**Dynamic Routing!<sup>SM</sup>**

With shipping costs on the rise it only makes sense to match your time requirements to the mode. Lynden's exclusive Dynamic Routing<sup>SM</sup> makes it easy to change routing between modes to meet your delivery requirements. If your vendor is behind schedule we can make up time and keep your business running smoothly. If your vendor is early we can save you money and hassle by slowing down the delivery to arrive just as it is needed. Call a Lynden professional and let us design a Dynamic Routing<sup>SM</sup> plan to meet your supply chain needs.

BMAS operates single and twin engine DeHavilland Otters for delivery of passengers and cargo to locations across Alaska in winter and summer conditions.

# When you fly Bald Mountain Air, you'll be flying the 'Rolls Royce' of Alaskan bush planes

*Company upgrades DeHavilland Otters to turbine power, the most dependable engines installed in any aircraft*

**Q.** What is the official name of your company?

A. Bald Mountain Air Service Inc.

**Q.** What do you most want people to know about your company?

A. That we are an Alaska Native-owned business and that we specialize in custom aviation solutions.

**Q.** Where is your company located?

A. We have locations in Anchorage, Homer and Deadhorse, Alaska.

**Q.** What year was the company founded and by whom?

A. In 1993, by Gary and Jeanne Porter of Homer.

**Q.** What is your company's primary business activity?

A. Air carrier, single and multi-engine charters

**Q.** Are there important projects the company is currently a

part of or has done recently?

A. Alaska wildland fire support, oil and gas exploration support in the North Slope and Cook Inlet.

**Q.** How many employees does your company have?

A. We have a staff of 20 employees.

**Q.** Describe the equipment your company uses and are there any new equipment purchases planned?

A. We operate single and twin engine DeHavilland Otters, a King Air B200 and a King Air 350. We are planning to purchase two CASA CN 235-10 airplanes within the next year.

**Q.** Is your company expanding any of its operations or locations?

A. In 2014, we will be adding CASA CN 235 combi flights from Anchorage to Deadhorse. These new aircraft will give us

*Continued on next page*

continued from page 7

## BALD MOUNTAIN AIR

the capability to carry 18 passengers with palletized cargo, oversized loads, bulk fuel delivery and wild land fire fighting smoke jumper/para cargo operations in Alaska, Canada and the Lower 48.

*Q. Is the company changing any of its services or products?*

A. We will be providing medium lift, oversized cargo and passenger combination services using the CASA CN 235. These planes allow for 18 passenger, along with palletized cargo flights from Anchorage - statewide.

*Q. What is your company's main strength or its edge over the competition?*

A. We specialize in remote, short field, off airport support for natural resource exploration. We are an Alaska-owned company with a perfect safety record.

*Q. What new markets, clients or projects did your company attract in the last year?*

A. Oil and gas exploration, mining and wild land fire fighting support.

*Q. What is the most challenging work/contract the company has undertaken?*

A. We supported the FEX Oil and Gas drilling program in NPR-A with 2 Twin Otters and 2 Single Otters. This project was located 160 miles west of Prudhoe Bay. We operated in all types of weather, handling cargo and freight movement, while building an 8,000-square-foot hangar and living quarters at the same time.

*Q. What are the biggest obstacles to completing work your company undertakes?*

A. The Federal Aviation Administration needs for more resources so that it can certify additional aircraft for our client's requirements.

*Q. What do you see as your company's biggest challenge in the next five years?*

Twin otter aircraft operated by BMAS can be configured to carry passengers or bulk fuel, which makes them perfect for servicing remote Alaska locations.

COURTESY BALD MOUNTAIN AIR

A. Being able to add additional aircraft to meet the needs of our clients.

*Q. Does your company have an anniversary or other landmark event coming up?*

A. This is our 20th year in business without any accidents or incidents.

*Q. What is the average length of time employees work for the company?*

A. We have employees that have been with the company for 20 years.

*Q. What is your company's safety record? What steps does the company take to ensure a safe work environment?*

A. We maintain a fully functioning SMS program that tracks all safety related processes to ensure we maintain our perfect safety record.

*Q. Has your company been involved in any community projects or charity events?*

A. BMAS hosts the NRA banquet in Homer each year free of charge. We also support Make-A-Wish, allowing kids they are serving to take a flight to see bears. We donated seats on our Bear watching tours from Homer for Military personell from JBER and an additional 20 bear viewing tour seats a year for numerous charities.

*Q. What is the address of your company's Web site?*

A. [www.baldmountainair.com](http://www.baldmountainair.com)

For more than 20 years, Bald Mountain Air Service has been offering bear viewing trips with single otter aircraft out of Homer.

COURTESY JUDY PATRICK

Crowley Solutions, the company's project management organization, coordinated the delivery of an ENI energy module to Pt. Oliktok, Alaska, on the North Slope. Here, Crowley assists as the module is docked Pt. Oliktok.

# Crowley celebrates 60 years

*Newly added Crowley Solutions offers comprehensive project management services to energy and resource extraction industries*

**Q. What is the official name of your company?**

A. Crowley Solutions, Inc.

**Q. Is your firm a subsidiary or affiliate of other companies? If so, please name those firms and their relationship to your company.**

A. Crowley Solutions, Inc. is wholly owned by Crowley Maritime Corporation, which owns a variety of subsidiaries, including TITAN Salvage, Jensen Maritime Consultants, Customized Brokers, Crowley Petroleum Distribution, Crowley Marine Services, Inc.

Crowley Solutions is also a partner in several joint ventures, including UIC Bowhead-Crowley, LLC.

**Q. What do you most want people to know about your company?**

A. We are a project management organization offering marine engineering, procurement, construction and management services in addition to extensive marine transport expertise. Crowley operates worldwide and has been operating continuously in the Arctic for more than 50 years. We leverage this experience

to provide a wide variety of services and project solutions to our clients.

**Q. Where is your company located?**

A. In Alaska, Crowley Solutions has offices in Anchorage and Prudhoe Bay, with additional offices in Houston, New Orleans, Seattle, Sakhalin Island and a new office opening in Singapore. Crowley Petroleum Distribution has 24 offices in Alaska and Crowley Ship Assist and Escort Services has an office in Valdez.

**Q. What year was the company founded and by whom?**

A. Our company was founded in 1892, when founder Thomas Crowley — the grandfather of current chairman, president and CEO Thomas B. Crowley Jr. — purchased an 18-foot Whitehall boat to provide transportation of personnel and supplies to ships anchored on San Francisco Bay. The present structure, in which Crowley Maritime Corporation serves as a holding company for business lines and all subsidiaries, was put in place in 1992. The company is wholly and privately owned by the Crowley family and Crowley employees. Crowley Solutions was

*Continued on next page*

Crowley's hovercraft Arctic Hawk provides transportation services from West Dock to NorthStar Island, on the North Slope of Alaska.

COURTESY JUDY PATRICK

continued from page 9

## CROWLEY SOLUTIONS

formed in 2012.

*Q. What is your company's primary business activity?*

A. Crowley Solutions is a project management organization providing comprehensive marine services for energy and resource extraction industries. We offer a wide array of turnkey solutions to our clients, including project management, marine operations, naval architecture and marine salvage. Working with Crowley gives our customers the advantage of a single point of contact and ensures coordination among all of the company's services. Our service offerings include: project management, fuel management, engineering, vessel design and build, emergency response, ocean towing, heavy lift barge transportation, and project concept studies.

*Q. Are there important projects the company is currently a part of or has done recently?*

A. We are currently providing fuel management services for the tank farm facility at Pt. Thomson. We have recently completed sealifts for both ENI and BP, which involved transporting large modules by barge from the U.S. Gulf to the U.S. Arctic. We have also transported a series of state-of-the-art drill rigs for BP, Parker and Doyon from the U.S. West Coast to the Arctic. The most recent rig move involved lightering the rig components offshore due to the draft restrictions at the dock. In 2012 we completed a large module transportation project in Sakhalin Island, Russia. Ongoing operations include coastal barging services, spill response barge services, rig towing and hovercraft operations.

*Q. How many employees does your company have?*

A. Crowley's domestic workforce is more than 3,500 today, with 625 employees in Alaska.

*Q. Describe the equipment your company uses and are there any new equipment purchases planned?*

A. Crowley Solutions operates a wide variety of tug and barge equipment. Our newest addition to the fleet is our Ocean Class vessels with 150 Tons of Bollard pull designed specifically for rig towing services. We operate the largest domestic fleet of heavy-lift barge equipment. These barges can transport up to 20,000 tons of cargo on a single barge. In the Arctic, we have a fleet of shallow draft tugs and barges that have been specifically designed to operate in the shallow waters of off-shore Alaska. We also operate unique equipment, such as our Arctic Hawk hovercraft on the North Slope, where its unique capabilities allow operations during periods of broken ice off-shore.

*Q. Is your company expanding any of its operations or locations?*

A. We are currently planning an expansion into the Asian-Pacific theatre, as well as opening a Crowley Solutions office in Singapore this year. In addition, we are designing and building a variety of equipment specifically designed for this market.

*Q. Is the company changing any of its services or products?*

A. Crowley Solutions is focused on the full range of project management services to support development projects. Crowley has built new equipment to better support the requirements for larger modules and drilling rigs associated with the North Slope of Alaska and deepwater projects in the Gulf of Mexico. We are also working with companies who are leading exploration projects on the Outer Continental Shelf (OCS) in the Arctic in support of their efforts. The development of the OCS could be a major driver of new equipment and services as well as future production infrastructure in the Arctic.

*Q. What is your company's main strength or its edge over the competition?*

A. Crowley is set apart by our extensive Arctic experience, robust HSSE systems and management framework, comprehensive project management, in-house design and engineering support, access to the right equipment for the project, and above all, our employees.

*Q. What is the most challenging work/contract the company has undertaken?*

A. Crowley most recently participated in the support operations for the Kulluk. Crowley responded to the request for assistance with rescue tugs and other support services. When the Kulluk was recovered, Crowley provided the primary towing tug for the transportation of the Kulluk from Kodiak to Dutch Harbor and supported the loading operation of the heavy lift ship.

Crowley's subsidiary, TITAN Salvage, is currently contracted for the salvage of the Costa Concordia off the coast of Italy.

*Q. What are the biggest obstacles to completing work your company undertakes?*

A. The environmental challenges of working in the Arctic, the remote nature of our projects, challenging conditions, and coordinating the logistics of having the right people and equipment in a specific place at a specific time are some of the challenges Crowley successfully overcomes on a daily basis.

*Q. Does your company have an anniversary or other landmark event coming up?*

A. 2013 is Crowley's 60th year of operating in Alaska.

*Q. What is the average length of time employee's work for the company?*

A. The average length of employment is 9.34 years, however, 17 percent of our domestic workforce has worked for the company more than 20 years.

*Q. What is your company's safety record? What steps does the company take to ensure a safe work environment?*

A. Our core values; safety management system, including internal management and continuous improvement; and our intensive training program are key to Crowley's impressive safety record.

*Q. Has your company been involved in any community*

Crowley Solutions' four new high-bollard-pull ocean class tugs towed the 120,000-ton, 406-ft. tall Olympus Hull from Ingleside, Texas, 425 miles to its deepwater location in the Gulf of Mexico.

COURTESY TIM BURDICK

*projects or charity events?*

A. Crowley has been actively involved in supporting education through scholarship funds. Since 1984, Crowley has provided more than half-a-million dollars in scholarship funds to more than 275 students. Crowley has also donated about \$2 million to education programs. In Alaska, Crowley supports several scholarships; provides training and employment opportunities through our partnership with AVTEC and First Alaskans Institute; and locally supports the communities we operate in.

Crowley also supports charitable organizations through mentoring, volunteerism, fundraising and financial assistance. From homeless shelters to children's homes, Crowley employees throughout the world make a difference in the communities they serve.

*Q. What is the address of your company's Web site?*

A. [www.crowley.com](http://www.crowley.com)

Inspection of test equipment to measure the in-situ strength of soil using a portable CPT system.

COURTESY FUGRO

# Fugro a proven partner in Alaska

*Global assets backed by local expertise yields decades of success in Alaska*

**Q. What is your company's primary business activity?**

A: Fugro collects and interprets data related to the earth's surface and subsurface. We offer a full range of onshore and offshore survey and geotechnical services, as well as subsea support, for projects related to oil and gas, mining, building and infrastructure, and sustainable energy.

**Q. What do you most want people to know about Fugro?**

A: Fugro is a global company with a long and proven history in Alaska. Our experience in the state dates back to the 1970s when we supported oil and gas exploration activities in the Bering, Beaufort and Chukchi Seas. Some of the people who worked on these early programs are involved in our Arctic projects today. It's an impressive legacy and we benefit greatly from the involvement of these longtime Fugro employees.

Deanne Hargrave, PE  
Operations Manager

**Q. What are some of the projects Fugro has undertaken in**

**Alaska this year?**

A. In the offshore arena, we managed multiple survey projects for oil and gas clients in the Chukchi Sea and Cook Inlet. Services included positioning, pipeline inspection, ice gouge, and shallow hazards surveys. In April, we performed a remote-sensing ice thickness mapping program in the Chukchi Sea. We also completed a hydrographic charting project for NOAA in the Aleutians. Onshore, we performed airborne geophysical surveys for the state of Alaska to help identify new mining prospects, and performed topographic mapping services related to the Statewide Digital Mapping Initiative (SDMI). We also provided geotechnical consulting services to an engineering firm in support of a major hydroelectric power project.

**Q. Describe the equipment your company uses.**

A. Fugro owns a large inventory of specialized and built-for-purpose equipment. Globally, these resources include vessels, aircraft, drill rigs, jack-up platforms, laboratories, and a host of related sensors and systems. These global resources are a great

complement to our local assets, which primarily comprise offshore geophysical equipment, and can be mobilized for work on Alaska projects as needed. At times, specifically for vessels and helicopters, third-party charters are a better choice for our local clients. In these cases, we have longstanding relationships with equipment providers.

