Alaska Textiles Inc., leader in flame-resistant workwear in Alaska for 25 years

Company meets challenges head on and excels in filling its customer's needs

Q. What is the official name of your company?

A. Alaska Textiles Inc.

Q. Is your firm a subsidiary or affiliate of other companies? If so, please name those firms and their relationship to your company.

A. Initially, Alaska Textiles sold mainly linens and traditional work clothing. In 1995 a Presidential memorandum was put into place to improve government regulations, which included the requirement of oil field workers to wear flame resistant apparel, and in response OSHA's standards improvement project began. Within the following year, veteran business manager, Clif Burnette, and Alaska Textiles Inc., turned its main focus to the flame-resistant apparel industry. Alaska Textiles quickly became a dominant player in the industry, thus arising as the number one flame resistant provider to Alaska's north slope and utility providers.

Today Alaska Textiles Inc. is the leader in flash fire and electric arc protection apparel solutions, and continues to be the front-runner in bringing the latest technologies in safety apparel to the workforce throughout the U.S. and Canada.

Q AND A

CLIF BURNETTE

Q. What do you most want people to know about your company?

A. We are the leader local FR apparel solutions. Our goal is to identify the needs and concerns of the customer and deliver the best combination of protection, comfort and value for each application. We continue to design new and customizable FR programs to meet the needs of the employees, and the industry.

Q. Where is your company located?

A. 620 West Fireweed Lane, Anchorage, AK

Q. What year was the company founded and by whom?

A. It was founded in 1996 by Dana Martens.

Q. What is your company's primary business activity?

A. Our main focus is on flame resistant clothing.

Q. Are there important projects the company is currently a part of or has done recently?

A. We are seeing an increase in our customer base in need of online specific ordering capabilities. We have a proprietary software called WebSam® that can track by employee, monitoring who purchased what and when. This allows companies to set

PHOTOS COURTESY ALASKA TEXTILES INC.

limits by employee and help maintain budget controls on FR clothing.

Q. How many employees does your company have?

A. We currently have twelve employees.

Q. What is your company's main strength or its edge over the competition?

A. We have the largest local stock of flame-resistant clothing in Alaska. We support this with state-of-the-art business-to-business online ordering and tracking.

Q. What new markets, clients or projects did your company attract in the last year?

A. During COVID-19 we saw an increase in demand for supply-ing to the health care industry. During the outbreak, many of our suppliers started to manufacture PPE, so it was a natural move for us to begin stocking and distributing supplies to the health care sector.

Q. What is the most challenging work/contract the company has undertaken?

A. When COVID-19 first hit Alaska, we received an email from Conoco Phillips on a Sunday that they needed flame resistant masks, and by Monday we started a manufacturing line in our warehouse. We were shipping PPE by Wednesday to keep work-ers safe while working in the field on the North Slope.

Q. What are the biggest obstacles to completing work your company undertakes?

A. The process of developing our online ordering system so that it can easily be tailored to each specific company's needs.

Q. What do you see as your company's biggest challenge in the next five years?

A. We are an oil business related company, so our challenges are the same as many Alaska business, we want oil to continue to flow through TAPS.

Q. What is the average length of time employee's work for the company?

A. The average length our employees work with us is fifteen years. Our employees are very important to us so we do what we can to help them grow as the company grows. 2020 has been a challenge for all of us, and our crew really stepped up and helped out where needed, no matter what job needed to get done.

Q. Has your company been involved in any community projects or charity events?

A. We partnered with Carhartt this winter, donating 1,000 hats to first responders and those in need in Anchorage, Alaska; Memphis, Tennessee; and Jackson, Mississippi. We also supported Country Cares for St. Jude Children's Research Hospital, an even we support every year.

Q. What is the address of your company's Web site?

A. alaskatextiles.com

Want to be a part of this oil and gas directory?

- **Exposure.** The Arctic Oil & Gas Directory is distributed twice a year to every one of our newspaper subscribers, in addition to its presence at trade shows and conferences nationally and internationally.
- **A company profile.** A full page, full color Q&A profile of your company. You'll be involved in the editing and choose the pictures.
- **Access to free news coverage.** Submit announcements, new hires, special projects, new technologies, company photos, and more.
- **Unique company listings.** With over 130 categories to choose from, you'll be able to list your company name, contact information and a brief description of the products and services you offer.

Bell & Associates utilizes latest technology to deliver exceptional results

Safety is of the utmost importance for employee-owned company, with zero lost time accidents in 20 years

Q. What is the official name of your company?

A. The official name of our company is ER. Bell & Associates, Inc.

Q. Is your firm a subsidiary or affiliate of other companies? If so, please name those firms and their relationship to your company.

A. Our firm is an employee-owned S corporation and is not a subsidiary of any other company, although we do have an LLC with Tikigaq Corporation (Amaguq Surveying, LLC).

Q. What do you most want people to know about your company?

A. Bell and associates has been providing professional engineering and surveying services to Alaska and the pacific rim since 1974. We make it our priority to utilize the latest technology available in order to provide the best deliverable in the most cost-effective way, while also making Bell an enjoyable place to work and a contributing member of our community.

