# Want to be a part of this oil and gas directory?

*Qualified Petroleum News advertisers have full access to all the benefits included in this biannual magazine, which used to be called the Petroleum Directory but was recently changed to Arctic Oil & Gas Directory to reflect its content and worldwide distribution. Those benefits include the following:*

- **Exposure.** The Arctic Oil & Gas Directory is distributed twice a year to every one of our newspaper subscribers, in addition to its presence at trade shows and conferences nationally and internationally.
- **A company profile.** A full page, full color Q&A profile of your company. You'll be involved in the editing and choose the pictures. Once it's printed, you own the piece and you'll receive an electronic copy to use as a company brochure or however you see fit.
- **Access to free news coverage.** Submit announcements, new hires, special projects, new technologies, company photos, and more. Let current and potential new clients keep track of your company's milestones.
- **Unique company listings.** With over 130 categories to choose from, you'll be able to list your company name, contact information and a brief description of the products and services you offer.
- **Additional opportunities** to feature your company and its people – including feature stories, photo spreads, cover shots, and more.

## Get listed and be noticed.

# Airport Equipment Rentals, Alaska's largest supplier of heavy equipment

*Family-owned business invests in Alaska's future through skilled technical programs*

*Q. What is the official name of your company?*

A. Airport Equipment Rentals Inc. (AER)

*Q. Is your firm a subsidiary or affiliate of other companies? If so, please name those firms and their relationship to your company.*

A. AER is an S-Corp sole proprietorship, and represents major dealers, such as John Deere Construction and Compact Construction Equipment, Genie, Bomag, Wacker, Magnum, Tucker Snow Cats, and more.

*Q. What do you most want people to know about your company?*

A. AER is, and always has been, a family owned and operated company since inception. We are a 100% Alaska hire team and we want our team to feel they are and will always be a part of our family.

*Q. Where is your company located?*

A. AER has six locations across Alaska with our headquarters based in Fairbanks.

*Q. What year was the company founded and by whom?*

A. After the pipeline days, Jerry and Jay Sadler, two hard working brothers who had a little extra money in their pockets, decided to start investing in the booming residential and commercial building market; Sadco Enterprises was born.

Oil was flowing through the pipeline and right into the coffers of this bustling frontier. Housing and commercial real estate couldn't be built fast enough.

Then it happened. The blanket of security dropped out from the entire state and the rich economy came to a crashing halt.

With tools, equipment, employees, and buildings spread out everywhere the brothers needed to get everything consolidated in one place, see what was left, and liquidate what they could.

In a building off of Airport Rd., they gathered their tools, their dump trucks, their one backhoe, an old manlift, and tried to sell what they could and move on.

One day, a person came in and asked if they would rent some tools for half the day to finish a project on their house. Then a friend stopped in and asked if they could rent their backhoe for a few days to finish some landscaping. The two brothers with nothing to lose, decided to go for it and buy their first piece of equipment specifically for rent. In the summer of 1986 AER was established.

*Q. What is your company's primary business activity?*

A. AER rents, sells and leases light and heavy-duty equipment. Parts and service for equipment is another component of our

AER tours the AVTEC Diesel Technology Program in Seward with Department Head Bobby Dunno and Career Advisor Rachel James.

business environment.

*Q. Are there important projects the company is currently a part of or has done recently?*

A. Projects AER has participated include the Eielson Air Force Base F35 squadron infrastructure, Clear Air Force Station radar infrastructure improvements, the UAA diesel technology program internship, Marathon' refinery 2020 turnaround, Sterling Highway Cooper Landing bypass project, Middleton Island runway upgrade, Fort Greely missile defense system, Petro Star tank farm, and the drone hanger program at Ft. Wainwright.

*Q. How many employees does your company have?*

A. We currently have 107 employees.

*Q. Describe the equipment your company uses and are there any new equipment purchases planned?*

A. AER has one of the most diverse equipment fleets across the state with over 500 separate categories & classes of equipment. We provide everything from a hand drill, all the way up to massive state of the art oil exploration packages, and everything in between.

AER is constantly rotating in the latest and greatest in John Deere's construction lineup to ensure our customers are receiving the best uptime and technology available.

*Q. Is the company changing any of its services or products?*

A. We are continually adding new attachments, accessories, and technologies to our equipment to ensure we remain the largest and most diverse equipment fleet across Alaska.

*Q. What is your company's main strength or its edge over the competition?*

A. Our main strength over the competition is our ability to adjust for rapid changes in the market, it is such a capital-intensive market. If a customer needs equipment quickly, and we do not have it on hand, we can line up procurement from suppliers and provide expected arrival dates for equipment, all in one day.

*Q. What new markets, clients or projects did your company attract in the last year?*

A. Through our long term and new customers, AER is constantly reaching into new markets and projects across Alaska. We continually try to do what we do best, which is utilizing current types of common equipment in Alaska, while listening to the needs of our customer base. There is always the potential of bringing new equipment that we find at trade shows and conventions to the market.

*Q. What is the most challenging work/contract the company has undertaken?*

A. A very challenging recent project we worked on, was the delivery and maintenance of a large package of equipment to Old Harbor on Kodiak Island for the Corp of Army Engineers. The location is only accessible by barge and plane. We had to ensure everything was ready to roll once it was on the barge. After that, we utilized our workhorse Pilatus PC-12 turboprop to access the gravel strip with necessary tools and mechanics to keep ultimate uptime for the project.

*Q. What are the biggest obstacles to completing work your company undertakes?*

COURTESY AIRPORT EQUIPMENT RENTALS

Airport Equipment Rentals showing its support for reliable and clean energy sources for our future.

A. The biggest obstacle we face to completing work is cold weather and access to resources. In sustained cold of -20 degrees or more in the interior of Alaska and on the north slope, we have to be thinking ahead to insure we have unthawed equipment ready to go at a moment's notice.

*Q. What do you see as your company's biggest challenge in the next five years?*

A. One of our biggest challenges is keeping up with advancements in equipment technology and systems, while finding and retaining the skilled technicians to service said advancements. Our industry is adding new features, automations, and computers to the equipment faster than we can learn about them. There are huge gaps in education, and demand for skilled technicians far exceeds the supply. Some 75,000 jobs by 2024 will need to be filled across the nation as mechanics reach their retirement age.

