CCI: Depth of experience

For the past two decades industrial pioneer leads way in poly-based coatings in Alaska

Q. What is the official name of your company?

A. CCI Industrial Services, LLC

Q. Is your firm a subsidiary or affiliate of other companies? If so, please name those firms and their relationship to your company.

A. CCI Industrial is a wholly owned subsidiary of Bristol Bay Native Corporation.

Q. What do you most want people to know about your company?

A. CCI Industrial began operation in 1989. For nearly two and a half decades, the company has had a presence in Alaska's oilfields.

Q. What is your company's primary business activity?

A. We provide operations and maintenance services to our valued clients on the North Slope and throughout Alaska. These include a diverse array of specialty services such as industrial coatings, asbestos and lead abatement, pipeline and component insulation removal and repair, tank and vessel cleaning, spill response, demolition, hazardous waste removal and construction.

CCI Industrial has been a reliable partner in extending the life of industrial infrastructure and for mitigating environmental risk. Our clients rely on our solutions-driven services that assist them in efficiently and reliably meeting their operational requirements.

Q. Are there important projects the company is currently a part of or has done recently?

A. We have recently acquired a major blasting, coating and painting facility and related equipment in Deadhorse, Alaska. CCI Industrial is the pioneer and leader in poly-based coatings on the North Slope. Our successful performance history includes spraying polyurea and polyurethane foam and other specialty industrial coatings on concrete, steel, floors, roofs, the interior and exterior of storage tanks, bed liners, and as secondary containment for bulk fuel farms and glycol tanks.

Our recent facility acquisition will allow us to perform these services year round and positions us to be the go-to coatings contractor on the North Slope. We have earned high praise for

Continued on next page

COURTESY CCI

A cleaned and newly coated well cellar.

our coatings expertise and services; the addition of a fit-for-purpose facility will allow us to provide enhanced support and services to our clients.

Q. How many employees does your company have?

A. CCI Industrial currently has approximately two hundred and fifty employees. During the summer season, our activity and employment will increase significantly.

Q. Describe the equipment your company uses and are there any new equipment purchases planned?

A. CCI Industrial has made a significant investment in the equipment and tools available for application of paints, coatings and linings used to protect our client's infrastructure from weather, erosion, corrosion and rust, while also protecting their workforce and enhancing process safety and energy efficiency.

Q. Is your company expanding any of its operations or locations?

A. As a leader in corrosion prevention and mitigation, our core competencies include proper surface preparation and application of a wide array of paints, coatings and containment linings – such as fusion-bonded epoxies, 1-2-3 coat protective systems, simple zinc primers for metal preservation, polyurea elastomers, polyurethane foams and a number of passive fire protection (PFP) systems.

With a renewed commitment and additional investment in providing specialty industrial coatings, our coatings crews apply coatings to: cast and molded parts; concrete; containment; drill rigs and platforms; equipment and components; floors, painting and striping; handrails and bull rails; metal structures; pipelines and piping systems; pipe spools – internal and external; pressure vessels; road crossings; roof and leak prevention systems; stacks and vents, including high temp; storage tanks, interior and exterior; structural steel; and well cellars.

Q. What is your company's main strength or its edge over the competition?

A. Our clients place a high value on CCI Industrial's ability to prolong the life of their oil and gas infrastructure. By doing this we save them money because our industrial coatings: protect against chemicals including petrochemicals, abrasion and impacts, corrosion and corrosive environments, long term weath-

Abatement technicians remove mastic before re-insulating a pipeline

COURTESY CCI

ering, thermal expansion and fire; increase workforce safety by providing reinforcement to structures and enhancing process safety; enhance operational performance by increasing energy efficiency and improving air quality; and by providing protection to immersed components, quick-to-service applications, and protection for below ground or buried assets.

Q. What new markets, clients or projects did your company attract in the last year?

A. Industrial passive fireproof coating systems are vital to the oil and gas industry. CCI Industrial has recently increased its capacity to provide passive fire protection systems for: blast proof modules and shelters; mechanical and electrical rooms; wall and roof assemblies; and structural beams, columns and support members.

Our company and technicians are qualified and experienced in applying a number of such coating systems, and our mature quality assurance and quality management systems ensure that we deliver excellent results.

Q. What is your company's safety record? What steps does the company take to ensure a safe work environment?

A. Nothing at CCI Industrial is more important than the health and safety of our employees and those of our customers. We acknowledge this truth in every action we take. We're committed to our critical objective of achieving incident-free operations and fostering an organizational culture where safety is a driving value. We are recognized leaders in promoting and working with a high value on safety and engendering the culture to ensure all work can be done safely and responsibly. For this to occur, every employee must have a meaningful role in achieving safety excellence. This is why CCI Industrial management actively provides visible support to safety and demonstrates a personal commitment through everything they say and do. Additionally, our focus on leading indicators and frequent, effective communications throughout our company and with our clients ensures that we continue to perform at high standards and avoid complacency.

With these safety values, CCI Industrial hopes to build relationships of trust and become the oilfield contractor of choice for our customers and our employees. We believe that this is the only way to do business.

Q. What is the address of your company's Web site?

A. www.cciindustrial.com

COURTESY CGG

Passion for geoscience

Work with the industry's recognized leader for Arctic geosolutions

Q. What is the official name of your company?

A. CGG. In Alaska we operate under CGG Services (U.S.) Inc.

Q. What is your company's primary business activity?

A. CGG is a fully integrated Geoscience company. We provide leading geological, geophysical and reservoir capabilities to our broad base of customers who are primarily from the global oil and gas industry. Through our three complementary business divisions of Equipment, Acquisition and Geology, Geophysics & Reservoir (GGR), we bring value across all aspects of natural resource exploration and exploitation.

Our primary business activities in Alaska are seismic acquisition and subsurface imaging. We also have a significant multi-client business in Alaska with seismic and non-seismic data available for license.

Q. What do you most want people to know about your company?

A. We have been committed to Alaska and working in Alaska for over 30 years and have the most advanced technology in the geoscience industry.

Q. Where is your company located?

COURTESY CGG

A. CGG has a seismic acquisition office in Anchorage, Alaska and some of our other business activities for Alaska are based out of our Calgary, Canada and Houston, USA offices.

CGG has over 70 locations globally.

Q. What year was the company founded and by whom?

A. CGG was founded in 1931 in France by Conrad Schlumberger.

Q. Are there important projects the company is currently a part of or has done recently in Alaska?

Continued on next page

A. CGG has a land seismic crew operating for the full winter season. In 2012 our multi-client group conducted its first multi-client seismic program, known as Tabasco, on the North Slope after conducting proprietary surveys there for over a decade. To acquire this high-density, high-productivity vibroseis survey, we deployed some of our latest high-end acquisition technologies for the first time on the tundra and generated a dataset of the highest quality. The multi-client team is planning for more programs in the area.

Q. How many employees does your company have?

A. Worldwide, we have 9,800. In Alaska, CGG employs up to 200 people during the peak acquisition season.

Q. Describe the equipment your company uses and are there any new equipment purchases planned?

A. Most of the equipment we deploy in Alaska is for our acquisition division. This includes geophysical equipment such as recording systems, sensors and cables which are manufactured by our equipment division, Sercel, a global leader in geophysical equipment. CGG is expanding the use of wireless nodes using Sercel's UNITE cable-free system. CGG Airborne has flown many proprietary and multi-client projects in Alaska and will have potential field systems flying there this year.

Q. Is your company expanding any of its operations or locations?

A. CGG is continually looking at opportunities to expand in different markets around the world. For instance, CGG recently opened a data processing center in Myanmar which it hopes to expand as the local market develops. With past experience of performing land seismic operations there and an offshore survey currently underway we are building a local presence to be ready for the expected upturn in the exploration sector.

Q. Is the company changing any of its services or products?

A. In 2013, CGG completed the acquisition of Fugro's Geoscience division. The addition of a number of new activities and technologies, including Jason software, Airborne and Robertson, significantly enhanced our geoscience capabilities and we expanded into new markets such as airborne geophysics, marine gravity, electromagnetic and Data Management Services. Locally, this acquisition brought many new capabilities to CGG and also added into CGG's existing Alaska portfolio multi-client gravity and magnetic data, satellite images and geologic and basin studies.

Also as part of the transaction, Fugro and CGG formed the Seabed GeoSolutions joint venture that focuses on the seismic acquisition of Shallow Water, and Ocean Bottom Nodes/Cables surveys. In 2012 CGG performed a Shallow Water acquisition project on the North Slope using Ocean Bottom Cables.

Q. What is your company's main strength or its edge over the competition?

A. Our people, technology, and safety culture leveraging our global experience and local knowledge offering a full range of onshore, offshore and airborne Geophysical & geological services.

Q. What new markets, clients or projects did your company attract in the last year?

CGG has worked in Alaska for over 30 years.

COURTESY CGG

A. CGG conducted the first Permanent Reservoir Monitoring (PRM) pilot survey in Alaska for a client on the North Slope. The pilot's objectives were to test different source and receiver depths, and to validate the method for monitoring purposes.

Q. What is the most challenging work/contract the company has undertaken?

A. Our multi-client Tabasco seismic program conducted in 2012 covered 130 square miles. This program mobilized the integrated technologies from different CGG businesses in terms of seismic equipment, land data acquisition, subsurface imaging and reservoir characterization and resulted in a high-quality dataset never seen before in this area, all the while preserving the delicate Arctic environment and complying with stringent environmental regulations.

Q. What are the biggest obstacles to completing work your company undertakes?

A. Having the expertise and experience to overcome the challenges of working in the Arctic with respect to weather conditions, remoteness, and general logistics in a very fragile ecosystem is something CGG is proud to be great at.

Q. What do you see as your company's biggest challenge in the next five years?

A. Maintaining our market and technology leadership while continuing to improve on our safety, sustainability, and social license initiatives.

Q. What is the address of your company's Web site?

A. www.cgg.com

Foss loading heavy-lift cargo for an Alaskan North Slope project in 2013.