Q. Where is your company located?

A. Our company's main office is located in Anchorage, Alaska, but we also maintain an office in Prudhoe Bay.

Q. What year was the company founded and by whom?

A. The company was founded by Bob Bell and John Herring in 1974.

Q. What is your company's primary business activity?

A. Our company's primary business activity is engineering and surveying, however we also provided services such as 3D laser scanning, Ground Penetrating Radar, UAV (drone) photogrammetry and inspection, and Geotechnical Inspection.

Q. Are there important projects the company is currently a part of or has done recently?

A. Bell has been involved in numerous large-scale projects over the years including Prudhoe Bay, Point Thomson, various mining operations, municipal and state road rehabilitation projects, and much much more.

Q. How many employees does your company have?

A. We currently have 30 employees, but have scaled up to as many as 200 in the past.

Q. Describe the equipment your company uses and are there any new equipment purchases planned?

PHOTOS COURTESY BELL & ASSOCIATES

A. Bell currently utilizes state of the art equipment to achieve our various client goals. We run Trimble R10 GPS units and S-series Total Stations, Digital Levels, Various Trimble and Leica 3D scanners, Noggin GPR equipment, and a fleet of DJI Matrice RTK capable drones.

Q. Is your company expanding any of its operations or locations?

A. Bell is always expanding into new arenas. Most notably we have increased our presence in the Matanuska-Susitna Valley with a recent term contract with the Matanuska Electrical Association.

Q. Is the company changing any of its services or products?

A. Bell is not currently changing any of our services or products, but as evidenced by our array of services we are always on the lookout for ways to increase safety and efficiency for the client by utilizing the most up to date technology and methodology.

Q. What is your company's main strength or its edge over the competition?

A. Our company's main strength is our long history of working in all parts of Alaska, as well as our breadth of services offered. We have worked in every environment imaginable within the State of Alaska from the arctic shores of the north slope to the old growth forests of SE Alaska, and over the years have developed a very specific knowledge of what it takes to complete work efficiently in these environments. Beyond that, we harness a number of unique modalities and technology in order to provide the most cost-effective service to our clients. The breadth of services we offer is not typically found in a single firm, which allows us to provide clients with a simpler and more consolidated approach to many projects. In addition to that, Bell has an impeccable and unrivaled safety record, having not had a lost time accident in this millennium, and no recordables in the last 14 years.

Q. What new markets, clients or projects did your company attract in the last year?

A. As mentioned above we recently acquired a term contract with MEA in the Mat-Su valley and continue to increase our presence there. We are also under contract with Hilcorp for Survey services in Prudhoe Bay, as well as with Exxon in Point Thomson. We also have agreements in place for surveying overseas, as we have done for many years in places like Russia and South Korea.

Q. What is the most challenging work/contract the company has undertaken?

A. It is difficult to define the most challenging work we have undertaken as a company, but some notable examples include dimensional control for module fabrication overseas and the setting of said modules once they arrive in Alaska, the construction of large man camps on small gravel island in the arctic ocean, and numerous remote surveys throughout the bush of Alaska.

Q. What are the biggest obstacles to completing work your company undertakes?

A. The biggest obstacles we face in completing work vary from project to project. Sometimes it is permitting requirements, sometimes it is logistics, sometimes it is weather, it really depends on the scope of work and the location.

Q. What do you see as your company's biggest challenge in the next five years?

A. Bell's biggest challenge in the next 5 years can be summed up in one word. COVID-19. The impact this virus has had on Alaska cannot be overstated and we, like many other companies in Alaska, have had to be quite resilient and resourceful in order to overcome the challenges that come along with it and to do so safely.

Q. Does your company have an anniversary or other landmark event coming up?

A. Bell's 50th anniversary will be upcoming in 2024, and a celebration is certainly being planned.

Q. What is the average length of time employee's work for the company?

A. One of the great benefits of being employee owned is the impact it has on employee retention. Currently around 80% of our staff have been with the company for more than 5 years, and

about 30% have been here 10 years or longer, with a couple employees over 25 years.

Q. What is your company's safety record? What steps does the company take to ensure a safe work environment?

A. Our company's safety record is a very large source of pride for our employees. As mentioned above, it has been over 20 years since our last lost time accident, and 14 years since our last recordable. Our safety training program is extremely extensive, and our safety philosophy is both a personal and a collective approach that is taken to heart as the single most important aspect of every day to our employees.

Q. Has your company been involved in any community projects or charity events?

A. Bell has been involved in many community projects over the years from sponsoring local youth hockey teams to being involved in community clean-up projects. We also sponsor an ongoing scholarship at UAA for engineering and surveying students each year.