*Q. What are your company's main strengths?*

A. We are locally based but have the strategic and financial backing of a global company, which allows us to take the long-view when it comes to working in Alaska. This is a difficult place to sustain a capital-intensive business like ours. Anyone who has lived in Alaska knows how quickly a major project can come to a halt due to regulatory hurdles. When that happens, we are able to "wait it out", mobilizing crew and equipment to work on Fugro projects in other parts of the world until the Alaska work comes back online. This flexibility is key to our maintaining a highly skilled local staff despite sometimes unpredictable market pressures.

part of the SDMI. It was during this project that Fugro discovered the ability for GeoSAR to penetrate snow and ice, a finding that could lead to a number of important Arctic applications including sea-ice thickness mapping. Over the past two

years, we have engaged in several studies to test this capability, partnering with the University of Alaska Fairbanks and major oil and gas companies with interests in Alaska.

*Q. What new markets, clients or projects did your company attract in the last year?*

A. One of the most exciting developments is the ice-thickness mapping capability I just mentioned. Based on promising results from two years of tests, 2013 will mark our first fully-funded program, though the project will be taking place in Arctic regions outside Alaska. While the capability is continuing to be developed, it is believed that GeoSAR will help reduce uncertainty in the prediction of ice-loads and provide accurate, timely information about sea-ice thickness, structure, extent, ridges, and modeling.

*Q. What are the biggest challenges to completing the projects your company undertakes?*

A. Working in Alaska means working in extremes. Even the most straightforward project typically entails logistical challenges due to remote locations, as well as technical challenges due to Alaska's harsh environment. But if it was easy, it wouldn't be so rewarding. We have great teams of people tackling these projects. They are skilled in their field and trained in Alaska's field conditions. Being prepared is something Fugro takes seriously, which is evident through our ISO-certified quality management, occupational health and safety, and environmental management systems, as well as our stellar safety record.

*Q. What do you see as the biggest obstacles to your company's success in the next five years?*

A. Political uncertainty. While Fugro is firmly committed to Alaska and the Arctic in a broader sense, I think we, and other companies like us, would be so much stronger if our clients were working in a more stable regulatory environment.

*Q. What is the address of your company's website?*

A. Our global website is [www.fugro.com](http://www.fugro.com). Our local website is [www.fugrogeoservices.com](http://www.fugrogeoservices.com).

COURTESY FUGRO

Deploying a high resolution digital seismic streamer during a shallow hazards survey in the Chukchi Sea.

Commitment to innovation is another strength. As an organization, Fugro has long worked with system manufacturers, clients, and universities to develop and test new technologies and/or to develop new applications for existing technologies. The GeoSAR system is a perfect example. A dual-band airborne radar mapping system, GeoSAR was developed by NASA's Jet Propulsion Laboratory and commercialized by Fugro as a way to provide efficient, large-area mapping in regions obscured by vegetation or clouds. In 2010, GeoSAR was used in Alaska as

# IFR has provided top quality workwear with comfort in mind since 2005

*Company meets demand for consistent quality workwear by expanding distribution facility*

**Q. What is the official name of your company?**

A. IFR Workwear Inc.

**Q. What do you most want people to know about your company?**

A. Supplying our customers with their coverall and winter wear needs, when they need it. Our goal is to have our client's inventory needs in stock, all the time.

**Q. Where is your company located?**

A. We are located in Red Deer, Alberta.

**Q. What year was the company founded and by whom?**

A. In 2005 by Reg Radford & Erin Buckland.

**Q. What is your company's primary business activity?**

A. Fire Resistant Clothing

**Q. Are there important projects the company is currently a part of or has done recently?**

A. Our customers are diversified throughout the Workwear industry. From oil and gas, to electrical to construction and beyond.

**Q. How many employees does your company have?**

A. We have 20 employees at the distribution center and on average about 200 contract sewers.

**Q. Is your company expanding any of its operations or locations?**

A. Yes, we are building a 30,000 square foot distribution center.

**Q. Is the company changing any of its services or products?**

A. Yes, we have added more embroidery machines to do all cresting in house to reduce delivery times.

**Q. What is your company's main strength or its edge over the competition?**

A. We sell only through distribution so local service is available to end users and inventory for same day shipping.

**Q. What new markets, clients or projects did your company attract in the last year?**

A. Many new national distributors and breaking into the overseas market.

Our "NEW" Patented Suit-All 2pc Coverall! Made for Men and Women of all sizes and shapes. Better comfort and Fit with the same or better safety level. Ask a distributor near you.

**Q. What is the most challenging work/contract the company has undertaken?**

A. To provide EDI & Ecommerce this will be implemented in 2013.

**Q. What are the biggest obstacles to completing work your company undertakes?**

A. End users not pre-planning their seasonal workplace wear needs.

**Q. What do you see as your company's biggest challenge in the next five years?**

A. There are a lot of off-shore garments sold in North America that do not meet the standards but claim compliance, thereby leaving employers open for liability issues. Employers are placing their employees at risk for a few dollars savings.

**Q. Does your company have an anniversary or other landmark event coming up?**

A. Opening of our new distribution center in 2014.

**Q. What is the average length of time employee's work for the company?**

A. Our company is still young and growing, the three employees that started with the company are still here, another employee has been here more than 5 years, a couple more than 3 years and then we grew again and added more staff so we have several that have been here 1-2 years.

**Q. What is your company's safety record? What steps does the company take to ensure a safe work environment?**

A. Our safety record is excellent. We try to ensure our space is as safe as possible by keeping aisles clear and having staff properly trained on the equipment they are required to use.

**Q. Has your company been involved in any community projects or charity events?**

A. Yes, we are involved with the Ronald MacDonald House, Red Deer College, Festival of Trees, Red Deer Hospice, Red Deer Curling Centre, Red Deer Gymnastic Centre as well as other charitable donations

**Q. What is the address of your company's Web site?**

A. [www.ifrworkwear.ca](http://www.ifrworkwear.ca)

# Want to be a part of this oil and gas directory?

*Qualified Petroleum News advertisers have full access to all the benefits included in this biannual magazine, which used to be called the Petroleum Directory but was recently changed to Arctic Oil & Gas Directory to reflect its content and worldwide distribution. Those benefits include the following:*

- **Exposure.** The Arctic Oil & Gas Directory is distributed twice a year to every one of our newspaper subscribers, in addition to its presence at trade shows and conferences nationally and internationally.
- **A company profile.** A full page, full color Q&A profile of your company. You'll be involved in the editing and choose the pictures. Once it's printed, you own the piece and you'll receive an electronic copy to use as a company brochure or however you see fit.
- **Access to free news coverage.** Submit announcements, new hires, special projects, new technologies, company photos, and more. Let current and potential new clients keep track of your company's milestones.
- **Unique company listings.** With over 130 categories to choose from, you'll be able to list your company name, contact information and a brief description of the products and services you offer.
- **Additional opportunities** to feature your company and its people – including feature stories, photo spreads, cover shots, and more.

## Get listed and be noticed.

# Polyguard Products Inc. an innovation driven company

*Company's coatings and barrier systems reduce corrosion  
and toxin exposure, no sick buildings here!*

**Q. What is the official name of your company?**

**A. Polyguard Products, Inc.**

**Q. What do you most want people to know about your company?**

A. Polyguard has made pipeline corrosion coatings since 1950. We are a 100 percent employee owned company, and most products we sell are products which we invented rather than copied from competitor's products.

**Q. Where is your company located?**

**A. Ennis, TX.**

**Q. What year was the company founded and by whom?**

**A. In 1950 by Robert M. Nee and Frank McNulty.**

**QA  
AND**

**Q. What is your company's primary business activity?**

A. Manufacture of corrosion coatings and waterproofing. Polyguard's Pipeline Division has been active in the pipeline protective coating industry for more than 50 years. This division has designed, manufactured, and introduced a number of innovative underground pipeline coatings and girth weld coatings, which have become commercially accepted as standards for the industry. They are both non-shielding coatings and soil stress tolerant.

**Q. Are there important projects the company is currently a part of or has done recently?**

A. Lots of them however, many oil companies don't like to have their name publicized, and we can't list them. We are in the process helping one oil company stop corrosion on many,

COURTESY POLYGUARD

many miles of pipe in Northern Alaska. We solved a major corrosion problem downhole in thousands of oil wells saving several oil companies MANY millions of dollars; that's the type of innovative products we are capable of bringing to market to solve problems.

*Q. How many employees does your company have?*

A. We currently have around 90 employees.

*Q. Describe the equipment your company uses and is there any new equipment purchases planned?*

A. We are in our 21st successive year of sales growth, so we are always expanding, updating, and improving our manufacturing and laboratory capabilities.

*Q. Is your company expanding any of its operations or locations?*

A. In the last 3 years we have added 1 million gallons of raw material storage.

*Q. Is the company changing any of its services or products?*

A. Not so much changing as introducing new, such as the two part epoxy we introduced in 2012, several insulation vapor proofing, weatherproofing, and cladding products for commercial and industrial insulation. Our Architectural division is growing in a very difficult time for the construction industry; this is due again to innovative new products.

*Q. What is your company's main strength or its edge over the competition?*

A. Innovation – we have always had more technical people than sales people. Our original product line, corrosion coatings for steel pipelines, remains strong and growing today. In 1970 Polyguard introduced architectural waterproofing membranes. In 2002 Polyguard introduced RG-2400® anti-corrosion gel, an innovative patented technology which successfully solves the problem of corrosion under insulation. In 2003 Polyguard launched the Underseal™ system to offer protection against termites, pests, radon gas, moisture, insecticides/pesticides as well as provide waterproofing and crack reduction in concrete structures.

COURTESY POLYGUARD

Polyguard's highway waterproofing membranes, introduced in the early 1970's, have been specified by most major DOT's for use on pavement and bridges.

With our ISO 9001 certification, Polyguard is committed to maintaining a high level of quality in both product manufacture and product development.

*Q. What new markets, clients or projects did your company attract in the last year?*

A. We are now growing rapidly internationally, including Canada. We have also become the primary products used on ammonia refrigeration systems.

*Q. What is the most challenging work/contract the company has undertaken?*

A. Waterproofing the Ballpark at Arlington. Solving the downhole corrosion issues in Alaska.

*Q. What are the biggest obstacles to completing work your company undertakes?*

A. We do nothing but manufacture, so the answer to that would be R&D and new product development and introduction.

*Q. What do you see as your company's biggest challenge in the next five years?*

A. Making the transition from being a good small company to a good large company.

*Q. What is the average length of time employee's work for the company?*

A. They tend to stay a long time because their Employee Stock Ownership (a retirement plan) keeps getting bigger.

*Q. What is your company's safety record? What steps does the company take to ensure a safe work environment?*

A. We have implemented the DuPont "STOP" safety program, which is raising awareness.

*Q. What is the address of your company's Web site?*

A. <http://www.polyguardproducts.com>

UMIAQ's background with design for extreme Alaska conditions was put to good use in solving technical challenges for the 60,000 s.f. facility. The multi-phase campus development is programmed to house science laboratories, administrative offices, dormitories, a warm storage building, water and wastewater storage facilities, and emergency power generation.

# UMIAQ providing strategic planning and permitting for oil and gas projects in Alaska

*Company's expanded suite of services offers clients comprehensive resources for design and regulatory needs*

**Q.** What is the official name of your company?

**A.** UMIAQ, LLC. – Commercially we use UMIAQ.

**Q.** Is your firm a subsidiary or affiliate of other companies? If so, please name those firms and their relationship to your company.

A. Ukpėagvik Inupiat Corporation Professional Services support UIC's mission to provide social and economic resources to its shareholders and their descendants through the development of long-term, meaningful career opportunities for UIC shareholders. Our areas of expertise in UICPS fall under three companies, UMIAQ, UIC Science, and UIC Arctic Response Services. UICPS identifies potentially impacted resources, communities, organizations, and individuals to help define project issues and constraints associated with future energy projects and their potential impacts to natural, environmental, and human resources.

**Q.** What do you most want people to know about your company?

A. UMIAQ meets the growing demands of resource and rural community development projects in Alaska. UMIAQ provides design, consulting, oil-field services, and science logistics that address the unique tactical and environmental challenges of the Arctic and remote regions of Alaska.

Our design division, formerly known as LCME, has over 3 decades of experience in architectural design, civil, structural, and mechanical engineering and surveying designing solutions that honors qualities of purpose and place.

Consulting division provides clients with specialized assets and trained personnel to meet the commitments of regulatory planning, stakeholder and community relations, health, safety, environment and training, response planning and operations,

UMIAQ Logistics Supervisor scouts the sea ice before allowing researchers to proceed. UMIAQ helps scientists conducting research in the Arctic with their project's logistical needs. From Arctic orientation and facilities planning to vehicle maintenance and bear hazing, UMIAQ works to ensure researchers' needs are addressed.

COURTESY UMIAQ

and geospatial analysis.

Oilfield services division provides project management experience, including engineering, construction, and operations and maintenance for both onshore and offshore exploration infrastructure. We also own and operate camps supporting staging for oil and gas exploration.

*Q. Where is your company located?*

A. UMIAQ is located in Anchorage, Alaska.

*Q. What year was the company founded and by whom?*

A. UMIAQ was established in 2006 to meet the growing service demands of resource development activities in Alaska and beyond. In August 2010, UMIAQ's services expanded when it merged with fellow UIC subsidiary LCMF, a professional services firm that has provided architectural design, civil and mechanical engineering, and surveying services since 1982.

*Q. What is your company's primary business activity?*

A. UMIAQ's primary business activity is diversified development and support services.

*Q. Are there important projects the company is currently a part of or has done recently?*

A. Shell OCS exploration project regulatory support, Point Thompson environmental and regulatory support, Tuzzy Library expansion project in Barrow, Alaska.

*Q. How many employees does your company have?*

A. UIC has over 2,000 employees.

*Q. Is your company expanding any of its operations or locations?*

A. UIC Professional Services has created a new company, UIC Arctic Response Services, which provides a broad range of arctic project management, including onshore, near-shore, and offshore oil spill prevention and response services, equipment, maintenance and training, and asset management.