COURTESY FOSS MARITIME

Foss is Always Safe. Always Ready

For more than a century Foss Maritime has set the standard for marine transportation services

Q. What is the official name of your company?

A. Foss Maritime Company

Q. Is your firm a subsidiary or affiliate of other companies? If so, please name those firms and their relationship to your company.

A. Foss Maritime Company is wholly owned by Saltchuk Resources, a privately owned family investment company formed in 1982 and based in the Pacific Northwest. The independent subsidiaries of Foss include: AmNav, Cook Inlet Tug & Barge and Young Brothers.

Q. What do you most want people to know about your company?

A. Foss Maritime delivers marine services without equal across the globe. From local harbor jobs to complex projects in the world's harshest environments Foss has the capabilities, resources and expertise to efficiently manage our customer's toughest challenges. Our two full-service shipyards offer naval architecture design services, marine engineering, new construction, retrofit and repairs. We are committed to meeting the unique needs of our customers, to the safety of our employees and to safeguarding the environment.

Q. Where is your company located?

A. Our corporate office is based in Seattle, Washington and our two shipyards are in Seattle and Rainier, Oregon, respectively. We also have offices in Alaska; Hawaii; Oregon; California; and the U.S. Gulf.

Q. What year was the company founded and by whom?

A. Foss was founded in 1889 by Thea and Andrew Foss.

The Lauren Foss covered in freezing spray.

COURTESY FOSS MARITIME

Q. What is your company's primary business activity?

A. Foss owns and operates one of the nation's largest coastal tug and barge fleets, offering a broad range of green- and blue-water marine services. Foss serves the world's largest oil and gas companies, international shipping companies and a variety of governmental and nongovernmental agencies. In addition, with two Pacific Northwest shipyards, Foss provides full technical and engineering services.

Q. Are there important projects the company is currently a part of or has done recently?

A. Point Thompson: In the summer of 2013 three Foss tugs hauled critical petroleum industry infrastructure more than 2,300 miles from Anacortes, WA to Point Thomson. The Point Thompson petroleum field had previously been thought too remote to develop, but Foss was able to meet the logistical challenge and deliver the infrastructure safely.

CD5 Bridge Project: Foss transported 11,000 tons of construc-

Continued on next page

tion materials for the Conoco Philips – CD5 bridge project to build four bridges across the Colville River connecting Conoco's Alpine Facility to a satellite operation in the National Petroleum Reserve of Alaska (NPRA). In two voyages in 2013, concrete deck panels and bridge girders were towed from Tacoma, WA to Valdez, AK and stored to await transit over the ice roads to the construction site by Foss's sister company Carlile Transportation.

Arctic Offshore Support: Operating in the harsh Arctic environment, Foss offered a variety of support services to Shell Upstream Americas' historical offshore exploration in Alaskan waters. Foss transported high-risk cargoes safely, and without incident, through a pristine, ecologically sensitive area. Foss provided rig towing through icy waters with two ice-classed tugs, a purposely-modified offshore warehouse barge, cargo barges, maintenance of vessels at the Foss Seattle shipyard, and general, terminal and harbor towing tugs and services in Alaska as well as the Puget Sound region.

Q. How many employees does your company have?

A. 1,500

Q. Describe the equipment your company uses and are there any new equipment purchases planned?

A. Our Fleet: Foss has one of the largest fleets of tugs and barges; we engineered and built the world's first hybrid tug and hybrid tug conversion; and we continue to expand our arctic class fleet and will launch the first of three in December 2014.

We recently deployed the Emmett Foss in Alaska – a shallow draft tug built at our Rainier yard with the specific purpose of moving modules, supplies and other cargo onto Arctic beaches and rivers; places where larger ocean-going tugs cannot possibly go.

Our Shipyards: We have extensive capabilities at our Seattle yard, including the Foss 300 floating derrick crane, which provides heavy lift capability to 75 short tons. The Foss dry docks are the most completely equipped of their size on Puget Sound. Our floating docks handle up to 2,000-tons, providing platforms for underbody maintenance, hull repairs, shaft repairs, and modifications.

Our full service Rainier shipyard features two marine railways rated at 640 ST and 120 ST, with a 90-ton crane and a 40-ton crane on site and have built both steel and aluminum-hulled boats.

Q. Is your company expanding any of its operations or locations?

A. We are investing in and expanding on our assets that are designed specifically for the terrain, environmental concerns and needs of Alaskan operations. In addition, we have increased the footprint of our Rainier yard; have begun offering new builds at our Seattle yard; and have expanded our operations in Hawaii.

Q. What new markets, clients or projects did your company attract in the last year?

While Foss has operated in Alaska for more than a century; the recent opening up of the North Slope has increased our activity and created new opportunities and partnerships.

Q. What is your company's main strength or its edge over the competition?

A. Foss has extensive experience working in harsh environments, and in remote areas with limited infrastructure and we are committed to protecting the environment and to the highest safety standards.

We have a long history in Alaskan waters and have recently

The ocean going tug Agnes Foss at anchor in Icy Bay in 1952, during discharge of a cargo barge in support of oil exploration.

COURTESY FOSS MARITIME

formed a partnership with the energy services arm of the Arctic Slope Regional Corporation (ASRC) and are currently expanding on our assets by building three new Arctic Class tugs.

Q. What are the biggest obstacles to completing work your company undertakes?

A. Much of our work takes place in extreme environments or in remote locations, such as delivering aid to Haiti, developing the world's first open lighterage north of the Arctic Circle, or delivering a 190-ton turbine up a never-before commercially traversed section of the Columbia River. With our global network and experience we are often brought on to find solutions to operational challenges that others may not be able to deliver on.

Q. What do you see as your company's biggest challenge in the next five years?

A. Foss has built a reputation as an industry leader and to maintain that position we must constantly be ahead of the curve: finding new and innovative solutions, and having the infrastructure in place to take on any challenge.

Q. Does your company have an anniversary or other landmark event coming up?

A. 2014 marks our 125th year. We have many celebrations and a new book coming out to mark the occasion.

Q. What is the average length of time employees work for the company?

A. Currently, the average length of employment is 12+ years. We have 328 employees who have been with us for more than 20 years, and the longest tenure is 44 years.

Q. What is your company's safety record? What steps does the company take to ensure a safe work environment?

A. Foss' safety program is recognized as a leader in the industry with a company-wide zero incident safety culture. Our safety program is built on a sophisticated behavior-based focus, with robust health, safety and compliance programs. We provide frequent reports on the ever-growing number of Job Safety Analyses, Near Misses and Safety Observations that are being reported every day. We have multiple committees that provide support, and we continually review and discuss notable near misses and observations, safety alerts and safety bulletins.

Q. What is the address of your company's Web site?

A. www.foss.com

BUSINESS SPOTLIGHT

URS Alaska

URS provides engineering, construction and technical services with capabilities to support all stages of project life cycle, offering a full range of program management; planning, design and engineering; construction and construction management; operations and maintenance; and decommissioning and closure services. URS Alaska has more than 130 employees in Anchorage, Fairbanks and Juneau, with satellite offices in Homer and Ketchikan.

Alena Averyanova, Project Administrator

Alena Averyanova recently joined URS as a project administrator with five years of experience in finance, accounting, and administrative functions. In her role as project administrator, Averyanova supports the organization in daily operations of special projects.

COURTESY URS

David Milliman, Project Coordinator/Estimator

David Milliman is a lifelong Alaskan and has been in the field of fire protection for the past 17 years. He credits his previous experience in construction with allowing him to understand a project from the ground up. An active person, Milliman runs daily and snow boards in the winter.

SUSAN CRANE

GCI

GCI is the leading provider of communications services to business customers, particularly large enterprise customers with complex data networking needs.

More information about GCI can be found at Gci.com.

COURTESY GCI

J.J. Harrier, Commercial Marketing Manager

J.J.'s experience includes journalist and features editor for the Frontiersman Newspaper and vice president and communications director for the Anchorage Chamber of Commerce for the last 5 years.

In the summer, he enjoys road, hiking and camping excursions, reading or a movie with good company. In the winter months, J.J. prefers to travel to keep sanity, perspective and spiritual growth intact and states that family, volunteering and fun time with friends makes his life meaningful.

Engineered Fire & Safety

Engineered Fire & Safety, a UTC fire and security company, is an industry leader in clean agent suppression systems, water based suppression systems, and industrial fire alarm and gas detection systems. Since 1986 Engineered Fire & Safety has established a reputation for quality, innovation and expertise in telecommunications, data processing, computer server rooms, power generation, manufacturing, oil and gas, municipal, state and government markets in Alaska.

ARCTIC OIL

BY JUDY PATRICK

A coffee table photo book covering 20 years of Alaska's North Slope oil patch.

"If you want to really see what the industry looks like in this little-traveled and forbidding part of North America, 'Arctic Oil, photographs of Alaska's North Slope' by Judy Patrick is the best documentary you will find..."

Want to be a part of this oil and gas directory?

Qualified Petroleum News advertisers have full access to all the benefits included in this biannual magazine, which used to be called the Petroleum Directory but was recently changed to Arctic Oil & Gas Directory to reflect its content and worldwide distribution. Those benefits include the following:

- **Exposure.** The Arctic Oil & Gas Directory is distributed twice a year to every one of our newspaper subscribers, in addition to its presence at trade shows and conferences nationally and internationally.
- **A company profile.** A full page, full color Q&A profile of your company. You'll be involved in the editing and choose the pictures. Once it's printed, you own the piece and you'll receive an electronic copy to use as a company brochure or however you see fit.
- **Access to free news coverage.** Submit announcements, new hires, special projects, new technologies, company photos, and more. Let current and potential new clients keep track of your company's milestones.
- **Unique company listings.** With over 130 categories to choose from, you'll be able to list your company name, contact information and a brief description of the products and services you offer.
- **Additional opportunities** to feature your company and its people – including feature stories, photo spreads, cover shots, and more.

Get listed and be noticed.