To push through these challenges, we made a big effort in 2019 and now 2020 to build relationships with the wonderful educational institutions we have right in this state. We've put in the time to visit and meet with all the renown diesel technology programs across the state. King Tech High School, UAA, UAF, and AVTEC. AER has provided free subscriptions and equipment for students to learn from. Additionally, we are now part of the new UAA diesel technology apprentice program.

*Q. What is your company's safety record? What steps does the company take to ensure a safe work environment?*

A. Our company has a very stable safety record. We perform monthly safety meetings in our shops across the state and follow a diverse curriculum for those monthly meetings.

*Q. Has your company been involved in any community projects or charity events?*

A. AER contributes and participates in many charitable activities, such as the Fairbanks Skatepark Coalition, Arctic Man, Deltana Fair Assoc., Alaska Trappers Assoc., just to name a few.

*Q. What is the address of your company's Web site?*

A. [www.airportequipmentrentals.com](http://www.airportequipmentrentals.com)

# Ahtna provides state-of-the-art multi-disciplinary support to oil & gas industry

*A modern corporation guided by traditional values of hard work and integrity*

*Q. What is the official name of your company?*

A. Ahtna, Inc.

*Q. Is your firm a subsidiary or affiliate of other companies? If so, please name those firms and their relationship to your company.*

A. Ahtna, Inc., is an Alaska Native Regional Corp. parent company. Ahtna's holding company, Ahtna Netiye', LLC, provides strategic direction and corporate structure stability for the Ahtna family of companies that is aimed at long-term growth and success. Netiye' is an Ahtna Athabascan word meaning "our strength."

*Q. What do you most want people to know about your company?*

A. We have a strong and vested interest in ongoing oil and gas production in the state. Ahtna laid the first section of pipe on the Trans Alaska Pipeline System which passes through 197 miles of Ahtna's traditional lands.

*Q. Where is your company located?*

A. Ahtna's Corporate headquarters are based in Glennallen, Alaska. We have project locations across the country and other main offices are located in Anchorage, Palmer and Fairbanks, AK; West Sacramento, Irvine, Oakland, Monterey and Pleasant Hill, CA; and Renton, WA.

*Q. What year was the company founded and by whom?*

A. Ahtna, Inc. is one of 13 Alaska Native Regional Corporations established by Congress under terms of the Alaska Native Claims Settlement Act of 1971. Ahtna was formally established in June of 1972. Ahtna Inc. is owned by more than 2,000 shareholders, the majority of whom are of Ahtna Athabascan descent.

*Q. What is your company's primary business activity?*

A. Our multi-disciplinary staff of professionals provides civil and vertical construction, construction management, aggregate production, geomatics, environmental services, engineering, operations and maintenance, spill response and prevention, facilities management, logistics and security support to the oil and gas industry.

*Q. Are there important projects the company is currently a part of or has done recently?*

A. Our latest endeavor is acquisition of 23 acres of North Slope pad space situated within the Prudhoe Bay Unit which is available for leasing. The pad footprint is strategically located less than five miles from the Deadhorse airport with 15 acres of gravel and ideal space for a laydown yard or equipment, rig, or camp storage.

*Q. How many employees does your company have?*

A. We have over 1,300 employees worldwide with nearly 400 based in Alaska.

*Q. Is your company expanding any of its operations or locations?*

A. We have purchased an office in Monterey, California where we have successfully operated for over 20 years and opened a regional hub office in the Renton area of Seattle. Our acquisition of vessels and equipment from a leading dredging and civil construction firm has opened new possibilities in Florida. The acquisition is part of our overall investment strategy which is focused on companies that increase our service offerings, provide shareholder value and diversify our customer base. Our Fairbanks environmental services staff has moved to a larger office and our Anchorage-based staff has increased and we have moved some of our subsidiary staff to a neighboring building to accommodate the growth. The purchase of a new storage warehouse in midtown Anchorage has allowed us to securely store our subsidiaries' equipment in a centralized location.

*Q. What is your company's main strength or its edge over the competition?*

A. We are a modern corporation guided by traditional values – values that define our corporation and the way we do business. Thousands of years ago, the Ahtna Athabascan people built a home in a harsh Alaska environment. For generations, they survived and thrived through teamwork, hard work, community, loyalty and integrity. Respect – We appreciate our connectedness to all; Unity – We are One Team, One Ahtna; Safety – Safety first, the right way, everyday; Quality – We exceed expectations through ex-

COURTESY AHTNA, INC.

An Ahtna Construction & Primary Products Company crew performs mainline integrity investigations on the Trans-Alaska Pipeline at Milepost 756.74.

cellence; Integrity – We do the right thing.

*Q. What new markets, clients, partners or projects did your company attract in the last year?*

A. We continue to form new companies and our six-fold bonding capacity increase since 2017 to \$300 million has allowed our subsidiaries to pursue larger government and commercial contracts.

Several subsidiaries have established new program partnerships over the past year through the Small Business Administration mentor-protégé program. Merrick & Company of Denver has been supporting us in developing geospatial expertise for the energy market sector. A newly developed partnership with Stantec, Inc. continues to grow and create new opportunities in the Alaska Oil and Gas markets and government contracting. Our joint venture with Great Lakes Environmental & Infrastructure is pursuing work with the US Army Corps of Engineers. We are excited about a new relationship with M.A. Mortenson Company, a Minneapolis-based construction company, that will expand our services in the Midwest. We now have three joint ventures with CDM Smith, a global engineering and construction firm. Levee work in the Midwest under our Klutina River Contracts JV with CDM Smith has grown beyond our expectations.

*Q. What is the most challenging work/contract the company has undertaken?*

A. This year the construction and environmental work being done by one of our subsidiaries in the Aleutians has been a real challenge. We have a proven track record in successfully completing projects in these logistically challenging locations. Risk mitigation plans had to be developed to address the concerns from the COVID-19 virus and assure all parties involved that we could conduct our projects safely and on schedule.

*Q. What are the biggest obstacles to completing work your company undertakes?*

A. Many of the projects we have in Alaska are seasonal and are impacted by logistics and weather. Normally our projects are bid with a certain amount of weather delay days, but couple that with transportation schedules and restrictions and you can run the risk of delaying a project by a year.