*Q. What is your company's main strength or its edge over the competition?*

A. The UMIAQ advantage, UMIAQ is a Native-owned firm with technical and professional personnel experienced in strategic planning, design, construction, administration, and regulatory consulting. The UMIAQ team knows the politics, culture, land use, regulation, engineering, and design conditions as they pertain to industrial and community development. Principal staff at UMIAQ has worked together for over two decades on projects throughout Alaska. We offer a distinct advantage over other firms by providing reliable local knowledge and expertise. UMIAQ helps clients maximize project startup efficiencies

UMIAQ offers a full range of surveying services supported by state-of-the-art equipment, technology, and training. UMIAQ surveyors, engineers, GIS analysts, architects and regulatory staff work to anticipate project needs and gather field data necessary for all phases of project development.

COURTESY UMIAQ

through comprehensive regulatory planning that includes stakeholder engagement. We also provide front-end planning and development services for Arctic projects, including helping clients define their scope and establish execution plans.

*Q. What is the address of your company's Web site?*

A. [www.uicalaska.com](http://www.uicalaska.com)

## IN PRINT

### Excerpts from 'Arctic Oil' Photographs of Alaska's North Slope by Judy Patrick

When I first started taking photos in Prudhoe Bay in 1989, I was excited to finally see the place everyone called "The Slope." My husband had worked there ten years earlier during construction of the Trans-Alaska Pipeline after the giant Prudhoe discovery. I often overheard he and his friends swapping stories like they all belonged to some exclusive club. Their descriptions fascinated me: a remote, frozen landscape, roads made from ice, hotel-sized buildings that arrived on barges, and massive construction equipment.

Over the years I have photographed "The Slope" from every angle imaginable. My clients included oil producers, drilling and pipeline contractors, heavy construction companies, air carriers, and camp caterers. During all of these assignments, my goal was to capture images that would illustrate what working in the Arctic was like, and how operations were conducted in a safe and responsible manner.

One of my favorite examples of environmental protection is the "duck ponds" — bright yellow or orange plastic spill containment that is placed under every single piece of equipment or vehicle, so that any drips or leaks are captured. I joke about how much cleaner the oil fields are than your average grocery store parking lot, but it's really true.

Over time, I realized that most Alaskans had no idea where their neighbors or family members were heading when they flew north for their work rotation. Workers constantly asked me for photos they could share with friends and family back home, and that's what led me to publish this book. The Arctic is difficult to describe in words. So, for those who will never get to Deadhorse, I hope these images provide a window to a beautiful and unique place that I have grown to love.

*"The Arctic is difficult to describe in words. So, for those who will never get to Deadhorse, I hope these images provide a window to a beautiful and unique place that I have grown to love."*

—Judy Patrick

## What others are saying

While the passion of many Alaska photographers is wildlife, unless an animal is walking under an oil pipeline or grazing near a drilling rig, it holds little interest for Judy Patrick: The people and machines of the oil industry are what grab her and that's evident in her evocative photographs of the Arctic.

If you want to really see what the industry looks like in this little-traveled and forbidding part of North America, "Arctic Oil, photographs of Alaska's North Slope" by Judy Patrick is the best documentary you will find, partly because of Patrick's fascination with the industry and her desire to document its footprint on the land — and partly because she will go anywhere, in any weather, to shoot photographs.

She once told me that she's at her best when she's in a helicopter with the door wide open snapping pictures.

My favorites in her collection are the building of BP's Northstar Island in the Arctic Ocean off Alaska's North Slope. She shot every aspect of the oil field's development, from placing the gravel for the island to laying the pipeline to take the oil to shore.

Most important, her photos are honest. There's no photo-shopping in mountains along the flat coastal plain, which at least one anti-development group is guilty of doing.

Rather, in Patrick's work the vast Arctic and industry's presence is accurately portrayed.

You will come away with an appreciation for the people and the science that protect an environment both pristine and rich in natural energy resources.

—Kay Cashman, publisher  
& executive editor  
of Anchorage-based  
Petroleum News

*Judy Patrick has been documenting the oil and gas industry in Alaska for over 20 years. "Arctic Oil" captures what life is like in Alaska's Arctic oil patch, and provides a window for the rest of the world to view the uniqueness of a place most folks will never visit in person. The book is scheduled to begin distribution in January, 2014. Advance copies may be available in December directly from [judypatrickphotography.com](http://judypatrickphotography.com).*

## BUSINESS SPOTLIGHT

### Usibelli Coal Mine Inc.

Founded in 1943 by Emil Usibelli, Usibelli Coal Mine Inc. is located in the mountains of the Alaska Range, near the town of Healy, Alaska. UCM has a work force of about 130 employees, and operates year round. Mine production has grown from 10,000 tons in 1943 to an average above 2 million tons of coal per year and is currently the only operational coal mine in Alaska.

#### Beverly Weis, CPA — Controller

Born and raised in Fairbanks, Weis attended college in Washington, returning to complete an accounting degree at the University of Alaska Fairbanks. She joined the Usibelli team as controller for Usibelli affiliated companies working in the Fairbanks office.

Weis has been married for 29 years to her husband Wayne and has three grown children. She enjoys cross country skiing and in 2009 completed the Boston Marathon and more recently the 50th Equinox Marathon.

COURTESY USIBELLI

### URS Corp.

URS Corp. is a leading provider of environmental, engineering, technical and construction management services for public sector and private sector clients around the world.

#### Gary Reimer, Senior Program Manager

Recently joining URS, Gary Reimer has extensive federal experience, particularly in NEPA reviews of Alaska projects. His strong history working with both local state and federal governments will prove a major asset to URS in supporting projects for responsible development in Alaska. Reimer previously served as BLM's Anchorage district office manager, field office manager and as a senior manager in BLM Alaska's Land Conveyance program and Office of Pipeline Monitoring. He played a key role in the renewal of the grant of right-of-way for the Trans-Alaska Pipeline System and preparation of several regional Resource Management Plans. He and his wife Lai Ming live in Eagle River.

COURTESY URS CORP.

### Arctic Controls Inc.

Arctic Controls Inc. is Alaska's leading expert in valves, flow meters, actuators, instrumentation and process controls for commercial oil, gas and water management, providing professional expertise for all commercial applications and can assist with estimates and recommendations for your project.

#### Brent Pound — Business Development Manager Oil & Gas

Brent Pound is a proud U.S. Navy veteran who served aboard the U.S.S. Constellation CV-64 as a catapult captain for four years. He has more than 30 years' experience supporting the engineering industry, specializing in engineering CAD systems management and design and drafting and is on the board of directors for the Petroleum Club of Anchorage. When not at work, Pound is an inspiring chef and restaurateur, who also enjoys fishing, hunting for caribou and moose and camping with his friends.

FORREST CRANE

### CH2M HILL

Employee-owned CH2M HILL offers consulting, engineering, procurement, logistics, fabrication, construction, construction management, operations and maintenance services all under one roof.

From consultants developing project concepts to turning the wrench in the field, CH2M HILL supports oil and gas, mining, environmental, water, power, transportation, government and other energy projects worldwide. In Alaska, CH2M HILL is doing major work in locations including the North Slope, Nikaitchuq, and Kenai.

#### Rick McAuliff, Project Manager

Rick McAuliff joined CH2M HILL in April 2012 as a project manager in support of the Operations and Maintenance Services group. Beginning his 26-year career in the construction industry as an apprentice, he worked his way up to general foreman then transitioned to management. He lives in Wasilla with his wife of 23 years and three children, fulfilling his childhood dream of living and working in Alaska.

## COMPANY NEWS *in brief*

### Carlile opens employee health clinic in Anchorage

Carlile Transportation Systems said Jan. 16 that it is very excited to announce the opening of its very own employee health clinic. The Carlile Employee Clinic is located on the Alaska Regional Campus at 2751 DeBarr Road and is managed by H2U.

The clinic partnership with Alaska Regional is designed to make it easier for employees to get well, stay healthy and is dedicated to serving Carlile employees and their families who participate in the company health plan. Employees will receive personalized attention, quality care; spend less time in waiting rooms and save money with free office visits.

Board certified nurse practitioners will care for employees with common illnesses such as allergies, ear infections, strep throat, minor infections and rashes. Additional services include blood pressure checks, flu diagnoses, x-rays, lab work and the administration of various vaccines. As an added convenience, employees can have prescriptions written by the nurse practitioner filled right at the clinic.

In addition to having an easy-to-access location, the clinic's hours were chosen with the employees' needs in mind. The clinic's operating hours are Monday through Friday with extended hours on Thursday. "We welcome Carlile Transportation Systems employees and dependents to our campus, and look forward to sharing the convenience of our clinic services with them," said Annie Holt, CEO Alaska Regional Hospital.

### ASRC'S Ty Hardt sets sights on top of the world

Arctic Slope Regional Corp. said Jan. 14 that in late March, its director of communications, Ty Hardt, will head to Kathmandu and attempt a climb of Mount Everest, the tallest mountain on Earth at an elevation of 29,035 feet. Identifying a need for the children of the North Slope, Hardt is using the climb to raise money for the Boys & Girls Club of Barrow, as well as other clubs statewide.

"I've been fortunate to be able to climb other big mountains around the world, but Himalayan expeditions present another level of difficulty, both in the amount of training and logistics," said Hardt. "I'm working hard to make sure I'm up to the challenge of Mount Everest, and am very excited to get this under way."

The Boys & Girls Club of Barrow is located inside Ipalook Elementary School and has more than 130 members, out of the more than 800 kids from Ipalook and Eben Hopson Middle School. "Our mission has always been to help enable our young people, and this unique fundraising effort will help us to extend our reach," said Alana Humphrey, CEO of Boys & Girls Clubs Alaska. "We will be following Ty on every step of his Mt. Everest expedition, and wish him the very best."

The expedition and fundraising effort is being called Going

TY HARDT

to Extremes. You can find more information regarding the climb at: [www.g2extremes.com](http://www.g2extremes.com).

### Vindeola joins Global Diving & Salvage Inc.

Global Diving & Salvage Inc. said Feb. 1 that it has hired Jose' Vindeola for its Gulf Coast Region in the business development and technical support position. Vindeola will be essential in providing Global's current client base with high quality solutions and also stewarding expansion both nationally and abroad. He has cultivated an extensive background within the maritime industry, with more than 30 years of diving experience in both the offshore and inland sectors. Vindeola comes to Global Diving & Salvage Inc. having spent several years in project management and business development roles.

JOSE' VINDEOLA

"Jose's wealth of experience and industry knowledge has already made him a key addition to the Global family. We view his appointment as a sign of our commitment to being a leading maritime service provider. Jose' brings a diverse technical and business development background that will fit in well with Global. We are excited to have him part of the Gulf Coast team," said Ryan Smith, general manager Gulf Coast Region.

### ASRC Energy Services' facility approved for program

As reported by State of Alaska Department of Labor and Workforce Development Feb. 15, Labor and Workforce Development Commissioner Dianne Blumer approved ASRC Energy Services' Grind & Inject Plant and Oily Waste Injection Facility for the Alaska Voluntary Protection Program renewal as a result of outstanding employee safety and health programs.

"ASRC Energy Services Inc. and its subsidiary AES Alaska Inc. are extremely proud to operate two VPP Star sites," said Don Gray, vice president of Health, Safety and Environmental Training. "Earning Star recertification for both the Grind & Inject Plant and the Oily Waste Injection Facility is in keeping with our Incident Free Culture and reflects our commitment to keeping everyone safe."

VPP recognizes and promotes effective workplace safety and health management through a cooperative program between a company's management, employees and Alaska Occupational Safety and Health.

As VPP Star recipients, AES Grind & Inject Plant and the Oily Waste Injection Facility won't be subject to random enforcement inspections for five years. Enforcement regulations remain in effect, however, and cases of employee complaints, accident investigations or other significant incidents will result in an enforcement inspection. Participation in the program is voluntary.

There are 12 sites in Alaska with the AKOSH VPP designation. For a complete listing of the sites and more information about the program, go to [www.labor.alaska.gov/lss/vpp-participants.html](http://www.labor.alaska.gov/lss/vpp-participants.html).

## Carlile recognizes employees for safety in 2012

Carlile Transportation said Feb. 20 that it recently honored employees for safe work performance at the sixth annual employee and driver safety awards banquets in Anchorage, Fairbanks and Tacoma. The banquets are held annually early in the year to recognize safety achievements from the year prior.

Recognized were the newest drivers to join the prestigious "Million Mile Club," including Chad Townsend, John Brown, Keith McCallie and Doug Hamrick. They join 40 other Carlile drivers with more than a million miles logged without an incident.

Operational employees from all the terminals were recognized for working the entire year of 2012 without a recordable incident. An impressive total of 411 employees were honored for 12 months of perfect safety performance.

"Our goal is to be the best, safest transportation company in Alaska and throughout North America," said Harry McDonald, Carlile's CEO. "Safe highways start with safe drivers and we need to communicate our support for their performance and make sure the driving public knows that's how we do it at Carlile."

Founded in 1980 by brothers John and Harry McDonald, Carlile has grown into one of Alaska's largest trucking companies. Carlile Transportation Systems is based in Anchorage and employs more than 680 people. Carlile services customers with terminals in Anchorage, Fairbanks, Kenai, Kodiak, Prudhoe Bay/Deadhorse, Seward, Blaine, Minn., Tacoma Wash., Houston, Texas, Edmonton, Alberta and also has a warehouse facility in Anchorage.

## Larson Electronics adds explosion proof signal light

Larson Electronics said Feb. 18 that it has added EPL-TL-2X10W-C LED traffic light to its line of industrial grade LED lighting solutions. This heavy duty unit features explosion proof approval and cool running LED lamps for high output and excellent visibility and is ideal for use as a traffic control device in servicing and refueling areas where flammable gases and vapors are present.