COMPANY NEWS *in brief*

CGG wins contract for PDO subsurface imaging center

CGG announced it has been awarded a further contract by Petroleum Development Oman to provide seismic imaging services at its dedicated center in Muscat, Oman.

CGG has been operating the PDO dedicated center since 1994 and the contract will run for another four years from January 2014. The center provides the full range of subsurface imaging services for PDO's onshore data and specializes in large, high-density wide-azimuth projects. As part of this contract CGG will also expand its onsite training facilities and increase its support to Sultan Qaboos University.

Jean-Georges Malcor, chief executive officer of CGG, said: "CGG is delighted that PDO has confirmed its confidence in our advanced subsurface imaging technology, expertise and service excellence by extending this contract on the eve of the dedicated center's twentieth anniversary. Throughout this time we have consistently shown our commitment to developing the people and seismic industry of Oman and have transformed the traditional contractor-client relationship into a highly collaborative and integrated partnership with PDO. The renewal of this dedicated center contract and the success of our expanding open center operation confirm our leading position in the Oman subsurface imaging market."

CCI Industrial Services acquires North Slope facility

CCI Industrial Services LLC said it has entered into an agreement with Alutiiq Oilfield Solutions LLC to acquire certain assets including a major blasting, coating and painting facility and related equipment in Deadhorse, Alaska. The transaction was completed Nov. 8.

"This asset purchase positions us to be the go-to coating contractor on the North Slope," said CCI Industrial President and Chief Executive Officer Ben Schoffmann. "While we have won praise and increased our activity with valued clients for our coating expertise and services, the lack of a fit-for-purpose facility prevented us from reaching our objectives. This acquisition will allow us to perform larger jobs and be better able to work year round."

CCI Industrial, a wholly owned subsidiary of Bristol Bay Native Corp., is an oilfield and industrial service provider with roughly 250 employees. CCI Industrial is engaged in a wide variety of activities on Alaska's North Slope including coating, sand-blasting and painting, tank cleaning, pipeline maintenance, hazardous materials handling and spill response.

Alutiiq Oilfield Solutions, a wholly owned subsidiary of Afognak Native Corp., is an oilfield service provider with operations in Alaska, Canada and North Dakota specializing in temporary road and pad matting and structural composite products.

COURTESY CROWLEY

Crowley consolidates liner, logistics teams

Crowley Maritime Corp.'s Panama liner and logistics teams have relocated to a new, shared location in the heart of the country's capital, just minutes from Panama City's major highways, airport and seaport. The facility offers triple the warehouse and distribution space and makes Crowley the first bonded facility in the heart of the capital city, and the only company with the ability to serve both bonded and nationalized cargo in the same warehouse.

Crowley customers now have access to a fully Customs-bonded, 25,300-square-foot warehouse with eight dock doors, increasing the company's efficiency in receiving and delivering cargo; a 38,426-square-foot container yard; and a business office staffed with knowledgeable Crowley representatives who can serve as a single point of contact for shippers and consignees who are importing to and exporting from the country. The facility also offers dedicated capacity for both bonded and non-bonded cargo, integrated communication and data interchange systems, along with a permanent fire and security system. For more information visit www.crowley.com.

Mahmood named manager for Marine Response Alliance

Samina Mahmood, former commercial manager for TITAN Salvage, has been appointed manager for Marine Response Alliance, an association of the top U.S. emergency responders providing OPA 90 Salvage Marine Firefighting.

Mahmood will lead the MRA administrative team and work closely with the alliance's emergency response center and the U.S.-based emergency response and salvage team.

Prior to joining TITAN and the MRA, Mahmood worked for Crowley Maritime Corp., TITAN's parent company, servicing oil and gas projects around the world. Recently she accepted on behalf of TITAN and MRA the Defense Logistics Agency's "Hurricane Sandy Award" at the Business Alliance Awards in Virginia, for the team's "unprecedented support" following the storm that

devastated much of the Northeastern coast in late October 2012.

MRA, founded in 1994, combines experts in all facets of emergency response with salvage, firefighting and lightering equipment in all Captain of the Port Zones. Alliance members include TITAN, Crowley, Marine Pollution Control and McAllister Towing & Transportation. To learn more about MRA, please visit www.marineresponsealliance.com.

Alaska Rubber Group completes Washington acquisition

The Alaska Rubber Group, with three locations in Alaska, has announced the purchase of five additional locations in Washington, effectively doubling the size of its employee owned organization.

The five new locations all fell under the company formerly known as Pacific Rubber Group, serving the entire Pacific Northwest region and are comprised of Pacific Rubber Inc. located in Seattle; TIMCO Inc. at the Port of Tacoma; North Sound Hose and Fittings in Everett; Central Hose and Fittings in Pasco; and Inland Pacific Hose and Fittings in Spokane.

"We're always exploring opportunities for growth, and it is exciting to see where this new addition to our group will take us," said Janece Higgins, president and CEO of Alaska Rubber Group. "Some of the former owners of the Washington stores, Don and Drennon Adams, were the original founders of our Alaska locations. We all started with a very similar model. It's kind of in our DNA. I have known some of the employees in the Washington stores for years, and the knowledge and experience they bring will help shape the future of the company. Everyone involved is critical to the team, and I look forward to their new ideas, hard work, and the growth that we will experience going forward."

Each location within the group will retain its original name; however, each will now be branded as an employee owned Alaska Rubber Group Company. For more information about the Alaska Rubber Group, please visit www.alaskarubber.com.

BP's Prudhoe Bay power station recognized for safety

As reported by the State of Alaska Department of Labor and Workforce Development on Dec. 6, BP Exploration Alaska's Central Power Station in Prudhoe Bay has again been awarded the Alaska Voluntary Protection Program's "Star" level for outstanding employee safety and health programs.

"The VPP Star re-certification is a testament to our team's proactive commitment to safety," facility managers Art Milan and Michael Dobesh said. "We have embedded this culture into the fabric of our facility and the team members are very proud of their accomplishment."

"As an employee driven process, the team facilitates weekly VPP meetings and manages their VPP funding through a well-established process. This process allows the team to have full control and accountability of all safety aspects in their facility. As the facility managers, we are very impressed with the level of involvement and commitment as we continue our journey to an incident free work place."

VPP recognizes and promotes effective workplace safety and health management through a cooperative program between a company's management, employees and the Alaska Department of Labor and Workforce Development's Occupational and Safety Section.

As a VPP Star recipient the BP Prudhoe Bay Central Power Station won't be subject to random enforcement inspections for five years. Enforcement regulations remain in effect, however, and cases of employee complaints, accident investigations or other significant incidents will result in an enforcement inspection. Participation in the program is voluntary.

For more information about the program, go to <http://labor.alaska.gov/lss/vpp-participants.html>.

Olgoonik/Fairweather team awarded ANIMIDA III contract

Olgoonik/Fairweather LLC in conjunction with a team of scientists from the University of Alaska Fairbanks, the University of Texas at Austin, the Florida Institute of Technology, Battelle Memorial Institute and Kinetic Laboratories Inc., has been awarded the Bureau of Ocean Energy Management contract to continue environmental monitoring research in the Beaufort Sea. The project is titled Arctic Nearshore Impact Monitoring in the Development Area. ANIMIDA III is a two-pronged monitoring project that includes a separate effort involving the monitoring of Boulder Patch kelp beds in the area around Camden Bay.

The group will conduct comprehensive scientific studies to characterize the lease areas and surrounding environs of the Beaufort Sea that expand beyond past sampling efforts conducted during prior ANIMIDA I and ANIMIDA II work. The duration of the project will span from 2014 to 2017, with field programs planned during the open-water seasons of 2014 and 2015 and through-ice sampling events in the spring of 2015. Data synthesis is planned for years three and four, with the 2014 field season data informing the research for subsequent years.

The ANIMIDA III scientific program will involve interdisciplinary research including benthic ecology, chemistry and physical oceanography. The chemistry work will evaluate the presence of oil industry contaminants, including a selection of metals and hydrocarbons in sediments and biological tissues, to detect possible changes as a result of future oil and gas activities.

Olgoonik/Fairweather LLC is a joint venture with Olgoonik Oilfield Services, a subsidiary of the Alaska Native corporation for the Village of Wainwright and Fairweather Science for more information visit www.fairweather.com/environmentalscience.

Growth drives change at Price Gregory and CONAM

In response to market demand in the Alaska construction industry, Price Gregory and CONAM Construction are making the following staffing and organizational changes to better respond to client needs.

Robert "Bob" Stinson has been named senior vice president of Price Gregory International, Alaska Division. Stinson has 38 years of experience in Alaska, primarily with Price Gregory and CONAM Construction, where he has been instrumental in developing both companies' roles as well-respected, long-term oil, gas

and industrial construction companies. In his new position, he will lead the organization in all aspects of its Alaska operations. Stinson is taking over Price Gregory responsibilities from Dave Matthews who will be retiring in March. In addition to serving the oil and gas sector, he will be introducing a new Industrial Power Division in response to awards of EPC electrical power plant contracts in Alaska and Hawaii.

Dale Kisse has been promoted to president of CONAM Construction Co., where he will continue to manage the operation of the company's capabilities in construction and maintenance of oil and gas, and infrastructure projects. Kisse is a 38-year veteran in the oil and gas industry, with more than 34 years spent with the Price Gregory and CONAM companies in Alaska. Supporting Kisse are Bill Binford, CONAM's North Slope area manager and Mike Sheppard, CONAM's Cook Inlet area manager.

Kenneth Yockey, P.E., has joined Price Gregory International, Alaska Division as its oil and gas construction manager. He will be responsible for managing the oil and gas initiatives of the company and continuing to support strong client and labor relations for existing and new projects under Stinson. Yockey has more than 20 years of experience as a senior corporate manager on construction projects throughout the state of Alaska, including extensive experience with the development of the North Slope oil fields.

A Quanta Services company, CONAM has provided the oil and gas and utilities industries with consistent quality construction and maintenance services in Prudhoe Bay and Cook Inlet, as well as remote location in Alaska since 1984.