*Q. What do you see as your company's biggest challenge in*

*the next five years?*

A. Continuing to grow our Alaska work to accommodate a shareholder workforce that is growing. Oil tax initiatives such as the "Fair Tax Act" continues to create uncertainty and run the risk of potentially delaying projects.

*Q. Does your company have an anniversary or other landmark event coming up?*

A. Next year, 2021, will mark the 50th anniversary of the passage of the Alaska Native Claims Settlement Act (ANCSA) and we will celebrate 50 years of business in 2022.

*Q. What is your company's safety record? What steps does the company take to ensure a safe work environment?*

A. Ahtna is committed to a safe and productive work environment. Our occupational illness and injury rates are well below the current national average despite extreme inclement weather and remote operations. Currently, our Experience Modification Rate of 0.59 is well below the construction industry national average.

Our site health and safety plans ensure hazards are identified and mitigated, specific site-safety reviews are continuously conducted, and daily safety and work plans are held.

Our specialists bring many years of regulatory compliance experience in all facets of environmental engineering, construction, waste-management and other types of safety-related experience in both government and private-sector arenas.

*Q. Has your company been involved in any community projects or charity events?*

A. As an Alaska Native corporation, Ahtna constantly seeks to enhance the overall well-being of our shareholders through employment, educational opportunities, monetary dividends, and other benefits. We are not focused solely on profitability, but also the provision of vital shareholder services and programs aimed at preserving our cultural identity, developing our resources, protecting our land and enhancing the lives of our people. Ahtna specifically supports non-profit organizations in the Ahtna region that address quality of life issues, culture, environmental stewardship, safety, and education.

*Q. What is the address of your company's Web site?*

A. [www.ahtna.com](http://www.ahtna.com)

# GCI launches Alaska's first 5G network in Anchorage

*Company aims high, taking Alaska from the Last Frontier to the First Frontier*

*Q. What is the official name of your company?*

A. GCI

*Q. What do you most want people to know about your company?*

A. GCI recognizes the importance of responsible resource development, and specifically how important the oil and gas industry is to Alaskans and a healthy state economy. GCI's long-term focus on network infrastructure across the state puts the company in a unique position to support the urban, rural and remote industrial needs of Alaska.

*Q. Where is your company located?*

A. GCI is headquartered in Anchorage, AK with employees located across the state.

**QA**

*Q. What year was the company founded and by whom?*

A. GCI was founded in 1979 by Ron Duncan and Bob Walp.

*Q. What is your company's primary business activity?*

A. GCI provides technology solutions to meet the complex challenges facing Alaska's energy sector. GCI's resilient fiber and LTE networks, including the only redundant fiberoptic network to the North Slope, help clients meet growing highspeed bandwidth needs.

*Q. Are there important projects the company is currently a part of or has done recently?*

A. Earlier this year, GCI delivered the first true 5G wireless service in the state, beginning with Anchorage. GCI's 5G project has not only delivered the first standards-based 5G network to Anchorage but has also improved 4G LTE speeds for all GCI wireless customers across the city.

That means GCI customers don't need a 5G phone to get the benefits of GCI's next generation network upgrades. When the 5G wireless project is completed, every sector of each cell site will be outfitted with five radios to utilize GCI's low-band and mid-band radio spectrum, driving massive improvements in speed and coverage, particularly in-building coverage. GCI's fiber network, the backbone of the project, will deliver broadband connectivity to each of the upgraded cell sites.

GCI's new, vastly more capable network will operate five times faster than before, and it will serve as the blueprint for GCI's network modernization efforts in other Alaska cities.

*Q. How many employees does your company have?*

A. 2,000 employees

A heavy-lift helicopter hauls materials for a remote GCI TERRA tower.

COURTESY GCI

A crewmember does prep work to lay fiber optic cable in the ground near the Port of Alaska.

COURTESY GCI

*Q. Is the company changing any of its services or products?*

A. GCI, as a technology company, continually develops new products to meet the ever-changing technology needs of its customers.

*Q. What is your company's main strength or its edge over the competition?*

A. GCI is committed to bringing the levels of connectivity necessary to its oil and gas customers so that all industry-specific applications, whether cloud-based or local, can be utilized when needed. The GCI team listens to the needs of its clients

A specialized helicopter ferries fuel to a GCI TERRA tower.

and brings solutions tailored to meet their current and future needs. Our philosophy focuses on detailed planning, integration, agility and customer enablement. We see this need growing significantly as the digitization of oilfield operations continue to transform the industry.

GCI also has access to the best engineers and technicians in the state who can design and maintain complex networks over multiple facilities, including fiber, coax, wireless, satellite and microwave. This team of professional telecom engineers, project managers, and industrial telecom technicians collectively have over 250+ years of experience in infrastructure design, construction, commissioning, and support in remote environments across the world

*Q. What is the most challenging work/contract the company has undertaken?*

A. The TERRA network is among the most challenging projects GCI has undertaken. Completed in 2017, GCI's TERRA network delivers high-speed broadband connectivity to 45,000 Alaskans in 84 rural communities in Western and Northwest Alaska. The \$300 million TERRA network consists of sections of fiber optic cable coupled with more than 100 microwave towers stretching more than 3,300 miles, which, if measured out, is larger than the state of Texas. Construction relied on heavy-lift helicopters to deliver tower equipment, tools and steel to remote areas.

But the work didn't stop there. With 22 TERRA towers located on remote mountain tops, GCI relies on generators to keep the equipment online 24/7/365. Keeping those generators running year-round requires a massive annual refueling effort, where GCI crews and contractors ferry enough fuel to keep the sites online for 15 months at a time. The refueling effort is critical in order to power the network that keeps Western and Northwest Alaska clinics, schools and community residents connected.

*Q. What are the biggest obstacles to completing work your company undertakes?*

A. Short construction seasons, challenging logistics in rural Alaska, harsh Alaska weather conditions, and a limited local talent resource pool.

*Q. What do you see as your company's biggest challenge in the next five years?*

A. The health of the state's economy – we have been operat-

A heavy-lift helicopter lowers a section of a mountaintop GCI TERRA tower into place.

ing in a recession for multiple years now and it shows no sign of ending. This has a direct impact of the health of GCI and of all our customers in the energy & mining sectors.