Q. What is the address of your company's Web site?

A. You can find more information about Bell & Associates at www.bellalaska.com

COURTESY EXP

EXP, delivering quality services to its clients around the globe for 115 years

Full-service company excels at innovative, proven solutions for the built and natural environment

Q. What is the official name of your company?

A. EXP

Q. What do you most want people to know about your company?

A. EXP is a full-service multidisciplinary engineering, architecture, design and consulting firm backed by the expertise of over 3,500 professionals. As a private company, we are committed to providing quality services to our clients and sharing the successes with our employees. Our commitment and expertise offer proven solutions for the built and natural environment and covers infrastructure capabilities across a spectrum of industries including the energy sector, oil, gas and chemicals, mining, pipelines, transportation and more. Our global reach supports our local Alaska presence, where our team of experts concentrate on full environment, engineering and integrity management services to the energy industry.

Q. Where is your company located?

A. EXP's Alaska operation is based in Anchorage. With over 90+ locations across North America and projects around the globe, we offer local roots, backed by global expertise.

Q. What year was the company founded and by whom?

A. EXP has continuously operated in Alaska since 2009, with an office located in Anchorage.

Our firm heritage dates back to 1906, when the earliest of EXP's predecessor companies started its engineering infrastructure practice.

Q. What is your company's primary business activity?

A. Our multidisciplinary professionals at EXP provide full-service engineering, environmental, architecture, design and consulting services. In the arctic region, we specialize in environmental and regulatory services, from initial siting, design and financial feasibility through commissioning and operations. Our unique approach is the result of decades of experience working with our clients to un-

derstand their key business drivers and the risks associated with every phase of the project life cycle; as well as engaging in effective and meaningful and stakeholder and Indigenous engagement and consultation.

Q. Are there important projects the company is currently a part of or has done recently?

A. Since 2013, the Alaska team has been providing comprehensive services to the Alaska LNG project including organization, coordination, management, and administration required for all aspects of the development of the environmental regulatory and land components. In addition to the Alaska LNG and other recognized national pipelines projects, EXP has supported infrastructure planning studies, final engineering for blast resistant modules, planning, design and architecture design projects and facility siting projects to meet process safety standards for oil and gas client projects on Alaska's North Slope.

Q. How many employees does your company have?

A. EXP has 10 local employees in Anchorage, backed by EXP's 3,500+ professionals worldwide.

Q. Is your company expanding any of its operations or locations?

A. EXP is currently expanding our operations throughout North America. In Alaska, we recently added Jeff Raun to our Alaska team, who plays an important role in delivering innovative environmental solutions and focus on working with oil and gas clients on the implementation of alternative and renewable energy objectives.

Q. Is the company changing any of its services or products?

A. Today's oil, gas + chemicals clients seek outcomes-focused solutions that increase productivity and reduce cost and risk. In addition to a greater focus on managing resources sustainably, we offer clients consulting services in the field of renewable energy to help our clients transition seamlessly to the circular economy. To facilitate the deployment of carbon capture and storage options to reduce emissions, we work with clients to facilitate more sustainable practices including environmental, social and corporate governance practices and reporting.

Q. What is your company's main strength or its edge over the competition?

A. With more than 50 years of diversified energy experience in North America and internationally, EXP delivers end-to-end services across the gas, chemical + circular segments. We measure value in a transparent manner traceable to your bottom line. We validate and select the appropriate technology, including global mapping, geospatial and analytical tools to leverage collaboration and accuracy for improving exploration and surveillance – ultimately meeting clients' needs and specifications – from early project definition through commissioning and start-up. Capitalizing on project delivery excellence and regulatory expertise, we support owner and contractor teams to meet regulatory, safety and competitive benchmarks.

Q. What new markets, clients or projects did your company attract in the last year?

A. Over the past year, EXP has expanded operations in the oil, gas + chemicals and energy sector, focusing on services to support the transition to renewable energy and circular economy. With active

EPC projects, EXP has enhanced services offering to include conceptual studies, technology selection, licensor integration, FEED, EPC and optimal support.

Q. What do you see as your company's biggest challenge in the next five years?

A. There is an urgency for the energy and oil, gas and chemicals industries to play an active role in sustainable solutions to address carbon reduction. In Alaska, we have a unique region with significant resources, and over the next five years, we will be working with clients to address and overcome the challenges associated with meeting sustainable goals while balancing operational and economic requirements.

Q. Does your company have an anniversary or other landmark event coming up?

A. EXP is excited to celebrate its 115th anniversary this year.

Q. What is your company's safety record? What steps does the company take to ensure a safe work environment?

A. Quality and safety are the core of our business. With over 40 years of experience across the energy and oil, gas and chemicals industries, we understand the business drivers and technical challenges our clients face and keep quality and safety at the forefront of our efforts. We are also proud to share our Energy Services group is ISO 9001:2015 certified team and has zero TRIR through 2020.

Q. What is the address of your company's Web site?

A. www.exp.com

COMPANY NEWS *in brief*

COURTESY ASTAC

ASTAC launches fastest internet offering to North Slope

Arctic Slope Telephone Association Cooperative Inc. announced Feb. 9 the launch of the North Slope's first and only 25/5Mbps, megabytes per second, internet service, called Home Internet 25+.