The EPL-TL-2X10W-C explosion-proof LED traffic light provides an effective signal light solution for hazardous locations where vehicles, equipment and aircraft are routinely serviced or maintained. This two color signal fixture operates similarly to a standard traffic signal and features copper free aluminum lamp housings that have been powder coated for a durable finish that resists corrosion. The signal lamp housings can withstand 1490 pounds PSI hydrostatic pressure and are waterproof, making them well suited to use in wet locations such as marinas or areas where hose downs are a part of regular maintenance. The red and green signal lights are LED powered for bright illumination and a long 50,000 hour lamp life, and feature colored Pyrex cover globes for brilliant coloration and added durability.

For more information visit [www.LarsonElectronics.com](http://www.LarsonElectronics.com).

## ASRC Energy Services Awarded Alyeska Project

ASRC Energy Services' engineering and professional services division said Feb. 20 that it recently was awarded a five-year contract to provide Alyeska Pipeline Service Co. with multi-disciplined engineering services. The proposed work will be for maintenance, operations, and modifications to the Trans Alaska Pipeline System.

"Our engineering group has senior professionals who have extensive engineering and design experience with pump stations and pipelines throughout Alaska including TAPS," said Frank G. Weiss III, AES vice president and general manager for engineering and professional services. "We look forward to providing Alyeska with quality engineering and design solutions that are safe, fit for purpose, and cost effective."

AES has been operating since 1985 and employs close to 5,000 people working in more than 30 states. AES is a leading oil and gas service company with headquarters in Anchorage, Alaska and is the largest private employer in the state, with annual revenues of approximately \$635 million.

## Calista Corp. announces shareholder dividend record

Calista Corp. said Feb. 25 that its board of directors voted at its Feb. 22 meeting to approve a shareholder dividend distribution totaling \$4.3 million to shareholders of record dated March 29, 2013. Total distribution of shareholder dividends will exceed \$19.9 million since inception. This is the sixth consecutive yearly dividend of eight total shareholder dividends. Each dividend has increased from the previous distribution.

Calista has one of the largest populations of shareholders among the Alaska Native corporations at more than 12,000 individuals. This distribution equates to \$3.25 per share, an 8 percent increase from 2012. Checks are expected to be mailed out by the close of business April 15.

"Calista Corporation, like other ANCSA corporations, has unique requirements to operate as a business, work to benefit our region and also improve the socio-economic lives of our Shareholders," said Calista Corp.'s Board Chair Willie Kasayulie. "The Calista region has some of the highest energy rates, food and transportation costs, and highest unemployment rates in the nation. Operating as a disadvantaged business in the federal contracting arena is crucial in allowing us to benefit our region while also providing cost-effective services for the government."

CALISTA CORPORATION  
[www.calistacorp.com](http://www.calistacorp.com)

## Rajabi joins Crowley's solutions group team

Crowley Maritime Corp.'s solutions group said Feb. 25 that it recently named Farhad Rajabi vice president of its project management team. He will work out of the group's Houston office

and report to Craig Tornga, Crowley's vice president of solutions.

Rajabi's new role will leverage his 30 years of experience in project management and other marine solutions fields to establish objectives, plans, policies and procedures for the project management department. With Rajabi onboard, the solutions team plans to provide more efficiently integrated solutions, and unmatched quality and safety standards that will in turn translate into overall cost and time savings to customers with unique and complex projects worldwide.

"We're thrilled to have someone of Farhad's caliber join our team," said Tornga. "The skills and knowhow he brings to the solutions group not only complement our turnkey service offerings, it further provides customers with the thought leadership and innovative spirit our clients have come to know over the years."

Rajabi earned bachelors' degrees in naval architecture from the Italian Naval Academy, in mechanical engineering from the U.S. Naval Postgraduate School, and in Italian language and literature from the Institute of Dante Alighieri. He also holds a Ph.D. in naval engineering from the U.S. Naval Postgraduate School.

FARHAD RAJABI

## Maritime Helicopters celebrates 40 years of service

Maritime Helicopters Inc. said Feb. 19 that it will be celebrating 40 years of service in Alaska this year.

Starting with one leased helicopter in 1973, the family-owned business has steadily grown to become the only Bell Helicopter/Textron Service Center in Alaska. Maritime owns a fleet of Bell Jet Rangers, Long Rangers, and 407 models which support marine, petroleum, construction and government agencies throughout the state.

From the main headquarters in Homer, the company has satellite bases in Kodiak, Dutch Harbor and Kenai. Maritime offers an 86-foot helipad equipped research vessel which has served customers throughout the Arctic, Western Aleutians and Southeast Alaska. The company is ever expanding and remains committed to serving its many loyal customers throughout Alaska. For more information visit [www.maritimehelicopters.com](http://www.maritimehelicopters.com).

## Tom Crowley honored for contributions to the USMMA

Crowley Maritime Corp. said March 4 that Tom Crowley, its president, chairman and CEO, became an honorary alumnus of the United States Merchant Marine Academy during a special banquet recently held in his honor. The USMMA Alumni Association and Foundation, along with its affiliated Jacksonville Chap-

ter, recognized Crowley for his years of unstinting support of the academy and its cadets in front of more than 130 guests, including past and present Crowley employees and USMMA graduates, at the University Club in Jacksonville, Fla.

Several USMMA Alumni Association and Foundation members, including President James Tobin and Chairman of the Board of Directors Charlie Hill, thanked Crowley and his company, and presented him with a special portrait of a racing sailboat on Long Island Sound painted by fellow alumni.

"This is an immense honor for me, not just because this is one of the most important and outstanding institutions of higher learning, but because one of our company's core values is our people, and many of our people have their roots with this academy," said Crowley. "It's because of them, and those who will come after, that I will always support the U.S. Merchant Marine and its mission to develop maritime leaders."

Crowley has supported the USMMA through the establishment of the USMMA Scholarship Program funded by the Thomas B. Crowley Sr. Memorial Scholarship, which since 1994 has provided \$10,000 in scholarship funds annually to deserving USMMA cadets.

## Granite on 'World's Most Ethical Companies' list

Granite Construction Inc. said March 6 that it has once again been recognized by the Ethisphere Institute as one of the 2013 World's Most Ethical Companies. The 2013 WME companies are those that embrace ethical business practice and demonstrate industry leadership.

"Not only did more companies apply for the World's Most Ethical Companies recognition this year than any year in the past, which demonstrates that ethical activity is an important part of many of these companies' business models, but we are also seeing more companies be proactive and create new initiatives that expand ethics programs and cultures across entire industries, such as industry-based ethics associations and other activities," said Alex Brigham, executive director of Ethisphere.

Through in-depth research and a multi-step analysis, Ethisphere reviewed nominations from companies in more than 100 countries and 36 industries. The methodology for the World's Most Ethical Companies includes reviewing codes of ethics, litigation and regulatory infraction histories; evaluating the investment in innovation and sustainable business practices; looking at activities designed to improve corporate citizenship; and studying nominations from senior executives, industry peers, suppliers and customers.

"This recognition is a tremendous honor," said James H. Roberts, president and chief executive officer of Granite Construction Inc. "We are grateful for our 90-year history and are committed to leading our industry for another 90 years. How we ethically operate our business and treat others — our customers, suppliers, communities, co-workers and shareholder s — is integral to our continued success."

## Bald Mountain Air Services adds King Air to fleet

Bald Mountain Air Service said March 15 that it has added a

King Air 350 to its fleet of fixed wing aircraft. "Our new King Air 350 is the largest of the King Air line from Hawker Beechcraft," said Jeanne Porter, president of Bald Mountain Air Service. "We are using this plane for statewide and Lower 48 charters." The new airplane complements the existing fleet of DeHavilland Single and Twin Otters.

BMAS uses for bear viewing excursions and to support the oil and gas industry with passenger and cargo service. BMAS also has a King Air 200 that is contracted to provide medevac service for the Alaska Regional Hospital Life Flight program. With its extended range and 300-knot speed, the King Air 350 can go non-stop to Dutch Harbor or Seattle with nine passengers. "It's the safest Twin Turbo prop airplane ever built," said Porter. Bald Mountain Air Service is headquartered in Homer, with bases in Deadhorse and Anchorage. BMAS has been serving government agencies and the oil and gas and tourism industries with accident-free flight services since 1993. For information on chartering the new King Air 350, contact [coordinator@bald-mountainair.com](mailto:coordinator@bald-mountainair.com). For more information on BMAS, visit [www.baldmountainair.com](http://www.baldmountainair.com).

## Fairweather opens second occupational medical clinic

Fairweather LLC, an Anchorage-based provider of remote medical, meteorological and expediting services, said March 21 that it has opened its newest occupational medical clinic located at 7999 Jewel Lake Road in Anchorage.

The new Fairweather Anchorage Medical Clinic is designed to serve oil companies and contractors operating on Alaska's North Slope. Complementing the services offered at the multi purpose Fairweather Deadhorse Medical Clinic in Prudhoe Bay, the new Anchorage clinic provides operators the convenience to receive customized occupational health services at either location.

The Anchorage and Deadhorse clinics are both equipped to perform random, pre-employment, post-incident and test-for-cause urine drug and breath alcohol collections and provide

substance abuse training for both supervisors and employees. On-site collections are available to companies throughout the Anchorage area. The Fairweather Deadhorse Medical Clinic, an air ambulance staging facility, also provides a full spectrum of acute care, emergency services and medical treatment to operators on the North Slope.

The mission of the Fairweather medical clinics is to provide innovative solutions to help employers enhance their HSE team objectives and maintain a safe and drug free workplace.

For additional information, contact the Fairweather Anchorage Medical Clinic at 907-248-8008 or visit [www.fairweather-medical.com](http://www.fairweather-medical.com).

## Crowley tugboat crew recognized by U.S. Coast Guard for assisting a disabled vessel

Crowley Maritime Corp. said March 22 that the captain and crew aboard the tugboat Explorer, which is managed by Crowley, were recently recognized by Coast Guard Rear Admiral William Baumgartner, who serves as commander of the Seventh Coast Guard District in Miami, for their humanitarian actions, unwavering determination, professionalism and skilled seamanship after they assisted a vessel that ran out of fuel 30 miles west of Providenciales, Turks and Caicos Islands, in December.

The Jacksonville-based crew, which included Captain Andrew Smith; David W. Keefe, chief mate; Robert A. Malouin, chief engineer; Marcus Huntley, A/B; Raymond A. Petterson, A/B; and Richard C. Smith, ordinary seaman, arrived on scene shortly after the vessel became disabled. They responded to the stricken crew by giving them water, lifejackets, flashlights and a hand-held radio until the Coast Guard arrived on scene to provide additional assistance.

"All of us at Crowley are tremendously proud of this crew," said Crowley's John Hourihan, senior vice president and general manager, Puerto Rico liner services. "The Explorer's quick response to fellow mariners in need is a tribute to their character and training. We congratulate them and thank them for their service."

COURTESY CROWLEY

## Nabors appoints Wolf as board director

Nabors Industries Ltd. said April 4 that its board of directors has expanded the board to eight members from the current seven and appointed Howard Wolf to fill the newly created vacancy.

Wolf is a former senior partner with the law firm of Fulbright & Jaworski L.L.P. where he practiced from 1959 until his retirement from the firm in 2003. While practicing at Fulbright, he chaired the Committee on Securities and Investment Banking, as well as the Section on Corporation, Banking and Business Law of the State Bar of Texas. His practice involved a number of industries, including extensive work in the energy industry, and

was primarily focused on corporate and securities matters, including mergers and acquisitions, finance, international law and restructuring. He chaired the firm's Corporate department from 1977-84. He has also served on or chaired a number of public, private and charitable boards of directors — including Stewart & Stevenson and Offshore Logistics — and as a partner of various companies. He currently serves on the board of Simmons & Company International, a private investment banking and securities firm specializing in the energy industry. Wolf received a Bachelor of Business Administration and a JD, with honors, from the University of Texas at Austin.

## Vigor Industrial promotes Nichols, Fosheim

Vigor Industrial said April 5 that it has strengthened its sales and marketing team with the recent promotions of Bryan Nichols and Grant Fosheim, two maritime industry professionals.

Nichols joined Vigor Industrial in 2011 as a sales representative. He will now serve as manager of Vigor's Sales and Marketing division, which is focused on the new build and major refit markets. Nichols will supervise Vigor's sales staff and play a key role in developing the company's overall sales and marketing strategy.

"We are fortunate to have Bryan Nichols on our team," said Vince Piscitello, VP of Business Development at Vigor Industrial. "Bryan is a leading industry expert with extensive maritime experience in both the commercial and government sectors."

Fosheim joined Vigor's marketing department in 2011 as a marketing assistant, where he excelled in deploying key marketing initiatives. He will now serve as sales and marketing associate working closely with Nichols on sales and business development for new builds and major refits while continuing to develop and execute Vigor's strategic marketing plan.

"Grant has done an exceptional job in his marketing role," said Nichols. "We have known for some time that he would be a great addition to the sales team. He understands our customers' needs and knows how to get things done. I'm looking forward to his expanded role."

BRYAN NICHOLS

GRANT FOSHEIM

## Crowley recognized for excellence in logistics

Crowley Maritime Corp.'s liner and logistics group said April 3 that it was recently presented with its 11th consecutive Logistics Excellence Award for export quality — an honor given in recognition of Crowley's ongoing efforts to safely and efficiently transport Toyota vehicles to Puerto Rico from the U.S. East Coast.

Crowley's Peter Noyer, vice president, national accounts and John Kelley, director, national accounts, accepted the award on Crowley's behalf during Toyota's annual logistics partners meeting in Newport Beach, Calif. Event attendees included profes-

COURTESY CROWLEY

sionals representing marine, rail and motor carriers.

"We are extremely pleased to be recognized by TLS for this prestigious award," said Kelley. "Crowley employees have done an outstanding job in delivering Toyota vehicles in a manner that exceeds TLS' expectations for quality and safekeeping."

As Toyota's exclusive carrier, Crowley transported over 13,000 of the company's vehicles to Puerto Rico in 2012.

## Lynden signs agreement to buy Northland Services

Lynden, a family of freight transportation companies serving primarily Alaska and the Pacific Northwest, said April 9 that it has entered into a purchase agreement to buy Northland Services Inc., a tug and barge carrier providing service between Seattle, Alaska and Hawaii.