*Q. What is your company's safety record? What steps does the company take to ensure a safe work environment?*

A. Safety is a core value of the GCI team. Nowhere is this focus more apparent than the success of our team achieving 3.2 million employee hours without a lost time accident, as well as 2 million hours since our last recordable incident in support of oil, gas, and mining.

*Q. Has your company been involved in any community projects or charity events?*

A. GCI is one of Alaska's leaders in corporate philanthropy, donating approximately \$2 million each year in cash, products and connectivity to organizations across the state. GCI is committed to giving back to the communities it serves and provides employees with 16 hours of paid leave to volunteer with local organizations. In 2019, nearly 550 GCI employees volunteered more than 5,300 hours.

*Q. What is the address of your company's Web site?*

A. <https://www.gci.com/business/solutions/energy>

# Lynden: Your Key to the North Slope

## **LYNDEN OILFIELD SERVICES**

From the Trans-Alaska Pipeline construction in the 1970s to today's global oil field operations and exploration, Lynden has a long history of supporting the oil and gas industry in Prudhoe Bay.

Transportation and logistics are critical to the activity on the North Slope. Utilizing the full capabilities of the Lynden family of companies, Lynden Oilfield Services provides multi-modal air, sea and land services including heavy haul options for drilling contractors, chemical suppliers, camp support, construction and all phases of resource activity throughout the North Slope and offshore Alaska. Heavy haul and oversized loads such as camp modules, drill rigs, and pipe, and bulk liquids including water and fuel, are regularly moved to the North Slope from locations around the world.

With an established operating base in Deadhorse, Lynden Oilfield Services has both the equipment and experienced on-site staff to ensure logistics – including last mile services – are completed efficiently and according to plan.

## COMPANY NEWS *in brief*

### Droop new VP Worley Alaska's field services/US O&M

A lifelong Alaskan with over 31 years of experience in the energy, chemicals and resources industry, Kelly Droop now leads Worley's Alaska field services and US O&M businesses and is focused on providing outstanding value to her customers through a collaborative and team-driven approach.

The Alaska field services team provides O&M, turnarounds, engineering, construction and fabrication, and wells and fluid hauling support, and boasts a significant equipment fleet and over \$200M of infrastructure investment in Anchorage and Prudhoe Bay, Alaska. The team comprises of approximately 600 employees, who work on a rotational basis 24 hours a day, seven days a week, 365 days a year on the North Slope of Alaska.

KELLY DROOP

The US O&M business provides operations and maintenance excellence to power and industrial water treatment facilities throughout the United States, as well as maintenance and turnarounds at 11 power plants.

Through multiple acquisitions, Droop has been a key member of the Worley team for over 31 years, beginning with union construction, then moving to field operations and back to corporate roles. Most recently she was the VP, global tools, equipment & fleet, managing the company's assets deployed on projects in the US, Canada, UK and Russia.

### Lynden a top finisher in 2020 Quest for Quality Awards

As reported by Lynden News Aug. 10, Lynden Transport continues to outperform other carriers in the western region, earning a top spot and its 24th award in the 37th annual Quest for Quality Awards. The company received the third-highest overall weighted score among less-than-truckload western regional carriers and was especially strong in the customer service and equipment and operations categories. The logistics management annual awards are the gold standard for customer satisfaction and performance excellence for carriers, ports and logistics providers worldwide.

"Lynden Transport is proud to add another top score in the Western Regional LTL category. We've now received 24 awards which contribute to a combined total of 40 Quest for Quality awards earned by Lynden companies over the years," said Lynden Transport President Paul Grimaldi. "This is a reflection of our long-standing focus on customers that we continually strive to uphold. I am especially proud of the 2020 award as it illustrates the dedication of our employees who have been working through the challenges of COVID-19 to serve our customers. Our team is committed to providing the Lynden brand of service excellence every day."

The Quest for Quality Awards are the culmination of a six-month research project conducted by Peerless Research Group.

For more than three decades, the awards have been regarded in the transportation and logistics industry as the most important measure of customer satisfaction and performance excellence. To determine the "best of the best," transportation and supply chain decision makers rate carriers, logistics providers and port operators on service quality in various categories such as on-time performance, value and customer service. This year, 4,504 ballots were cast from logistics and supply chain decision makers resulting in 144 companies earning Quest for Quality gold. ### C & R Pipe and Steel expands its equipment and inventory

C & R Pipe and Steel in Fairbanks, Alaska, said recently that it has been working towards better serving the oilfield industry by expanding its inventory and obtaining high end equipment.

The company said it has recently added a Messer MetalMaster 2.0 to its arsenal of equipment. The addition of this high-end CNC cutting table allows C & R Pipe and Steel to process plate up to 1 5/8-inch in high definition giving precision cutting when it comes to cutting holes in a true hole diameter.

The machine is high-performance with cutting at 114 feet per minute with the utmost accuracy, whether while cutting with plasma, or with oxyfuel. The Hypertherm Powermax 125 plasma torch, on the cutting table, can cut steel, aluminum, or stainless plates.

This machine will allow C & R Pipe and Steel a great advantage when it comes to processing plate in the interior for the oilfield industry. It was a welcomed addition to the vast inventory of C & R Pipe and Steel's yard.

### Alaska Marine Lines celebrates 40 years

As reported by Lynden News July 15, Alaska Marine Lines celebrates its 40th anniversary this year! That is 40 years we've been privileged to serve our amazing customers and local communities, 40 years side-by-side with the most wonderful, hard-working people in the barge industry and 40 years of experience fine tuning our service and reach to offer the largest fleet of equipment in Alaska, the company said.

In 1980, Lynden acquired the assets of Southeast Barge Lines from Western Towboat, Trucano Construction and Jim Harper and Southeast Alaska Barge Lines was established. "This began the long and productive partnership between Lynden and West-

ern Towboat that we still enjoy today,” said Alaska Marine Lines President Kevin Anderson.