Price Gregory, also a Quanta Services company, is a name associated throughout the world as a leader in pipeline and facility construction for the past 80 years. PGI is the largest pipeline contractor in North America.

Tabitha Trosper joins Golder Associates group

Golder Associates Inc. Anchorage office welcomes new hire Tabitha Trosper.

Trosper is an engineering geologist with Golder Associates Inc. Prior to joining Golder, she served as geologist in the engineering geology group of an environmental and engineering consulting firm where she evaluated geologic hazards, provided field support for engineering geology and geotechnical projects throughout Washington and other regions of the United States. Trosper has just embarked on her career in consulting with over two years of engineering geology and geotechnical field exploration experience. She is a graduate of Central Washington University, Ellensburg, with a Bachelor of Science and master's degree in geology. While at CWU, Trosper's focus was on geomorphology, several of her research projects described the paleoenvironments of archaeological sites in the Northwestern United States and Central Mexico. She is also passionate about

ROBERT STINSON

DALE KISSE

science education and has participated in many educational outreach programs, providing supplemental scientific instruction and promoting careers in science.

Usibelli Coal Mine completes 2013 accident free

Usibelli Coal Mine Inc., based in Healy, Alaska, said it has achieved a one calendar year safety record for 2013, with more than 120 employees at UCM achieving in excess of 530 continuous days without a lost time accident.

"This is a significant accomplishment considering the challenging conditions in which we work every day. Operating and maintaining heavy equipment and conducting mining operations — essentially 24 hours a day, 7 days a week, all year long, in rain, snow, extreme wind conditions, in the dark of winter, and in many cases very remote locations on the mine property are not easy tasks," said Alan Renshaw, UCM general manager.

"I am very proud of our people. We have a professional and dedicated workforce with great teamwork and leadership. The safety of our employees is priority number one. It takes the constant vigilance of every employee every day, all day long. Our goal is to provide a quality product, in the requested quantities, and with on-time deliveries; all accomplished in a safe manner. My compliments go out to every member of the company; I am extremely proud of everyone," added Joe Usibelli Jr., president of Usibelli Coal Mine.

Usibelli Coal Mine is a fourth generation, family-owned, all-Alaskan business and the only operational coal mine in Alaska.

Soper named Five Star December employee of the month

Julie Soper received Five Star recognition for the month of December for being an outstanding employee. Soper is a huge asset to Five Star Oilfield, her hard work and dedication is noticed by all. She is constantly going above and beyond to make sure the client is completely taken care of and also that her coworkers have what they need to do their jobs to the fullest, making the workplace a fun place to be with her positive attitude.

Employees of the month are based on client feedback and site visits performed by the operations manager of Five Star Oilfield Services.

Five Star Oilfield Services specializes in providing remote sites with catering and cleaning services, solving the most challenging problems companies face when operating in remote parts of the world and in areas that lack sufficient accommodations.

ASRC, Institute of the North announce partnership

The Arctic Slope Regional Corp. and the Institute of the North recently agreed to a strategic partnership addressing Arctic policy and infrastructure issues. In addition to a financial contribution to the Institute of the North, Teresa Imm, vice president of resources at ASRC, will join the Institute of the North board of directors.

ASRC joins Shell Alaska and the University of Alaska Fairbanks as Strategic Partners. "We believe that the Institute of the North brings attention and direction to Alaska's Arctic, convening critical conversations about issues that are at the heart of what we're doing at ASRC," said Imm. "I'm excited to join a wonderful team who share our vision of responsible resource development, balanced against vibrant cultures and a sensitive environment."

The Institute of the North and UAF have signed an MOA outlining a collaborative framework that aligns the university's current and future Arctic programs and projects, utilizes the institute's role as a convener, builds UAF's academic, research, and public service capacities, and leverages financial resources from both entities.

Institute of the North Strategic Partners believe in the Institute of the North's mission and goals, and support the Institute with a financial contribution of \$25,000 or more. For more information visit www.institutenorth.org.

Lori Davey appointed GM of Fairweather

Fairweather LLC announced the appointment of Lori Davey as the company's new general manager. Davey will be responsible for directing all of Fairweather's business activities and overseeing the company's expansion and management of Deadhorse Aviation Center.

A member of the Edison Chouest Offshore group of companies, Fairweather LLC is a 38-year-old Alaska company and a leader in providing remote medical, aviation, logistics and scientific support services to Alaska's natural resource industry. Fairweather operates the Deadhorse Aviation Center, a multifaceted aviation facility on the North Slope, created to support expanding Arctic oil and gas operations. In September 2013, Fairweather formed Tulugaq LLC — a partnership with Olgoonik Corp. and Kaktovik Inupiat Corp. created to expand airborne assets for remote sensing operations and scientific surveys, bolstered by the purchase of a new Diamond DA42 optionally manned aircraft.

A lifelong Alaskan and resident of Anchorage, Davey joined Fairweather in 2012 as director of business development. Prior to joining Fairweather, she owned and served as president of Motznik Information Services, a data service company founded in 1974 that provides highly targeted information searches for key Alaska industries. Davey graduated from the University of Alaska Anchorage in 1992 and earned an MBA in 1998. She serves as a trustee on the boards of the Nature Conservancy in Alaska and the Anchorage Rotary Club. Davey was selected as one of the "Top 40 under 40" by the Alaska Journal of Com-

LORI DAVEY

merce and Anchorage Chamber of Commerce in 2010.

Nabors names Restrepo as new CFO

Nabors Industries Ltd. announced the appointment of William Restrepo as chief financial officer following his upcoming departure from Pacific Drilling S.A.

"Nabors has been seeking to fill the CFO role with someone possessing financial management and operational skills and experience who can meaningfully add to our senior management team. We believe William Restrepo is that person. He brings nearly 30 years of financial and operational management experience in the global energy industry to Nabors. William has an extensive portfolio of proven domestic and international capabilities in corporate finance, financial accounting, internal audit, treasury, operations, and mergers and acquisitions, as well as planning and analysis. We are very pleased to have him join our executive leadership team," said Chairman, President and Chief Executive Officer Anthony Petrello.

Restrepo, 54, most recently served as CFO at Pacific Drilling. In this role, he provided leadership for Pacific's initial public offering and listing on the New York Stock Exchange and helped the company grow by raising \$4.5 billion in bank debt, bonds and equity. He holds bachelor's degrees in economics and civil engineering as well as an MBA from Cornell University. His employment is expected to begin on Feb. 28.

Futaris secures investment position in networks

Futaris Inc., a subsidiary of Calista Corp., is pleased to announce its investment in Quintillion Networks Ltd. Futaris provides global IT and communication solutions via satellite, VoIP, broadcasting and LMR communications and has more than 30 years of private and federal telecommunications experience. Futaris is the only approved HITRUST Common Security Framework Assessor organization in the state of Alaska, and is licensed to conduct HITRUST CSF assessments nationwide.

Alaska-based QUIN-TILLION Inc., a wholly owned subsidiary of Quintillion Networks Ltd., is a middle-mile telecommunications company with exclusive rights to develop Alaska fiber optic landing sites. These sites will connect via spurs to a 15,000-plus kilometer subsea fiber optic network currently in the pre-construction phase. This project is led by Arctic Fibre Ltd. Quintillion has selected seven landing sites based upon the market and feasibility analysis. The landing sites range from Shemya in the Aleutian Chain, subject to federal government approval, to Prudhoe Bay on the North Slope. The project takes advantage of international economic opportunities to route via the Northwest Passage and North Arctic. This network will run between England and Japan, connecting vital financial markets.

Subsequent phases are being developed with the goal of expanding the network to neighboring communities. This improvement in affordability and capacity can provide a wide range of new opportunities for Internet service providers, who in turn, supply service to schools, local governments, health care providers, residential consumers and rural businesses.

For more information visit www.futaris.com.

UMIAQ announces new associate civil engineer

Cindy J. Titus, P.E., has joined UMIAQ's engineering department as a civil engineer and will be based in Barrow, Alaska. Titus is a Colorado State University graduate and a registered professional engineer in civil engineering. Her experience includes 10 years of engineering oversight, planning, permitting, design and construction oversight of water and wastewater treatment facilities. Program management experience includes developing, mapping, and implementing integrated processes for contracting and procurement activities across programs controls and contracts, and coordination with client and consultants.

Titus's recent project experience includes the following projects: Fargo-Moorhead Area Flood Diversion Project in North Dakota, Ruth Burnett Sport Fish Hatchery in Fairbanks, North Slope Borough Wastewater Treatment Plant in Barrow and the Toolik Research Station Well House and Water Treatment System in the Brooks Range.

UMIAQ is a full-service consulting and design firm specializing in architecture, engineering, surveying, regulatory planning, stakeholder relations, geospatial analysis, environmental consulting services, logistics and full-service camps, and response planning and operations. UMIAQ's team understands the politics, culture, land use issues, regulations, and design conditions as they pertain to industrial and community development in arctic and subarctic Alaska. UMIAQ is a member of the Ukpiaq Inupiat Corp. family of companies.

CGG enhances portfolio with TerraSpark's software

CGG has enhanced its software portfolio with the addition of TerraSpark's Insight Earth, advanced 3D visualization and interpretation software. Insight Earth greatly enhances seismic interpretation systems and provides the interpreter with guided tools that can automate the fault extraction process, precisely define salt bodies, deliver fast depictions of paleo-depositional environments and enable the visualization of discrete fracture networks in unconventional plays. Insight Earth brings the most complicated structures into clear definition and delivers superior results.

With Insight Earth joining its Hampson-Russell and Jason software, CGG offers a full and complementary suite of tools to provide its worldwide clients with best-in-class reservoir characterization technology. These include advanced seismic interpretation, petrophysical analysis, well-to-seismic ties, inversion, reservoir property determination and geomodeling.

"Insight Earth and its industry-renowned visualization and interpretation capabilities strongly complements our reservoir characterization software to address the most difficult subsurface challenges, enabling our clients to reduce the risks and costs associated with the discovery and production of hydrocar-

bons," said Sophie Zurquiyah, senior executive vice president of CGG's geology, geophysics & reservoir division.