"Today we are proud to begin the launch of our Home Internet 25+ in Utqiagvik, Wainwright, Point Hope and Nuiqsut," said Jens Laipenieks, ASTAC CEO/general manager. "This new offering will provide the speeds needed for families who continue to work and do schooling from home due to the COVID-19 pandemic."

Since January 2018, ASTAC has installed more than 62 miles of fiber networks connecting almost 2,200 locations to fiber. Eighty-five percent of North Slope residences now have an end-to-end fiber optic broadband connection when coupled with Quintillion's subsea fiber optic cable network.

"Quintillion is proud to partner with ASTAC to bring fast, reliable and affordable internet to these North Slope communities," said Quintillion CEO George Tronsrue III. "Our subsea fiber network was built to help improve the lives of rural Alaska residents. These new services will do that and come at a time when they are needed more than ever."

ASTAC now meets the Federal Trade Commission's standard of 25Mbps (download speed) over 3Mbps (upload speed) to en-

sure rural Americans receive internet service comparable to those in urban areas.

For more information visit www.astac.net.

COURTESY LYNDEN

Lynden opens flagship location in Guelph, Ontario

As reported by Lynden News Jan. 26, Lynden International Logistics Co. has expanded its network of healthcare facilities in Canada by opening a fifth location in Guelph, Ontario. "We consider this our flagship facility," says Brian MacAskill, LILCO vice president and general manager.

LILCO serves the human and animal health industries in Canada, and its continued growth prompted the additional location. The company is widely recognized as a leader in Canadian healthcare logistics.

The new location, with state-of-the-art security and temperature control, will accommodate 8,000 ambient pallets, 1,000 cooler pallets and 350 pallets of controlled substances storage. Pharmaceuticals represent a high-value inventory and security can be a challenge. Controlled substances require storage regulated by Health Canada's Controlled Drugs and Substances Act. One of LILCO's two controlled drug vaults is the largest third-party logistics vault in Canada.

The vaults include motion, heat and smoke detection, seismic detectors and layered security access that includes access cards, combination locks and biometric fingerprint reading.

At 108,000 square feet, the Guelph facility is LILCO's largest. It brings LILCO's Canadian footprint to nearly 450,000 square feet. The other locations are in Vancouver, Calgary and two in the greater Toronto area - Vaughan and Milton.

Construction on the Guelph location started in late 2019, and the doors were open in July. Despite the challenges and delays of the COVID-19 pandemic, the facility was completed on time. "This required approvals from regional authorities and a tremendous amount of dedication and teamwork from Lynden and vendors alike. The Health Canada audit went very well, and the facility was licensed for operation on schedule," MacAskill explains. The technology aspect was a key element of the

startup. "Lynden's IT team was terrific in supporting LILCO and its requirements," adds Adrian Peluffo, LILCO vice president of administration.

COURTESY SECURITY AVIATION

Security Aviation acquires a second Learjet 45

Security Aviation, an Anchorage based Part 135 on-demand charter operator, announced Jan. 5 the addition of a second Bombardier Learjet 45 to its existing fleet, the only such aircraft available for charter in Alaska.

The new Learjet is wide area augmentation systems capable, meaning it uses an extremely accurate navigation system developed for civil aviation. It is also advanced airborne sensor equipped and equipped with BR modification and gross weight increase kit to allow for better performance, fuel efficiency and range. The Learjet offers amenities like executive leather seating, a refreshment station and an enclosed lavatory.

The jet's primary use will be for expedited passenger and light cargo transportation throughout Alaska, Canada and the Lower 48, as well as emergency response services. The Learjet is available for charter 24/7, and seats up to eight passengers. The aircraft cruises at 535 mph with a range in excess of 2,000 statute miles.

Security Aviation has more than 35 years of operating experience in Alaska and is currently the only on-demand charter operator in the state to offer mid-size charter jet service. For more information visit <https://securityaviation.biz>.

COURTESY SEATAC MARINE SERVICES

SeaTac Marine Services increases barge capacity to Alaska

SeaTac Marine Services, based in Seattle, said Jan. 19 that it has acquired a new heavy deck cargo barge. Built in 2010, the SeaTac Atlas can haul up to 11,000 tons and with nearly 30,000

square feet of deck space, is one of the larger barges in the Pacific cargo trade. At 300 feet in length and 100 feet wide, the barge was purchased from Signet Marine in late 2020. Specializing in general cargo and heavy lift machinery, the Atlas will fit well into SeaTac Marine's regular shipping schedule to Anchorage and Seward. SeaTac Marine is modifying the barge to maximize cargo protection and space. "We are looking forward to increased opportunities and optimizing service for new and existing customers," said Walter Seay, SeaTac Marine's president. Sited on its own 12-acre parcel along the Duwamish river, the terminal specializes in break bulk cargo, lumber, heavy lift machinery, and bulk commodities.

Alaska Textiles and Carhartt help those in need

Alaska Textiles said recently that it, along with donations from Carhartt, handed out 1,000 hats to first responders and those in need in Anchorage, Alaska; Memphis, Tennessee; and Jackson, Mississippi.