Northland will be an independent operating company within the Lynden family of companies. The current Northland management team would stay in place.

Lynden's Alaska Marine Lines also provides tug and barge transportation services between Seattle and Southeast and Central Alaska. "Northland has a great reputation, and adds Western Alaska and Hawaii to Lynden's service, enabling us to provide more service capabilities to our customers," said Lynden Chairman Jim Jansen. "We are excited about the ability to provide integrated statewide Alaska service, higher service frequency, and greater combined capabilities for our customers. Where there is service overlap, we will organize to provide a higher level of service. In certain communities where Alaska Marine Lines and Northland are the two primary freight carriers, other barge lines have plans to compete with us."

A lengthy, complex process remains before the purchase can be completed. The proposed transaction is subject to regulatory review and other terms that, if completed, would likely result in closing in late 2013.

## Arctic Wire Rope celebrates 30 years with open house

Arctic Wire Rope and Supply said April 22 that it is holding an open house on May 8 to celebrate 30 years of customer appreciation. "We like to extend a thanks to those who have done business with for so many years," said General Manager Mark

Lamoureux. Customer service has been a mainstay for Arctic Wire Rope and Supply, a full-service wire rope and nylon sling manufacturing plant. Also stocking crane and winch lines, rigging hardware, chain and anchors, cordage and can provide on-site rigging inspections.

During the open house there will be a few demonstrations, drawings, as well as representatives from The Crosby Group, the world renowned manufacturer of rigging products, providing its famous Louisiana shrimp boil, and Bridon American, a domestic wire rope manufacturer will also be present.

Arctic Wire Rope and Supply specializes in U.S. made products used in the oil and gas, construction, mining, fishing and marine industries.

Eric McCallum founded the company in 1983. The event, held at 6407 Arctic Spur Road in Anchorage, will be from 4-7 p.m. on May 8.

## Dillahay named ASRC Federal president and CEO

Arctic Slope Regional Corp. said April 24 that it has appointed Paul Dillahay as its Federal president and CEO. Dillahay previously served as ASRC Federal's chief operating officer and had principle responsibility for day-to-day operations of ASRC Federal subsidiaries and the company's Shared Services Center.

"Paul Dillahay brings tremendous leadership, experience and vision to ASRC Federal and has contributed to our success in the federal marketplace," said Rex A. Rock Sr., ASRC president and CEO. "During his tenure as chief operating officer, Paul led efforts to optimize service delivery and performance, and I am confident in his ability to lead the continuing development of ASRC Federal."

Prior to joining ASRC Federal in 2011, Dillahay was president and COO of USIS. He previously spent seven years in finance and operations at Lockheed Martin, where he implemented growth and leadership initiatives and led a broad business line providing support to the defense and intelligence community.

Dillahay succeeds Ken Asbury, who left ASRC Federal to pursue other interests.

## Reich announces new UIC Arctic Response Services

Richard Reich, general manager of UMIAQ, a subsidiary of UIC Professional Services, said April 22 it has formed a new company — UIC Arctic Response Services LLC — to pursue opportunities in oil spill prevention, training, preparedness and response services along the Arctic coastlines including, onshore, nearshore, and offshore areas of the North Slope Borough, Chukchi, and Beaufort seas of Alaska.

UMIAQ, the majority owner, and OCS Ventures LLC have teamed to create UIC Arctic Response Services LLC. Together, the two organizations have greater reach and access to the requisite expertise, experi-

RICHARD REICH

ence, and resources that will effectively position the new company for future work.

The intent and objective of UIC ARS is to ensure a fully integrated, proactive, and programmatic approach to work, which is customer focused, flexible, and designed to consistently deliver in a way that achieves the highest possible level of stakeholder confidence. Instilling stakeholder confidence is only achieved with a comprehensive oil spill prevention and response program that effectively meets the needs of those living within the region, federal and state regulators, as well as those of the exploration and production companies. UIC ARS has the ability to provide that level of stakeholder confidence.

Additionally, UIC ARS brings training and employment opportunities to UIC shareholders, their descendants and spouses, and other local residents throughout the region.

## Vigor completes barge for King County Marine division

US Fab, a Vigor Industrial company, said April 23 that in March it delivered its latest purpose built vessel to Washington's King County, a unique maintenance and moorage barge designed to serve the day-to-day needs of the county's passenger-only ferry fleet. The 140-foot by 40-foot by 7-foot 6-inch barge features moorage for up to four vessels and two steel structures, one that houses a well-equipped maintenance workshop and the other a two-story office and crew quarters.

"This was an interesting project that required teams to integrate two different building classification standards while maintaining optimal cost efficiencies," explained Bryan Nichols, sales and marketing manager for Vigor Industrial. The barge was designed by Glostest Assoc. to ABS and Coast Guard standards, while the structures were designed by CH2M Hill to non-marine, commercial construction standards.

US Fab's expert teams in Portland built the barge, pump house and all the below deck systems. Once the barge section was complete the vessel moved to Vigor's Tacoma facility where experienced project managers worked with trusted subcontractors to construct and integrate the barge's buildings.

The completed barge is moored at Pier 48 in Seattle where it will be used to support the King County Ferry District's passenger only vessels operating the West Seattle and Vashon Island Water Taxi ferry routes.

## Huff joins F. Robert Bell and Associates team

F. Robert Bell and Associates said April 24 that Zachary Huff, FE, has been hired as junior civil engineer.

Huff has more than 10 years of construction experience specifying in utility trades. He has successfully completed his Fundamentals of Engineering exam in April of 2010 and graduated from the University of Alaska Anchorage with a Bachelor of Science Civil Engineering, cum laude. Huff is a member of the Alaska Native Science and Engineering Program and a steward of the Communication Workers of America.

Bell is a wholly Alaskan-owned consulting firm providing complete design, engineering, surveying, and construction management services to federal, state, and local governments as well

as the private sector, industries, and individuals. With a staff of more than 100 engineers, surveyors, technicians, and support personnel, Bell has provided utility engineering, transportation and environmental engineering, land-use planning and development, oil field site facilities engineering, and land and construction surveying since 1974.

## BMAS hires Marie as director of safety

Bald Mountain Air Service said April 17 that Claire Marie has joined its team as director of safety. Marie advises management on all aviation safety and security issues. She also is implementing a new safety management system — SMS Pro™, a web-based SMS application that includes safety reporting, documentation, risk management and safety assurance. A life-long Alaskan, Marie's past work experience includes serving as chief of the Joint Operations Center at the Department of Defense, U.S. Air Force, Joint Base Elmendorf Richardson. She also has worked for the state's Division of Homeland Security and Emergency Management, as a transportation security specialist for TSA and as a DOD contractor. She has aviation experience in Alaska, California and Hawaii. Marie holds a master's degree in security studies and a bachelor's degree in management studies from the University of Maryland. BMAS is headquartered in Homer, with bases in Deadhorse and Anchorage and offers oil and mining industry support, government services and airplane medevac service for the Alaska Regional Hospital Life Flight program. For more information go to [www.baldmountainair.com](http://www.baldmountainair.com).

## Alaska Rubber announces addition of rigging department

Alaska Rubber said April 30 that it has completed the addition of its rigging shop and it is fully operational as of late October 2012.

In 2009 Alaska Rubber purchased and brought into its employee owned company Alaska Rubber and Rigging in Fairbanks. The two companies were significantly similar, however, Alaska Rubber and Rigging also ran a qualified rig shop, fabricating wire rope and chain slings to be used in lifting and rigging operations. Recognizing a need to support the rigging industry statewide, Alaska Rubber began making plans to expand its Anchorage facility in 2011 and by the end of 2012 had made significant investments in equipment, inventory and hiring three full-time employees to run its newly formed rigging shop. The new facility offers a test bed that can pull test up to 350,000 pounds and a press that can crimp wire rope up to an inch and a half.

All employees, including sales people involved in Alaska Rubber's rigging shop, have received training through Industrial Training International. Alaska Rubber is also a member of the As-

sociation of Wire Rope Fabricators. Employee owned Alaska Rubber specializes in arctic grade hydraulic and industrial hose, hydraulic components and lifting and rigging supplies and carries a full line of domestic products from companies such as Wireco, Campbell and Columbus McKinnon. For more information visit [www.alaskarubber.com](http://www.alaskarubber.com).

## ASRC responds to BLM strategic cleanup plan

ASRC said May 9 that it is pleased that the longstanding need for the cleanup of the U.S. Navy exploration program on the North Slope continues to be addressed by the Bureau of Land Management.

The 2013 Strategic Plan carries a significant work commitment by the BLM. All North Slope residents will be grateful when the most hazardous and pressing remnants of more than 40 years of Navy-sponsored explorations are remediated to make the lands safe and clean.

ASRC firmly believes that the cost of the cleanup of the Navy exploration program should come from the federal government itself, as it is with all formerly used defense sites, for example, and not from any federal funds that would have otherwise been allocated directly to North Slope communities.

Arctic Slope Regional Corp. is owned by and represents the business interests of the Arctic Slope Inupiat. Corporate headquarters are based in Barrow, Alaska, with administrative and subsidiary offices in Anchorage and throughout the United States. ASRC, along with its family of companies, is the largest Alaskan-owned company, employing approximately 10,000 people worldwide. The company has five major business segments: petroleum refining and marketing, energy support services, construction, government services and resource development.

## Crowley enters liquefied natural gas market

Crowley Maritime Corp.'s petroleum services group said May 8 that it is entering the liquefied natural gas market by acquiring Carib Energy LLC. Florida-based Carib Energy, founded in 2011, was the first company to receive a small scale, 25-year, LNG export license from the U.S. Department of Energy for LNG transportation from the U.S. into Free Trade Agreement countries.

While Crowley's overall strategic focus on the LNG market will span several of its diversified business lines and leverage its storied history and success in the marine, project management, energy and transportation fields, Carib Energy provides an induction into the emerging energy market from which the company can grow its concentration on LNG transportation.

A Crowley LNG services group has been formed within Crowley's petroleum services business unit. It is being headed up by Vice President of Business Development Matt Jackson, who reports to Rob Grune, senior vice president and general manager, petroleum services. This team will marshal Crowley's extensive resources to serve the LNG market through LNG vessel design and construction; transportation; product sales and distribution, and full-scale, project management solutions.

The acquisition of Carib Energy, which becomes a wholly owned subsidiary of Crowley Petroleum Services, now provides

COURTESY ALASKA RUBBER

Crowley an immediate book of business for the supply, transportation, and distribution of LNG via 10,000 gallon ISO tanks.

## Experienced oil and gas lawyer joins Stoel Rives

Stoel Rives LLP, a leading U.S. business law firm, said May 6 that it is pleased to announce that Tina Grovier has joined its Anchorage office as a partner in the firm's Environment, Land Use and Natural Resources group. Grovier is recognized as a leading oil, gas and mining lawyer. During her 15-year career she has helped secure federal and state permits for the first non-conditional state right of way for a North Slope natural gas pipeline, Alaska's first heap leach facility, Alaska's first third-party natural gas storage facility and Anchorage's first commercial-grade wind farm. Grovier regularly represents pipeline and telecommunication carriers and other public utilities before the Regulatory Commission of Alaska and state courts. In addition, she has broad appellate, litigation, arbitration and commercial transaction experience.

TINA GROVIER

"I am pleased to welcome Tina to the Anchorage office," said Anchorage managing partner Jim Torgerson. "Her strengths will benefit our oil, gas and mining clients here in Alaska and beyond."

An active member of the Anchorage community, Grovier has been involved with the United Way as co-chair of the Tocqueville Society and with the YWCA, and has also volunteered her time with AWAIC Summer Solstice and served as a legal advisor for the Anchorage Youth Court.

## Golder Assoc. Anchorage office welcomes Twitchell

Golder Assoc. said May 14 that it would like to welcome Olin Twitchell, a junior level fisheries biologist, to its Anchorage office. Prior to joining Golder, Twitchell worked as a biological science technician for the Yukon Delta National Wildlife Refuge of the U.S. Fish and Wildlife Service, the Salmonid Rivers Observatory Network and the Alaska Department of Fish and Game. He has three years of fisheries field work experience. While working on remote Western Alaska rivers, Twitchell's focus was on quantifying salmonid population structure, biodiversity and productivity as it related to shifting biophysical processes. Twitchell is a graduate of the University of Alaska Fairbanks with a Bachelor's of Science in fisheries and a minor in Arctic skills.

## UMIAQ announces Wolski as new engineering manager

UMIAQ LLC said May 13 that Michael Wolski, P.E., has been named engineering manager for its Engineering Department. Wolski is a University of Alaska graduate with more than 20 years of experience designing, managing and coordinating civil engineering projects throughout the state of Alaska. He is a reg-

istered professional engineer, registered as both a civil engineer and environmental engineer. His engineering experience includes site development and water and sewer systems for federal, state, municipal and private projects, including the design of storm drain systems, roadways, water treatment and distribution systems, sewer collection and treatment systems, and water wells. Wolski has managed projects from the feasibility study stage through funding acquisition, design, construction, and operation and maintenance.

MICHAEL WOLSKI

Wiley Wilhelm, P.E., will continue to serve as UMIAQ's design division manager.

UMIAQ is a full-service consulting and design firm specializing in architecture, engineering, surveying, regulatory planning, stakeholder relations, geospatial analysis, environmental consulting services, logistics and full-service camps, and response planning and operations. UMIAQ's team understands the politics, culture, land use issues, regulations, and design conditions as they pertain to industrial and community development in arctic and subarctic Alaska. UMIAQ is a member of the Ukpia vik Iñupiat Corp. family of companies.

COURTESY CROWLEY

## Crowley's CPD 'Alaska Safe Truck Fleet of the Year'

Crowley said April 30 that its Alaska petroleum distribution subsidiary, CPD Alaska LLC, was recently honored with the "Alaska Safe Truck Fleet of the Year" and the "Most Improved Fleet" awards during customer ConocoPhillips' and the Alaska Trucking Association annual Safety Awards Banquet, held in Anchorage in late April. Crowley's Bob Cox, vice president, and Mike Moeller, director of trucking, attended the banquet and accepted the awards on behalf of the company.