Propeck joins Global Diving in Gulf of Mexico

Global Diving & Salvage Inc. announces the hiring of John Propeck as general manager for its Gulf Coast regional office in Houston, Texas. In this position, Propeck will be responsible for the day-to-day undertakings of this region both administratively and operationally. He will lead the development of new and ongoing business opportunities within Global's core service lines: offshore operations, marine construction, and casualty response.

"John brings with him a wealth of history, experience, and knowledge that is hard to find," said Devon Grennan, Global CEO/president. "His management and leadership will be a great asset as we expand our client base and service offerings in the Gulf Coast region."

Propeck brings with him more than 45 years of multi-faceted experience in the commercial diving and maritime industry. He began his career as a commercial diver, logging more than 1,000 days in saturation. He has more than 20 years of program and project management experience, including business development, marketing, sales, purchasing and procurement management.

JOHN PROPECK

Tara Ballard named Five Star employee for January

Five Star Oilfield Services announced that Tara Ballard has received Five Star recognition as the employee of the month for January. Ballard has worked as a bull cook for Five Star Oilfield since May of 2013. She always maintains a fun work environment with her positive attitude. Ballard's supervisor nominated her and said that she keeps them going strong week after week and is an asset to Five Star. As a bull cook she is responsible for a variety of duties, it is hard work and she stays busy and gets it all done with a smile on her face. She is always willing to take on anything that is asked of her. We appreciate her dedication to her job, her supervisor said.

URS welcomes Moss as its environmental planner

URS said Aug. 22 that Katrina Moss recently joined its team as an environmental planner with 20 years of experience in planning and impact analysis on a variety of infrastructure projects throughout Alaska. Her technical expertise includes public involvement and participation, transportation planning, and national environmental policy act environmental impact statements and assessments. Moss is experienced in environmental, aviation, capital improvement, and transportation planning; permitting; regulatory compliance; and agency coordination. She has managed transportation planning projects throughout Alaska for both the Federal Aviation Administration and Alaska Department of Transportation and Public Facilities.

KATRINA MOSS

CH2M HILL announces Bailey to lead in Alaska

CH2M HILL, a global full-service consulting, design, construction and operations firm, announced that Terry Bailey has been named senior vice president of CH2M HILL Alaska, effective Sept. 1. Bailey succeeds Mark Lasswell, who will become the program executive over other business pursuits for CH2M HILL.

Since joining CH2M HILL in 1994, Bailey has held a variety of executive level positions in engineering, construction and operations and maintenance in Alaska and recently served as regional vice president. With over 30 years' experience, 23 years of that in Alaska, he brings a thorough understanding of the oil and gas business and the unique demands and needs of the Alaskan market.

"Our Alaska operations are critical to CH2M HILL," Berra said. "And we are proud of the rich and successful history we have in the state. Terry is the right leader to direct us on this continued path of success."

TERRY BAILEY

Doyon Emerald and Alaska Anvil announce joint venture

Doyon Emerald and Alaska Anvil announced they will expand their existing strategic alliance and merge their respective Alaska engineering and consulting operations to create Doyon Anvil, headquartered in Anchorage, Alaska.

This new joint venture is created to better serve clients within Alaska. Doyon Anvil services will include full service multi-discipline engineering and procurement, process safety and risk management, project management, and construction field support.

Werner Plagge will serve as Doyon Anvil's president and general manager. Plagge has worked for Anvil Corp. for 20 years and

Crowley's Artiga and Harrison presented with honor

Crowley Maritime Corp.'s Micki Harrison, director, human resources, and Miguel Artiga, vice president, logistics, Central America, were presented with 2012 Thomas Crowley awards, the company's highest honor, at a ceremony at the company's Jacksonville, Fla., headquarters.

The exclusive employee recognition program was created in 1985 and only 56 of the company's more than 5,300 employees have received the award symbolized by a limited edition bronze sculpture, which depicts company founder Thomas Crowley ferrying goods to and from ships on San Francisco Bay in the early 1890s. The trophy serves not only as a tribute to the founder of the company, but also to those honorees who have aligned themselves closely with the company's values displaying outstanding performance, dedication, leadership and initiative.

Crowley's Chairman, President and CEO Tom Crowley Jr., the grandson of the company's founder, presented the awards before more than 200 employees and senior leaders who had gathered from around the world for the event. Included in the audience were eight past recipients of the coveted award.

"This award is very meaningful for me because of the gratitude and appreciation I have for my father, my grandfather and all the employees who have pulled together to make this such a special company," said an emotional Crowley. "Our two recipients this year are people who live the culture and values and do everything they can to make the company better."

led the strategic alliance effort with Doyon Emerald.

Doyon and Anvil have very similar corporate cultures with complementary experience and values. Both companies focus on developing long-term relationships with their clients and their employees. Their missions are directed toward providing quality services and continually enhancing their position as financially strong companies that provide stable and rewarding careers for their employees.

Crowley completes acquisition of Taku Oil Sales

Crowley's Alaska fuel sales and distribution company, CPD Alaska, LLC, has completed its acquisition of Juneau-based Taku Oil Sales Inc. Taku, founded in 1953 by Clarence E. Jacobsen, is a well known and respected local fuel company that has been serving the Southeastern Alaska community of Juneau for more than 50 years.

Jeff Hansen, president of Taku, and the Jacobsen family are leaving the oil business to pursue other interests. The company operates a 2.5 million-gallon bulk fuel storage terminal, a deep-water marine fuel dock and two service stations in the Juneau area.

While the leadership at Taku will change, the company will continue to provide great products and services under the Taku

brand name. The company's 13 employees have been welcomed as new members of the Crowley team.

"The owners of Taku Oil Sales are very happy to have made this arrangement with Crowley. We feel like it is the best thing that could have happened for our employees and for the community of Juneau," said Jeff Hansen, president and shareholder of Taku, who will remain with the company for a short period to assist in the transition.

Crowley currently operates 22 fuel terminals in western Alaska and the rail belt, with over 265 employees. This is Crowley's second acquisition of a southeast Alaska fuel distributor. The company acquired Anderes Oil in Ketchikan on July 1.

Calista acquires STG Inc. as newest subsidiary

Calista Corp. has announced the acquisition of STG Inc. In the last 20 years STG has earned a solid reputation while operating throughout Alaska, from hot and sunny summer days to frigid winter nights.

STG has installed approximately 80 percent of the utility-scale wind projects currently in operation across the state, including crane support for the Fire Island Wind project near Anchorage and in rural communities throughout Alaska. They also completed the 34-site tower and control buildings for the massive DeltaNet Project for United Utilities Inc. in southwest Alaska. STG is also the premier pile foundations contractor for western and Interior Alaska. Additionally, the team at STG provides deep experience with diesel power generation projects, bulk fuel systems and other renewable energy projects.

"STG stands out in Alaska as a proven company with dedicated employees, led by Jim and Sandy St. George," said Calista Corp. President and CEO Andrew Guy. "Calista continues to strengthen and grow with complementary acquisitions. That is one of our key obligations to our shareholders."

The acquisition also includes Alaska Crane Ltd., Terra Foundations Inc. and Gambell Properties LLC. Alaska Crane provides crane equipment and operators for nearly any sized project. Their equipment includes the largest crane in Alaska, currently working on the Blue Lake Hydroelectric project in Sitka. Three years ago Calista acquired Brice Inc. and Yukon Equipment Inc.

CONAM welcomes Bill Binford to its executive team

Bill Binford, P.E., PMP has joined CONAM Construction Co. as North Slope area manager. Reporting to Dale Kissee, CONAM's operations manager, Binford will be responsible for managing construction operations and project development in support of the company's North Slope clients in the oil and gas and power sectors. Working in concert with CONAM's President Bob Stinson, he will also be responsible for business development for CONAM, as well as other subsidiary companies of CONAM's parent, Quanta Services Inc. Binford has more than 30 years of experience in construction and project man-

COURTESY GLOBAL DIVING & SALVAGE

Global Diving & Salvage ROV group travels to Hawaii

Global Diving & Salvage Inc. said its ROV team, operating off of the Healy Tibbitts 544 crane barge, was tasked with restoring the pipeline to an as-designed condition. Many of the tasks required had never been done by an ROV and purpose built tools and fixtures had to be built to perform the work.

All of the tooling and techniques were tested in Seattle prior to departure. Tasks included; removal of marine growth at new clamp locations, cutting 1-1/2" stud link chain, installation of hydraulic actuated clamps, replacement and tensioning of two 500 foot sections of 1-1/2" stud link chain from newly installed clamps to 40 ton gravity anchors, installation of 1-5/8" stud link chain bridles, and installation of 1-1/2 tons of flotation to each new clamp.

The ROV crew consisting of Warren Posten, Matt Nienow, Chris Moritz, Colins Goertzen, Dan Anderson, Scott Blair, and Eric Crumpton encountered many obstacles but persevered and finished the job to the many thanks of a happy customer.

agement and more than 13 years of Alaska North Slope project experience.

De Guzman Five Star's August employee of the month

Five Star's Joey De Guzman has received recognition for being an outstanding employee. He started with the company as a bull cook and has quickly moved up to a night cook and baker. Clients have referred to his cooking as some of the best Chinese food they have ever had. De Guzman also has an excellent attitude, is eager to learn and happy to teach and is a very hard

worker, all round he is a huge asset to Five Star.

Employees of the month are based on client feedback and site visits performed by the operations manager of Five Star Oilfield Services.

Five Star Oilfield Services specializes in providing remote sites with catering and cleaning services, solving the most challenging problems companies face when operating in remote parts of the world and in areas that lack sufficient accommodations.

JOEY DE GUZMAN

Crowley presents scholarships to maritime cadets

Crowley Maritime Corp. awarded three Thomas B. Crowley Sr. Memorial scholarships to California Maritime Academy students Andrew Leonard, Jeff Harcq and James McSweeney during the 2013 Containerization and Intermodal Institute's Connie Awards dinner in Long Beach, Calif.