"I would like to thank Carhartt for working with us at Alaska Textiles to get nice warm hats on people in need and first responders during these tough times," said Cliff Burnette, president, Alaska Textiles.

Alaska Textiles was also awarded the flame-resistant clothing contract for ConocoPhillips in October. The five-year contract was given to Alaska Textiles due to its ability to supply both women's and men's FRC to meet ConocoPhillips exceptional safety requirements, locally commercially competitive pricing, extraordinary expertise in the field of FRC, comfortable and convenient customer purchasing experience, ability to supply add-on services such as custom embroidery and alterations, and proven high level of quality and performance.

For more information contact Cliff Burnette at clif@alaskatextiles.com or visit alaskatextiles.com

COURTESY ALASKA TEXTILES

Paul Verhagen to leave Fugro after 7 years as CFO

The supervisory board of Fugro NV announced Jan. 12 that its Chief Financial Officer Paul Verhagen has decided to leave the company. Verhagen, who joined Fugro as CFO and member of the board of management in 2014, will step down after the annual meeting of shareholders on April 22. He will be nominated to become CFO and member of the management board at ASM International NV effective June 1. Harrie Noy, chairman supervisory board, said: "We respect Paul's decision to take on a new challenge after having served as our CFO for 7 years but of course it is unfortunate that he leaves. We are very grateful to

PAUL VERHAGEN

him for what he achieved based on his business acumen, commitment and perseverance. Paul played a key role in the substantial refinancing of Fugro which was recently successfully completed. This brings the company in a stable situation, providing Fugro with the financial flexibility to execute on its Path to Profitable Growth strategy.”

Mark Heine, CEO, said: “I want to thank Paul for all that he has done for Fugro. Under his leadership, the finance function throughout the company has been professionalized. Moreover, he made a significant contribution in our transition towards a more cohesive, agile and resilient organization with a more diversified business. He is a great colleague and team player. We wish him every success in this next step in his career.”

Verhagen said: “I have truly enjoyed my time at Fugro. Although market circumstances have been challenging during most of that period, we have been able to transform the company and I am proud to have been part of this journey. I have every confidence in the future success of Fugro, supporting the energy transition, climate change adaptation and sustainable infrastructure development.” The supervisory board has initiated the process for the succession of Paul Verhagen and will communicate about the progress in due course.

Lynden Transport receives SmartWay Award from EPA

As reported by Lynden News Jan. 12, Lynden Transport earned a SmartWay High Performer Award from the Environmental Protection Agency for operating efficiencies in its flatbed and reefer fleets. The company is included in the top 20% of national carriers for reducing carbon emissions and achieved top-ranking performance for all metrics, including fuel efficiency. Fewer than 10% of all SmartWay carriers operate fleets efficient enough to make the SmartWay High Performer list for carbon emissions.

“This award recognizes the efforts throughout the Lynden companies to work efficiently and reduce our carbon footprint,” said Lynden Transport President Paul Grimaldi. “It also confirms the efforts of employees to make this happen on a daily basis. We have achieved impressive scores for continual improvement in operations as well as energy efficiency by using electric forklifts, streamlined trip routing and other measures.”

Carbon is a leading indicator of fuel use. SmartWay High Performers consume less fuel for every mile they travel and for every ton of freight moved. For example, for every trip they make, the carriers pack their trailers more efficiently and move heavier loads - all while reducing consumption by thousands of gallons annually as compared to their SmartWay peers.

ASTAC brings 4G LTE service to Alaska's Dalton Highway

Arctic Slope Telephone Association Cooperative Inc. said Jan. 4 that it turned up three new 4G LTE sites this week making it the first telecommunications company to bring wireless coverage from the Brooks Range to Deadhorse where no other coverage had existed previously. These sites will improve safety and connectivity along this remote 414-mile critical Alaska corridor for both ASTAC and AT&T wireless customers. ASTAC has plans

to turn up three additional sites on the Dalton Highway in 2021.

In October 2017, ASTAC turned up its first three 4G LTE wireless sites in Kuparuk and Deadhorse. The following September, ASTAC expanded 4G LTE coverage in Utqiagvik, Wainwright and Deadhorse, vastly improving wireless Internet speeds.

Quality 4G LTE wireless service is an essential part of many people's lives. The ability to utilize and experience high-speed Internet in richer ways opens new possibilities for both people and businesses. From streaming videos to online classes at universities, the Internet of Things and improved oil field analytics, to the delivery of near instantaneous medical information, users will improve how they connect with the world by experiencing data speeds up to eight times faster.

“ASTAC is committed to closing the technology gap across the North Slope to enhance our members' experiences and improve safety in some of the most remote places in Alaska. 4G LTE is a big part of that effort and a real game-changer in the region,” said Jens Laipenieks, ASTAC CEO/general manager.

ASTAC provides Broadband Ethernet and Internet, LTE wireless as well as local and long-distance services across the North Slope. Additionally, ASTAC offers a Nomadic WAN and Internet service using the North Slope's only private LTE network covering the oil fields. For more information visit www.astac.net.