To be considered for the "Safe Truck Fleet of the Year" award, the Crowley team was evaluated and ranked on several 2012 statistics, including the total number of miles driven, as well as the company's Federal Motor Carrier Safety Administration CSA fleet scores, accident frequency and overall Occupational Safety and Health Administration rate. Last year, the 125 vehicles in the Crowley fleet drove more than 1.8 million accident free miles, delivering in excess of 100 million gallons of petroleum products to 280 communities across the state of Alaska.

The Safety Awards Banquet, dually hosted each year by the ATA and ConocoPhillips, is a premier event developed to recognize carriers with the best safety performance. The competition

becomes more challenging with each passing years, as companies continually improve their focus on safety through regular meetings, driver workshops, trainings and a variety of other employee development programs.

## Baker Hughes names Sumruld new corporate treasurer

Baker Hughes Inc. said May 28 that Mike Sumruld has been named vice president and treasurer.

"Mike brings more than 20 years of diversified financial expertise, international experience and a record of solid performance within Baker Hughes to his new role as treasurer," said Peter Ragauss, Baker Hughes senior vice president and chief financial officer. "We believe this depth of experience will enable him to interact very effectively with our external stakeholders."

Sumruld started his career at Baker Hughes in 1998 and worked most recently as vice president, financial planning and analysis, Eastern Hemisphere based in Dubai. Prior to this role, Sumruld served as director of investor relations and he also previously served as vice president, FP&A, Western Hemisphere.

Sumruld has held a range of geographic financial roles covering the United States, Latin America and the Eastern Hemisphere as well as global financial roles covering several product lines, including drill bits, drilling services, chemicals, and drilling and completion fluids. He earned his MBA at Texas A&M, and his undergraduate business degree at the University of Houston.

Baker Hughes is a leading supplier of oilfield services, products, technology and systems to the worldwide oil and natural gas industry. The company's 58,000-plus employees today work in more than 80 countries helping customers find, evaluate, drill, produce, transport and process hydrocarbon resources. For more information on Baker Hughes' century-long history, visit [www.bakerhughes.com](http://www.bakerhughes.com).

## Blanchett and Tweto to emcee Calista Golf Classic

Calista Heritage Foundation said May 23 that Ariel Tweto and Stephen Qucung Blanchett will emcee the 14th Annual Calista Heritage Foundation Golf Tournament on June 19 at the Moose Run Hill Golf Course in Arctic Valley. These two lively entertainers will bring the golf classic's Mardi Gras theme to life. With active participation from businesses and organizations this tournament is the main source of contributions for CHF's scholarship program.

Stephen Qacung Blanchett grew up in the Yup'ik community of Bethel, Alaska. He is one of the founders of the award-winning musical group Pamyua. Stephen and the group have performed on stage in many countries and venues throughout the world, most recently in Iceland. The group shares the unique cultural expressions of the Inuit people.

Ariel Tweto is on the popular television series "Flying Wild Alaska" which aired on Discovery Channel. "I am so excited and honored to co-host the 14th Annual Calista Heritage Foundation

ARIEL TWETO

Golf Tournament. I am a big believer in setting goals and chasing after your dreams, and the CHF helps students pursue their dreams through higher education and career training which is so awesome! Also, I need a good excuse to wear a polo shirt and a visor while hanging out in beautiful Anchorage, Alaska! This is going to be such a great event," said Tweto.

Team registration and sponsorships are still available at [www.eventbrite.com/event/5274750922#](http://www.eventbrite.com/event/5274750922#).

STEPHEN BLANCHETT

## ASRC employee, Ty Hardt, summits Mt. Everest

Arctic Slope Regional Corp. said May 22 that shortly after sunrise on May 20 in Nepal, its director of communications, Ty Hardt, successfully summit Mount Everest.

In late March Hardt began his expedition, determined to climb the tallest mountain on Earth at an elevation of 29,035 feet. Identifying a need for the children of the North Slope, Ty Hardt is using the climb to raise money for the Boys & Girls Club of Barrow.

"This has been long awaited and anxiously anticipated. We are so thankful for this part of the journey, and are awaiting his safe return to Anchorage," said Tara Sweeney, SVP of External Affairs at ASRC. "A member of the ASRC family has literally reached the top of the world!" Hardt has scaled some of the tallest peaks across the globe — including Mount Aconcagua, three climbs of Denali's West Buttress, Kilimanjaro, two trips on Mount Bona, and three climbs of Mount Rainier, not to mention various ice routes around Alaska.

The expedition and fundraising effort is called Going to Extremes. You can find more information about their journey at: [www.g2extremes.com](http://www.g2extremes.com).

## ASRC mourns the passing of Athabascan Elder Katie John

Arctic Slope Regional Corp. said May 31 that it is remembering Katie John as a tireless advocate for Alaska Native subsistence fishing rights. Known for her perseverance in a case to access traditional subsistence fishing grounds inside the Wrangell-St. Elias National Park, the loss of Katie John is a loss for the entire Alaska Native community.

Rex A. Rock Sr., president & CEO of ASRC said, "The Arctic Slope region mourns the loss of Katie John, matriarch of the subsistence fight. We send our heartfelt condolences to the people of the Ahtna region."

Arctic Slope Regional Corp. is owned by and represents the business interests of the Arctic Slope Inupiat.

Since opening enrollment in 1989 to Alaska Natives born after 1971, the corporation's shareholder base has nearly tripled, growing from the 3,700 original enrollees to around 11,000 today. Corporate headquarters are based in Barrow, Alaska, with administrative and subsidiary offices in Anchorage and throughout the United States. ASRC, along with its family of companies, is the largest Alaskan-owned company, employing approximately

10,000 people worldwide. The company has five major business segments: petroleum refining and marketing, energy support services, construction, government services and resource development.

## UMIAQ announces Strand new civil engineer

UMIAQ LLC said May 29 that Laura W. Strand, P.E., has joined its Engineering Department as an associate civil engineer. Strand is a University of Alaska Anchorage graduate and a registered professional engineer in civil engineering. Her experience includes 17 years engineering oversight, environmental permitting coordination with public and regulatory agencies, leasing coordination, systems design, civil design, report preparation, specification writing, project scheduling, cost estimating and cost scheduling management.

Strand's recent project experience includes the following projects: Nuiqsut Gas Pipeline and Gas Home Conversions, the Laura Madison Road Extension and Uivagsaaq Road, the Point Hope Evacuation Road Extension and Repair in Point Hope, Alaska, and the new Kaktovik Airport in Kaktovik, Alaska. Her past experience also includes aviation design on Alaska Department of Transportation projects at Ted Stevens Anchorage International Airport, Fairbanks International Airport and rural design projects such as St. Paul and St. George.

LAURA W. STRAND

## Krawiec Joins Global Diving & Salvage Inc.

Global Diving & Salvage Inc. said May 31 that it has hired Tracy Krawiec, who will be joining its Health, Safety, & Environment Group as the dive safety specialist, based out of Global's corporate headquarters in Seattle, Wash. Krawiec will be essential in ensuring that Global's safety program stays abreast of regulatory and industry changes that may affect the company's dive safety programs and training.

Krawiec has cultivated an extensive background within the maritime industry, with more than 16 years of diving experience in a variety of operational and safety related roles. He comes to Global Diving & Salvage Inc. having spent several years as a diver, dive supervisor, project manager, and in various management positions.

"We are very pleased that Tracy is now part of the Global team," said Stephanie Guerzon, HSE program manager. "Tracy's experience in progressive supervisory roles, coupled with his knowledge of dive safety and technical writing abilities, provides Global the added boost we were looking for in our safety and training programs. The addition of his position reaffirms our commitment to placing the safety of our employees in the highest regards."

TRACY KRAWIEC

## M-I SWACO introduces new dual-deck shale shaker

M-I SWACO, a Schlumberger company, said June 6 that it has introduced the MD-2 dual-deck shale shaker. When combined with DURAFLO composite screens, the MD-2 shaker provides optimal solids control performance for drilling applications.

The development of the MD-2 shale shaker was the result of customers' requests for a durable mid-range shaker suitable for both onshore and offshore applications. M-I SWACO developed the dual-deck shale shaker using the proven design of the offshore-suited MD-3 triple-deck shaker, and also utilized design elements from the onshore-suited MONGOOSE PRO shale shaker. Design validation for the MD-2 shaker was conducted at the SWECO manufacturing facility in Florence, Ky.

In a field trial in South Texas a customer was drilling a 22-inch hole using two conventional shakers, but due to capacity limitations there was a low rate of penetration. To optimize the solids control performance, one MD-2 shaker was provided, which processed drilling fluid at a rate of 658 gallons per minute, or more than twice the two conventional shakers combined. Additionally, the MD-2 shaker handled 100 percent of the flow throughout the top hole section, thereby maximizing flow rate and maintaining the desired ROP.

The small footprint of the MD-2 dual-deck shale shaker makes it ideal for space-restricted onshore and offshore drilling rigs where high-capacity separation efficiency and operational flexibility are needed. For more information visit [www.slb.com/md-2](http://www.slb.com/md-2).

## SANY America names Totem its Alaska excavator dealer

Totem Equipment & Supply said June 4 that it has been named the first SANY America excavator dealer in Alaska, representing SANY in the Anchorage market.

"There is a lot of opportunity in Alaska and we're excited to partner with a company that has found the key to success for over 50 years," said Eric Teague, vice president of earthmoving at SANY America. "Totem is another family-owned success story with a dedicated heritage of trust, dependability and customer service. We look forward to a great partnership."

"We heard a lot of good things about SANY and when I visited their operations in Georgia I knew it was a good fit for us," said Totem owner Mike Huston. "They listen as a company and their product is solid. We like that they use name-brand components and that the product will lend itself well to the cold, rough conditions we often face here in Alaska. We're glad to get in on the ground-floor as one of the initial dealers for SANY."

Totem Equipment & Supply was founded in 1961 by Cliff Huston and his wife and business partner Allie Huston. Today under the ownership of Mike Huston, the family business continues to thrive as Alaska's leading equipment distributor and full-service rental company.

SANY is a global leader in the manufacture and sale of hoisting, concrete machines, road machinery, port equipment, excavators, mining equipment, pile-driving machinery and wind turbines.

## Skinner promoted to VP of Freight Services

Sourdough Express said June 6 that Brian E. Skinner has been promoted to vice president of Freight Services.

Skinner joined Sourdough Express 10 years ago as the manager of business development. He was quickly promoted to general manager as his leadership increased a loyal customer base and successfully diversified the services Sourdough Express provides.

As VP of Freight Services, Skinner will lead Sourdough Express to new growth, while keeping the unparalleled customer service reputation Sourdough Express has sustained for over 100 years.

Sourdough Express is a full service trucking company servicing Alaskans since 1898.

BRIAN E. SKINNER

## Tapping new talent, MSI Communications is growing

MSI Communications said June 11 that it has added two highly experienced professionals to its staff.

One of Alaska's most senior account managers, Amy Guse brings a wealth of expertise and energy to MSI Communications. She is known for her skills in overseeing the development of advertising, collateral materials, videos, event planning and budgets for clients in the health care, oil and gas and resource industries.

Born in Anchorage and schooled in Kentucky, Guse most recently managed the national public relations account for the Alaska Seafood Marketing Institute. Her other major accounts included Providence Health and Services Alaska, the Alaska Marine Highway System, AT&T, the Alaska Permanent Fund Corp. and Era Alaska.

Web Director Bryan Meshke is one of the most experienced and talented website designers in the state. He has spent nearly a decade at local advertising agencies, where he designed and developed sites for NANA, Bristol Bay Native Corp., Matanuska Telephone Association and the Anchorage Economic Development Corp., among others.

Before coming to MSI Communications, Meshke ran his own company, providing Web design and development to Alaska businesses and other designers. Raised in Seattle, Meshke has lived in Alaska for 15 years. Holding two bachelor's degrees, one in business administration and another in fine arts, he presents a great combination of business savvy, artistic creativity, and extensive knowledge of technology.

AMY GUSE

BRYAN MESHKE

## Hilcorp cooks host luaus with help from Five Star

Hilcorp said June 14 that from June 3-14 Five Star Oilfield Services put on 18 luaus for Hilcorp's Trading Bay camp, Dolly Varden Platform, Grayling Platform, Steelhead Platform, King Salmon Platform, Monopod Platform, Granite Point Platform, Anna Platform and the Bruce Platform. The head cooks on each platform hosted the luau two times, allowing each crew to enjoy it.

The spread at each luau included a large variety of decorations, from grass skirts to leis and

parrots, and a vast and impressive menu of Kailua pork skewered shrimp, teriyaki chicken and beef, macadamia nut crusted halibut and lomi lomi salmon for the main dishes. Side dishes included chicken long rice, baked sweet potatoes, roasted yams, tuna poke, and pineapple and mango fruit skewers. For the sweet desserts crews had haupia, tropical island cake, and banana and mango cake. The luau provided crews a chance to escape, if for only 30 minutes and get as close as they could to Hawaii!

Five Star Oilfield Services enjoyed hosting the luaus and would like to thank all of the hard working employees who went above and beyond to pull it off.

COURTESY FIVE STAR

## Crowley's magazine wins 2013 TMSA Award of Excellence

Crowley Maritime Corp. said June 12 that its biannual Connections Magazine has been recognized by the Transportation Marketing and Sales Association, TMSA, with a 2013 Compass Award of Excellence in the Marketing and Sales Collateral category. The award was given after a team of TMSA industry expert judges evaluated the company's winter 2012 issue in several key areas, including design, content, creativity and the publication's ability to fulfill stated goals.

The TMSA Compass Awards are considered the highest level of professional achievement and recognition in marketing, communications and sales in the transportation, logistics and passenger transit marketplace.