Leonard has had a long-time passion of the water and boating, and began researching maritime academies while still in high school. He now serves as the residential assistant for his freshman class, is a member of the Associated Students of the California Maritime Academy and is an active supporter of the greater City of Vallejo, Calif.

When Harcq applied to Cal Maritime, he had already obtained his 50-ton master's license and had more than 10 years experience as a mechanic for the Correct Craft boat dealer in San Diego. As a student, he has fully embraced his role as a valuable mentor for his younger classmates by sharing his real-world experiences in the classroom.

During one of the fishing seasons, McSweeney was approached by a Cal Maritime alumnus who encouraged McSweeney to return to school. After being accepted to the school, he began pursuing his U.S. Coast Guard 3rd Mate Unlimited license and a Bachelor of Science degree in marine transportation.

Crowley Chairman, President and CEO Tom Crowley Jr., established the Thomas B. Crowley Sr. Memorial Scholarship Program in honor of his father, who guided the company to extraordinary heights before passing away in 1994.

CH2M HILL announces CEO transition

CH2M HILL announced that its Chief Executive Officer and Chairman Lee McIntire will step down as CEO effective Jan. 1, 2014. McIntire, 64, will continue to serve as chairman of the board. The board has appointed Jacqueline Hinman, 52, to serve as CEO also effective Jan. 1, 2014. She most recently served as president, CH2M HILL International and is presently a member of the board of directors. McIntire has been CEO since Jan. 1, 2009.

"Lee's leadership and vision has guided CH2M HILL from 15,000 employees with \$3 billion in annual revenues when he joined the company to a firm with 28,000 employees and \$7 billion of revenue today," said Chad Holliday, lead outside director. "I think this growth to a truly global firm while preserving their

core values is the greatest compliment to Lee's capabilities."

During McIntire's tenure, the company has been recognized by Ethisphere as one of the World's Most Ethical Companies and repeatedly named to the FORTUNE 100 Best Companies to Work For list. "The Board is delighted that Lee will continue as Chairman and will focus on strategic business development and international strategies. The firm stands to benefit from Lee's extensive industry knowledge and global experience," continued Holliday.

Hinman joined the firm in 1988. She has held numerous management positions during her tenure and has been involved as a key executive in many of CH2M HILL's highest profile projects, such as the London 2012 Olympic and Paralympic Games construction program.

Maddock is Five Star's September employee of the month

Shelley Maddock is Five Star's employee of the month for September. Maddock was promoted by Five Star to head cook in April and she has been doing a fantastic job. She makes the best of any situation, is a very hard worker and an excellent cook. Maddock works hard to accommodate the client by cooking up their requests and always goes above and beyond. Five Star has received many compliments about her from clients. She has a positive attitude and is a huge asset to the Five Star team.

Employees of the month are based on client feedback and site visits performed by the operations manager of Five Star Oilfield Services.

Five Star Oilfield Services specializes in providing remote sites with catering and cleaning services, solving the most challenging problems companies face when operating in remote parts of the world and in areas that lack sufficient accommodations.

Trimble receives UAA 2013 Alumni of Distinction Award

Stephen Trimble of URS Corp. was recently honored with the UAA Alumni of Distinction Emerging Leader Award.

UAA describes the nominees as alumni who have made a significant impact on their industry or profession or contributed to the community, and have strived to make a difference in the lives of others.

Trimble has built a career on connecting the dots and bringing people together. He serves as a political appointee on three commissions for the State of Alaska: the Alaska Arctic Policy Commission, Alaska Minerals Commission and the Alaska Emerg-

ing Energy Technology Fund Advisory Committee. He also serves as a trustee for the Nature Conservancy, as chair of the UAA Geological Sciences Advisory Board, co-chair of the UAA College of Arts & Sciences Advisory Board and president of the Gold Cord Development Corp. Trimble is also currently involved in the development of the state's first Arctic policy, advising the governor and the Legislature on ways to mitigate constraints on the development of minerals in the state, advising the state in funding emerging energy technology projects, ensuring the natural wealth and vast landscapes of Alaska remain healthy for future generations and advising the university on strategic matters in the college and department of which he is an alum.

Crowley presents scholarships to maritime cadets

Crowley Maritime Corp. awarded three Thomas B. Crowley Sr. Memorial scholarships to California Maritime Academy students Andrew Leonard, Jeff Harcq and James McSweeney during the 2013 Containerization and Intermodal Institute's Connie Awards dinner in Long Beach, Calif.

Leonard has had a long-time passion of the water and boating, and began researching maritime academies while still in high school. He now serves as the residential assistant for his freshman class, is a member of the Associated Students of the California Maritime Academy and is an active supporter of the greater City of Vallejo, Calif.

When Harcq applied to Cal Maritime, he had already obtained his 50-ton master's license and had more than 10 years experience as a mechanic for the Correct Craft boat dealer in San Diego. As a student, he has fully embraced his role as a valuable mentor for his younger classmates by sharing his real-world experiences in the classroom.

During one of the fishing seasons, McSweeney was approached by a Cal Maritime alumnus who encouraged McSweeney to return to school. After being accepted to the school, he began pursuing his U.S. Coast Guard 3rd Mate Unlimited license and a Bachelor of Science degree in marine transportation.

Crowley Chairman, President and CEO Tom Crowley Jr., established the Thomas B. Crowley Sr. Memorial Scholarship Program in honor of his father, who guided the company to extraordinary heights before passing away in 1994.

Fairweather's Tulugaq launch bolsters data collection

Following the recent acquisition of VDOS, a worldwide leader in airborne remote sensing operations, Fairweather LLC has announced the formation of subsidiary Tulugaq LLC, a partnership between Fairweather, Olgoonik Corp. and Kaktovik Iñupiat Corp. Tulugaq (pronounced "too-lu-gak") is the Native Alaskan word for "raven." The company was formed to provide specialized airborne support to further Fairweather's remote sensing and real-time scientific data collection capabilities, and offer greater efficiency to oil and gas exploration and production efforts through the ability to share assets and programming costs between projects.

Tulugaq's operations are bolstered by the purchase of a new Diamond DA42 optionally manned aircraft outfitted with live streaming high-definition video, infrared and ultra-high resolution digital cameras. Future integration will include the addition of multispectral sensors. Tulugaq is one of the few operators of the DA42 in the U.S. and the only operator in Alaska. Originally designed for government work, the DA42 is designed to collect data in harsh weather and no-light conditions. The aircraft's low profile and quiet operation allows Tulugaq to conduct complex missions without disturbing the Arctic's many species of protected wildlife.

Tulugaq flight operations will be performed by an Alaska team with more than 40,000 hours of flight experience in Alaska and more than 2,000 hours of manned and unmanned flight experience worldwide. For more information visit www.fairweather.com.

ASRC once again tops list of Anchorage businesses

Arctic Slope Regional Corp. said it is pleased to be recognized by the Alaska State Chamber of Commerce, Alaska Business Monthly magazine and local business leaders as the top Alaska-owned and operated corporation. This is the 19th consecutive year that ASRC has ranked No. 1 on the "Top 49ers List,"

based the prior year's gross revenues.

"To top this distinguished list for nearly two decades is truly an honor," said Rex A. Rock Sr., ASRC president and CEO. "We set aggressive goals at the beginning of 2012 that helped us clear some challenging hurdles as they relate to the national economy, and I believe this plan will help ASRC to see continued growth in the future. I certainly would also like to congratulate the other prominent companies on this list as well."

In 2012 ASRC's revenues topped \$2.6 billion, the most ever in the company's 40 year history. ASRC has five major business segments, including petroleum refining and marketing, energy support services, construction, government services and resource development.

COURTESY JENSEN MARITIME

Jensen Maritime awarded contract for Jones Act tankers

Jensen Maritime Consultants, Crowley Maritime Corp.'s Seattle-based naval architecture and marine engineering company, said the company has been awarded a new construction management contract for four new 330,000-barrel, Jones Act product tankers, being built by Aker Philadelphia Shipyard Inc., for Crowley. With construction scheduled to begin in January, Jensen is already establishing on-site offices and personnel at the Philadelphia shipyard to ensure strong working relationships with Aker staff and a seamless construction and delivery program. Delivery of the new veteran class tankers is expected in 2015 and 2016.

The project is the second major construction management project that Jensen has signed since it officially announced the launch of its new, in-house construction management program. The team first managed the construction of two new fireboats for the Port of Long Beach. But long before the program was formally established, Jensen construction management professionals were already at work managing multiple high-profile projects, including the construction and deliveries of all four Crowley high-bollard-pull ocean class tugboats and 17 articulated tugbarges.

Given the growth in Jensen's construction management business, the company has promoted Ray Martus to vice president

COURTESY URS

Mulcahy awarded Anchorage Chamber Gold Pan Award

Pete Mulcahy of URS Corp. was awarded the Anchorage Chamber of Commerce's 2013 Gold Pan Award in the Distinguished Community Service category at the annual event held on Sept. 13 at the Dena'ina Center.

The Anchorage Chamber of Commerce describes nominees for the award as active participants in the community who demonstrate outstanding community service, creativity, and excellence and have significantly improved the city of Anchorage by achieving success in business through growth and quality performance.

Mulcahy has been active in the community since moving to Alaska in 2000. He is involved as a volunteer in many community organizations such as Rotary, Chamber of Commerce and the Chugiak Volunteer Fire Department. In his role as business development manager, he brings his business knowledge to URS by establishing strategies to develop new business and by serving as a key client contact. In his free time, Mulcahy enjoys hiking, biking, kayaking, and snowmachining.

of construction management reporting to Jensen Vice President Johan Sperlberg. Most recently Martus was director, new construction, for Jensen. In his new role, Martus will oversee Jensen's construction management division, which brings together the unique skills of both Crowley and Jensen throughout the entire lifecycle of design and construction.

Vigor unveils names for fab shop and Alaska operations

Vigor Industrial announced that it has renamed two of the

company's subsidiaries. US Fab, Vigor's fabrication and ship-building subsidiary is now Vigor Fab. Alaska Ship and Drydock, which operates the Ketchikan shipyard in Alaska, is now Vigor Alaska.