Lynden VP Dennis Mitchell joins Airforwarders board

As reported by Lynden News Dec. 17, Lynden International Senior Vice President Dennis Mitchell was elected to the board of the Airforwarders Association on Nov. 16.

The AfA serves as the voice of the air forwarding industry and represents nearly 400 member companies dedicated to moving cargo throughout the supply chain. The association's members range from small businesses with fewer than 20 employees to large companies employing more than 1,000 people and business models varying from domestic to worldwide freight forwarding operations. The AfA helps freight forwarders move cargo in the timeliest and most cost-efficient manner whether it is carried on aircraft, truck, rail or ship.

“Dennis is a highly respected member of the AfA that was selected by our membership for a board position. His skills and expertise in the transportation industry will help guide the AfA in its ambitious agenda toward continued success,” says Brandon Fried, AfA executive director.

Mitchell will be sworn in on Jan. 5 to serve a three-year term as one of eight AfA board members. Lynden International Vice President Laura Sanders also served a 12-year term on the AfA

DENNIS MITCHELL

board from 1999 to 2012. Lynden International has been a member of the AFA for more than 25 years.

Mitchell brings 26 years of Lynden experience to his board position as well as background as a business owner. He owned his own customs brokerage firm from 1986 to 1994 prior to joining Lynden in Anchorage. He holds a bachelor's degree in Business Administration and Supply Chain Management from the University of Alaska and is a licensed customs broker. Mitchell is also the former chair of the board of directors for the Anchorage Economic Development Corp.

Little Red Services receives ConocoPhillips award

Little Red Services said Dec. 18 that during a virtual ceremony in late November its team received the ConocoPhillips 2019 Supplier Recognition Award for the company's "focus on execution."

The 13 recipient companies were chosen from a worldwide network of suppliers. Recipients were honored for exhibiting exceptional leadership in observance of the ConocoPhillips SPIRIT values. Suppliers were recognized for two distinctions: focus on execution and doing business better. ConocoPhillips global business units generated nominations internally and winners were carefully selected by a cross-functional committee of senior managers.

"Since the 80s we've been partnering with ConocoPhillips Alaska on the North Slope," said Jerry Webre, president of LRS. "ConocoPhillips Alaska asked if we could double our exploration well testing capacity for the 2019 exploration season. Our team did an outstanding job of pulling together a second full kit in a few months. I'm proud of how this team engaged with our client and suppliers to secure, prepare, and modify equipment to deliver exceptional well testing."

Bison relocate to Sitkalidak Island with Lynden's help

As reported by Lynden News Dec. 8, earlier this year the Alutiiq Tribe of Old Harbor, Alaska, was awarded three bison bulls from Yellowstone National Park to improve the genetic diversity of its Sitkalidak bison herd. The catch: the bison required transport from Montana to Seattle, from Seattle to Anchorage and from Anchorage to Homer Spit. The final destination required a boat ride to Sitkalidak on Kodiak Island.

"I was informed that on special occasions Lynden Transport may transport livestock," said Cynthia Berns, vice president of community affairs for the Old Harbor Native Corp. "So, I called Paul Friese in Anchorage."

Paul Friese, vice president of Alaska sales for Lynden Transport, responded to the call with the usual can-do attitude. Gathering all the details, he quickly put the team in motion. Lynden driver Clay Bonty met the FedEx plane in Anchorage, carefully loaded the special 20-foot container containing the three bison and headed to Homer. "This was a very special project," Paul says. "We were happy to be involved and assist the Alutiiq Tribe."

The transfer was a historic moment in returning Yellowstone bison to tribal lands. These particular animals are important to

tribes because they are the genetically pure descendants of the bison that tribal ancestors lived with. In the case of the Sitkalidak herd, the new bulls will introduce genetic diversity for herd survival.

"Our herd is managed to provide food security for our community of 230 residents and tribal members throughout the state," Cynthia explained. "In 2017, DNA testing was conducted on the herd, and it was suggested that we integrate new genes into the herd for long-term health and survival."

The bulls are settled in and doing well. For more information visit info.lynden.com/blog.

COURTESY LYNDEN AIR CARGO

Lynden Air Cargo welcomes N410LC

As reported by Lynden News Nov. 24, another L100 Hercules joined the Lynden Air Cargo fleet this fall. After a major overhaul and conformity heavy check, N410LC was delivered to Anchorage in October. "The aircraft was purchased in Africa from Safair in 2017," explains Ethan Bradford, vice president of technical operations. "Our dedicated maintenance, quality control, records, contract vendors and other Lynden Air Cargo personnel have spent many thousands of hours getting it ready to serve our customers." Oct. 8 was N410LC's functional test flight out of Singapore.

The addition of N410LC brings Lynden's fleet to 14. "We operate nine Hercules aircraft; one is a parts plane and four are on lease back to Safair," Bradford explains.

