 style light fixtures. The LED18W-PAR38-RGB 18 Watt RGB LED PAR 38 Remote Control Light provides innovative control and operating options with remote control operation and multi-color output choices as well as the ability to produce flashing, dimming, and strobing effects.

The Larson Electronics

## Larson Electronics offers strobe hazard strobe light

Larson Electronics said March 14 that it has announced the addition of an LED strobe light designed for use in hazardous locations where corrosive conditions are commonly encountered. The HALSB-CRNM-LED Hazardous Area Strobing LED Light Beacon is constructed with a non metallic design that features a excellent resistance to corrosion and incorporates a high power LED lamp for brilliant signal output and high reliability in hazardous locations where easy signal visibility is critical.

The HALSB-CRNM-LED hazardous area LED beacon light from Larson Electronics is a powerful signal beacon that provides high reliability and durability

with corrosion resistant construction and high output LED lamp assembly. This powerful strobing beacon is constructed with a housing formed from GE Lexan polycarbonate, giving it excellent resistance to the effects of corrosion from exposure to marine environments, high humidity, salt water and damaging chemicals. A Pyrex lamp globe provides protection for the LED assembly and is also resistant to the effects of damaging environments and heat. This beacon light is NEMA 4X rated against water intrusion, making it suitable for wet locations and hose down areas, and is USCG approved for marine locations as well. For more information visit [www.larsonelectronics.com](http://www.larsonelectronics.com).