"It's about better serving our customers," explained Frank Foti, president and CEO of Vigor Industrial. "The new names not only simplify things for customers dealing with Vigor, they better reflect the reality that no matter which subsidiary customers are working with, they can count on Vigor's high level of craftsmanship and customer service."

Vigor Fab and Vigor Alaska join three other subsidiaries under the Vigor name: Vigor Shipyards, which provides repair, maintenance and modernization services to the U.S. Navy and Coast Guard; Vigor Marine, which provides fixed-price ship repair, refit and modernization services to commercial customers; and Vigor Machine, which provides machining work for a variety of industrial applications, including turbines and generators.

The changes apply to the names only and do not alter the operating structures of either subsidiary. The new names go into effect immediately.

CIRI to bring new office tower to former theater site

Cook Inlet Region Inc. has announced the development of the first office tower in what will become the Fireweed Business Center. Once the site of the Fireweed Theater, the now vacant 8.35-acre site at the corner of Fireweed Lane and the New Seward Highway will soon be home to CIRI's corporate offices, as well as upscale commercial office space available for lease.

"CIRI envisions a campus of upscale office buildings at the Fireweed Business Center," said CIRI President and CEO Sophie Minich. "At a time when the Anchorage commercial real estate market is tight, CIRI is prepared to meet the demand with a project that will be as iconic for the community as it is for our company."

CIRI Land Development Co. is leading the project with RIM Architects and Davis Constructors & Engineers Inc. The 110,000-square-foot, eight-story building is being designed with the input of CIRI shareholders and employees to reflect the cultural values of sustainability, diversity and a respect for the land.

Site preparation began earlier in October and construction is scheduled to begin next spring. For more information visit www.FireweedCenter.com.

Crowley establishes SE Alaska management team

Crowley's petroleum distribution group in Alaska has appointed Tom "TC" Craig as general manager, southeast Alaska, and charged him with leadership of a new business group created by the recent acquisitions of local fuel distributors Anderes Oil in Ketchikan and Taku Oil Sales in Juneau. The company has also named Jim Fowler as sales manager, southeast Alaska, and Tom Erickson as operations manager, Southeast Alaska. Both Fowler and Erickson will report to Craig and all three will be based in Ketchikan.

"We are delighted that these individuals from Anderes Oil's management team will now play an integral part in Crowley's

expansion plans in the area," said Bob Cox, vice president, petroleum distribution. "Crowley seeks to leverage our substantial resources to support local fuel sales in Juneau and Ketchikan, continuing the tradition of great service by the Anderes and Taku staff in these communities."

All three men bring a wealth of knowledge and experience to the Crowley team. Craig served Anderes Oil as controller for 13 years where he was responsible for all aspects of financial reporting.

Fowler spent seven years with Anderes Oil as operations manager where he was responsible for sales, marketing and public relations, inventory management and training.

Erickson spent 35 years with Anderes Oil including the last 17 years as plant manager where he provided acquisition support; planning and implementation of plant upgrades and maintenance; facility security and day-to-day management of plant employees.

CH2M HILL Alaska announces VP of construction

CH2M HILL, a global leader in consulting, design, design-build, operations, and program management, announced that Craig Crawford has been hired as the new energy and chemicals vice president of Alaska construction of CH2M HILL Alaska, effective Oct. 15.

Crawford has held a number of positions for the oil and gas industry at the executive level in engineering, construction, advising, finance, as well as operation and maintenance for various companies across the U.S. He previously served as vice president of operations for Texas Gulf Oil and Gas Inc. Crawford also co-founded and served as chief operating officer of Texas Gulf Energy Inc., a startup construction service company focused on the oil and gas industry. With more than 30 years of experience in chemical and petroleum engineering and continued accomplishments on the business side of the industry, he will now focus on providing his leadership and success to CH2M HILL in Alaska.

"Having a leader with a proven track record such as Craig is a welcome addition to the company and will only serve to further strengthen our operations in Alaska," said Terry Bailey, CH2M HILL regional manager of Alaska operations. "This is an exciting time for the company, not only in strengthening our leadership team, but with someone as experienced as Craig on board, we can expect to see great business results and continued client satisfaction in Alaska."

Crowley crew rescues passengers from adrift skiff

The crew of the Crowley Maritime Corp. tug Siku, operating in Western Alaska, recently rescued six men adrift in the Bering Sea. Shortly before the incident, the men's 21-foot, aluminum skiff ran out of gas in Hooper Bay and was being quickly blown out of the bay and into building seas.

Responding to a request by the Coast Guard, the crew of Siku, which was in the area holding for weather, located the skiff, which was drifting about a mile offshore of Hooper Bay despite having its anchor out. Siku Captain Angus Isaac in-

structed the skiff crew to pull up their anchor and ready themselves for a line from the tug. The captain then maneuvered the tug so that the skiff was in the lee to protect it and its passengers from the building wind and seas. The crew then threw a heaving line to the skiff and pulled it alongside the tug allowing the passengers to disembark and board Siku. The tug crew then attached a line to the skiff and towed the stricken boat back into the sheltered waters of Hooper Bay where it was re-filled with gasoline.

"We are proud of the professionalism of Captain Isaac and his crew," said Greg Pavellas, director, marine operations. "Crowley has a longstanding relationship with the people of Alaska and we were happy to put our safety and rescue training to work in order to lend a hand to those men who were in dire need." For more information about Crowley visit www.crowley.com.

Chouest appoints Fox to lead Alaska operations

The Edison Chouest Offshore group of companies has announced the appointment of Rick Fox as senior vice president and general manager of Alaska operations. Fox will be responsible for leading all ECO vessel activities in the Arctic, as well as overseeing the operation of Chouest affiliates Fairweather LLC, Deadhorse Aviation Center, Tulugaq LLC and VDOS LLC.

A cum laude graduate in mathematics from the University of Georgia, Fox joined Shell in 1975. He served as a drilling supervisor from 1979 to 1990, overseeing projects in the Gulf of Mexico, North Atlantic, Brazil, the North Sea and Alaska's Bering, Beaufort and Chukchi seas. Throughout the 1990s, Fox led several highly successful projects in the Gulf of Mexico deepwater frontier and in 2002 he was picked to lead Shell's operations capability strategy. In 2006, Fox was named Alaska asset manager, taking a lead role in Shell's growing exploration and development activities in the Arctic. In 2010, he retired from a 35-year career with Shell and has since served as an adviser to Chouest's Fairweather and Deadhorse Aviation Center operations. Actively involved in his community, Fox serves on the board of United Way of Anchorage and volunteers for Covenant House Alaska and AK Child & Family.

RICK FOX

Crowley donates land to help Nenana Tortella Council

Crowley Maritime Corp.'s petroleum distribution group recently completed the sale of 2.836 acres of unimproved land to Nenana Tortella Council on Aging for a mere \$500. The lot, which has a market value of \$25,000 upon recent appraisal in 2013, will be used by the council as a community match which is required to secure additional funds for a desperately needed

new senior center.

The vacant land is adjacent to the Meda Lords Senior Living Center, owned by the council, and therefore presents a likely fit for the council's expansion plans. The number of citizens in the community has continued to grow while the size of the council's current building has not.

"Crowley has always been a staunch supporter of the community of Nenana, particularly the Nenana seniors," said Vickie Moyle, executive director, Nenana Tortella Council on Aging. "Crowley is one of the few large corporations that strive to have a positive impact in and around the communities in which they do business."

Crowley's Nenana terminal serves as a loading port for barges making fuel and freight deliveries to communities on the upper Yukon River, including company owned tank farms in Fort Yukon and Galena. As many as 12 Crowley staff are employed seasonally operating the terminal under long term lease from the Port of Nenana.

Foss Maritime honored for hurricane relief

A year after Hurricane Sandy struck America's East Coast the federal government has honored Foss Maritime Co. for its part in critical relief work.

Vice Admiral Mark D. Harnitchek, director, Defense Logistics Agency, presented the award to the Seattle-based company during a ceremony at the agency's headquarters, citing its ability to quickly move personnel and equipment to devastated, hard-to-reach locations in New York and the New Jersey shore.

Foss Maritime's John Tirpak was on hand to accept the honor. "Foss is proud to have done its part in Sandy's aftermath," he said. "We were able to respond quickly because of our peoples' unique skills and their on-the-ground experience in disaster areas."

"Foss was contacted during Sandy in part because of the work we'd done in Haiti in partnership with the U.S. government," said Robert Wagoner, who oversaw Foss' role in helping deliver tens of thousands of tons of food to the earthquake-torn country and rebuild the island-nation's main port. "The United States Transportation Command and the Defense Logistics Agency were well aware of Foss' capabilities in the face of a natural disaster."

"When our country calls, Foss stands at the ready," added Tirpak.

Crowley and subsidiary relocate to shared facility

Crowley Maritime Corp.'s solutions group, project logistics and global freight management team, and subsidiary TITAN Salvage have relocated to a shared, custom-designed office and warehouse facility in Houston. The new consolidated location at 15894 Diplomatic Plaza Drive is expected to foster company-wide synergies, expand TITAN and Crowley's customer base and create new business opportunities among the three groups. Together, these businesses, which are founded in engineering, project management and logistics, will ultimately be able to provide better, more value-added customer solutions.

Though its name and core business remains unchanged, TITAN Salvage has relocated its headquarters from Pompano,

Fla., to Houston as a result of the move.

The new facility will feature a state-of-the-art emergency response center, manned 24/7, for TITAN Salvage customers, and will have collaborative work spaces and meeting rooms, as well as a fully functional, secured warehouse and maintenance facility. The office boasts 128,500 total square feet, including 102,500 square feet dedicated to maintenance and warehousing. TITAN and Crowley's project logistics and global freight management team will use the warehouse space to store and stage salvage equipment, inventory ship parts and spares, and handle project cargo for customers. The new facility also offers 4.61 acres of additional paved outside storage and parking.