Denali Universal Services announces new leadership

Denali Universal Services said Dec. 14 that it is announcing that Bob Kean, who has spent the last 20 years with DUS, is retiring after a long and esteemed career of both public and private service, effective Dec. 31. Kean has made significant contributions to the growth of DUS during his tenure and will continue to serve DUS and Sodexo in an advisory role. DUS wishes Kean well in his retirement and thanks him for his many contributions.

Following Kean's departure, DUS is pleased to announce that Maria Bourne has been promoted to president, effective Jan. 1. Over the past five years as senior vice president of operations and chief financial officer, Bourne has been responsible for

COMPANY NEWS *in brief*

DUS's financial management. Her responsibilities included supervising operational execution, assisting in company growth, facilitating development, and supervising internal management. Along with her Bachelor of Business Administration in accounting from the University of Alaska, Bourne is a certified public accountant and has spent over a decade in senior financial management positions. Prior to DUS, she worked at KPMG, where her work focused on auditing, advisory, and valuation services.

"I am grateful to have spent 20 years with this company and am very proud of what the DUS team has accomplished together," said Kean. "As the future unfolds, I have great confidence that DUS is in terrific hands for future success. Maria Bourne has been preparing for this and the timing is right for her to transition into the role as president of DUS."

PND Engineers Inc. welcomes two recent hires

PND Engineers Inc. said Nov. 5 that it was pleased to welcome Cameron Klatt, EIT, and Michael Ulmgren, EIT, to its Anchorage office.

Klatt, a lifelong Alaskan, has joined PND's geotechnical team. He earned his bachelor's degree in civil engineering from Montana State University, and a master's degree in geotechnical engineering from the University of Washington, which he completed this past June. He has interned with HDL Engineering and Kiewit Bridge and Marine, building experience in geotechnical investigations, calculations for foundation and retaining wall design, geotechnical report writing, and primary and secondary lab testing. Growing up in Alaska, Klatt enjoyed playing hockey, skiing, fishing, hunting, and exploring the outdoors.

Ulmgren brings experience as a research professional at the University of Alaska Anchorage, where he conducted wave and storm surge modeling, shoreline change modeling and sediment transport studies. Before joining UAA, he was a civil associate at Michael Baker International, where he performed hydraulic and hydrology modeling and analysis, stream stability and scour analysis. As part of his academic studies, he assisted with hydrokinetic research. A Swedish immigrant and now a United States citizen, Ulmgren moved to the U.S. in 2001 and to Alaska in 2003.

MICHAEL ULMGREN

Nordic Calista Services camps receive upgrades

Nordic Calista Services, a drilling and workover company owned by Calista Corp., recently said that it has performed extensive preventative maintenance on the majority of its five

camps, all of which worked last drilling season. The updates include new sheeting, new plumbing, insulation and new paint. One of Nordic Calista's smaller 20-person camp annexes, Camp 101, is now placed on a single trailer, like its other camps, for maximum mobility. Camp 101 adds needed bed space and washing facilities to existing camps, helping to meet new COVID-19 protocols for single occupancy rooms and social distancing.

Camp 101 is a 21-person camp annex with 10 double/1-single status rooms, which could come in handy if an existing camp needs extra beds for quarantining or to expand an existing camp to provide single occupancy rooms. The camp annex is also on a trailer for easy mobilization and has a recreation area and toilets/showers.

Camp 4 is currently committed for the exploration season. The rest are currently located in Deadhorse and are available for lease.

For more information visit www.nordic-calista.com

Diamond Grid and ClubBuy in agreement

John Horjes, executive director for Diamond Grid USA & Canada, said Oct. 30 that Diamond Grid is an approved vendor for GolfNow's ClubBuy program.

"We are pleased to join ClubBuy and be a vendor to 170,000 members, and that includes over 1,800 golf courses."

ClubBuy, the No. 1 general purchasing organization in sports and beyond, is managed by the team at GolfNow and their partner's team at Premier Inc., a source GPO. In total, its group members combined, spend over \$60 billion annually. This spend total allows the group to negotiate prices never before seen in the world of sports. As a result, Minor League Baseball, and professional hockey leagues National Hockey League, American Hockey League and ECHL (formerly the East Coast Hockey League), along with more than 1,800 golf facilities, are participating members of this GPO.

Diamond Grid is a global market leader in surface stabilization and erosion control systems. With manufacturing and distribution in over 16 countries, Diamond Grid can be found being used in many industries to include golf, landscape, construction, roads, airstrips, mining, oil & gas, marine, equestrian, livestock, federal, and state parks. For more information visit www.clubbuy.com or www.diamondgrid.com/?fbclid

JOHN HORJES

Jeff Raun joins EXP to strengthen Alaska

EXP, a global leader in engineering, architecture, design and consulting, said Oct. 16 that it is excited to welcome Jeff Raun as senior environmental project manager, based in EXP's Anchorage office. Raun has more than 15 years of experience serving in environmental and regulatory roles. Most recently, Raun

held various positions at ExxonMobil, where he worked on international oil and gas projects, conducting global exploration activities. In his new position, Raun will be responsible for managing and developing environmental permitting and regulatory compliance projects in and outside of Alaska and advancing strategies to support EXP's low carbon energy transition and developing sustainable regulatory strategies.