Two years later, Southeast Alaska Barge Lines was renamed Alaska Marine Lines. In 1985, as Foss Alaska Lines withdrew from Southeast service and Pacific Western Lines curtailed its service, Alaska Marine Lines purchased selected assets from those barge carriers and added many employees who are still with the Lynden companies today including Executive Vice President Alex McKallor. Also that year, service partner Arrowhead Transfer headed by Gordie Harang began providing services to Alaska Marine Lines in Southeast Alaska.

Looking back, Anderson said some of the biggest changes have been in equipment. “We’ve gone from 20-foot containers to 40’s, then 48’s and now 53’s, and forklifts with a capacity of 55,000 pounds that can now lift 120,000 pounds,” he said. “The first barge was 130 feet long with a 1,000-HP tug. Today we have 420-foot barges towed by tugs with 5,000-HP.”

In 2019, Alaska Marine Lines expanded its service area to include Arctic villages like Kaktovik to better serve customers statewide and this year has expanded its fleet with the purchase of two cargo barges.

“As we celebrate four decades of business, I’d like to honor the dedicated and talented employees, past and present, who have contributed to our success,” Anderson said. “We now service every major coastal region in Alaska. I look forward to seeing what the new decade will bring.”

## Diamond Grid USA welcomes John Horjes to its team

Diamond Grid USA & Diamond Grid Canada announced July 20 the appointment of John Horjes to executive director of the businesses to facilitate ongoing expansion targets. Horjes will lead the establishment and expansion of the Diamond Grid product into the USA and Canadian markets - two regions which have been identified as key areas of focus for Diamond Grid.

Horjes is well credentialed in business management and strategy, hailing from a strong background of business development, investment banking and mergers and acquisitions of key businesses. Horjes said that he is excited to be joining Diamond Grid, a global market leader in surface stabilization and erosion control systems.

“Diamond Grid is a unique and innovative product with inimitable strength characteristics. The concept is simple, but the applications are boundless and there’s a lot of excitement within the mining, agricultural, construction and landscaping sectors in response to it. Diamond Grid offers the cost savings, easily solves erosion issues and makes construction of paving and hardstand areas a breeze. Its application as an alternative to traditional concrete formwork is saving customers time and significant costs. It is great to have the opportunity to

JOHN HORJES

work with a product that services everyone from large scale industrial customers to DIY’s.”

Diamond Grid’s Managing Director Ben Kirkup said that Diamond Grid is on track for another solid year of business growth globally despite economical disruptions.

## Nordic-Calista Services, investing in Alaska’s future

Nordic-Calista Services, a drilling and workover company owned by Calista Corp., said July 10 that it is in the process of updating Rig 2, located in Deadhorse.

Due to COVID-19, Nordic-Calista decided to look at ways to invest in Alaska’s future and ready itself for when things would change. The new owners decided to invest capital and upgrade the Rig 2 mast.

Previously the mast on Rig 2 was a double, which means it could only rack two single joints of drill pipe at a given time. The new mast is a larger custom mast, referred to as a triple, capable of racking three drill pipes at a time. In addition, Nordic-Calista is increasing the rig’s mast capacity, from a 300,000 pound mast to a 460,000 pound mast. The mast, currently located in Edmonton, should be installed sometime in September. Once the mast is installed,

Nordic-Calista plans to invest in a top drive unit, providing the rig with a higher capacity for rotary drilling, side track drilling, or heavy workover. “The equipment we are adding really increases the capabilities,” said Benjamin Wedin, operations manager Nordic-Calista, “It looks there will be some of that work on the horizon, so we are going to try to position to be ready for it.”

Although Nordic-Calista does not currently have a customer in line to use Rig 2, due to COVID-19, the company was awarded a Paycheck Protection Program loan by the Small Business Administration, this has allowed for Nordic-Calista to keep its crews working to make it all happen. “We thought well, what can we do to get our crews back working,” said Sharon Lechner, president of Nordic-Calista Services, “We decided let’s invest some capital dollars somehow and put people back to work. The real driver was the SBA program because we could spend that money on our workforce and we also get the option of having a much better rig at the end of that period.”

Nordic-Calista Services plans to have Rig 2 up and running by early October.

## COMPANY NEWS *in brief*

COURTESY LYNDEN

### Lynden Oilfield Services delivers critical freight

As reported by Lynden News July 8, Lynden Oilfield Services equipment crossed tundra-covered public lands in Alaska this winter and spring to deliver critical infrastructure across the North Slope that couldn't wait until this summer's barging season.

Methanol, cement mixer trucks, front-end loaders, sheet steel and fire trucks were included in the remote deliveries. Time was limited as the tundra is closed to travel once the snow depth deteriorates. Air freight and other alternatives were not an option for most of the cargo due to weight and dimensional challenges.

"This season was the busiest yet for snow road projects, which meant many challenges for our team. With the hard work and innovative thinking of our crew we were able to pull it all off," says John Jansen, general manager of Lynden Oilfield Services. The team moved more than a million pounds of freight on the North Slope this season using the PistenBully snow cats. These deliveries allowed for more efficient and newer housing in the community of Atkasuk and helped the village of Utqia vik repair and replace fuel storage areas. Unlike conventional trucks that move freight on roads with existing right-of-way and permits, the PistenBully snow cats must travel across property owned by a variety of entities at an average speed of 9 mph.

The moves involve cooperation between Lynden companies and Alaska partners like the Bureau of Land Management, North Slope Borough and Alaska Department of Natural Resources. In all, Alaska West Express and Lynden Oilfield Services worked with 10 different local, state, and federal agencies and three native corporations this season.

### Lynden Transport on the build with Sprung Industries

As reported by Lynden News July 1, Lynden Transport is delivering materials for a project at Fort Wainwright military base near Fairbanks, Alaska, this spring and summer. Drivers are hauling 58 loads of large tent frames and insulation from Salt Lake City and Calgary for the construction of seven buildings on base for customer Sprung Industries. According to Lynden Transport Regional Sales Manager Tony Vitoff, DynCorp International is handling the construction and Sprung Industries is supplying the materials. Loads are moving over the highway or water depending on construction timeline requirements and are being coordinated through Lynden Transport's Portland and Fairbanks service centers.

"Lynden Transport has gone the extra mile to support the

COURTESY LYNDEN

Wainwright project by staging structures in their yard until we need them on site," says Gary Smith, DynCorp International project manager. "DI appreciates this kind of support which is critical to our collective success."