This shared office and warehouse is at 15894 Diplomatic Plaza Dr., Houston, Texas 77032. The businesses can be reached by calling the following new phone numbers: TITAN Salvage, 832-850-4150; solutions, 832-850-4100; and project logistics and global freight management, 832-850-4000.

ASRC Energy Services promotes Omnik

ASRC Energy Services recently promoted Suege Omnik, PE, to process engineering supervisor for the company's engineering and professional services division. Omnik will manage the process engineering department as well as providing her technical expertise in the construction of new well testing units that are employed by the AES well testing group.

Omnik graduated from Massachusetts Institute of Technology in 2006 with a B.S. in Chemical Engineering. From 2004 to 2006, Omnik interned at AES and began working full time for the company as a process engineer after graduating from college. She is a member of both the American Institute of Chemical Engineers and the Society of Women Engineers.

SUEGE OMNIK

Crowley awards scholarships to four business students

Crowley Maritime Corp. recently awarded \$2,500 Thomas B. Crowley Sr. Memorial Scholarships to four students in the University of Washington's Foster School of Business. The students, Kainan Bell, Vi Nguyen, Giovanna Oseguera Tapia and David Kashubin, were chosen for their academic achievements, excellent scholarship essays and demonstrated financial need.

Bell, a native of Tacoma, Wash., is a junior studying business and social welfare. During his time at the university, he has held internships at KPMG and Boeing, served as a residential advisor and studied abroad in Brazil.

Nguyen is a senior studying international business and marketing. She is pursuing a degree in Norwegian studies and is also president of the custom language track within the Certificate of International Studies in Business program.

Tapia, also a senior, is majoring in business marketing and is currently studying abroad at the University of Sussex, in England. Tapia is a member of the Kappa Alpha Theta sorority and has also been a part of UW's AMA chapter.

Kashubin is a senior marketing major who is also pursuing a minor in psychology. A member of the UW AMA chapter, Kashubin

COURTESY ALASKA CHAMBER

Portman honored with North Star Award

The Resource Development Council's very own Carl Portman was the distinguished recipient of the North Star Award at the Alaska Chamber's 54th Annual Conference, recently held in Fairbanks.

When merited, the Alaska Chamber grants the North Star Award to an individual or organization in Alaska, who through a special project, action, or concern, developed or pursued the endeavor for the betterment of all Alaska residents. These individuals or organizations provide a significant contribution to the future of Alaska.

Portman, a life-long Alaskan, was recognized for his lifetime of service in responsible resource development to support and encourage economic growth in the state of Alaska. His efforts have benefitted not only RDC and all resource development industries, but every Alaskan as well. He has devoted his entire professional career to responsible economic development and environmental protection, working to ensure Alaska's resources are developed in a manner consistent with the state's constitutional mandate of maximum use consistent with the public interest.

enjoys playing football, ice hockey and tennis, and spending time with family.

Crowley scholarships are part of Crowley's lengthy and ongoing commitment to education. next edition will be released in March.

ASRC Energy Services promotes Steve Gasser

ASRC Energy Services Inc. is pleased to announce the promotion of Steve Gasser as the general manager for the company's Fabrication and Construction division. Gasser will be responsible for the day-to-day operations of North Slope construction group, and the Anchorage and Kenai fabrication facilities.

Gasser is a graduate of the Rensselaer Polytechnic Institute where he earned a Master of Science in Engineering Science Management. In addition, he is a certified project management professional with 15 years of project management experience. Prior to his new role, Gasser was manager of projects, engineering manager, and engineering, procurement, fabrication, and construction manager. He has been with AES since 2008.

STEVE GASSER

McGillie joins Global Diving & Salvage Inc.

Global Diving & Salvage Inc. has hired Anita McGillie to lead the Human Resources Group as human resources manager. Based in Global's corporate headquarters in Seattle, Wash., she will direct Global Diving's Human Resources Group in the development of HR policies and compliance, ongoing company-wide recruitment efforts, spearhead the EEO and diversity programs as well as administer Global's employee benefit programs.

McGillie joins Global Diving from the media and commercial printing business and was previously the HR director for a company that had up to 1,100 employees, and operated in five states across the U.S.

"We are very excited to add Anita to the Global family. She brings over 13 years of experience in all phases of Human Resources, including Benefits, Employee Engagement, Management Training, Performance Management, and Policy Development," said Vice President Trinity Ng-Yeung.

Vigor Fab delivers Harley Marine's newest AK barge

Vigor Fab has delivered Harley Marine Services' newest vessel, the 250-foot by 70-foot by 15-foot 8-inch Iliuliuk Bay deck barge. Iliuliuk Bay, an Aleut name meaning big island, was purpose built to enhance quality of service provided to customers living and working in Alaska.

Iliuliuk Bay entered service Nov. 3 in Dutch Harbor.

Her unique design provides a flexible workhorse that can easily switch between containers and other cargo to serve the diverse needs of Harley Marine's customers.

She will transport a wide variety of cargo between Dutch Harbor and neighboring islands.

The barge, designed by Jensen Maritime Consultants and built at Vigor's Swan Island Shipyard in Portland, Ore., houses a Manitowoc 4100 Vicon Series crawler crane, D rings to secure 40-foot ocean containers up to three high and eight lashing bars running fore and aft for other cargo such as heavy construction machinery or general equipment.

per. He studied journalism and public communications at the University of Alaska Anchorage, where he received a Bachelor of Arts degree in 2001, and has a background in print journalism, writing numerous features articles for the Anchorage Press and outside freelance projects.

He currently serves on the board of directors for the School Business Partnership and Identity Inc.

CH2M HILL announces Clemenz promotion

CH2M HILL, a global full-service consulting, design, construction and operations firm, announced as part of its rapidly growing energy and chemicals portfolio the promotion of Bryan Clemenz to vice president of Program and Project Development Alaska, the company's Energy and Chemicals Business Group.

Clemenz has served over 27 years in the petroleum industry and joined CH2M HILL in an engineering leadership capacity in 2007. He maintains his professional engineering registration for both Alaska and South Carolina and has served in various leadership roles throughout his professional career including engineering manager, program manager, and business and project development manager. Currently he serves as president of the International Society of Automation Alaska Section, is an active member of the Government Affairs Industry Relations committee for the Alaska Industry Support Alliance, and serves as vice chair on the University of Alaska Fairbanks College of Engineering and Mining Advisory

and Development Council Action Committee. Clemenz is heavily involved in representing CH2M HILL through participation in professional and community organizations that help train Alaskans and grow Alaska's economy.

"Bryan's understanding of the Alaskan market make him a huge asset to helping our clients develop successful projects," said Craig Pierrotti, CH2M HILL senior vice president of Business Development for the Energy & Chemicals Business Group. "He, along with our CH2M HILL colleagues, are always looking with an eye towards minimizing the total cost of ownership and maximizing value for all stakeholders."

BRYAN CLEMENZ

Global Diving & Salvage announces Grennan as new CEO

After over 30 years as founders and owners of Global Diving & Salvage, Inc., Tim Beaver and John Graham continue to remain excited about the future of the company. They are pleased to announce the newest chapter in Global's history; Devon Grennan, president for the past four years, will now also take on the position of CEO. Beaver and Graham will maintain ownership and continue to serve on the board of directors, but will step down from direct operational involvement.

Grennan began his tenure in 1995 as a marine environmental supervisor moving up the ranks to environmental division manager and by 2005 serving as the general manager. In 2009, Global formed its senior management team and he was moved into the position of president. As CEO/president his newest undertaking is to determine the overall strategic plan for the company and lead the senior management team and the board of directors in Global's mission to provide quality marine service and discover new opportunities to better serve the maritime industry.

"I am very excited to take on this challenge. Global continues to develop new capabilities and uncover opportunities beyond the original vision of the founders," said Grennan. "With the foundation laid these past 30 plus years and the quality and experience of our people, we continue to transition from a traditional commercial diving company into a more well-rounded, marine and subsea service provider. Our four regional locations and diverse service lines allow us to serve an ever-expanding market, both domestically and internationally."

Crowley awarded more CSA awards than any other firm

During the 10th-annual Chamber of Shipping of America awards ceremony held in Washington, D.C., Crowley Maritime Corp. was awarded 100 Certificates of Environmental Achievement for 2013 — more than any other company in the running. The certificates were awarded to Crowley-owned and operated vessels for having worked at least two consecutive years without an environmental incident. Additionally, Crowley was also presented with a membership award in recognition of five years of support to the CSA.

The Environmental Achievement awards are open to all owners and operators of vessels that work on oceans or inland waterways. This year, nearly 1,431 vessels from 76 companies, including Crowley, were recognized. In total, the honored vessels accumulated 10,282 years of safe operations, with a vessel average of 6.9 years. Two hundred and eighty of the vessels have logged more than 10 years each of environmental excellence.

Combined, Crowley's vessels achieved a total of 1,066 years of service without incident. Fifty-three of Crowley's vessels have gone without incident for 10 or more consecutive years, including the following: Saturn, 44 years; Kuparuk River, 43 years; Kavik River, 38 years; Pt. Oliktok and Stalwart, each with 31 years.

Accepting the awards on behalf of Crowley were Mike Golonka, vice president, ship management; Jeff Hoffman, chief engineer, National Glory; Vince Mull, chief engineer, Achievement/650-8; Ralph Elroy, captain, Cape Decision; and Jeff Siefert, chief engineer, Charleston Express. Crowley has been honored with Environmental Achievement Awards each year since at least 2005.

two roundtrip system-wide airline tickets won by Paul Chan; the second prize, \$500 in cash, was won by Darrell Lantz; the third prize, \$400 in cash, was won by Lisa Hodge; the fourth prize, a \$300 gift card to REI, was won by Steve Gerlec; and the fifth prize, two roundtrip tickets to Seward, Alaska, 2013 season Alaska Railroad, was won by Ann Pilch.

Sponsors of the event include Polar Supply Co., Era Alaska, Proactive Diagnostic Solutions, Welltec, Schlumberger and the Alaska Railroad.