JEFF RAUN

"EXP's role in Alaska is focused on delivering services to improve the resiliency of our client's resource projects. We are very excited to welcome Jeff to the team, enhancing our efforts to consistently exceed client expectations. Jeff brings the expertise, leadership and global knowledge to advance environmental solutions for complex projects and help drive EXP's sustainable initiatives."

EXP has been a part of the North American energy industry, including Alaska, for over 40 years. Led by Vice President Chris Humphrey, the EXP team has been delivering effective environmental and regulatory permitting services for oil and gas projects in Alaska, including the ongoing Alaska LNG project.

Alaska Railroad Corp. awarded \$4 million

Alaska Congressman Don Young announced Sept. 18 that the U.S. Department of Transportation has awarded \$4,110,480 to the Alaska Railroad Corp. as part of the consolidated rail infrastructure and safety improvements grant program. This funding will be used to replace a timber bridge over the Trail River approximately 23 miles north of Seward. The new bridge will support the Alaska Railroad's freight and passenger services by allowing industry standard gross weight capabilities of railcars and intermodal double-stack cars from 263k to 286k.

"Whether it is by train, plane, or watercraft, ensuring that Alaska's infrastructure is strong and safe is critical to our economy and way of life," Young said. "As former Chairman of the House Committee on transportation and infrastructure, I have seen first-hand the need for reliable roads, bridges, and highways. I am very grateful to the Department of Transportation for making this funding available to the Alaska Railroad. From tourism to the movement of goods and services, the work of the Alaska Railroad is vital. This funding will go a long way toward keeping the wheels turning on our trains for years to come. Infrastructure has always been one of my highest priorities in Congress, and I will always fight to ensure that Alaskan families and businesses can safely and effectively travel around our state."

Seward & Alaska Railroad Awarded \$20 Million Grant

As reported by the Alaska Congressional Delegation Oct. 9, U.S. Sens. Lisa Murkowski and Dan Sullivan, and Congressman Don Young, welcomed the announcement of a roughly \$19.78 million port infrastructure grant issued by the United States Maritime Administration for the City of Seward and the Alaska Railroad Corp. to improve the freight dock and corridor in Seward, Alaska. The Alaska congressional delegation wrote a letter to Secretary of Transportation Elaine Chao supporting the grant

application in May.

"This grant announcement by MARAD is an exciting development for the people of Seward and the industries that form the backbone of our economy, particularly fisheries and tourism," the delegation said. "An expanded and revitalized port at the southern tip of Alaska's Railbelt will unleash new economic opportunities for Alaskans on the Peninsula and throughout the state, while also expanding vital transportation services to a number of rural communities. We also can't overstate the importance of this infrastructure to our maritime security and Coast Guard operations, with Seward soon poised to host a new fast response cutter, in addition to the fueling and maintenance work already conducted at this important port. Mayor Terry, the community and the railroad made a strong case for the wide-ranging benefits of this project, and we thank Secretary Chao for heeding the voices of Alaskans."

According to the grant announcement, the project will lengthen and widen the primary freight dock at the Port of Seward "to accommodate growing freight cargoes and minimize operational conflicts between freight and cruise movements, both onshore and in the harbor." Additionally, the project will include a roadway connection between the dock and Airport Road, facilitating the safe and efficient movement of passengers and cargo.

PND Engineers Inc. welcomes new hires to its team

PND Engineers Inc., in Anchorage, said Sept. 9 that it is pleased to welcome three new hires in recent months. It's tough enough to start a new job. Try stepping in just in time to go into lockdown, in response to COVID-19 guidelines. PND's latest staff additions are undeterred and have embraced their new roles with aplomb. We're lucky to have them, the company said.

Tanner Stephens earned his Bachelor of Science in civil engineering with a minor in mathematics from the University of Alaska Anchorage in 2019. He joined PND's civil team in Anchorage in March - just days before staff began working at home due to the COVID-19 pandemic - following a year as a project engineer with the Alaska Department of Natural Resources Office of Design and Construction. At PND, he has been working on the California Creek fish passage and connecting Anchorage trails projects.

Addison Yang, born and raised in Anchorage, earned his Bachelor of Science in civil engineering from the University of Alaska Fairbanks in 2015 and is currently completing his master's degree remotely. Previously a project engineer and design engineer for the Alaska Department of Transportation, Yang's projects since joining PND have included a Washington Department of Transportation project with Kiewit to replace a culvert under the I-5 highway with a fish passage, while minimizing impact to motorists and the local community.

Obadiah "Obi" Dawson, EIT, grew up in Juneau and attended the University of Alaska Anchorage, earning his Bachelor of Science in civil engineering this past spring. He is interested in structures and previously interned in transportation and civil site development. His recent assignments include structural calculations for the Wendell Avenue temporary trestle.

PLANS CHANGE. DEADLINES DON'T.