### North to Alaska, South by Barge: Voyage of a Reefer Tech

As reported by Lynden News June 29, every fishing season, Alaska Marine Lines refrigeration mechanics leave Seattle and make the journey north to keep Lynden's refrigerated containers in top shape. The techs fly to Alaska and then accompany the loaded reefers on the southbound barges. These ride-along-with-the-reefer trips have been taking place for years, but the voyage of the reefer technician has not been well known. Until now.

Mechanic Greg Restad was so impressed with his off-site assignment that he decided to document his experience. His notes provide a unique look behind the scenes of this annual effort to protect customers' fish and other refrigerated freight and maintain Lynden's equipment. It should be noted that Restad has 30 years of experience working on refrigerated equipment including working for Les Candee and Art Burg at Foss Maritime in the early 1980s.

According to Assistant Maintenance and Repair Manager Steve Tafoya, mechanics check around 3,000 reefers each year during the north-to-south trips. Most reefers last around 20 years, but with excellent care, they can last longer.

"We run a pre-trip inspection anytime a reefer enters the yard so we keep close tabs on all equipment and any emerging problems," Tafoya says. "It could be power, a leak, burnout of the evaporator motor or something else. The most common issue with reefers is a lack of communication with the tug. Our mechanics also check and service generator sets, make sure gear vans are stocked and that the GRASP reefer monitoring system, all plugs and time share panels are working," Tafoya explains. Everything is documented and becomes part of the service record.

For more information visit [www.lynden.com](http://www.lynden.com).

### Alaska Marine Lines expands fleet with two big barges

As reported by Lynden News June 22, Alaska Marine Lines (dba Aloha Marine Lines in Hawaii) expanded its fleet with the

purchase of two cargo barges, the Kamakani and Namakani, from Oregon based Sause Bros. Sause terminated its Hawaii service in March and Alaska Marine Lines is now serving its customers.

The Kamakani and the Namakani are now the largest of all Alaska Marine Lines vessels - each with a 438-foot overall length and 105 feet of width and a payload of 16,869 tons. "For comparison, our railbarges are 420 feet long and 100 feet wide with a payload of 15,300 tons," explains Tom Crescenzi, Seattle service center manager. The Kamakani was constructed by Gundersen Marine in 2008 and the Namakani in 2016. Both are fitted with 22-foot-high cargo binwalls and an internal ballast system.

"While the initial sailing of the Kamakani on April 18 was definitely the heaviest Hawaii single barge sailing to depart from Terminal 115 in Seattle, she also had the least amount of lashing," Crescenzi said. "Between the walls and the rod lashings we dropped close to 90 percent of the lashing compared to a regular Hawaiian sailing. We still have a number of things to learn and improve on, but Hawaii Barge Master Brad Hughes did a great job on the first round. Everyone has put in a lot of work and, considering the size of this sailing and the short time we've had to handle the switch-over from Sause, everyone really stepped up."

COURTESY LYNDEN

## LTI, Inc. Idaho drivers deliver groceries for WinCo

As reported by Lynden News June 11, LTI Inc. drivers in Caldwell and Jerome, Idaho, answered the call this spring when the supermarket chain WinCo Foods was hit with an unprecedented demand for groceries due to the shelter-in-place orders. WinCo's daily freight volumes grew from 2.4 million to 7 million pounds of grocery products. "We agreed to help and quickly sent out trucks and drivers to the Boise, Idaho, distribution center," said LTI Inc. Operations Manager Gordy Sant. "Within the same day Caldwell drivers were hauling 400,000 pounds of groceries to several WinCo locations."

In all, LTI Inc. drivers hauled 3.4 million pounds of freight to various Idaho communities during the rush period. Jerome drivers also hauled loads to Salt Lake City, western Oregon or wherever products were needed. "Everyone at LTI Inc. pulled together to cover shifts for these drivers so we could assist in this emergency situation," Gordy said. "We continue to haul groceries for WinCo as needed. This is a great example of how Lynden and its people can quickly diversify and an opportunity to show our strength in an area outside of the milk industry."

## Air Liquide signs contract with customer in South Korea

Air Liquide Engineering & Construction said June 10, that it

COURTESY AIR LIQUIDE

has signed a new contract with POSCO, a leading steel producer in South Korea, to design and build an air separation unit which will produce oxygen, nitrogen, and argon and have a production capacity of 1,700 tonnes per day of oxygen.

The new unit will be installed at POSCO's Pohang site in South Korea. The oxygen and argon produced will be used to transform iron into high quality steel and enable POSCO to improve efficiency of the production process.

This new air separation unit, replacing two existing units on the Pohang site, will be designed and built using Air Liquide's best-in-class cryogenics technologies, thereby maximizing energy efficiency and reducing environmental footprint.

POSCO, as the largest integrated producer in South Korea, delivers 41 million tons of crude steel per year. Founded in 1968 and privatized in 2000, POSCO has led the Korean steel industry for more than four decades.

Air Liquide has been working with POSCO for more than 30 years and has supplied 20 air separation units to POSCO's Pohang and Gwangyang sites.

## Sea urchins to Kombucha, Brown Line carries cool freight

As reported by Lynden News May 29, Brown Line's "bread and butter" is the I-5 corridor from Washington to California. Four days a week, drivers make the trip hauling fresh and frozen fish, chicken and other refrigerated products up and down the coast.

"We also haul some lesser-known types of freight, like sea urchin and Kombucha," explains Riley Rosvold, Brown Lines sales manager. The round, spiky creatures are harvested for the eggs inside, called roe, which is used in sushi. Brown Line is the only carrier in the Pacific Northwest trusted to carry the high-value, temperature-sensitive freight.

Divers bring the urchins to the surface during the winter months and they are delivered to Brown Line for transport to Oxnard and Los Angeles. They are then processed and the roe is flown to Japan.

"We are diversifying our freight hauls," Riley says. "In the past, Brown Line has been reliant on the seafood industry, but now we are moving into more dairy and vegan products." Offering both truckload and LTL service throughout the U.S. and Western Canada, Brown Line provides companies with a variety of delivery options.