Accepting the award on behalf of Crowley was the company's Amelia Smith, manager, corporate and marketing communications. The honor was given during TMSA's 61st Annual Compass Awards Gala, held at the Sawgrass Marriott Resort in

COURTESY CROWLEY

Ponte Vedra Beach, Fla., earlier in June.

"Connections Magazine is not only a fantastic representation of our company's innovative people, safety culture and dedication to customers, but it's also a testament to the abilities of our corporate and marketing communications team," Smith said. "I'm proud of our highly talented group and am pleased to accept the award from TMSA on behalf of my colleagues and the company."

Also sharing the success is the company's corporate and marketing communications team, which works together to manage, develop, write and design the magazine in-house. In addition to Smith, this team includes Director of Corporate and Marketing Communications Mark Miller; Creative Manager Bryant Hardwick; specialist Joelle Parra, and contributing writer Jenifer Kimble.

## URS announces Seagars as senior marine biologist

URS said June 20 that Dana Seagars recently joined URS as a senior marine mammal biologist with more than 38 years of experience in marine mammal studies and National Environmental Policy Act compliance. He was previously employed by the National Oceanic and Atmospheric Administration and U.S. Fish and Wildlife Service. Seagars received his B.S. and M.S. degrees in biology from San Diego State University and has been involved with marine mammal research and management in Alaska, California and Russia. A 25-year Alaska resident, he has participated in a wide range of marine mammal research and management projects including population assessment, contaminant studies, Section 7 consultations, incidental take regulations, Marine Mammal Protection Act permit reviews, as well as various Endangered Species Act issues. Seagars' experience includes projects involving Steller sea lions, ice seals, walrus, and Cook Inlet beluga whales.

DANA SEAGARS

## Crowley launches new LCL service from Chicago

To better serve customers making smaller shipments to Puerto Rico, the Caribbean and Central America from the U.S. Midwest, Crowley Maritime Corp.'s logistics group launched a new weekly less-than-container load or LCL service from Chicago on June 17. The new service utilizes Crowley vessels and a single point of contact within the company to ensure accountability and that the movement of customers' cargoes is managed and monitored effectively and reliably.

"The addition of this service is yet another extension of Crowley's commitment to providing total cargo and supply chain solutions to our customers," said Frank Larkin, Crowley senior vice president and general manager, logistics. "With LCL shipments now being handled from Chicago, Crowley can offer efficient, fast and reliable logistics services throughout the Midwest. This new service should be particularly attractive to our

FRANK LARKIN

existing customers, NVOs; freight forwarders; and individuals who have a need to ship less than a full container load of freight at competitive rates. Customers may also leverage our experience in moving freight internationally with Crowley handling the complexities of customs clearance, import/export documentation, transportation services, customer deliveries and more."

Crowley customers can also take advantage of additional logistics services, including warehousing and distribution, cross docking, air-freight consolidations and cargo insurance.

For more information visit [www.crowley.com/cargo](http://www.crowley.com/cargo).

## Global's services utilized in recovery project

Global Diving & Salvage said June 19 that under contract to Atkinson Construction, it recently worked around the clock for 13 days under direction of the Washington Department of Transportation and the National Transportation Safety Board to provide diving and salvage services throughout the investigation and debris recovery phase of a project on Interstate 5.

On May 23, while traveling in the southbound lane of Interstate 5, a truck hauling a heavy and oversized load struck the support structure of a bridge crossing the Skagit River in Mount Vernon, Wash. The damage inflicted by the truck caused the 160-foot long four lane span to collapse into the river below, completely severing the interstate. While the truck cleared the bridge before it collapsed, two passenger vehicles caught up in the failure of the bridge were destroyed with the passengers emerging shocked and scared, but alive. Interstate 5 is the major West Coast transportation route between the United States and Canada, serving more than 70,000 vehicles per day.

Dive operations in the river were complicated by spring runoff conditions resulting in high river currents. The operations included a detailed underwater survey of the downstream edge of the wreckage to ensure that it was safe to bring demolition equipment alongside, cutting and rigging the bridge wreckage and an underwater inspection to survey for damage to the bridge piers.

Global Diving & Salvage Inc. is based in Seattle, Wash., with additional offices in the San Francisco Bay Area; Houston, Texas; and Anchorage, Alaska.

COURTESY GLOBAL DIVING

## Fortun joins AECOM's air quality team

Todd Fortun has joined the Anchorage office of AECOM, as an air quality scientist, supporting AECOM's Alaska air quality permitting and compliance team. Fortun has an MS in Environmental Chemistry from the University of Alaska, Fairbanks, and a BS in Meteorology from St. Cloud State Univer-

TODD FORTUN

sity. Prior to joining AECOM, he was a project chemist supporting Alaska remediation projects for Jacobs Engineering. Fortun will also support AECOM's Alaska remediation program and associated project chemistry requirements.

AECOM is a global provider of professional technical and management support services to a broad range of markets, including transportation, facilities, environmental, energy, water and government.

## Guess & Rudd's McLaughlin honored by Martindale-Hubbell

Michael McLaughlin at Guess & Rudd PC was recently honored by Martindale-Hubbell with an AV Preeminent® rating which is "a significant rating accomplishment — a testament to the fact that a lawyer's peers rank him or her at the highest level of professional excellence." Legal ability ratings are based on performance in five key areas: legal knowledge, analytical capabilities, judgment, communication ability and legal experience and are an objective indicator of a lawyer's high ethical standards and professional ability, generated from evaluations of lawyers by other members of the bar and the judiciary in the United States and Canada. McLaughlin is a shareholder of the firm. After obtaining his BA degree at Stanford University and his JD and MBA degrees at Willamette University, he moved to Alaska in 1985 and began work with the firm. His practice areas are focused on regulated oil and gas pipelines, banking, regulated public utilities, real estate, ANCSA law and other commercial practice areas. He represents some of the largest oil and gas pipeline and commercial interests in Alaska.

MICHAEL MCLAUGHLIN

## Crowley's Alert Tugboat recognized for emergency tow

Crowley said June 18 that the captain and crew of its prevention and response tug Alert were personally recognized by Rep. Eric Feige from the Alaska State Legislature for courage, teamwork and professionalism during the emergency rescue tow of the drill barge Kulluk off the southern point of Kodiak Island.

During their meeting, he presented them with a letter of commendation from the members of the 28th Alaska State Legislature, which stated the following: "The crew safely and methodically adapted to changing conditions, used their training to identify and manage hazards, and then performed each task to minimize the risks associated with those hazards. ... We express

COURTESY CROWLEY

our admiration and respect to each man individually, and to the crew for its superb teamwork, conducting themselves at all times as professional mariners in an extreme and challenging incident."

Following the formal recognition of the crew by Rep. Feige, he along with Mayor Dave Cobb from the City of Valdez, spent two hours touring the Alert and individually congratulating each member of the crew including: Captain Rod Layton, Brad Burger, Brett Spellman, James Mueller, Craig Matthews, Leroy Edenshaw and Walt Nickerson.

"This was a fine tribute to what we value — our people, operational excellence and innovation," said Charlie Nalen, Crowley's vice president of Valdez Operations.

## Solstice Advertising wins prestigious national award

Solstice Advertising said June 24 that it has won a Silver Anvil for a campaign promoting energy efficiency in Alaska. The Silver Anvil recognizes the top public relations campaigns from around the country and is the most prestigious award given in the industry. Solstice received top honors in the public service-government category for its energy awareness month campaign for the Alaska Energy Authority and Alaska Energy Efficiency Partnership.

Energy efficiency is a delicate message in Alaska, a state where energy costs can be staggering but resource development is a major economic driver. Solstice's October 2012 campaign — "Save Energy. Save Money. You have the power" — dispelled common energy myths, educated Alaskans about energy efficiency behaviors and encouraged people to become more efficient. One in three Alaskans had the potential to be exposed to the campaign and during October, enrollment in the state's flagship Home Energy Rebate Program increased by approximately 46 percent.

Presented by the Public Relations Society of America, Silver Anvil winners reflect professional skill, creativity and resourcefulness. This year, a record-breaking 847 applicants entered and 144 were selected as finalists. Winners were announced June 13, at an awards ceremony in New York City. Only a handful of Alaska agencies have ever been named finalists.

## TOTE Logistics and Carlile announce new key positions

TOTE Logistics Inc., parent company of Carlile Transportation Systems, on July 1 announced two new company leadership positions.

John Armstrong has accepted the vice president, logistics position for Carlile. Armstrong joins Carlile from sister company Alta Logistics, where he was the director of logistics. He has extensive leadership, operations and logistical supply chain management experience and is looking forward to growing Carlile's business on all levels. Armstrong is familiar with both the Alaska and Pacific Northwest markets, having worked in Alaska for many years. He will be based in Tacoma, Wash.

JOHN ARMSTRONG

Gene Carlson has accepted the vice president, trucking operations position with Carlile. Carlson previously held the position of vice president of special projects for Carlile. In his new position he will be overseeing the heavy haul, equipment repair and maintenance, line haul and bulk departments. Carlson has far-reaching experience in the industry and is looking forward to the new opportunities this position brings to implement successful transportation strategies, strengthening the company's supply chain and improving service and will be based in Anchorage, Alaska.

GENE CARLSON

## GCI announces launch of new business website

General Communication Inc. announced the launch of a new business website July 15, [www.gci.com/business](http://www.gci.com/business), now offering customers more solutions, more support, and more expertise.

"The new website was designed to be engaging, dynamic and user-friendly while featuring smart technology solutions for Alaskan businesses," said Rochelle Marshall, director of commercial marketing & sales operations. "We're excited to provide our customers with access to relevant content for a wide range of sectors including small business to enterprise."

The site includes extensive product information to help customers understand GCI's complete range of business solutions. Key features offer users the ability to: read customer case studies from businesses like Jack White Real Estate, CIRI Alaska Tourism and Associated General Contractors, to name just a few; watch videos; take a tour of GCI's state-of-the-art Data Center; learn about industry specific technology from government and resource development to healthcare and tourism; find solutions based on business size and budget from small business to Fortune 100 companies.

Created with user experience firmly in mind, the website is optimized for compatibility with today's browsers and mobile devices.

## 14th annual Calista Golf Classic another big success

Calista Heritage Foundation, a 501(c)(3) nonprofit, announced July 10 that \$252,000 in contributions was received at the 14th Annual Calista Golf Classic. Held June 19 at Moose Run Golf Course, the event to raise scholarship funds was hosted by Ariel Tweto and Stephen Qacung Blanchett.

"Since 2003 the scholarships awarded each year has in-

COURTESY CALISTA CORP.

creased," said CHF President/CEO Rea Bavilla. "This remarkable achievement is only possible due to the generous participation of businesses and organizations. We are extremely grateful as hundreds of students have earned and continue to earn pilot certification, bachelor's, master's and doctorate degrees, vocational training and more."

In 2012, CHF awarded \$460,000 in scholarships and, most recently, \$177,000 in scholarships for the spring 2013 semester. Since the scholarship program was formally created in 1994, more than \$3.2 million in scholarships have been awarded with \$1.2 million of that total awarded since 2010.

More than 1,500 students have benefited from this program. In 2012 the top five schools scholarship recipients attended were University of Alaska Anchorage, UA Fairbanks, Alaska Career College, UA Fairbanks-Kuskokwim Campus and Bethel's Yuut Yaqungviat flight school.

## Vigor Industrial, community college, open training center

Vigor Industrial said that it has partnered with South Seattle Community College launching an industrial training center at the shipyard on Harbor Island. The Harbor Island Training Center, which opened with a ribbon cutting ceremony June 7, will provide students with the industrial skills they need to get family-wage jobs at the region's industrial manufacturers. Classes began July 1.

"There's a disconnect between industry and a lot of talented, hard-working people in this country," explained Sue Haley, Vigor's senior vice president of human resources.

"People want to work and industry needs a highly skilled workforce. However, Vigor and other manufacturers can't find enough workers with the right skills to fill good-paying jobs. This training center will bridge that disconnect by providing motivated local people with critical industrial skills."

Partnering with South Seattle was a natural fit, she said, with Vigor providing the location, equipment and a real-world industrial workplace, and South Seattle Community College's welding and manufacturing programs bringing their long expertise in skills training and instruction. The center is already garnering wider community support, including a partnership with the United Association of Plumbers and Pipefitters and Local 32, which donated welding machines and will provide additional training options.

The center is located on-site at the shipyard, and includes a computer lab, classroom space and an industrial training floor with weld-booths and industrial machining equipment. The shipyard location will also allow students to experience how the facility works and learn from veteran workers. For more information visit [www.southseattle.edu/harbor-island-training-center](http://www.southseattle.edu/harbor-island-training-center).

## Lynden Air Cargo names Zerkel president

Lynden Air Cargo, a cargo airline providing domestic and international scheduled and charter service, has promoted Richard Zerkel to president. Zerkel succeeds retiring President Judy McKenzie.

Zerkel began his career with Lynden Air Cargo in 1999 as a first officer on the company's Hercules aircraft. He was promoted to captain and then director of operations in 2008. He most recently was vice president of operations.

"Rick has an outstanding leadership record delivering safe and high-quality services for Lynden customers," says Lynden Inc. President & CEO Jon Burdick. "His 15 years of experience in various positions with the company ensures Lynden Air Cargo customers and employees are in good hands."

Before joining Lynden Air Cargo, Zerkel held management positions at various airlines in Alaska. He is a member of the executive council of the National Air Carriers Association and a volunteer with the Boy Scouts of Anchorage.

Lynden Air Cargo is part of the Lynden family of companies offering truckload and less-than-truckload freight to Alaska, charter barges, rail barges, intermodal bulk chemical hauls, scheduled and chartered air freighters, domestic and international shipping via air and ocean forwarding, customs brokerage, trade show shipping, remote site construction, sanitary bulk commodities hauling and multi-modal logistics. Lynden companies are repeat winners in the annual Quest for Quality customer service awards presented by Logistics Management magazine.