"Our freight is extremely time-sensitive due to short shelf life

COURTESY LYNDEN

and expiration dates, so we have to be vigilant about traffic, deadlines and equipment,” Riley explains. “Many customers shipping fresh and chill products have sell-by dates which are less than a week after production. It is a testament to our driving teams and dispatchers that our customers trust us to deliver their products at the peak of freshness and quality - especially in the congested Los Angeles area. Routing our trucks efficiently and effectively is imperative.”

## Norum takes gavel as new ATA president

On May 1 Josh Norum of Sourdough Express was passed the gavel to become the 2020-2021 president of the Alaska Trucking Association. The outgoing president is Jamie Benson of Federal Express.

“I have been a part of this group for six years now and am proud to be able to serve on an organization that has been a much needed advocate for the trucking industry,” Norum said. “I am the fifth member of my family to be the ATA president — my Great Uncle Gene Rogge (1959-1960), Great Grandpa Leo Schlotfeldt (1963-1964), Grandpa Whitey Gregory (1982-1983) and Uncle Jeff Gregory (1999-2000).”

Sourdough Express, which operates facilities in Anchorage and Fairbanks, is a fourth generation family organization. Since 1898, it has been servicing the commercial freight needs of Alaska businesses throughout the state including the oil and gas industry.

ATA is celebrating its 60th anniversary this year. From its inception, the organization’s goal has been straightforward — to foster and promote the interests of the trucking industry in Alaska.

Among other things, ATA works to promote highway and driver safety, influence government and regulatory agencies, boost the industry’s image, and provide education and information about the industry.

## New features added to Lynden’s mobile app

As reported by Lynden News May 12, Lynden’s mobile app recently received updates, including expanded GPS map tracking and shipment detail. The app has also been updated for compatibility with iOS 13 and Android 10 and is available now in

the App Store and Google Play store.

Improvements were based on customer feedback and include:

**Date and time:** “Received” and “Delivered” status updates now include dates and timestamps (when available) providing more detail than before.

**GPS maps:** In addition to written status updates, GPS maps are included with select active shipments. Most notable are shipments on Alaska Marine Lines’ barges which can now be tracked every mile of the journey. Maps are also offered for select truck shipments and show freight scanned into most Service Centers for all modes.

**Equipment numbers:** New in this release, the equipment number(s) for active shipments are displayed in the search results, throughout the shipment details pages, and on the available Excel export. This will be especially helpful to customers who ship multiple full container loads and need to quickly identify the shipment by equipment number.

Core features of the app include the ability to track shipments, receive status updates via email and view and email documents like bills of lading and invoices. Visit [www.lynden.com/mobile](http://www.lynden.com/mobile) to learn more or download the app.

## New Foss Maritime Asd-90 tug arrives in Long Beach

Foss Maritime said May 2 that the Jaime Ann, the first of four new ASD-90 tugs constructed by Nichols Brothers Boat Builders for the Saltchuk family of companies, arrived in her new home-port of Long Beach. Powerful enough to escort the largest tankers and container ships calling on ports in the U.S. West Coast, Jaime Ann will provide tanker escort and assists for Foss Maritime’s customers in the Ports of LA/Long Beach area.

Along with her 6866 horsepower and 90ST bollard pull, the Jaime Ann was built to the most stringent emission standards. Her two MTU Tier 4 engines meet the EPA’s highest standards, reducing particulate and nitrogen oxide emissions to near zero through a selective catalytic reduction system. The vessel’s up-graded safety features are equally impressive and focus on crew safety on deck, wheelhouse visibility, winch operations and sound abatement in the engine room and staterooms.

“The Jaime Ann was built to satisfy the requirements of the State of California - requirements we believe will soon be required of the rest of the country and the world,” said Janic Trepanier, Foss Maritime project manager. “Her innovative design offers greater operating efficiencies by producing lower emissions resulting in less maintenance down time.”

The Jaime Ann is the first of four ASD-90 tugs constructed at Nichols Brothers Boat Builders in Freeland, Washington. Her

three sisters: the Sarah Averick, the Leisa Florence and the Rachael Allen, are due to deliver this year for service within the Saltchuk Marine family of companies.

## Lynden employees keep freight moving

As reported by Lynden News April 24, Lynden employees are stepping forward to meet the needs of customers, keeping the freight moving as Lynden companies have always done during difficult times. Lynden has maintained regular business operations since the COVID-19 situation arose in late February with no disruption to global shipments or supply chains.

"The safety of our people and serving our customers are our priorities during these challenging times. We've been keeping freight moving to Alaska since 1954, and we're not planning to stop now," says Chairman Jim Jansen. "Lynden companies provide critical cargo services throughout Alaska and beyond and we are committed to delivering essential supplies and services to our customers and communities."

Lynden barges, trucks and planes deliver cargo to all points in Alaska including providing a supply lifeline to much of the state whose only surface supply line is Lynden and its dedicated people. "Our customers need our support to keep their businesses operating during this time and we are also supporting state and federal agencies. Keeping delivery routes open and supplies moving is our main focus and goal," explains Lynden President Jon Burdick. "We have dealt with earthquakes, oil spills, floods and other obstacles. This situation is no different."

According to Alaska Marine Trucking President Scott Hicks, employees are demonstrating the Lynden can-do attitude each day. "I have been so proud of our teams in Alaska," he says. "They are a shining example of the personal commitment required to keep businesses open and the economy moving. I know Lynden employees are doing the same in all locations."

Safety is one of Lynden's core values and many protocols have been implemented to ensure employees are operating in a safe and secure manner throughout all Lynden areas. Lynden's safety teams maintain active communication with local and federal agencies and comply with recommendations by the Centers for Disease Control.

## Fugro wins NOAA contract for shoreline mapping services

Fugro said April 7 that it has signed a 5-year indefinite delivery indefinite quantity contract with the U.S. National Oceanic and Atmospheric Administration to provide shoreline mapping services in support of the agency's coastal mapping program. Issued through NOAA's national geodetic survey, this multi-year contract is NOAA's second consecutive award to Fugro for services such as the provision of aerial imagery, topobathymetric lidar and shoreline feature compilation. National geodetic survey uses these data to update NOAA nautical charts, define U.S. territorial limits, support coastal management activities and perform inundation modeling.