RICHARD ZERKEL

## TOTE Logistics and Carlile announce key new positions

Linda Leary has accepted the vice president, commercial development position with TOTE Logistics Inc., Carlile's parent company. Leary's new role will be overseeing the sales and marketing department of Carlile, TOTE Logistics and Spectrum. She will continue to build revenue with current customers and seek new opportunities to continue the positive growth on a much broader logistical scale; maintaining several key accounts and remaining heavily involved in community relations. Leary will continue to be based in Anchorage.

In addition, Geoffrey Hawtrey has accepted the vice president, support services position with TOTE Logistics, Carlile's parent company. Hawtrey will be working with the Carlile, TOTE Logistics and Spectrum IT departments to develop and implement strategies, policies and initiatives needed to support the corporate vision and achieve the organizational goals. He has successfully implemented TMW, PeopleSoft and Lawson and possesses strong leadership and process implementation skills. He will be based in Federal Way, Wash.

LINDA LEARY

GEOFFREY HAWTREY

Lastly, Jeff Palmer has accepted the controller position with TOTE Logistics, Carlile's parent company. Palmer will be overseeing the accounting and finance department, working with Judy Eckart, Carlile's controller, to streamline processes, develop budgets, reduce expenses and keep revenue growing. He will be located in Anchorage for the next six months and then working out of Federal Way.

## Lynden International launches newly designed website

Lynden International, a full-service freight forwarding and logistics company, has launched a newly designed website at [www.lynden.com/lint](http://www.lynden.com/lint). The expanded and enhanced site was created by Lynden's marketing team to update and improve content and make navigation easier for new and current customers.

"We spent more than a year researching and fine-tuning the changes," said Marketing and Sales Support Director Dorene Kolb. "Our goal was to make it easier for customers to find us online and then to find what they need on our site within two clicks of the mouse."

The new site offers user-friendly "solutions" pages with a case study and brochure for each to help customers learn more about Lynden services such as Global Coverage, Tradeshow, Oil & Gas and Pharmaceutical. The pages help customers research transportation and logistics projects and access the shipping tools they need. Each page also features an icon to "get a quote or learn more" and allows customers to log onto EZCommerce to track shipments or use Lynden's LIVE CHAT feature to talk to a Lynden representative.

Lynden International is one of the Lynden family of companies, whose combined capabilities include: worldwide air and ocean forwarding, third-party logistics, trade show shipping, shipping to Alaska, truckload and less-than-truckload transportation, scheduled and charter barges, intermodal bulk chemical hauls, scheduled and chartered Hercules L-382 cargo aircraft and multi-modal logistics.

COURTESY CROWLEY

## Crowley honored with Healthiest Companies Award

Crowley Maritime Corp. has been honored once again as one of the healthiest companies in the region by the First Coast Worksite Wellness Council. The company was selected for the

2013 Healthiest Companies Award in the gold category for its demonstrated commitment to employee health and wellbeing through the implementation of comprehensive worksite health-promotion strategies. The FCWWC is an organization that has a mission of improving the health of the First Coast community by sharing resources and providing guidance to its member companies.

The gold award was presented to Katy Keene, manager, Crowley's employee programs, by Jacksonville's Mayor Alvin Brown during the fifth-annual FCWWC First Coast Worksite Wellness Conference and Healthiest Companies Awards Luncheon. This is the fourth consecutive year that Crowley has been honored by the FCWWC with Healthiest Companies Awards but its first gold as the last three years' awards were in the silver category.

Crowley has a dedicated website that serves as the hub to promote company-wide wellness programs, such as health and nutritional challenges designed to help improve employee health. The website also offers a health library, motivational e-cards and a monthly, wellness-focused newsletter. Each year Crowley provides on-site health evaluations and risk assessments and flu shots to its employees, in addition to offering health coaching programs, weight management and gym reimbursement programs.

## Pete Mulcahy named finalist in 2013 Gold Pan Awards

Pete Mulcahy was recently named as a finalist for the Anchorage Chamber of Commerce's 2013 Gold Pan Awards, URS Corp. announced Aug. 5.

The Gold Pan Awards are one of Anchorage's longest-running business honors, now in its 56th year. The Anchorage Chamber of Commerce describes the nominees as individuals, organizations and businesses who show a commitment to community service as well as business and entrepreneurial excellence.

Mulcahy, business development manager for URS, was nominated in the distinguished community service by an individual, organization or small business category. He has been active in the community since moving to Alaska in 2000, and has been involved in numerous organizations including the Planning and Zoning Commission, Alaska Military Force Advocacy and Structure Team Advisory Committee, Board of Directors for Association of the United States Army, president of the Chugiak-Eagle River Chamber of Commerce, past president of Eagle River Area Rotary Club, former military liaison to the Anchorage School Board, Boy Scout Council, Eklutna District chairman, executive director of the Armed Services YMCA of Alaska, Knights of Columbus and teaching project management at UAA. In his role as Business Development Manager, Mulcahy brings his business knowledge to URS by establishing strategies to develop new business and by serving as a key client contact.

PETE MULCAHY

## Teresita Snead named Five Star employee of the month

Teresita Snead received Five Star recognition for the month of July for being an outstanding employee. Snead, a bull cook for Five Star, helps prep for the head cook, takes care of the salad bar, and keeps the galley and kitchen clean. She is very hard worker, possesses a positive attitude and goes above and beyond to ensure Five Star's clients have a positive stay in while in the remote camp.

Employees of the month are based on client feedback and site visits performed by the operations manager of Five Star Oilfield Services.

Five Star Oilfield Services specializes in providing remote sites with catering and cleaning services, solving the most challenging problems companies face when operating in remote parts of the world and in areas that lack sufficient accommodations.

TERESITA SNEAD

## Guess & Rudd ranked in Band 1 by Chambers USA

Guess & Rudd was again ranked by Chambers USA in Band 1 in the "Environmental, Natural Resources & Regulated Industries: Alaska" category. Only three law firms in Alaska achieved that ranking.

As described by Chambers, "Guess & Rudd is renowned for its broad natural resources practice, which caters for a variety of clients including mining companies, financial institutions and native corporations. Its most prominent area of expertise remains oil and gas, and due to its long experience the team is able to handle virtually any type of transaction relating to this area."

Key individuals within the firm who received recognition were Louis Veerman, in the areas of administrative law and litigation, James Linxwiler, for his wealth of experience in the natural resources arena, representing oil and mining companies and electric utilities, and George Lyle, who has a broad practice that includes the areas of oil and gas, environmental and natural resources law.

With law offices in Anchorage and Fairbanks, Guess & Rudd's extensive experience in natural resources law includes multi-party trials, complicated administrative and regulatory hearings and disputes, and lawsuits involving pollution and environmental issues. For more information visit [www.guessrudd.com](http://www.guessrudd.com).

## Lynden named 2013 Green Supply Chain partner, top 3PL

The Lynden family of companies said July 25 that it was included in Inbound Logistics magazine's annual Top 100 3PLs and 75 Green Supply Chain Partner lists for 2013. Lynden is profiled in the June "lean and green" issue of the magazine, and the Top 100 list appears in the July issue.

The lists are compiled by surveys and polls of 3PLs and sup-

ply chain professionals. The Top 100 3PL Providers list is the result of editors soliciting questionnaires from more than 400 3PLs, detailing the services they provide and their areas of expertise.

The Green Supply Chain Partner selection considers a company's involvement in three areas: participation in public-private partnerships, corporate sustainability initiatives and collaborative customer-driven projects. According to the magazine, "Lynden's truck fleet is among the most fuel-efficient in the nation based on the EPA's SmartWay program criteria. The company has continued to improve its equipment with more efficient engines; aerodynamic side skirts, tanker, and trailer design; wide base single tires; and idle-reduction equipment. The improved use of routing software has similarly improved fuel savings, as well as on-time delivery."

Lynden Transport was the first Alaska-based transportation company to join the EPA's SmartWay partnership in 2008 followed by Lynden companies Milky Way, LTI, Inc. and Brown Line last year. Lynden earned the Green Star Award for environmental stewardship in Alaska in 2009. Lynden's environmental policy calls for meeting or exceeding environmental regulations, maximizing fuel efficiency and monitoring and guarding against accidents, emissions and avoidable pollution.

COURTESY CH2MHILL

## CH2M HILL sees more North Slope business

Just one short year ago CH2M HILL was looking at renting out its fabrication shop to movie producers because the work was so limited. Today the workforce within CH2M HILL's fabrication shop has increased by more than 800 percent and is bustling with individuals hard at work modules for BP, ConocoPhillips and ExxonMobil.

"We see more work on the horizon and it's important that we begin preparing Alaskans for that work now," said Sara Gould, manager of project resources.

Part of CH2M HILL's future workforce strategy has been to recruit a mix of experienced and entry-level employees. CH2M HILL has shown the commitment to workforce development by employing eight electrical apprentices this year and a similar number of entry-level welders, recent high school and vocational school graduates.

To prepare the new workforce, CH2M HILL held a welding workshop for students interested in the business last year.

At the time there wasn't enough demand to hire any of the nine students that passed the workshop. Now CH2M HILL has been able to hire two of those graduates into the fabrication shop.

With this increase in workforce CH2M HILL is preparing for a bright future in the Alaska market and is currently hiring for additional positions. Job opening can be found at [www.careers.ch2m.com](http://www.careers.ch2m.com).

## AT&T teams up with Nature Conservancy to skip the bag

AT&T said Aug. 12 that in an effort to empower its customers sustainable choices, increase efficiency and minimize impact on the environment, it is teaming up with The Nature Conservancy to encourage AT&T customers to skip the bag when purchasing items from its retail stores in Alaska. With this program, which runs now through January 31, 2014, AT&T will donate 10 cents to the Nature Conservancy for each check out bag its customers choose to forego.

AT&T's Skip the Bag campaign is in support of The Nature Conservancy's efforts to protect and restore the lands and waters on which all life depends. The Nature Conservancy takes innovative action to invest in the planet's environmental and economic future.

Funds generated from AT&T donations will be used to support The Nature Conservancy's work. For example, The Nature Conservancy restores salmon streams and wildlife habitat in the Tongass National Forest of Southeast Alaska. For many people in Alaska, catching salmon is an essential part of the Alaska way of life.

Throughout the duration of this campaign, customers will also have the opportunity to donate additional funds to The Nature Conservancy at AT&T stores in Alaska.

To learn more about AT&T's sustainability efforts, visit [www.att.com/sustainability](http://www.att.com/sustainability).

For more information on The Nature Conservancy in Alaska, visit [www.nature.org/alaska](http://www.nature.org/alaska).

## Fairweather expands capabilities with VDOS acquisition

Fairweather LLC, an Anchorage-based provider of marine science, medical, aviation, meteorological and expediting support to Alaska's natural resource industry, said Aug. 8 that it has acquired majority ownership of Virtual Data Operations Support LLC, a provider of manned and unmanned remote sensing and data collection services. Fairweather is a member of the Chouest group of companies. VDOS provides operational support to commercial, government and humanitarian entities spanning the globe from the Arctic Circle to the Middle East. VDOS will continue to be run by Brian Whiteside, who founded the company and has been a pioneer in the commercial application and humanitarian use of unmanned systems.

Fairweather and VDOS were brought together in response to the critical need in the arctic oil and gas industry for actionable scientific data to aid real-time decision making. This capability is enabled by cutting-edge technologies such as live streaming high-definition video, infrared, LIDAR and multispectral sensors. Through proprietary technology, the team offers the unique abil-

ity to collect relevant, real-time environmental and scientific data utilizing a network of integrated sensors deployed via subsea, surface and airborne assets.

Efforts will be focused on deploying scientific teams and providing technical support to meet the needs of multiple clients in the environmental and energy sectors. For more information visit [www.fairweather.com](http://www.fairweather.com).

## Crowley named a top 3PL for fifth consecutive year

For the fifth consecutive year, Crowley Maritime Corp.'s logistics group has been recognized as one of the best-equipped industry providers after being named a 2013 Inbound Logistics Top 100 Third-Party Logistics Provider. Editors selected Crowley, along with the company's fellow honorees, from hundreds of candidates, based on its ability to offer diverse operational capabilities, scalability and experience to meet readers' unique supply chain and logistics needs.

"This honor is a testament to the diligence and dedication our employees show every day to differentiate our company in the marketplace as a unique logistics and liner shipping provider," said Crowley's Frank Larkin, senior vice president and general manager, logistics. "We understand our customers' unique needs and we pride ourselves on tailoring our services to meet their requirements, ultimately helping to make their supply chains run as smoothly as possible. It is an absolute honor to once again be recognized for our work by a panel of our peers."

Distilling the Top 100 is no easy task, and the process becomes increasingly difficult as more 3PLs enter the market and service providers from other functional areas develop value-added logistics capabilities. Inbound Logistics magazine editors select the best logistics solutions providers by carefully evaluating submitted information, conducting personal interviews and online research, and comparing that data to readers' burgeoning global supply chain and logistics challenges.

## NAC chief executives transition to Saltchuk subsidiary

Anchorage based Northern Air Cargo President and Chief Executive Officer David Karp and Chief Financial Officer Phil Okeson have transitioned into corresponding roles within Northern Aviation Services, a newly formed subsidiary of Seattle based Saltchuk.

The company Northern Aviation Services is comprised of the operating brands and air cargo divisions Northern Air Cargo and Aloha Air Cargo, aircraft maintenance divisions Northern Air Maintenance and Aloha Tech Ops, and aviation contract service provider NAS Contract Services.

Karp and Okeson will work collaboratively on all operational aspects of each of the businesses, as well as strategic guidance and planning towards growing the footprint in the air cargo and maintenance business.

"Having all of our Hawaii, Alaska, and Continental U.S. operations work collaboratively creates a stronger overall organization by focusing on leveraging best practices and being more efficient across our entire organization," said Karp. "By achieving this objective we will not only increase our success in our current operations, but also set ourselves up better for growth today and in the future."

Anchorage based Northern Aviation Services is currently a wholly owned subsidiary of Seattle based Saltchuk. Northern Aviation Services' operating brands employ more than 650 people and offer scheduled and charter air cargo services as well as aircraft maintenance, ground handling and contract services throughout Alaska, Hawaii, the Lower 48 and North America.