"Fugro is proud to continue working with NOAA to update and improve the nation's shoreline mapping needs," said Edward Saade, president of Fugro in the U.S. "This work closely aligns with our NOAA hydrographic surveying services contract, which was awarded to Fugro last December. In both cases we

are focused on using innovative technologies to streamline the delivery of high-quality Geo-data while improving operational safety and significantly reducing our carbon footprint."

The new shoreline mapping services indefinite delivery indefinite quantity contract is active now and will run until March 20, 2025. Fugro is one of four contractors who will receive task orders under the program. The total maximum value of work to be shared among all contractors is US\$40 million.

## PND Engineers Inc. announces new members to its team

PND Engineers Inc. said March 26, that it is pleased to announce the additions of Jake Randazzo and Forrest Savel to its team.

Jake Randazzo brings 15 years of experience in hands-on primary and secondary soil testing, data

JAKE RANDAZZO

FORREST SAVEL

reduction, and soil lab operations. He is also experienced in geotechnical investigations, pile driving analysis, wave equation analysis, pile driving inspection, concrete testing and other inspection work. Randazzo has an Associate Degree in Process Technology from Kenai Peninsula College; holds ACI, NICET and Nuclear Gauge certifications; and has done field work all over Alaska, including the North Slope. He's a lifelong Alaskan who enjoys snowboarding, playing hockey, watching pro sports, oil painting, and spending time with his daughters.

Forrest Savel earned his Bachelor of Science in Civil Engineering from the University of Alaska Fairbanks in 2018 and is a lifelong Alaskan who grew up in Glennallen and Palmer. He has a background in construction, having worked previously as a summer laborer with the Alaska Department of Transportation & Public Facilities, and as an intern with R&M Consultants. Most recently he worked fulltime as a distribution designer for Chugach Electric Association. At PND, Savel assists on general civil engineering projects. In his spare time, he likes to travel; he spent the better part of 2019 traveling overseas.

## Five board members elected at Doyon annual meeting

Doyon Ltd. announced March 20 that at its annual meeting of shareholders, five shareholders were elected to the board of directors. Incumbents Georgianna Lincoln, Shirley Cleaver, Orie G. Williams were joined by new board members, Marvin Roberts and Cheryl Cadzow. Each seat has a three-year term, ending in March 2023.

The board members join continuing directors Walter "Wally" Carlo, Jennifer Fate, Erica L. Frankson, Betty Huntington, Jerry Isaac, Sonta Hamilton Roach, Miranda Wright and Christopher Simon. The main item of business was the election of the five board members.

This year's annual meeting was historic, held virtually online

in order to protect shareholders from the spread of COVID-19. Shareholders and proxyholders were able to vote their proxies by paper, electronically and by phone. Many agenda items were cancelled and will be rescheduled. Only the board election, president's report, and treasurers report were included on the agenda.

Doyon's quorum was announced at 59.85% and at least 562 shareholders logged in and participated via Doyon's live webcast of the virtual meeting. Doyon's board of directors also participated remotely.

Many components of the annual meeting, including the keynote addresses, shareholder question and comments, promotional giveaways and shareholder of the year awards will be rescheduled, hopefully in conjunction with sister organizations Tanana Chiefs Conference and Fairbanks Native Association.

## Alaska Materials announces Dimond Grid USA agreement

Alaska Materials President John Horjes said March 12 that the company has established a distribution agreement with Diamond Grid USA.

The agreement is exclusive to Alaska Materials to develop the state of Alaska and provides an open door for further development in the Lower 48 states.

Horjes stated, "This is an example of how Alaska Materials serves as a platform for strategic alliances, and new product development. We will best serve Alaska and Diamond Grid through distribution, and work with the many companies already here in Alaska."

Diamond Grid, founded in Australia, is a global market leader in surface stabilization and erosion control systems. With clients that include the three largest mining companies in Australia, leading construction companies, and government entities, it's been a natural progression that Diamond Grid bring its high-quality product and service to the United States. For more information visit [www.diamondgrid.com/usa-en/](http://www.diamondgrid.com/usa-en/).

## Lynden's Pete Kaiser wins Kuskokwim 300

As reported by Lynden News March 6, Pete Kaiser won the 41st running of the Kuskokwim 300 sled dog race in January. For the fifth time in six years, the Bethel local was crowned champion of what is

called the toughest mid-distance mushing race in the world. Kaiser maintained a solid lead for the last leg of the race, so it was not a surprise when he pulled into the finish chute with his nine-dog team. Kaiser works for the Lynden family of companies, who are long-time sponsors of his racing career and Kaiser Racing Kennels in Bethel. At the finish line he was surrounded by family, friends and fans. "Lynden companies proudly sponsor Pete each year and his dedication and hard work are a true carryover from the job to the trail," says Knik President Dan Hall. Though the K300 is always competitive, Kaiser said that the field of elite mushers this year was especially fierce. "Dog teams are getting

COURTESY LYNDEN

better and better and so are the drivers." Kaiser will be competing in the 2020 Iditarod which began March 7 in Anchorage.

## Hydroelectric project will move Kake off diesel power

As reported by Lynden News Feb. 13, construction is under way for a new hydropower facility in Kake, Alaska, and Alaska Marine Lines is supporting the project by transporting penstock pipe and other materials. Local electrical utility Inside Passage Electric Cooperative is building the facility at an old hatchery near town. The plant will allow the community of 630 people to move from diesel power and generators to a cheaper, cleaner and more efficient power source. It is estimated that the new plant will save 2 million pounds of CO<sub>2</sub> per year. According to Arrowhead Transfer Operations Manager Adam Davis, the first shipment of pipe was delivered last summer, but the project has been in the works for more than a year. "We started working on the project in 2018 with contractor Rock N Road," he said. "We've already handled 60 loads of concrete and aggregate weighing between 20,000 to 66,000 pounds each to build pillars, thrust block and other features." Many of the deliveries tested Davis' driving skills as they required backing a fully loaded 40-foot trailer down a long, one-lane driveway. The trailer was too wide for the narrow bridge so the excavator was used to unload the pipe at the job site.

IPEC is scheduled to finish the \$10 million project this year. Pictured, 54-inch penstock pipe is stacked for delivery at the Alaska Marine Lines yard in Kake.
